What the "Other Fellow" Is Accomplishing

LANGUAGE STUDY IN CHICAGO.

Lyon & Healy Doing a Big Business With the Courses Directed by the International Correspondence Schools.

(Special to The Talking Machine World.)

L. L. Lewis, representing the International Correspondence Schools of Scranton, Pa., is in charge of a special branch in the retail department of Lyon & Healy's devoted to the exploitation of language teaching through the medium of the talking machine. It is said that so far Lyon & Healy have disposed of over 200 outfits, mostly to the better class of customers, the facilities offered by the talking machine plan for studying at odd hours appealing directly to the busy man of affairs. All told, the International Correspondence Schools have disposed of 20,000 outfits, valued at $1,000,000.

Another story of a "dealer who has tried it." And a prominent firm in Atlanta is going to open a regular school of language study with the aid of our phonograph system. They are waking up all along the line to the possibilities of the language feature of the business. How about **YOU?** Do you realize what I. C. S. Language Outfits will do for **YOUR** business? Do you know that with these outfits you can reach a class of trade that would not think of using a phonograph for ordinary purposes, that you can reach those people who have become tired of their phonographs as an amusement fad, and that you can quickly interest your regular customers in this **PROFITABLE** use for the phonograph? "Dealers who have tried it" have increased their business from 10 to 30 per cent. and more. Don't be slow. Get into the game and get **YOUR** share of this trade. Write **TODAY** for further particulars.

READY FOR THE HOLIDAYS?

So smoothly do the orders come in and the Phonographs and Records go out that it is difficult to realize that the volume of business being done by this company is nearly fifty per cent. greater than it was a year ago at this time, when we were way behind on orders and the entire trade was clamoring for goods. The orders for machines have been running ahead of the output for several weeks but no one has yet been seriously inconvenienced. The Record situation is in good shape. Running the factory at its full capacity right through the summer and increased factory room are the two important reasons for the present condition of affairs.

With the approach of the holiday season we would urge Dealers and Jobbers to see that their stock of machines and Records is adequate to meet the demand. Bear in mind that as the weeks go on it will be a little more difficult for Jobbers to get quick shipments from us and for Dealers to get their orders promptly filled by Jobbers. It is, therefore, advisable to order somewhat farther in advance than usual.

It would seem as if the demand for Edison Phonographs and Records would be greater than ever during the holiday season this year. The interest of the public in "canned music" continues to grow in spite of Mr. Sousa's denouncement, and with our country's present great prosperity more Phonographs than ever should be sold.

Don't forget the trouble you had a year ago in getting machines and Records. Remember the sales you lost because you did not have the goods in stock. Don't get caught in the same straits again. Add fifty per cent. to the sales you made in November and December of last year and stock up accordingly. What if you don't sell out? The stock is as salable as flour and last January the business was fully as good as in December.

THE ADVANCE LIST OF JANUARY RECORDS APPEARS ON PAGE 2.

NEW EDISON GOLD MOULDED RECORDS.
ADVANCE LIST FOR JANUARY, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **December 27th**, all things being favorable, but they **must not be placed on sale by Jobbers or leave their places of business, or be re-shipped to Dealers before S. A. M. on December 27th.** Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after December 20th, but must not be circulated among the public before **December 27th.** Jobbers are required to place orders for January Records on or before **November 10th.** Dealers should place December orders with Jobbers before **November 10th** to insure prompt and complete shipment when Jobbers' stock is received.

9434 The Mouse and the Clock (*Whitney*) *Listen to the mouse* Edison Concert Band
9435 Just Because (*Burleigh*) Harry Anthony
A fine sentimental ballad beautifully rendered
9436 Gwendolyn (*Hein*) *Comic song hit from Marie Cahill's "Marrying Mary"* Ada Jones
9437 Believe Me, If All Those Endearing Young Charms (*Stevenson-Benzler*) Albert Benzler
Another piano solo—it's a transcription, same as "Violets"
9438 When the Flowers Bloom in Springtime (*Von Tilzer*) Harry MacDonough
A new song. It will be a big success
9439 Tramp! Tramp! Tramp! (*Root*) Harlan and Stanley
A male duet. You can hear "The Boys are Marching" too
9440 I'm Getting Ready for My Mother-in-law (*Norworth*) Bob Roberts
A comic song on a familiar theme
9441 Colonial Guard March (*Bonk*) *A catchy military march* Edison Military Band
9442 Moses Andrew Jackson Good-bye (*Snyder*) Arthur Collins
A new coon song in which, to employ a popular expression, Master M. A. J's better half "hands him a lemon"
9443 It is Well With My Soul (*Bliss*) Edison Mixed Quartette
Sacred quartette by mixed voices
9444 Seems to Me I've Always Loved You (*Ball*) Irving Gillette
A beautiful song. The same composer wrote "Will You Love Me in December as You Do in May"
9445 Hermosillo (*Schuh*) *A characteristic Mexican dance* Edison Symphony Orchestra
9446 Why Can't a Girl Be a Soldier? (*Halle*) W. H. Thompson
The song puts up a good argument in the affirmative
9447 Arrah Wanna (*Morse*) *An Irish-Indian matrimonial venture* Collins and Harlan
9448 Spring-Tide Revels (*Harper*) Mrs. Alice Shaw and Twin Daughters
A whistling trio novelty
9449 Ballet Music from William Tell (*Rossini*) Edison Concert Band
It's the prettiest part of this celebrated ballet music
9450 The Bird on Nellie's Hat (*Solman*) *A new comic song* Helen Trix
9451 When "Tommy Atkins" Marries "Dolly Gray" (*Cobb and Edwards*) Billy Murray
The "Hands Across the Sea" song feature from Lew Fields' "About Town"
9452 I Love the Last One Best of All (*Hein*) Frank C. Stanley
One of the most talked of songs in Marie Cahill's "Marrying Mary"
9453 March "Jest" (*Blum*) Albert Benzler
A xylophone solo that merits fully the highest praise
9454 Bonnie Jean (*Snyder*) Byron G. Harlan
A brand new march song in which "Annie Laurie" is effectively introduced
9455 Jealous Julie (*Original*) Ada Jones and Len Spencer
Another refreshing coon vaudeville sketch. Miss Jones sing the new coon song "Jealous" by P. J. Brown
9456 When Daddy Sings the Little Ones to Sleep (*Vogel*) Edison Male Quartette
Introduces the well known lullaby "Hush! hush my babe, lie still and slumber, holy angels guard thy sleep," unaccompanied
9457 On the Rocky Road to Dublin (*Ephraim*) Edison Military Band
A bright Irish intermezzo

Edison Gold Moulded Records are made only in Standard Size. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

GIVE PHONOGRAPH CONCERTS.

One of the most effective methods of advertising and selling Records by Dealers is to give public concerts once or twice each month. It is advisable to give two concerts, one upon the arrival of the new Records and the second about two weeks later. A formal invitation should be sent out in each instance. A few days before the arrival of the new Records a printed invitation should be sent to each Phonograph owner known to the Dealer, asking him or her to hear the latest additions to the Edison list. The invitation should state the hours of the concert and make it clear that during its progress no goods would be sold and no one solicited to buy. Copies of the *Phonogram*, containing brief descriptions of the new Records, make excellent programmes. After the new Records have been played over the guests should be asked to name selections they would like played. The second concert should be for the benefit of those not owning Phonographs and here again it should be clearly stated that no goods would be sold during the evening. At this concert the Dealer should make a little talk on the merits of the Phonograph as an amusement maker. Pains should be taken to make these concerts popular as possible. Don't let your guests think you too eager to sell them. Don't be discouraged if a man or woman comes again and again without buying. The fact that they continue to come shows that they are interested and sooner or later they will succumb to the charms of the Phonograph. Check those who attend with your invitation list and try other means to get the missing ones to come next time. There is no Dealer's town so small that it will not yield good results from giving concerts, especially if continued long enough to make them looked forward to as events of interest. If a Dealer happens to be an advertiser in the local newspaper it will lend him excellent assistance in giving his concerts publicity.

FACTORY BUILDING PROGRESS.

Splendid progress has been made during the past month on the work of erecting the new concrete buildings at the factory of the National Phonograph Co. Every effort is being made to get the buildings up and enclosed before freezing weather sets in. To this end all the work is concentrated on three buildings, namely the new Record building, the addition to building No. 17, which connects with the addition to No. 18, and the gas making plant. As many men are employed on each as possible without getting in their own way. The five stories of the Record building are completed and the roof is nearly finished, only the parapet walls remaining to be done. The side walls are being put in. The windows are in on the second and third floors, completely enclosing these floors. The supporting construction of three floors of the addition to No. 17 is completed and the side walls are being put in at the same time. The gas making plant is completely enclosed. Another month will see the work on all of the buildings advanced to a stage that cannot be affected by freezing weather.

The buildings already completed, including the burnishing department, the wax department extension and the five-story addition to No. 18, are almost entirely occupied. The added room is materially increasing our facilities for turning out machines, the new floors being occupied by departments that have long been crowded.

H. J. Moyer, the engineer in charge of the construction of these concrete buildings, is establishing a record with them that will make him one of the foremost men in his line in the country. He is not only demonstrating that great factory buildings can be erected with almost unprecedented rapidity, but he is almost daily solving heretofore unknown problems in concrete construction. These buildings to-day represent the most advanced efforts in reinforced concrete work. Their construction is already bringing engineers from all parts of the country. Perhaps the most striking feature about the work is the small number of skilled mechanics required to do it. Our own buildings are being erected by our own force of workmen, under the personal direction of Mr. Moyer.

SETTING A GOOD EXAMPLE.

The following letter from Koehler & Hinrichs, Edison Jobbers at St. Paul, Minn., is representative of how the trade as a whole view our exchange proposition:

We received your circular letter in regard to allowing Dealers to exchange or send back to you Records that were cut out, over stock, etc., and can say if the writer was in your city he would like to take you by the hand and tell you that you are the right sort of people.

While we have nothing particular to send back ourselves, excepting the Mexican Records, which we wrote you about a short time ago, at the same time it is a grand thing for those who have a big stock of cut out Records, surplus, etc., on hand so that they can have an opportunity to clean up.

You certainly are setting an example for other manufacturers to follow and deserve every success. This little act on your part is going to do very much towards getting all Dealers to push hard on Edison goods.

ABOUT SPECIAL OUTFITS.

The attention of our Legal Department was recently called to the advertisement of a Southern Jobber, in which the latter had inadvertently failed to give prices of several accessories when included in a special outfit at a given sum. Since this is a feature of selling Edison goods not understood by all Dealers, we print the letter of our Legal Department in full, as follows:

"Your letter of the 15th instant has been called to the attention of this department; and we wish to direct your attention to Section 2 of the Jobber's Agreement, and particularly to the following:

"When other goods are included with an Edison Phonograph or Records and are advertised or sold as an outfit at a special or fixed price, the price of the Phonographs or Records, or both, size of each and every component part included in such outfit, must be given and not be the same whether included in an outfit or sold separately."

"In your description of the Gem, Standard, Home and Triumph outfits, you omit to specify the prices at which the flower horn and crane are included in the outfit. We must insist that this must be done in all cases; but if you have a catalogue or price list of your own in which the prices of the horns and cranes included in the several outfits are specified, and if you will refer the reader to such catalogue or price list, there will be no objection to your advertisement as it now stands.

"The object of the requirement to specify the price of each article included in the outfit is to show that the extra articles are included at the same prices at which such articles are sold separately. Therefore, if under each outfit you refer to a special catalogue which gives the prices of these articles, this object would be carried out, since the trade and the public will be in position to ascertain at what prices the extra articles are included."

FALL AND WINTER ADVERTISING.

The copy of our full page advertisement in November magazines, printed on page 21, is the first of a series that will appear in magazines and newspapers for the next six months. The style of the series is wholly unlike any other talking machine advertising now before the public. No matter what the first impressions of the critical may be, we believe that before the series is half completed it will be recognized as advertising of unusual merit and value. We believe that it is going to be of great benefit to the trade in all parts of the country, for where the magazines do not reach the newspapers will. We have made contracts to have these advertisements appear in one or more newspapers in every jobbing city for several months. This advertising will be entirely general. No firm, no matter what its volume of business may be, will be permitted to appropriate its benefits by having its name appear in the copy. All Edison Dealers, great and small, will share in its benefits. Dealers themselves, however, can get the maximum amount of good from it by doing some advertising on their own account and otherwise letting the local public know that they have the goods, for which we are creating the demand. Edison goods sell readily and easily, but they will sell even better if the local Dealers will do their part.

RECORD RETURN PROPOSITION.

The Record exchange proposition in effect in this country from October 1st to 6th has been universally proclaimed by the trade to be the most satisfactory of any ever promulgated by this company. The conditions imposed were all that could be expected. They were easily understood, and compared to the large number of shipments the friction and errors were of no consequence. The number of cut out, surplus and defective Records returned by many Dealers was surprisingly small for each. The aggregate, however, has given the specially created "Exchange Department" at Orange a most busy month. Probably two-thirds of our 9,000 Dealers took advantage of the exchange proposition and made shipments to Orange. All of these arrived by freight within two weeks. With the arrival of the first shipment a score or more of trucks and wagons were put into commission. Yet at one time fourteen carloads stood on the siding awaiting the trucks and wagons. For a time the local freight officials were literally "up in the air." At the factory the "Exchange Department" worked like beavers, checking the cases, getting them opened, taking the Records out of the cartons, inspecting them and filling in the necessary blanks. It is difficult to imagine in advance the magnitude of a task of this kind. It is practically over now, and since the trade is so well satisfied we are greatly pleased.

An exchange proposition like this gives a new impetus to the Record business. It gives every Dealer an opportunity to return all his unsalable stock and put in a supply of newer and more up-to-date selections, for which there is a greater demand.

A Record exchange proposition, similar to the above, will go into effect in Canada from November 1st to 6th. Its general conditions will be the same as the United States arrangement, except that the Records must be returned to R. S. Williams & Sons' Co., Ltd., 143 Yonge street, Toronto, Canada, and not to Orange. Printed matter explaining the matter fully was mailed to all Canadian Dealers on October 24th.

Be sure that your holiday stock is complete.

PRINTED MATTER.

A Jobber suggests that we point out to Dealers that numerical catalogues should not be used as copy when ordering a supply of Records. Numerical catalogues are issued for store use only and, as Jobbers are held down in the quantity shipped to them, it is not always an easy matter for them to supply extra copies. The Record order sheets, printed especially for the purpose, are much more convenient for ordering Records. Jobbers will supply them as needed.

A new edition of the Foreign Record Catalogue, Form No. 990, has been printed and is now being supplied on all orders received from the trade. Copies are not being mailed, for with the exception of the addition of the six new Hebrew selections and the omission of a few cut out selections it does not differ from the last edition. The difference is not sufficient to warrant those having a supply of the last edition on hand throwing them away and getting a new lot.

We are mailing to the entire trade a sample copy of a four-page folder printed especially for use at the holiday season. It is printed in two colors. On the first page is Santa Claus, with his reindeer team, flying over the housetops. The most conspicuous article in his sleigh-load is an Edison Phonograph. On the following pages, under the caption of "A Gift Worth While," is an argument on the merits of an Edison Phonograph as a Christmas present. In order that these folders may be in the hands of Jobbers in ample time to redistribute them, we are sending a quantity to each Jobber without waiting for his order. In some cases these may be shipped with the December Record printed matter, but they may be put in circulation as soon as received.

Owing to a delay in printing the new edition of our Record Catalogue No. 1000, we shall be compelled to continue to fill orders with the present edition No. 940 for about two weeks longer. Those who have been waiting for the new issue should order small quantities of the present edition to tide them over until No. 1000 comes out.

AMONG THE JOBBERS.

E. F. Ball, of the Ball-Pintee Co., Edison Jobbers at Newark, O., recently made a sworn statement that the company had in stock over 163,000 records. The company contemplate carrying in stock over 200,000 records during the winter, as large shipments are already being received.

The Western Talking Machine Co., Philadelphia, have removed to 41 and 43 No. 9th street.

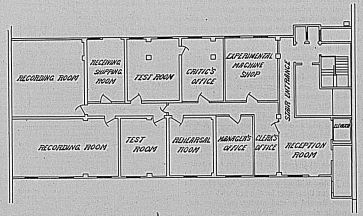
SUPPLEMENT NO. 4 GRAND OPERA RECORDS.

A supply of supplements for List No. 4 of the Edison Grand Opera Records, together with the Records themselves, are in the hands of all Jobbers in the United States and Canada. Many Dealers have put in a stock of these Records and are meeting with much success in selling them to high class musical trade. All other Dealers should follow their example. They should make up a mailing list of the best people in their towns and send a Grand Opera supplement to each, putting in one or more of each Grand Opera Record to meet the demand. No one expects the sale of these Records to approach the sale of regular Records, but every Dealer should carry them in stock and constantly use them to gain the interest of those of good musical tastes. Following is a reprint of supplement No. 4:

B. 31—Aria, "Durch die Wälder" ("Thro' the Forests") "Der Freischutz".....*Weber*
By Alois Burgstaller, Tenor.
Sung in German, Orchestra accompaniment
B. 32—Serenata, "Canzonetta, L'Ammiano's Air"
"Child".....*Verdi*
By Antonio Scotti, Baritone.
Sung in Italian, Orchestra accompaniment
B. 33—Italian Scene, "Each Listen" ("Ye Heroes") "Lohengrin".....*Wagner*
By Emil Fischer, Bass-Baritone.
Sung in German, Orchestra accompaniment
B. 34—Aria, "Ah Forse, Lui" ("Alone in the World") "Il Trovatore".....*Verdi*
By Susan Rahn, Tenor.
Sung in Italian, Orchestra accompaniment
B. 35—El mar amo Aparo, ("The Sea With Love I Adore") "Lucrezia Borgia".....*Donezio*
By Gustave Bell Kenny, Baritone.
Sung in Italian, Orchestra accompaniment
B. 36—Lohengrin's Alsobied, ("Lohengrin's Farewell") "Lohengrin".....*Wagner*
By Antonio Scotti, Tenor.
Sung in German, Orchestra accompaniment
B. 37—Love Song, "Love's Rose" ("I Send You Dear Rose") "Rigoletto".....*Verdi*
By Miss Bessie Abbott, Soprano.
Sung in Italian, Orchestra accompaniment
B. 38—Love Song, "Walther's Prize Song" ("Love Song") "Walther".....*Wagner*
By Herbert Knote, Tenor.
Sung in German, Orchestra accompaniment
B. 39—Duo de Stephanie, (Stephanie's Air)
"Gentle Maid".....*Gounod*
By Marie Jacoby, Contralto.
Sung in French, Orchestra accompaniment
B. 40—Del mio bottesi Sorelli," ("Farewell and Wild My Dreams of Youth")
"La Traviata".....*Verdi*
By Francisco Constantino, Tenor.
Sung in Italian, Orchestra accompaniment

George B. Dillon, Edison Dealer at McArthur, O., prints the following at the top of his letterheads:

Dear Friend:—The clear, rich tone of a good Phonograph or talking machine in your home will be a source of never-failing and never-tiring pleasure. At a small cost you can hear songs or marches, classical or rag-time, band or orchestra music, rendered by the trained and skilled musicians of the world. These charming entertainers will take you to the wharf at Memphis,—you can hear the bells and escaping steam of the river boat, while the deck-hands sing, "Nigger Loves His Possum." In the old church house (so dear to grandpa) a trained quartette is singing, "When the Roll is Called Up Yonder I'll be There." Can you afford to go through life without the melody of song?



OUR NEW YORK RECORDING PLANT.

Seventeen stories above the ground, on the top of the Knickerbocker building, at the corner of Fifth avenue and 16th street, New York, stands the new Recording Department of the National Phonograph Co. We believe that it is beyond a doubt the finest and most completely equipped recording plant in the world. It was built especially for the uses of our department. It comprises a suite of ten rooms, each arranged for some special feature of the department's work. The arrangement of the rooms is shown by the accompanying diagram. Entering by the elevator or staircase, the visitor finds himself in a handsomely furnished reception-room. It is finished in hard woods. Expensive rugs cover the floor and interesting pictures hang on the walls. One of the latter is a mammoth frame containing the photographs of all the Edison talent. Having stated our business to the clerk on duty in the reception-room, we are allowed to enter the sacred and somewhat mysterious precincts. Here the first operations of making "canned music," so objectionable to Mr. Sousa, are carried on. The first door on the left opens into the private office of Walter H. Miller, manager of the department. Mr. Miller entered the employ of Mr. Edison when the latter built his laboratory at Orange, nearly twenty years ago. He has since been continuously in the service. He has taken part in all of the important experimental work in record making at the Edison Laboratory. Few men in the harness to-day have had as many years experience in record making as he and none in the entire world are better informed on the subject. Mr. Miller's work and experiences would make a most interesting volume. He is the only manager that our Recording Department has ever had. The present high standard of Edison Gold Moulded Records shows how successful he has been.

Mr. Miller is at his desk as we enter. As he greets us with a pleasant smile and cordial handshake we cannot fail to observe his quiet, unassuming manner. Knowing what he has accomplished in his unique vocation, we are impressed by his modesty. Rugs, mission furniture, a handsome desk and more pictures of special interest comprise the room's fittings. Except for a recorder or two on his desk it might be the office of a broker or any professional man.

Passing along the corridor the next door on the left opens into the rehearsal room. Here the regular Edison artists "run over" their music with a pianist if they feel uncertain about being prepared for their work with the orchestra accompaniment. Here, too, the new vocalists get their first "try-out." Here they are given an opportunity to join the ranks of the men and women who by means of the Phonograph have become known in the most remote corners of the globe.

Beyond the rehearsal room is one of the test rooms. This in turn adjoins the largest of the two recording rooms. It is the recording-room used for band, orchestra and other instrumental work. This recording-room is equipped with devices, hangings, etc., that remind one of the rear of a theatre stage. The Edison Military Band is making a Record as we enter. The day is warm and the work is arduous and unromantic. Sans coats and vests the men are quite prosaic in appearance. But how they can play. It is evident that a dress suit and a diamond bedecked shirt front are not necessary to musical ability. When the recorder reaches the end of the

ARRANGEMENT OF THE ROOMS.

VIEWS IN NEW YORK RECORDING PLANT.

1. Reception-room. 2. Manager Miller at His Desk. 3. Mr. Cronkhite's Private Office. 4. The Rehearsal Room. 5. Mr. Benedict at the Piano. 6. Making a Band Record. 7. Making a Vocal Record with Orchestra Accompaniment. 8. Listening for Defects. 9. Making a Singing Record with Piano Accompaniment.

Record the hand stops. The Record is removed and carried by an assistant back to the test room. A Triumph Phonograph stands on a table at one end of the room. The horn faces several men sitting on the opposite side. These are W. H. A. Cronkhite and his assistants. Their function is to pass judgment upon the work of all Edison artists. Mr. Cronkhite is the official critic of the department. Since he entered the employ of the company nearly five years ago no master record has been turned over to the manufacturing department that has not first had his seal of approval. Mr. Cronkhite is a trained musician, a correct player of no mean ability, and he possesses a well rounded, varied musical knowledge that makes him invaluable in his position. He has had a most interesting theatrical experience, which must, however, be the subject of another story some time later. Mr. Cronkhite's demeanor is no more assuming than that of his chief and it is not easy to get him to talk about himself and his experiences.

As the wax master record is played over all present listen intently and critically. Defects are pointed out and suggestions made. It may be too loud or too weak as a whole. One instrument may be too strong or the balance may be off. Or it may have any one of a dozen other defects. Back to the recording-room go the men. The errors are explained to the band, individually or as a whole, and another record is made. Another test, and more criticisms and suggestions. Back and forth go the wax masters until the right results are secured. Then the required number of masters are made for the factory. It's no easy task to make master records up to the Edison standard; records that must first be played at the Edison Laboratory before a committee of twenty men, most of whom have devoted years to the mastery of record making problems of all kinds. This committee test is also another story.

Diagonally across the hall is another and somewhat smaller recording room. This is used for vocal work. It also has its own peculiar equipment of traps and things that look odd to the uninitiated. A partition runs across one corner. A recording horn projects through a curtained opening in this partition. The artists see only this horn into which they sing. The Phonograph attached to the horn stands back of the partition. How it is equipped and how it does its work are department secrets that even the artists are not permitted to know.

Adjoining this recording-room as we work back toward the entrance is the receiving and shipping room. Its name tells its function. Then another testing room. Circumstances occasionally make it necessary to have two "dates" at the same time. Therefore the reason for two recording rooms and two test rooms. When two "dates" are on at the same time Mr. Cronkhite and his people have a strenuous day.

The next room toward the entrance is Mr. Cronkhite's private office, quietly but handsomely furnished. A feature of this room is a cabinet containing the music of nearly every record in the Edison catalogue. The remaining room of the suite is the experimental machine shop, with lathes and other machinery, microscopes and a lot of other paraphernalia only to be found in a department of this peculiar character.

Our Recording Department came into an official existence shortly after the incorporation of the National Phonograph Co. For several years its work was conducted at the Edison factories in Orange. This was eventually found inconvenient for the "talent" and three years ago the top floor of 65-69 Fourth avenue was leased and fitted up for the work of the department. These quarters proved inadequate to meet the demands of our rapidly growing business and some months ago the department moved to its present location.

WHY SOME DEALERS CANNOT SELL.

A successful jobber in talking machines recently made a tour among the retail trade incognito, to study the methods employed in making sales, and details his general impressions thus: "There are a number of dealers scattered throughout this part of the country who have not the slightest idea of how to sell talking machines or records against keen competition. They seem to leave an idea that the mechanism of all machines is much the same, and that the name on their goods is its chief selling merit. The consequence is that they lose many good sales to the other fellow who has familiarized himself with what may be termed the talking points of the machine in his stock. He will dilate on the springs in the motor, the ease of regulating speed and many minor technicalities, all of which will convince the customer that he is dealing with a man who has made a study of all machines, and carries in stock what he believes to be the best. Another point I scored against the first mentioned class of dealers is that they show their low-priced machines first. This is a poor policy. They should reverse the process, as it is far easier to come down than go up a bit of prices. A customer who has heard the best machine-is never satisfied with a cheap one, and will almost invariably compromise between the machine he intended buying and the one he would buy if he could. This is human nature. Another bad feature in some of the stores is the employment of ignorant salesmen to play records. In the heart of this city I had an amusing experience recently. A young man of perhaps eighteen was showing records, and among them was the 'Ave Maria.' 'What is singing that?' asked the customer. 'Miss Gounod,' he replied. 'And who is it by?' asked his patron with a smile. The young man looked at it hastily and answered, 'Mr. Sembrich.' Such ignorance is inexcusable, and unless the customer had a keen sense of humor, would result in the loss of future sales. Dealers and salesmen cannot become too familiar with their line, and if they are wise, will carefully study the line of their opponent so as to be able to intelligently answer any question put to them. The successful men in the trade I found to be those who have studied out every detail of the business, and such men always receive the backing of their jobbers."—*Talking Machine World.*

GRAND OPERA RECORDS.

Now and then Dealers will come across a would-be customer whom they find is a very difficult one to please with Records. He doesn't care for comic songs; band pieces and marches have little interest for him; duets and quartettes do not appeal to him; in fact, perhaps the only thing which seems to please him is the operatic selections played by the Edison Concert Band. This is the customer to whom you can very well offer the Edison Grand Opera Records. If you have a few in stock we should certainly advise you to play them over to him, pointing out the magnificent way in which they reproduce and, as a final argument, the exceptionally low price. If this customer is one who appreciates good music and especially grand opera, as sung by some of the world's most renowned artistes, he is practically certain to take away with him a few of these Records. Of course, this kind of customer is not the only one who will buy Edison Grand Opera Records—not by a long way. The great majority of Edison Phonograph owners should certainly have two or three of these Records, and you can often induce a customer to purchase them by pointing out that even if he does not care for such music himself, there is doubtless someone at home or among his friends who will certainly appreciate listening to them.

NO LONGER A SIDE LINE.

G. M. Nisbett, manager of the Edison wholesale department of Babson Bros., at 304 Wabash avenue, Chicago, and formerly Western Manager for the National Phonograph Co., recently made a business trip through Wisconsin. He found the dealers already enjoying a fine fall trade, and looking forward to a record breaking holiday business. "One thing that impresses me forcibly in viewing the trade situation," said Mr. Nisbett in a trade paper interview, "is the fact that the Phonograph is rapidly graduating from the side line class even in the country. For instance, I had four Edison Dealers call on me to-day. They were all from small Wisconsin towns, and three of them were exclusive talking machine dealers. The third is a jeweler, but his talking machine trade is rapidly forming a very vital factor in his business. While perhaps not in the proportion indicated by my visitors, this tendency is growing very rapidly, and it speaks volumes for the progress of the business."

According to the London edition of the EDISON PHONOGRAPH MONTHLY, Dr. Page Robertson, of 2 Cathedral street, Glasgow, Scotland, has a collection of 3,834 Records and it quotes Dr. Robertson as saying that he has a special weakness for Edison Gold Moulded Records.

PUBLISHERS OF MUSIC IN JANUARY, 1907, LIST.

The publishers of the compositions made for our January list of Records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers:

9434 The Moose and the Clock—M. Witmark & Sons, New York.
9435 Just Because—William Maxwell Music Co., New York.
9436 Queendolyn—Jos. W. Stern & Co., New York.
9438 Hiawatha—Jerome H. Remick & Co., Detroit.
9439 I'm Getting Ready for My Mother-in-Law—York Music Co., New York.
9441 Colonial Guard March—E. Ruffler, New York.
9442 Sleepy Mariner Jackson, Good-bye—F. A. Mills, New York.
9444 Seems to Me I've Always Loved You—M. Witmark & Sons, New York.
9445 Hercsello—Thos. Goggan & Bro., Galveston, Texas.
9446 Why Can't a Girl Be a Soldier—Jos. W. Stern & Co., New York.
9447 Arab Wanns—F. B. Haviland Pub. Co., New York.
9448 Spring-Tide Revels—Metzler & Co., London, England.
9449 Bell Music from William Tell—John Church Co., New York.
9450 The Bird on Nellie's Hat—Jos. W. Stern & Co., New York.
9451 When "Tommy Atkins" Marries "Dolly Gray" —Lin Edwards Music Pub. Co., New York.
9452 I Love a Lassie That's East of All—Jos. W. Stern & Co., New York.
9453 Joseph Jones—Vandersloot Music Co., Williamsport, Pa.
9454 Bonnie Jane—F. A. Mills, New York.
9457 On the Rocky Road to Dublin—M. Witmark & Sons, New York.

THE PHONOGRAPH AMONGST THE ESQUIMAUX.

When Commander Peary, the celebrated Arctic explorer, went on his last journey to the Arctic regions he took with him an Edison Phonograph and he also took his little daughter, who had been born in the Arctic regions on a previous journey. She was christened "Marie Ah-mi-glit-to," which is Esquimaux for "Snow Baby." She is now nine years of age, but when she returned from her last journey she published a book called "The Children of the Arctic," by "The Snow Baby and her mother," and it is really a collection of letters and portions of a diary of the Snow Baby, edited by Mrs. Peary. In it she tells us how her father made the Esquimaux women sing into the Phonograph and then made the Phonograph sing their song to them. "You ought to have seen them laugh," she says. Commander Peary, however, is not the only Arctic explorer to take the Phonograph to amuse himself and his fellow explorers during the long Arctic nights, for Captain Bernier, the head of an expedition sent out by the Canadian Government, took an Edison Phonograph, a lot of Records and a quantity of blanks. The Records to amuse them during the long nights, and the blanks to make many interesting new ones.

EDISON GOLD MOULDED RECORDS FOR JANUARY, 1907.

Perhaps the most interesting feature of the first list of Edison Gold Moulded Records for 1907 is the piano solo, No. 9437, "Believe Me, If All Those Endearing Young Charms," by Albert Benzler. Like our other piano solo, "Violetas," it is a transcription. In other words, the music has been re-written so as to make it suitable for a piano rendition. We believe that this is the best piano Record ever made. It shows that our Recording Department is overcoming some of the difficulties of making good piano Records. It will be a very popular selection. Another novelty is No. 9428, "Spring-Tide Revels," a whistling Record by Mrs. Alice Shaw and her twin daughters. These artistes are the most famous whistlers and imitators on the American stage. Their first selection will please all who hear it. Harlan and Stanley have another of their popular series of old time war songs in No. 9439, "Tramp! Tramp! Tramp!". The others on the list are full of variety and interest. All are made in the most up-to-date manner.

No. 9434, "The Mouse and the Clock," by the Edison Concert Band, is a descriptive number in which a variety of effects are introduced. They include the squeal of a mouse, which is very well recorded; the clock striking, the cuckoo clock, sounding of clock, clock ticking, chimes, clock out of order and final break down. This composition was written by Howard Whitney, composer of "Mosquito Parade," which was a big Record hit.

No. 9435, "Just Because," by Harry Anthony, is a ballad of the higher grade, the music and words being by H. T. Burleigh. The words are above the average of sentimental ballads. Made with orchestra accompaniment. The chorus:

Just because I love her dearly,
Just because she loveth me,
Just because I love to love her,
And she's all the world to me.

No. 9436, "Gwendolyn," by Ada Jones, is another one of the song hits in Marie Cahill's "Marrying Mary." Gwendolyn was a clerk behind the ribbon counter in a downtown store and she had talents to burn. She played the mandolin and guitar. Upon going home at night she practiced until daylight next morning, to the great dismay of the neighbors. The song tells how she played and what the neighbors said and did. Miss Jones is as clever as usual in rendering this song. The music is by Silvio Hein and the words by Benj. Hapgood Burt. The Record is made with orchestra accompaniment.

No. 9437, "Believe Me, If All Those Endearing Young Charms," by Albert Benzler, is a piano Record that will be greeted with many expressions of satisfaction by Phonograph owners everywhere. Ever since we put out the transcription of "Violets" (our Record No. 8393), we have had hundreds of calls for more piano solos. We are learning more about piano recording than we once knew and have no hesitancy in claiming that this is the best piano Record ever put on the market. Like "Violets," it is transcription and in its re-written form is admirably suited to the piano. Mr. Benzler is quite as much of an artist on the piano as he is on the xylophone and bells, and gives a splendid rendition of this well known ballad by Sir John Stevenson.

No. 9438, "When the Flowers Bloom in Springtime," by Harry MacDonough, is a sentimental ballad by Harry Von Tilzer (music) and Andrew B. Sterling (words) and sung with orchestra accompaniment. The chorus is fully descriptive of the song:

When the flowers bloom in spring time, Molly, bye and bye,
We'll be roaming in the glooming 'neath a summer sky.
Down in clover land we'll wander, we'll be happy don't you fear,
When the flowers bloom in spring time, in the spring time, dear.

No. 9439, "Tramp! Tramp! Tramp!" by Harlan and Stanley, is another addition to the war-time Records by these well known artists. There are probably no more popular Edison Records than No. 8606, "Marching Through Georgia," and No. 8805, "Battle Cry of Freedom," both made by Harlan and Stanley. There is something about these old time war songs that has given them undying popularity. Our Record of "Tramp! Tramp! Tramp!" contains drum corps and other descriptive effects and a ringing chorus at the close. The Record is made with orchestra accompaniment. The music and words of this song are by George F. Root.

No. 9440, "I'm Getting Ready for My Mother-in-Law," by Bob Roberts, is a most laughable description of the way a married man got ready to greet the coming of his mother-in-law for a visit of six months or longer. It is worth the price of several Records to hear Mr. Roberts sing it. The Record includes three verses and three choruses. It is made with orchestra accompaniment. The music and words are by Jack Norworth.

No. 9441, "Colonial Guard March," by the Edison Military Band, is a catchy military march by Valentine J. Rose. The passage for basses stands out prominently. Also the solo for bells.

No. 9442, "Moses Andrew Jackson Goodbye," by Arthur Collins, is a new coon song by Ted Snyder (music) and Ren Shields (words). One verse and two choruses are given on the Record, which is sung with orchestra accompaniment. Mandy has become tired of Andy's shiftlessness and general lack of working ability and is getting ready to leave him. In the song she tells of her troubles and bids Andy farewell. May Irwin makes a hit with this song in her new play "Mrs. Wilson—That's All."

No. 9443, "It is Well With My Soul," by the Edison Mixed Quartette, is in the opinion of our Recording Department, the best sacred selection for mixed voices we have ever made. It is splendidly sung by the artists composing our mixed quartette and is finely recorded. The singers are unaccompanied.

No. 9444, "Seems To Me I've Always Loved You," by Irving Gillette, is a beautiful sentimental song by Ernest R. Ball, who also wrote "Will You Love Me in December as You Do in May," (our Record No. 9198), and "Love Me and the World is Mine" (our Record No. 9371). The words of this new ballet are by Hartley C. Costello. The Record is made with orchestra accompaniment. The chorus:

Seems to me I've always loved you,
Seems as tho' I've never known
In my life a single moment,
When you were not all my own.
Seems that you've been ever near me,
Ever near in joy or sorrow,
Seems to me I've always loved you,
Always loved you, sweetheart mine.

No. 9445, "Hermosillo," by the Edison Symphony Orchestra, is a characteristic Mexican dance. As pretty as it is typically Mexican. Composed by Albert Schuh.

No. 9446, "Why Can't a Girl Be a Soldier?" by W. H. Thompson, is a new march song in which the above question is propounded in the verses and replied to in the affirmative in the chorus. Made with orchestra accompaniment. The music is by Roger Halle and the words by John J. Nilan. The chorus follows:

Why can't a girl be a soldier,
Just the same as her sweetheart boys?
In the days of old, women were bold,
Their lives they offered gaily.
They wore a fine hat with feathers,
A jacket and dress of blue.
And she'll carry a gun,
Good as any mother's son,
And she'll make a good soldier too.

No. 9447, "Arma Virumque," by Collins and Harlan, is described by its publisher as an Irish-Indian matrimonial venture. The music is by Theodore Morse and the words by Jack Drislane. It is a story of Barney's courtship of an Indian maiden on the wild and woolly of an Indian reservation. The music is a combination of music generally typical of the Indian and the Irish. Both words and music are catchy and the song can hardly fail to be popular.

No. 9448, "Spring-Tide Revels," is a whistling trio by Mrs. Alice Shaw and Twin Daughters, who are perhaps the best known artists in their line now on the vaudeville and lyceum stage. There is scarcely a theatre-goer in the entire country who has not heard them one or more times. Therefore, a Record giving a reproduction of their remarkable talent will undoubtedly find a large sale. Their introductory selection was written by Ed. Hartroductory selection was written by Ed. Hartley and is one exactly suited to their whistling. The orchestra accompaniment is a feature of the Record.

No. 9449, "Ballet Music from William Tell," by the Edison Concert Band, is the 3-4 movement and the prettiest part of this celebrated ballet music. The flute and clarinet at the close will attract much attention.

No. 9450, "The Bird on Nellie's Hat," by Helen Trix, is a new comic song by Alfred Solman (music) and Arthur J. Lamb (words). The little bird on Nellie's hat sees and comments on the love making of Nellie's various beaux. Miss Trix sings with orchestra accompaniment and in her usual clear and distinct voice. The chorus:

'Tis be your baby beaux, I will promise that,
Said Nellie as she rolled her dreamy eyes,
It's a shame to tell fibs,
Said the bird on Nellie's hat,
Last night he told the same to Johnny Wise,
Then he whispered as they fondly kissed,
The fact that you were never kissed like that.
Well he don't know Nellie like I do,
Said the saucy little bird on Nellie's hat.

No. 9451, "When Tommy Atkins Marries Dolly Gray," by Billy Murray, is the "hands across the sea" song feature from Lew Fields' "About Town." The two well-known songs are cleverly intermingled and the quartette chorus deserves special mention. Words and music are by Cobb and Edwards and the Record is made by orchestra accompaniment. The chorus:

Oh, it's Tommy, Tommy take her by the hand,
She's a fortune girl in all our native land,
See her lips, and cheeks, and eyes,
They're the color that we prize,
So red, so white, so blue,
Good bye Dolly every loyal heart and hand,
Longs to see you wear that little wedding band,
For the British speaking race against the world will stand,
When Tommy Atkins marries Dolly Gray.

No. 9452, "I Love the Last One Best of All," by Frank C. Stanley, is Eugene Cowles' big song hit in Marie Cahill's "Marrying Mary." Mr. Stanley has not in some time made a better baritone Record than this, and the way in which he sings the final low note stamps him as the possessor of a voice of rare quality. Silvio Hein and Benj. Hapgood Burt wrote the music and words of this selection. The Record is made with orchestra accompaniment.

No. 9453, "March Jose," by Albert Benzler, is a xylophone solo that merits the highest praise. Well written and well played. Its composer is Marcus Blum.

No. 9454, "Bonnie Jean," by Byron G. Harlan, is a brand new march song in which "Annie Laurie" is effectively introduced. It has already caught the popular fancy. The words are descriptive of the love affair of two highland queers, and the music is typically highland queers, and the music is typically highland queers, and the music is typically

THE CRY FOR "BRAINS."

BY JAMES CHEELMAN, IN PEARSON'S MAGAZINE FOR AUGUST.

Turning from the sweep and glitter of American prosperity to the men who have made it possible, one thinks of Thomas Alva Edison. His is "the honest life, the useful life, the friendly life" that deserves earnest attention in this astonishing year of moral incendiarism.

No American name is more widely known. No living man has contributed more to the advancement of the human race. Millions of men and billions of dollars are employed in enterprises made possible by his genius and industry; and his works have extended themselves to the ends of the earth.

So great is Mr. Edison's renown, and so secure his place among the few immortals who have modified civilization without bloodshed that we are apt to forget that he is not an illustrious abstraction, but a vigorous American citizen, still working night and day at the central problems of applied science, and pausing occasionally to wonder what in the world has happened to his countrymen that they should listen to croakings of despair in the midst of success.

It is something to sit beside this really great man, whose name is a glory as well as a romance in the history of the continent, and to hear him speak words of soberness and truth about the outlook of the country; for Mr. Edison is not only a scientific investigator and inventor, but a business man, a millionaire, a manufacturer employing a great force of men and a merchant. And he is a man of rare candor.

"I can't for the life of me understand why anyone in the United States should think that the poor man's chance for success is less than it used to be," he said as we sat in the great library of his laboratory at Llewellyn Park. "It's just the other way; no doubt of it."

The strong arms were folded across the deep chest and the big gray eyes looked steadily through the window at a brawny workman hammering away on the new electric storage-battery factory. A whistling boy danced under a white-blossomed fruit tree.

"I would rather begin now as a poor boy," he continued, "than to start again in the conditions which surrounded my early life. The opportunities for a poor boy or a poor man are greater to-day than they were then; make no mistake about that.

"Great organizing minds have massed capital, systematized business, eliminated waste of materials and labor, and concentrated the forces of production along lines that grow more intelligent and humane year by year.

"The world is crying for men of intelligence. It is searching for them everywhere. The door of opportunity is open, as it has never been before, for men who have minds even a fraction above what is necessary for a routine muscular task. It doesn't matter whether a man be poor or rich, or what his color or creed or origin, he has a better chance now than if he lived a generation ago; that is, if he can bring intelligence to his work.

"This is the golden age of men of brains, even a little brains, and I'd rather, much rather, take my chances now, without a friend or a dollar in my pocket, than to go back even twenty years.

"The world is growing better and stronger all the time, and the invitation to think is becoming almost irresistible in every branch of human effort. That is raising the race higher and higher.

"As science is applied to industry more and more the rewards of intelligence grow greater, and to-day there are in thousands of factories 'suggestion boxes' into which workmen are urged to drop any ideas that may occur to them—so hungry are those who direct business to advance men capable of advancement."

Mr. Edison had just come from the gray vapors of his chemical laboratory, where, among mysterious glass tubes, bulbs and jars, gleaming ovens, small pans, sizzling and sputtering above little devil-dancing flames of pink and violet, he had been studying the results of endurance tests of his new electric storage battery, which is presently to revolutionize the wheeled traffic of cities. But the rosy, unwrinkled face and the smooth, splendid brow gave no hint of the mental struggle through which he had passed in the effort to better his latest gift to mankind.

Mr. Edison is probably the hardest worker alive. But for his ability to toil for five days and nights at a stretch without sleep, the incandescent electric light might still be a laboratory toy. The Phonograph, the kinetoscope, the quadruplex telegraph, the electric railroad, the telephone transmitter, the megaphone and all the marvelous contributions which his brain has given to civilization, are the result of almost incredible working powers and an equally wonderful indifference to food.

Living in the threshold of the future he has visions of things to come which make him jealous of everything that takes his time. He appreciates the shortness of life and the almost unspeakable wonders that science is about to reveal to man. And, at the age of fifty-nine, he works night and day with a quiet joy that sometimes breaks into fierce enthusiasm—moving forward, forward, forward, into the darkness that is slowly changing to light.

"We are groping on the verge of another great epoch in the world's history," he said one me not long ago. "It would not surprise me any morning to wake up and learn that some one, or some group, of the three hundred thousand scientific men who are investigating all over the earth has seized the secret of electricity by direct process, and begun another practical revolution of human affairs. It can be done. It will be done. I expect to see it before I die.

"A man will discover one fact in one part of the world, and that will set some fellow at work on another fact in some other part of the world, and presently a lot of men will be working on the true path; and one day it will be announced to the world that electric power can be produced directly from coal. When

that discovery is made the steam engine and boiler will be driven out of use. It will then be possible to have air-ships. I expect to see air-ships flying before my death. Such a discovery will make it possible to drive ships across the sea by electricity at a rate of forty or fifty miles an hour—three days across the Atlantic from shore to shore.

"The human race may well look forward with hope to the day in which that discovery will be announced, for, after that, the world will be greatly transformed."

With this thrilling idea of the immediate future in his mind, the great inventor looks upon the amassing of immense private fortunes and the concentration of industry and commerce into giant combinations as inevitable incidents in the development of the race, necessary instrumentalities in the working out of "the great plan."

There is nothing gaunt or hollow-eyed about this protagonist of the wonderful present and prophet of the yet more wonderful future.

He has a thick-set body, deep in the chest and somewhat fat in the girth, a figure of vitality and power that thrives upon what the poorest-paid workingman would regard as a scanty diet. Work that consumes nights and days, without pause for sleep, cannot waste that magnificent bulk of a man. The long concentrations of all his powers, the breathing of chemical vapors, the nerve-racking disappointments, the slow, patient pursuit from fact to fact to glorious victory, leave him erect and full of red blood.

The head is big, wide and symmetrical, with wispy, iron-gray hair that whitens over the noble forehead. The face is broad and full, without puckers or wrinkles, but extremely sensitive and full of gentle humor. The wide, expressive mouth droops at the corners, but it is a smiling mouth and a courageous one. The handsome gray eyes are deep and full of power, yet there is a never-absent sincerity and sunny friendliness about them.

His is a personality big, simple and absolutely devoid of vanity. It is a singular compound of profound experience and equally profound innocence. And the central, dominating quality is what the world calls "heart."

As he sat there in the vast library hall he seemed to be a part of the place. The stretches of shelved alcoves rising, gallery above gallery, and packed with forty thousand volumes representing the labors of the scientific men of all ages; the tiers of cases crowded with rare and precious minerals, soils and fibres—but a fraction of the more than a hundred thousand substances gathered from every part of land and sea and assembled together under that same roof—the delicate instruments representing the various stages of electrical progress; the framed diplomas telling of honors showered upon the master of the hall; the poetic white marble statue of "The Genius of Light" brought from the Paris Exposition; the rude bed in the corner where fragments of sleep are snatched between experiments; the prim geraniums on the window-sill—all these are eloquent of his many-sided life and world-wide contact.

As he leans forward intently, his large, strong hand hollowed behind his ear, one is reminded of the fact that the man who perfected the telephone, who invented the Phonograph, and who even produced and classified musical sounds caused by the contraction of molecules of matter, has been half-deaf since his boyhood. Yet that affliction has never soured his philosophy nor discouraged him in his work.

"I've been through the mill myself," he said with a laughing shake of the head, "and when I say that a man has a better chance to rise from the ranks to-day than he has ever had before, I think I know what I'm talking about."

The mingled strains of Scotch and Dutch blood which are combined in Mr. Edison, perhaps the shrewdest combination possible, fail to furnish his countenance with the keen worldliness that one would naturally look for. And as he spoke of his early life he looked for all the world like a great, quiet, imaginative boy.

In fact, he rubbed his shin and chuckled.

"I may be a rich man now; but I started as a newsboy on a train running between Detroit and Port Huron. I wasn't connected with that, and so I started two small stores in Port Huron, one for the sale of newspapers and the other for the sale of vegetables, butter, eggs, berries and so on. It was a small trade, but I was able to carry my merchandise free in the United States mail cars, and that counted.

"In time I had two other newsboys working for me. They couldn't sleep very well at night, so I bought a bottle of paregoric and gave each of them two teaspoonfuls a day. That was the first time I combined business and science, and it turned out to be a success.

"I'll tell you how I happened to get into telegraphing first: When the battle of Pittsburg Landing was fought, the first report which reached Detroit announced that there were sixty thousand killed and wounded."

Mr. Edison rocked back in his chair and stroked the back of his head as he recalled the situation.

"I knew that there would be a tremendous demand for the *Detroit Free Press* containing that report, if I could only get word to the various railway stations before my train arrived. I said to myself, 'Gracious! if I could only get the people to know about it!' So I went to the telegraph operator at the Detroit station and told him that if he would wire the main facts of the battle along the line, so that announcements could be put up on the station bulletin boards, I would give *Harper's Weekly* to him for six months free of cost.

"Well, the operator agreed to do his part, and he did it well. I used to sell about forty newspapers on the trip, but this time I made up my mind that I ought to take a thousand. Then, when I counted my money, I found I had only enough to buy two hundred. Then it occurred to me that if I could get to Wilbur F. Story, the proprietor of the *Detroit Free Press*, I might be able to work out of my difficulty. Mr. Story was a man of austere, some used to say savage, haughtiness. Most people were afraid to approach him. But my situation was desperate, and I wasn't going to let my plans fail for the lack of a little pluck; and so I climbed up the stairs to his office, presented myself and said, 'Mr. Story, I have only got money enough to buy four hundred papers and

I went six hundred more. I thought I might get trusted for them. I'm a newsboy.' I got my thousand papers all right."

The inventor rubbed his hands softly together and moistened his lips with his tongue. He seemed to grow younger each instant. His gray eyes sparkled. The boy under the blooming fruit tree beyond the window began to whistle again. The rat-tat-tat of workmen's hammers came through the stillness of the spring air.

"That was a great day for me. At the first station the crowd was so big that I thought it was an excursion crowd. But, no; when the people caught sight of me they began to yell for papers. And what did I do? Why, I just doubled the price on the spot and charged ten cents instead of five cents a copy. At the next station the crowd was even greater, and you ought to have seen them dig their hands down into their pockets when I shouted out the price. So it went all along the line. The message from the telegraph operator had done its work well, and everybody was excited and crazy to get papers. When I got to the last station I jumped the price up to twenty-five cents a copy, and sold all I had left. I made seventy-five or a hundred dollars in that one trip, and I tell you I felt mighty good.

"Now," said Mr. Edison, folding his arms, "that called my attention to what a telegraph operator could do. I thought to myself that telegraphing was simply great. I made up my mind to become an operator as soon as possible. You know that you can learn a great deal in a very short time if you will only put your mind to it. I worked twenty hours a day, and in four months I was a telegraph operator.

"I worked as a Western Union operator in Detroit, Memphis, Louisville and Boston, and all the time I studied and experimented with electricity. The first serious thing I invented was an electrical machine to count votes in Congress. I had been handling press reports as an operator, and I noticed it took a long time to count the votes after each roll call. My machine would show the total vote a few seconds after the end of the roll call. I thought the device was a good one, and I think so now. But when I went to Washington and showed it to the chairman of a committee, he said, 'Young man, that works all right, but it's the last thing on earth we want here. Filibustering and a delay in the count of the vote are often the only means we have for defeating bad legislation.' I was sorry; but I ought to have thought of that before.

"My next practical invention was the quadruplex telegraph. I started in to work it on the Atlantic and Pacific telegraph line between Rochester and New York. But there was a chump at the other end of the wire and the demonstration ended in a fizzle. It was years before the quadruplex was adopted.

"That landed me in New York without a cent in my pocket. I went to an operator and managed to borrow a dollar. I lived on that for a week, but I had to 'park it' a little, that is, I slept outdoors. Oh, I didn't mind it much, and I never did care much about eating anyhow.

"Then I hustled for something to do. I could have got a job as an operator at ninety dollars a month, but I wanted a chance to do something better. I happened one day into the office of a 'gold ticker' company which had about five hundred subscribers. Those were the days of gold speculations in New York, and the ticker was an important factor, for it supplied news to all the offices. I studied out the machine in the central office and thought I saw how it could be improved. One afternoon about 2 o'clock I was standing beside the apparatus, when it gave a terrific rip-roar and suddenly stopped. In a few minutes hundreds of messenger boys blocked up the doorway and yelled for some one to fix the tickers in their offices. The man in charge of the place was simply flabbergasted. I stepped up to him and said, 'I think I know what's the matter.' He asked me to fix it, and I did so. I simply had to remove a loose contact spring which had fallen between the wheels. The result was that I was employed to take charge of the service at three hundred dollars a month. I almost fainted when I heard how much salary I was to get.

"Then I joined hands with a man named Callahan and we got up several improved types of stock-tickers. These improvements were a success. When the day of settlement for my inventions approached I began to wonder how much money I would get. I was pretty raw and knew could put things through. I hoped that I might get five thousand dollars. I dreamed of what I could do with big money like that, of the tools and other things I could buy to work out inventions. But I knew Wall Street to be a pretty bad place, and had a general suspicion that a man was apt to get beat out of his money there. So I tried to keep my hopes down; but the thought of five thousand dollars kept rising in my mind.

"Well, one day I was sent for by the president of the Gold and Stock Telegraph Company to talk about a settlement for my improvements. He was General Marshal Lefferts, colonel of the Seventh Regiment. I tell you, I was trembling all over with embarrassment, and when I got in his presence my vision of five thousand dollars began to vanish. When he asked me how much I wanted I was afraid to speak. I feared that if I mentioned five thousand dollars I might get nothing at all. That was one of the most painful and exciting moments of my life. My, how I beat my brains to know what to say! Finally, I said, 'Suppose you make me an offer?'

"By that time I was scared; I was more than scared, I was paralyzed.

"'How would forty thousand dollars do?' asked General Lefferts.

"It was all I could do to keep my face straight and my knees from giving way. I was afraid he would hear my heart beat. With a great effort I said as calmly as I could, 'I guess that will be all right.'

"He said that he would have the contract drawn up in a couple of days and that I could come back and sign it. Yet the thing didn't seem to be real. It was too big. Besides, I had my opinion of Wall Street. I couldn't sleep. But, when I went back, there was the contract. I signed it in a hurry without reading it. I don't know even now what was in that contract. Then a check for forty thousand dollars was handed to me.

"I went to the bank on which the check was drawn as quick as my feet could get me there. Even then the thing didn't seem real. It was the first time I was ever in a bank. I got in a line of boys in front of the paying teller's counter, and when my turn came I handed in the check. Of course I had not endorsed it. The teller looked at the check, pushed it back to me and roared out something which I could not understand, being partly deaf. My heart sank and my legs trembled. I handed the check back to him, but again he pushed it back with the same unintelligible explosion of words.

"That settled it. I went out of the bank feeling miserable. I was the victim of another Wall Street 'skin game.' I never felt worse in my life. I went around to the brother of the treasurer who had drawn the check and said, 'I'm skinned, all right.' When I told him my story he burst out laughing, and when he went into the treasurer's office to explain matters there was a loud roar of laughter at my expense. They sent somebody to the bank with me, and the bank officials thought it so great a joke that they played a trick on me by paying the whole forty thousand dollars in ten, twenty and fifty dollar bills.

"It made an enormous pile of money. I stuffed the bills in my inside pockets and outside pockets, my trousers pockets and everywhere I could put them. Then I started for my home in Newark. I wouldn't sit on a seat with anybody else on the train, and I would let nobody approach me. I clasped my arms across my body and sat in that way, suspicious and alert, all the way home. And when I got to my room there was so much money that I couldn't sleep a wink for fear of being robbed; so the next day I took it all back to General Lefferts and said to him: 'I didn't know where to keep it. He had it placed in a bank to my credit. That was my first bank account.

"With that money I opened a new shop and worked out apparatus for the Western Union Telegraph Company. My automatic telegraph, which handled a thousand words a minute between New York and Washington, was bought out by Jay Gould and the Western Union Company. It is in litigation yet.

"Then the quadruplex was installed. I sold that to Jay Gould and the Western Union Company for thirty thousand dollars. The next invention was the mimeograph, a copying machine.

"When Bell got out his telephone the transmitter and receiver were one. Professor Orton, of the Western Union Company, asked me to do something to make the telephone a commercial success. I tackled it and got up the present transmitter. The Western Union Company eventually made millions of dollars out of it. I got a hundred thousand dollars for it.

"At last President Orton sent for me and said, 'Young man, how much do you want in full payment for all the inventions you have given to the Western Union Company?'

"I had forty thousand dollars in my mind, but my modesty didn't move. I hadn't the nerve to name such a sum.

"'Make me an offer,' I ventured.

"'How would a hundred thousand dollars seem to you?' he asked.

"I almost fell over. It made me dizzy. But I kept my face and answered, with as much coolness as I could muster, that the offer appeared to be a fair one. Then another thought occurred to me, and I said that I would accept a hundred thousand dollars, if the company would keep it and pay me in seventeen yearly instalments. I knew that if I got it all at once it would soon go in experiments. It took me seventeen years to get that money, and it was one of the wisest things I ever did. By putting a check on my extravagance I always had funds."

Mr. Edison paused for a moment and thrust his hands in his pockets. An intense look came into his face. His eyes seemed to be looking at something a mile away. So I had seen him in the midst of his electric storage-battery experiments—the world suddenly shut out; his mind turned in on itself.

"It is not true that the strain of life is wearing out the brightness and originality of the American people," he said slowly. "I believe that competition and hard work, above all, hard mental work, is making the American mind keener and more fertile than ever. We are making rapid progress in every direction.

"These great corporations and enormous fortunes that people talk so much about—well, they are blessings. The more big organizations we have and the more rich people we have, the better off the country will be.

"It is the grand scale of work made possible by this concentrated wealth and organization that has produced the present systematic application of science to industry, and the ceaseless demands and greater rewards for higher intelligence among workingmen. This is the best time in all history for a man to live in. Success is no longer a matter of brute strength, but a question of brains. Isn't that a great gain for humanity? The school-house is the door to success.

"The country going backward? Stuff! What we need is an honest enforcement of our laws, more schools, more people in them, more 'trusts' and more millionaires, yes, billionaires.

"Of the things that are yet to be known we don't know a hundredth-millionth part now, and we need massed billions of money and mighty, waste-eliminating organizations, directed by Rockefellers and Carnegies and Schwabs and Boers, to move the productive powers of the world to a higher plane and make things easier and better for everybody.

"I have proven anything like the present demand for intelligent men in every line of work. With the rapid compounding of power, and the certainty that it will become very much cheaper, the value of more physical strength is becoming less important, and the value of knowledge and thinking qualities advances. The idea expressed in 'A Yankee at King Arthur's' becomes truer every day. The eyes of the great capitalists and organizers are strained for signs of intelligence above the dead line that divides raw labor from inquisitive labor.

"One of the most significant evidences of the tendencies of the age is the fact that while the hours of manual work are becoming shorter, hours of intellectual work are growing longer. The hours of brain work are growing longer. Science is making the executive problems of production more involved and, at the same time, it is simplifying and lightening the burdens of mere animal effort.

"Go to the Bethlehem Steel Works and see young men of twenty-five and thirty years in charge of the big hammers and machines. Why? Because they are graduates of the Massachusetts Institute of Technology. If there were ten such schools in Boston their graduates would be gobbled up as fast as they came out.

"Go to the General Electric Company's works and see the crowd of inventors developed from the ranks, all being liberally paid for their ideas.

"Go to any of the great industrial centers and see how large capital and concentrated, systematized methods of business have developed and rewarded poor men who bring intelligence to their tasks. If that isn't a good sign for the present and the future, then my experience and observation go for nothing.

"In my judgment the great organizers, such men as John D. Rockefeller and Andrew Carnegie, have actually done more for the country, more for the masses, than any other men, with the possible exception of the inventors. Of course I do not approve of the advantage secured by Mr. Rockefeller through secret railroad rebates. Yet, that was not his fault so much as the fault of our laws or our administration of the laws. They were all the same game. He simply played it better and on a larger scale. Human nature is not perfect and, so long as we leave such opportunities to businessmen men, we must expect them to take advantages where they can.

"If Mr. Rockefeller were born to-day, he could, I believe, do pretty nearly as well as he has done. The opportunities for success of all kinds are just as great, greater, I think, than when he started in as a poor boy.

"As I look at it, Mr. Rockefeller has never been able to draw his wages for what he has done for the world. He hasn't been even half paid for his work. What has he got out of it? A lot of tin boxes full of bonds that are of no use to him or to anybody else.

"If the Standard Oil Company were to be divided up into a hundred different proprietorships and managements to-day, refined oil would be selling for twenty-five per cent. more within ten years. I have bought lubricating oil for $2 a ton and, with all my knowledge of the technique, I cannot see how it can be made at that price.

"I believe that if all the manufacturing businesses that have been merged into great central systems should be forced back into their original units of organization, most of the products of industry would cost twenty per cent. more actually to make than we can buy them for now.

"Take two large manufacturing works competing with each other. One is managed by a man who is a logical thinker, the other by a man who is not. Now, if competition is close, the thinker improves his methods, while the other man simply cuts down wages or goes out of business."

It is hard to describe Mr. Edison in moments of enthusiasm. He is so strong and quiet and the shine in his eyes is so soft in moods of mental or spiritual exaltation that one gets only a sense of tranquil cheerfulness. Then comes an eye-flash, a raising of the brows and relaxation of the mouth, and his face has instantly the glow and glory of inspiration. It was so at that moment. And the sun, shining across the little row of geraniums in the window, made a very striking picture of him.

"Pessimism is out of place in this country," he said. "We are all advancing together, and there is every reason for hope and confidence. The improvement in rapid transit facilities will enable workingmen to move out into the green country, away from congested centers of population where a poor man has to live in a sort of sarcophagus, with a sewer under it. Every man who works ought to have a bit of garden. That will come through rapid transit, in the near future. The improvement in methods of production will also make it possible soon to build workmen's houses for half what it costs now. These houses can be built away from the city, for the day is not far off when we shall have networks of suburban electric railroads, with trains running at different rates of speed up to fifty miles an hour.

"The cost of living is going down and wages going up, that is, the wages for intelligent work. Practically everything a poor man uses, except food, is cheaper. The demand for food is limited, but the demand for everything else is practically unlimited. Look back over the last twenty years, and you will see how one new scientific methods and genius for organization have lowered the cost of nearly everything except food.

"The price of food will come down, too. Look at what that great man Luther Burbank is doing to improve the food produced by the earth. He has started a new epoch in experimental agriculture and probably in a few years the results of his work will be shown in better food and infinitely cheaper prices. Mr. Burbank is really a very great man. He plants a thousand things of one kind and, as they grow, his eagle eye detects the variations; then he works on the variations to reach a higher plane. That is my own method of work. The Government will in time take up that work, and we shall have thousands of men all over the country spreading knowledge of and applying the new methods. That means better and cheaper food.

"There are a number of men working on the problem of a nitrogenous fertilizer taken from the air by electricity. They are making distinct progress. The salient product is cyanamide. That one discovery will in time double the value of agricultural land, or cut the price of agricultural food products in two.

The government experimenters have found a fertilizer, which can be had in great quantities, and which, when ground sufficiently fine, will give up potash to plant life. These two improvements will probably enable a farmer to grow fifty bushels where he can grow only twenty bushels now.

"Professor Fisher has actually produced albumen from inorganic material. It is a peptone. If that sort of thing keeps on we shall soon be able to make eggs for breakfast out of air, water and stone, minus the organic principle of life.

"I mention things like these merely to call attention to the fact that we are moving forward better times, and that life is growing easier, not harder. As I see it, the condition of the man who rises above the dead line of mental mediocrity or inertia has greatly improved, and improves every year."

"But how about the man below that dead line?" I asked.

Mr. Edison leaned his head on his hand and blinked his eyes.

"His only hope is to be found in the schoolhouse," he said, with great earnestness. "That is to be his salvation. We must protect him by good laws, honestly enforced, and see that the means of education are open to him. Beyond that no one can help him but himself. But the whole tendency of the age, which is calling for increased knowledge and intelligence, is to draw him up out of the rut.

"The labor unions could do much to advance the workingman if they did not insist on pulling good men down to the level of inferior men. The trouble is that, as a rule, they don't employ their best men to manage their business, as employers do. They ignore their wisest men and follow the biggest blow-hards. Under the leadership of such men as Mr. Arthur, the late chief of the Brotherhood of Locomotive Engineers, the labor unions might become a great power for good.

"Looking over the whole country, I have come to the conclusion that the greatest factor in our progress has been the newspaper press. Russia is much bigger than this country in every way. She has a tremendous population and immense natural resources. Yet she is fifty times slower. Why? Because she lacks the power of a free press. She cannot unite or harmonize her forces. But when we want to do anything in America the newspapers take it up. Everybody reads the newspapers, everybody knows the situation, and we all act together. That is another way in which our energies are more concentrated and systematized."

That sincere tribute to the practical value of newspapers from the master worker of the business of to-day recalls the fact that Mr. Edison was himself an editor. It was in his early days, when he emerged from his newsboy career. He managed to get some worn type and other damaged printer's apparatus. With these he fitted up an old car on the Grand Trunk Railway and issued *The Grand Trunk Herald*, a small sheet bearing his name as editor. At the same time he carried on scientific experiments in the car. He even attracted the attention of the great engineer Stephenson and won a tribute from the *London Times*. This stirred his boyish heart and impelled him to fresh experiments as his car moved up and down the line. In a luckless moment a bottle of phosphorus became uncorked and set fire to the car. The conductor of the train threw him and his apparatus out of the car, after boxing his ears. That boxing resulted in the deafness which has been an impediment in his work ever since.

In spite of that little tragedy, he threw himself into the work of experimentation with greater vigor than ever. It is said that his telegraph line consisted of stovepipe wire strung between two houses and insulated with bottles, the magnets wound with wire and wrapped in rags, and a piece of spring brass serving as the key. This system was connected with the two houses that were entirely unlinked by the young inventor; and, in spite of their clawing and yowling, he managed to develop a local current, but not of a kind to work the line.

After becoming a telegraph operator young Edison gave an extraordinary illustration of what ready intelligence can do even with primitive means. The electric cable connecting Port Huron with Sarnia, its neighbor city in Canada, was broken by the ice in the Saint Clair river. All communication between the cities was completely stopped. Leaping on a locomotive at Port Huron, Edison began to sound a message on the whistle, using the dots and dashes of the Morse telegraphic alphabet, "Hello, Sarnia! Do you hear, Sarnia?" For some time there was no response across the mile and a half of drifting ice. But at last a locomotive whistle in Sarnia answered. The signal had attracted the attention of the Canadian telegraph operator. From that time on the cities were in communication.

It is a far cry from these crude triumphs to the long struggles that ended in the incandescent electric light and the Phonograph, yet, all through these events, years of alternate disappointment and success, one can see how large organization and large capital were necessary to the magnificent outcome of Mr. Edison's intelligent and never-ceasing toil.

One of Mr. Edison's assistants has recorded the fact that, in working out the Phonograph, the inventor has spent from fifteen to twenty hours a day, for six or seven months at a stretch, shouting the word "Specia" against the wax cylinders, in his effort to have the sibilants distinctly reproduced. The intense and prolonged labor which has resulted in the new business-man's Phonograph can scarcely be realized. But it took immense capital and a widespread organization to place the million or more Phonographs of kinds now in use.

We are stirred by the story of Mr. Edison's agonizing brain-concentration in the days and nights when he sought to find a carbon filament of sufficient resisting power to obtain a proper subdivision of incandescent light, of how one filament after another was destroyed, at the moment of apparent victory, by delicate breaths of air, and of how he kept on, without sleep, almost without food, while his companions and assistants grew haggard and faint, until at last his memory of what the great Humboldt had written about the qualities of a bamboo growing on the banks of the Amazon suddenly solved the problem. We remember that story, but we forget that Mr. Edison was backed by a corporation with ample capital. It was not enough to produce one or a dozen or a hundred incandescent lamps. To bring the invention within reach of mankind generally it became necessary, to search the whole world for the right kind of bamboo-fiber. William Moore was sent to search China and Japan. Frank McGowan followed the course of the Amazon for two hundred hundred miles, investigating South America from the Atlantic to the Pacific, penetrating regions roamed by wild beasts and hostile Indians, and finally, after great suffering, completely disappearing. No trace of him has since been found. Mr. Ricalton explored the jungles of Pondicherry, Bangalore, Madras, Bombay and Delhi, ascended the Himalayas to an altitude of six thousand feet, followed the Ganges to its mouth, investigated the thickest of the Irrawaddy as far as Mandalay and searched the

Malay peninsula and Ceylon. While Mr. Edison sat in the stillness of his New Jersey laboratory studying variations so delicate as to be scarcely expressible, his agents were to be found in the remotest parts of the earth, braving dangers and hardships in a search for a sufficient supply of the right kind of bamboo fiber to make the incandescent light a permanent addition to the practical wealth of civilization.

THE COMMERCIAL DEPARTMENT.

LOCAL REPRESENTATIVES ARE APPOINTED.

Mr. Edison's inventions have all been so important and far-reaching that campaigns of public education, combined with the selling plans, have had to be conducted to overcome the natural resistance which is experienced when something radically new, such as the Business Phonograph, is introduced.

The present Commercial Department of the National Phonograph Co., with headquarters in Orange and branch offices in Boston, New York, Philadelphia, Pittsburg, Buffalo and Chicago, are at present the headquarters of these centers of combined educational and sales work. Under the direction of these branch offices and others that will be opened, local representatives in every city and small town must be appointed who can demonstrate the Edison Commercial System to prospects who have made inquiry at the branch offices and if possible install the appliances and render local service in the training of employees, and in making repairs.

Edison Jobbers and Dealers in every locality will be given the preference in these appointments which will be made in contract form the same as for amusement goods. But if we find that Edison Jobbers or Dealers are not interested nor qualified to handle the Business Phonograph appointments will be made among other local firms.

Reviewing the contract for handling the Edison Commercial System, which will be mailed upon application, the following features are important: *First*, representatives must purchase the proper number of outfits for writing their correspondence, and for demonstration, at the special discount of 20 per cent. *Second*, branch offices of the Commercial Department will send any goods to customers they may require, either for outright purchase, or for trial, and assume the account so that representatives need not carry any stock. *Third*, representatives must provide salesmen and a mechanic for repairs; the branch office of the Commercial Department will supply all of the repair parts. *Fourth*, the Commercial Department branch office will bill the goods direct to the customer and the National Phonograph Co. will be responsible for the collection of account. *Fifth*, on all goods installed by representatives a commission of 20 per cent. will be allowed when the customer has paid for the goods to the National Phonograph Co.

Edison Jobbers or Dealers who at first thought consider 20 per cent. commission is not sufficient will notice that they are only required to make a local demonstration to the prospect, after being furnished with the inquiry from the branch office, and supply the small amount of interest necessary to properly install the machines when they are shipped from the branch office and attend to any repairs in the future.

It is pointed out that branch office experts are expected to visit the cities and towns where agents will be appointed and in every possible manner instruct the local representatives in accordance with the campaign of education which has been laid out for the Commercial Department. Although 20 per cent. commission may seem small, it is a fact that no purchase of the Edison Commercial System for an ordinary office costs less than $200, while it is not uncommon for offices with five or six stenographers to order fully $1,000 worth of these appliances. At 20 per cent. commission it can thus be seen that Edison Jobbers and Dealers can very easily make considerable profit if they have anyone in their employ capable of attending to this class of business in their spare time.

A complete line of literature, consisting of catalogues, instructions for selling and installing, and blank contracts, will be sent to any Edison Jobber or Dealer who may be interested. Address Commercial Department, Main Office, National Phonograph Company, Orange, N. J.

ADVERTISEMENT OF A TEXAS DEALER.

He wore'ed the girl with serenade
And 'fored the girl with words; you may laugh,
She ne'er said yes, the little maid
Till won by Edison's Phonograph.

Now why don't you buy her one? We will let you have a nice machine for $10, and a dozen Gold Moulded Records for $4.20 per dozen.

Of course you must not tell her how cheap it was. You never tell how cheap you bought things until after you are married. This young lady will enjoy the machine and Records more than she would $20 worth of candy, which will only make her sweeter and you more sad. Again, you must have an eye for business, if you win her, the machine will come back to you; whereas the candy, theatre tickets, flowers, skating rinks do—well, you "muff sed."

Let each of the dozen Records tell her that you love her. Let her have it by voice, violin, guitar, banjo, piccolo. Let the bells ring it to her and let the cornet blow it into her ear, and you will have made the best investment of your life.

Now if you are a married man, of course you must have one. How cheerful and restful to reach home after a hard day's work and have the sweet plaintive notes of the Phonograph greet you with "Everybody works but father."—*Temple Book Concern, Temple, Tex.*

A JOBBER'S LIST OF 250 GOOD SELLING EDISON RECORDS.

Each year the Eastern Talking Machine Company, of Boston, issue for the benefit of their Dealers a list of what they consider the best selling Edison Records. The advantage of such a list to Dealers who cannot carry the full line of Edison Records is obvious. It is especially helpful to Dealers who are taking on the line for the first time and who are all at sea as to the makeup of their initial Record order. Other Jobbers could follow the same plan to advantage. Believing that the list of the Eastern Talking Machine Company will be of interest to the entire trade, we are reprinting it below:

19	Under the Double Eagle March	8391	Violets	8326	When the Bees Are in the Hive
93	Stars and Stripes Forever March	8366	Blues Away March	8431	Come Take a Trip, etc., Medley
1	Sousa's Band Medley	8369	In the Valley Where the Bluebirds Sing	8333	The Troubadour
128	Ireland's Well-known Melodies No. 1	8439	Intermezzo—Cavalleria Rusticana	8346	Yankee Doodle
504	Anvil Chorus from Il Trovatore	8441	Reuben Haskins of Skowhegan, Maine	8048	The Ancients' March
510	Blue Danube Waltz	8455	Scene in a Country Store	8049	My Carolina Lady
631	Faust Waltz	8466	There's a Mother Always Waiting, etc.	8050	When the Harvest Moon, etc.
2066	McGinty at the Living Picture Show	8470	Two Babes in the Rye	8051	There's a Dark Man, etc., Medley
1313	Home Sweet Home	8484	Two Babes in an Eating House	8057	In the Shade of the Old Apple Tree
1325	Where is My Wandering Boy Tonight	8516	Ballet Music from Faust, Part 2	8066	Bunker Hill
2018	Holy City	8525	Girl That's Behind Me Medley	8067	Grandfather's Clock
2201	Annie Laurie	8526	Handful of Earth from Mother's Grave	8073	Parson Spooner's Discourse, etc.
2213	Dancing on the Old Barn Floor	8531	Handful of Earth from Mother's Grave	8079	Tammany
2217	Rocked in the Cradle of the Deep	8536	Beaumarie	8080	Heinie
2222	My Old Kentucky Home	8546	Le Secret Polka	8084	Professor and Musical Tramp
2237	Carry Me Back to Old Virginny	8557	Scene in Country Blacksmith Shop	8086	Two Rubes and Tramp Fiddler
2601	Dublin Dream	8562	Peaceful Henry March	8093	Gerry Owen Medley
2602	Irish Reel	8566	Melody of Love	8095	Good Night, Little Girl, Good Night
2202	Climes of Trinity	8582	Last Rose of Summer	8098	When Father Laid the Carpet on the Stairs
4005	Laughing Coon	8587	New Colonial March	8099	Teddy and the Bear
4012	Whistling Coon	8594	Dancing Waterfowls	8107	Dear Miner Joshua
4013	Wheeling Coon	8598	Marching Through Georgia	9009	Diddy's Day
4023	Norman Dunter's Song	8619	Reuben Haskins' Ride in an Auto	9013	You're My Heart's Desire, etc.
7197	Cowboy	8630	Uncle Sammy March	9014	An Autumn Evening
7169	Mocking Bird	8645	Medley of Original Airs	9015	Good-night, Ladies Helps
7195	Spanish Fandango (*Mendelssohn*)	8657	Blue Bell	9019	Good-night, Beloved, Good-night
7267	Heard My God to Tree	8659	Dan Goes the Second Medley	9020	Tell Me With Your Eyes
7253	Hail Dot, Silver Moon	8668	Dan Goes the Henry Bells	9022	Medley
7250	Bell Boy	8700	All Aboard for Dreamland	9023	Beautiful Ohio Song, On

EDISON GOODS HIS LEADER.

I send you photograph of my store where Edison Phonographs and Edison Gold Moulded Records are the leaders in the talking machine line. None of the several makes of goods in this line in seven years (my experience in the business) has ever equaled in popularity and

staying qualities the Edison machines and Gold Moulded Records. Other makes having long ago been discontinued. Selling Edison Phonographs and Records is the best branch as a moneymaker I have and they will have my most energetic efforts to increase their sale.—*C. E. Wyeth, Newark, Ohio.*

A PLAN WORTH EMULATING.

Following is a copy of a letter that the R. S. Williams & Sons' Co., Ltd., Edison Jobbers at Toronto, Canada, are sending to their Phonograph Dealers:

The Phonograph season is now well under way, and the prospects are that this season will be the greatest in the history of the talking machine trade. Are you getting your share of the talking machine business? If not, why not?

Now, to make your Phonograph business is the new issue Records. This is the evolution of the phonograph and the secret of your success as a Phonograph dealer.

Make your customers look for these new issue Records each month; advertise the fact that they can get them from you; send out a circular monthly, drive the wedge to still further by a postal to each of your customers, inviting them to call, then watch the results that are bound to follow.

Now, to work this end of the business successfully, you must have a copy of your each of the new issue Records each month. We will send you a card which we trust you will sign and return to us as quickly as possible. You are running no chance as the *Edison Phonograms*, of which you no doubt received a copy.

Now, this will you double your business; it can be done; we have done it in our retail department. Write us fully the conditions you have to contend with in your locality, and we will give our frank, open opinion, backed with our long experience, which we think will greatly increase your business.

Enclosed with the letter is a card, directing the Williams Company to enter an order for one or more of each of the new Edison Records each month until ordered discontinued. The Williams Company report that they have had surprising results with the plan.

BE ENTHUSIASTIC.

With a product so perfectly made, and so thoroughly advertised as Edison Phonographs and Records, Dealers should have no trouble in being enthusiastic when talking about these goods to a prospective buyer. They may have an excellent window display; may have a most complete stock; may know the merits and advantages of Edison goods by heart, yet if they do not talk with the conviction which comes from being really enthusiastic, their customers will not get to that point of interest when they will say, "Yes! that's the machine I want."

Dealers must remember that, in all probability, a customer comes into the store with the definite idea that the Edison is the one of all others that he would like, but he wants to have his opinion confirmed by the Dealer. Thus it may mean that the Dealer will have to enumerate the good points about which he is already well informed, and if this is done in a genuinely enthusiastic manner, an order may very easily be secured for a "Home" when he intended to buy a "Standard"—and so make just so much more profit.

Dealers should never let a customer buy a low priced machine if they can possibly help it. It means less satisfaction for the customer, for the Dealer, for those that hear it. Emphasize strongly the advantages of paying a little more and getting an instrument that is certain to give more real pleasure, and true enjoyment, to everyone that hears it. The sale of an "Edison" means selling a regular supply of Edison Records to its owner, too; this is almost an impossibility when a low priced talking machine is sold.

THERE is nothing so good for the family as laughing. Anything introduced into the family circle which will increase the number of laughs per person per evening is a benefit to the health of the home.

The Edison Phonograph is able to furnish good, hearty, wholesome fun. It is not always funny, but it can be made funny when you like it funny.

The first work of the Edison Phonograph is to amuse. Some people are better amused by things that are not funny. Music, operas, hymns, ballads, old songs—whatever it is that you like best—that is what the Edison Phonograph can give you best. There are good dealers everywhere who show it and sell it. Write for the book and you will know why you want the Edison.

National Phonograph Company

What the "Other Fellow" Is Accomplishing

LANGUAGE STUDY IN CHICAGO.

Lyon & Healy Doing a Big Business With the Course Directed by the International Correspondence Schools.

(Special to The Talking Machine World.)

L. L. Lewis, representing the International Correspondence Schools of Scranton, Pa., is in charge of a special branch in the retail department of Lyon & Healy's devoted to the exploitation of language teaching through the medium of the talking machine. It is said that so far Lyon & Healy have disposed of over 300 outfits, mostly to the better class of customers, the facilities offered by the talking machine plan for studying at odd hours appealing directly to the busy men of affairs. All told, the International Correspondence Schools have disposed of 20,000 outfits, valued at $1,000,000.

Another story of a "dealer who has tried it." And a prominent firm in Atlanta is going to open a regular school of language study with the aid of our phonograph system. They are waking up all along the line to the possibilities of the language feature of the business. How about YOU? Do you realize what I. C. S. Language Outfits will do for YOUR business? Do you know that with these outfits you can reach a class of trade that would not think of using a phonograph for ordinary purposes, that you can reach those people who have become tired of their phonographs as an amusement fad, and that you can quickly interest your regular customers in this PROFITABLE use for the phonograph? "Dealers who have tried it" have increased their business from 10 to 30 per cent. and more. Don't be slow. Get into the game and get YOUR share of this trade. Write TODAY for further particulars.

THE HOLIDAY SEASON.

Are you ready for the holiday trade, Mr. Dealer? The little more than three weeks that remain between now and Christmas constitute the most important season of the year for Edison business, and he whose stock is most complete is going to reap the greatest good from it. Thousands of families are recognizing in the Edison Phonograph one of the most desirable of holiday gifts, and more and more of them are being bought at this season every year. Every Edison Dealer should recall to mind the demand that he had at this time last year and determine that he will be amply supplied to meet any similar demand this year. Many a fine sale was lost last year because Dealers did not have the Phonographs and Records on hand when customers wanted them. Our inability to turn them out fast enough was responsible to much of this shortage, a condition that does not now exist. We are in splendid shape to meet all reasonable demands. Jobbers are also well stocked, so that Dealers have but to order to get all the goods they want. The unusual advertising that we are now doing in all parts of the country cannot fail to create a great demand for Edison goods, and Dealers would do well to recognize the fact in making their plans for the holiday trade.

It is with considerable satisfaction that we say that we are in splendid shape at the factory to take care of the needs of the trade. Never in the history of the Phonograph has our factory been working so smoothly as it has for months past. It is difficult ourselves to believe that the output is fully fifty per cent. more than at the same time a year ago, when our entire manufacturing and selling forces were at their wits' ends to keep the trade appeased. While we are fully sold up all the time and cannot accumulate a surplus, the orders are so promptly filled that Jobbers do not need to write letters begging for goods, and a world of correspondence and unnecessary work is

(Continued on page 3.)

THE ADVANCE LIST OF FEBRUARY RECORDS APPEARS ON PAGE 2.

NEW EDISON GOLD MOULDED RECORDS. ADVANCE LIST FOR FEBRUARY, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **January 28th**, all things being favorable, but they **must not be placed on sale by Jobbers or leave their places of business, or be re-shipped to Dealers before 8 A. M. on January 28th.** Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after January 29th, but must not be circulated among the public before **January 28th.** Jobbers are required to place orders for February Records on or before **December 10th.** Dealers should place January orders with Jobbers before **December 10th** to insure prompt and complete shipment when Jobbers' stock is received.

9458 A Garden Matinee (*Friml*) *A delightful Entr' Acte* Edison Concert Band
9459 When the Snow Birds Cross the Valley (*Solman*) Harry MacDonough
A song that you'll like the very first time you hear it. By the writers of "In the Valley Where the Blue Birds Sing"
9460 Kentucky Babe (*Geibel*) Vassar Girls Quartette
A pleasing selection by a quartette of female voices
9461 Lustspeil Overture (*Keler-Béla*) Edison Symphony Orchestra
One of those pieces that always makes a fine record
9462 A Lemon in the Garden of Love (*Carle*) Billy Murray
The biggest song hit in Richard Carle's "The Spring Chicken"
9463 Good-a-Bye John! (*Herbert*) Collins and Harlan
A comic Italian dialect selection sung by Montgomery and Stone in "The Red Mill"
9464 Fancy Little Nancy (*Bainer*) *A serio-comic song* Ada Jones
9465 Regimental Pride March (*Heed*) Edison Military Band
One of the best marches that we have recorded in some time
9466 Uncle Josh in a Chinese Laundry (*Rehe*) Andrew Keefe
It's the same old, but ever funny, story
9467 Looking this Way (*Van De Venter*) Miss Hinkle and Miss Keyes
Sacred selection by soprano and contralto
9468 Good Bye, Sweet Maryland (*Rosenfeld*) James F. Harrison
A beautiful descriptive ballad
9469 Little Nell (*Pryor*) Albert Benzler
As a waltz solo Arthur Pryor's tuneful and swingy song and dance makes a fine number
9470 Night Time (*Cohan*) J. W. Myers
A big hit in Geo. M. Cohan's "The Governor's Son"
9471 Whistle It (*Herbert*) Miss Trix and Messrs. Meeker and Murray
The great comic trio from "The Red Mill"
9472 And a Little Child Shall Lead Them (*Harris*) Byron G. Harlan
Chas. K. Harris' latest ballad
9473 Cherry—Intermezzo (*Albert*) Edison Concert Band
This instrumental selection is given out by its publishers as their "follow up" number to "Iola"
9474 Alice Where Art Thou Going? (*Gumble*) Billy Murray and Chorus
This song is already very popular. It's popularity as a record will be even more so. The Edison Quartette sings with Mr. Murray in the choruses
9475 Cherry Hill Jerry (*Original*) Ada Jones and Len Spencer
A typical East Side character sketch. The song "Cherry Hill Jerry" (Lawlie) is sung by Miss Jones
9476 Somebody's Waiting for You (*Gumble*) *A new waltz song* Harry Anthony
9477 Ave Maria (*Gounod*) *A solo for 'cello accompanied by piano* Hess Kronold
9478 Because You're You (*Herbert*) Miss Hinkle and Mr. MacDonough
The repeatedly encored soprano and tenor duet from "The Red Mill"
9479 I'm Going Right Back to Chicago (*Van Alstyne*) Arthur Collins
A lively coon song by Williams and Van Alstyne
9480 A Flower from Home Sweet Home (*Schmid*) Edison Male Quartette
A beautiful sentimental ballad
9481 Arrah Wanna Medley (*Original*) Edison Military Band
Includes three song hits: "Arrah Wanna" (No. 9447), "Bonnie Jean" (No. 9454), and "When Tommy Atkins' Marries Dolly Gray" (No. 9451).

Edison Gold Moulded Records are made only in Standard Size. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

(Continued from page 1.)

avoided. The month of October broke all records for volume of business and it is expected that November will be even better. Such results as these show how strong the National Phonograph Co. is with its Jobbers and Dealers and how the public look upon the Edison Phonograph and Edison Records.

5 MORE GRAND OPERA RECORDS IN FEBRUARY.

On page 5 is printed the Advance List of five new Grand Opera Records. They are numbered from B 41 to B 45. Four of them are sung by artists who have appeared in previous lists and the fifth by Mario Ancona, an Italian baritone. The latter is an artist of renown in Europe. He sang in this country some years ago. He will shortly arrive in this country and will be one of the stars in Hammerstein's new grand opera company, in which Madame Nordica will also sing. Three of the new selections are sung in Italian and two in German. Five different operas are represented. From an artistic and recording standpoint, they are all that could be desired by the most fastidious.

Forty-five Grand Opera Records have now been listed, comprising a variety sufficient to suit all tastes. Never before have lovers of high grade music been given such an opportunity to hear their favorite composers in so permanent a form and at such low cost. At an opera performance the airs can be heard but once and at considerable expense. With these Records and an Edison Phonograph the music lover may hear them as often as he likes.

While we have no fault to find with the success of this grand opera series, we cannot help feeling that the trade in general, especially the smaller Dealers, are not paying the attention to them that their high quality deserves. The entire list should be part of the stock of every Dealer attempting to carry an adequate supply of Edison Records and he should make an effort to call the attention of his patrons to them.

In the past much has been said in criticism of the Phonograph because no high class Records by grand opera singers could be had for it. Dealers have reported their inability to sell a machine because of this shortcoming. Now that the want has been supplied, Dealers should lose no time in going after this high class trade. There is scarcely a Dealer in Edison goods who does not have in his territory a number of families of musical taste whom he should be able to interest in the Phonograph because of these Grand Opera Records.

Think the matter over, Mr. Dealer. See if you cannot put in at least one of each selection and push their sale. Get up a mailing list of the best families in your city or town and send each a copy of the supplement that we shall get out for retail use, accompanying it with a letter, stating that you have the Records and the machines to play them. These supplements will contain the titles of the forty selections before issued, and will be an attractive piece of literature. Don't let your competitor beat you out, but rather strive to get ahead of him.

CARRY THE FULL LINE.

"If we could only get Dealers to realize the Edison business they would do if they would carry the full line of Edison Records in the domestic catalogue there would be no limit to the sale of Edison Records." Such is the constant cry of our salesmen when asked concerning the business in their territories. While there are doubtless places too small to make it profitable to carry such a stock, yet it is true of hundreds of places where Dealers now do not think it possible. Our salesmen report that the experience of Dealers who put in the entire line is always the same. They jump at once from a small business into one that makes them most enthusiastic. Many a Dealer has regretted that he could not see the advantages of the complete line sooner than he did and he would not go back to the old way of doing an Edison business for a considerable sum. To carry one each of all Edison domestic Records involves an outlay of about $275.00 and the cost of a suitable system for taking care of them, about $25 more. After that it becomes a mere detail, with no additional capital, to keep the stock up. As fast as sales are made other Records can be ordered in their places. It is impossible to over-rate the advantages to a Dealer of being able to advertise that he carries every Edison Record. Then think of the satisfaction of being able to say to every customer: "Yes, I have it," instead of "No, but I'll get it for you." The profits are equally satisfactory and they are made with the least amount of trouble. There's an absence of worry in doing a business of this kind that hundreds of present Dealers would not think possible. We cannot urge too strongly that Dealers give this matter their most careful consideration.

One of our most enterprising salesmen has compiled the table given below and presents it to new Dealers as representing what he considers essential to a complete stock for doing a successful business in Edison Phonographs

and Records. While such a stock cannot be carried in many small towns, we commend it to hundreds of Dealers doing a limited business in cities and large towns where such a stock could be carried to the great profit of Dealers. This table shows that with an outlay of $566.12 a Dealer can make $405.28, and many Dealers are turning over their money from six to twelve times a year in this manner:

	Cost Each.	Total Cost.	Selling Price Each.	Total
1300 Edison Rec.	$ .10	$125.00	$ .25	$325.00
1 Gem Phono.,	5.00	5.00	10.00	10.00
2 Std'd Phonos.	12.00	24.00	20.00	120.00
6 Home Phonos.	18.00	108.00	30.00	180.00
1 Tri'ph Phono.	30.00	30.00	50.00	50.00
24 Tre'ted Horns	1.35	32.00	3.50	84.00
24 No. 2 Cranes,	1.50	36.00	3.50	84.00
24 M. Connections	.03	.72	.10	2.40
		$566.12		$857.40
				566.12
	Net Profit,			$405.28

MAKE UP MAILING LISTS.

One of the most profitable methods that a Dealer doing business in a small town can employ is that of going after prospective customers by mail. Such Dealers should make up two different mailing lists. One should be of owners of Edison Phonographs or other cylinder talking machines and a list of new Records or a copy of the *Phonogram* should be sent to them every month. The plan would be strengthened with a brief invitation to call and hear the new Records on a given night each month. The other list should include the names of every family in the vicinity who might be induced to buy a Phonograph, and a piece of printed matter or letter should be mailed to each at intervals. Not more than two months should elapse between each mailing. Each time a cordial invitation should be extended to call and hear a demonstration. Or still better, ask for the privilege of making a demonstration in the home of the party addressed. In nine cases out of ten where such consent can be secured a sale can be made. Those who have given mailing lists a good trial find them very profitable ways of increasing their Edison business.

THREE NEW CANADIAN JOBBERS.

C. H. Wilson, General Manager of Sales of this company, is spending a week in Canada during the early part of last month and established three new Jobbers of Edison Phonographs and Records. Up to the present time our only Canadian Jobber was the R. S. Williams & Sons' Co., Ltd., with headquarters at Toronto and a wholesale branch at Winnipeg. The growth of our business in Canada made it advisable to have a greater number of distributing points than these two cities, and it was also felt that an additional number of Jobbers would bring a still further increase in our Canadian business. Mr. Wilson had no difficulty in signing Peter Kelly, of 282 St. Lawrence street, Montreal; C. Robitaille, of 320 Rue St. Joseph, Quebec, and W. H. Thorne & Co., of 42-46 Prince William street, St. John, N. B. All of these firms had been handling Edison goods as Dealers and were, therefore, quite familiar with them and their possibilities. The five named firms will give excellent distributing facilities east of Winnipeg and enable us to get goods to Canadian Dealers at a minimum cost for freight charges.

THE EXCHANGE PROPOSITION.

The statement last month to the effect that the exchange proposition had been disposed of was hardly correct. It was a fact so far as the trade shipments to us were concerned, but it was far from correct as representing the situation at Orange. The men in the specially created "Exchange Department" have had the time of their lives in trying to straighten this matter out. It would be hard to imagine a greater tangle than these shipments were in early in November. Scores upon scores of shipments arrived with one or two cases short. Such shipments could only be set aside till the missing cases came in and many shipments are still waiting for the missing parts. These broken up lots not only caused trouble, but they made it impossible to send Jobbers and Dealers credit for their shipments. Many complaints from the trade were received, but as the delay was beyond our control we could only explain the situation and ask the complainants to wait. Those still waiting will appreciate how impossible it is to send them the credit papers until we get the complete shipments. We are doing everything in our power to dispose of the whole proposition.

FEBRUARY RECORDS ON JANUARY 28TH

Since January 27th, 1907, falls on Sunday, February Records cannot be placed on sale until the following day, January 28th. The trade must bear this in mind and under no circumstances permit February Records to leave their places of business on Sunday or earlier date. Such a contingency was provided for in the original notice sent to the trade.

NO MORE BRONZE PAPER WEIGHTS.

The trade is hereby advised that we have discontinued the sale of bronze paper weights. Reference to them will be eliminated from future catalogues.

ADVANCE LIST EDISON GRAND OPERA RECORDS

SUPPLEMENT No. 5, FEBRUARY, 1907.

THE five Grand Opera Records listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **January 28th, 1907**, all things being favorable, but they **must not be placed on sale by Jobbers or leave their places of business, or be re-shipped to Dealers before 8 A. M. on January 28th.** Supplements, will be shipped with Records. These may be distributed to Dealers after January 20th, but must not be circulated among the public before **January 28th.** Jobbers are required to place orders for these Grand Opera Records on or before **December 10th, 1906.** Dealers should place orders for these with Jobbers before **December 10th** to insure prompt and complete shipment when Jobbers' stock is received.

B. 41—"Nobil donzella," "Gli Ugonotti" *Meyerbeer*
By Mario Ancona, Baritone.
Sung in Italian, Orchestra accompaniment

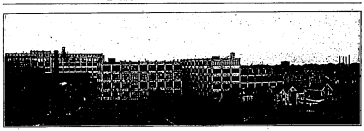
B. 42—"Geardate, pazzo son," "Manon Lescaut" *Puccini*
By Florencio Constantino, Tenor.
Sung in Italian, Orchestra accompaniment

B. 43—Gebet, "Allmächt'ge Jungfrau," "Tannhäuser" *Wagner*
By Mme. Rappold, Soprano.
Sung in German, Orchestra accompaniment

B. 44—"Bello siccome un angelo," "Don Pasquale" *Donizetti*
By Antonio Scotti, Baritone.
Sung in Italian, Orchestra accompaniment

B. 45—"Willist jenes Tags," "Der Fliegende Holländer" *Wagner*
By Alois Burgstaller, Tenor.
Sung in German, Orchestra accompaniment
Edison Grand Opera Records cannot be furnished in concert size.

PRINTED MATTER.



Orders of Jobbers for domestic Record catalogues are now being filled with the new edition, Form No. 1000. This contains all Records listed to and including November, 1906. Only the December supplement is needed to make it complete for holiday trade.

It is not our intention this month to get out a special list of Christmas Records. Special lists of this kind are not as a rule successful because many Dealers in smaller places do not have the Records in stock, and cannot meet the demand that the printed matter creates.

Beginning with the December issue, the monthly Record supplement will be printed in two colors on the front and one on the back. The front page designs will be unusually artistic. Each will typify the month of issue and all will be of similar style. The December design shows a trio of carol singers of olden times and the colors are red and green, both design and color scheme being appropriate to the Christmas season.

We will be glad to mail a muslin sign showing the words "Edison Phonographs and Records" to any Dealer who has not had one. These signs are large and suitable for outdoor or window display, or may be put up on the inside walls of stores. When used for banners over the sidewalk two should be used, placed back to back, so as to read both ways. Two are also needed when used for transparencies.

A new edition of the Numerical Catalogue of Records will be issued in January. It will be Form No. 1020 and will have the January Records and all changes in both domestic and foreign lists up to January 1st. In addition to this Numerical Catalogue we shall issue an alphabetical catalogue of domestic Records to and including January. The latter is a new catalogue with this company. It has frequently been asked for by the trade. It is believed that an alphabetical catalogue of the domestic list will meet every requirement. The foreign list is already arranged alphabetically by languages. Both of these catalogues will be for trade use only. A copy of each will be mailed to every Edison Dealer and we will follow our usual plan of refusing to supply Jobbers with quantities to duplicate this mailing. We shall adhere to the claim that Jobbers only need limited quantities of these catalogues to supply new Dealers and fill the requests of Dealers needing a second copy. Dealers must not use them as copy for ordering Records but should use regular order sheets furnished by us for such purpose.

PANORAMIC VIEW OF FACTORY IMPROVEMENTS.

The above picture, while not as clear as we would like, furnishes a splendid idea of the great increase now going on in the Edison plant at Orange, N. J. It is taken from the roof of the four-story concrete building of the Edison Storage Battery Co. The dark building with the brick chimney at the left is the rear of Mr. Edison's Laboratory. Immediately to the right of this is the new office building, 137 feet long and 50 feet wide. Beyond the laboratory and running to the extreme left of the picture is the new Record building 70x240 and five stories high. A further extension of this building, 135 feet long, is planned for the spring. To the right of the office building is the extension to No. 18, 50x120 feet in size and five stories high. Connecting with this is the extension to No. 17, also 50x120 feet in size, with a connecting building 50x60. The three latter buildings will be really one structure 150x120 feet and five stories high. Still further to the right is the four-story concrete extension to No. 2, erected a year ago. This is 40x180 feet in size. At the extreme right is the concrete power house 50x80 and 25 feet high, also put up last year. The last two and the office building are the only ones fully occupied. Three floors of No. 18 extension are partially in use. Practically all of the present great output of Phonographs and Records is being made in buildings that do not show in this picture, a statement that will give the trade some idea of the facilities we shall have when our plans are fully carried out. The above picture covers a distance of 1000 feet.

The new gas making plant that we are building is now being equipped with the necessary machinery and apparatus and will be in operation in a few weeks. This plant occupies a one-story concrete building on the north side of Alden street, constructed especially for the purpose. The building is not shown in the above picture. The plant will manufacture what is known as producer gas. It is obtained from coal by a process which differs from that used in producing ordinary illuminating gas. The process is so much cheaper that where the ordinary gas costs $1 per thousand cubic feet, the new gas plant will give the same results for thirty cents.

The plant will have a capacity of 60,000 cubic feet per hour, which will be sufficient to run the wax pots in the shop where the Phonograph Records are cast. The company will, for the present, continue to use gas from the Public Service Corporation in the japanning and tool shops, and for the running of the forges, but if the new scheme is a success it will gradually be extended to these departments, and in time over the entire allied Edison works and in the new storage battery buildings.

INSTRUCT THE DEALERS.

Jobbers can do no more profitable work for themselves than to strive to make every Dealer a better Dealer. By this we mean not merely to endeavor to sell him more goods but, when you sell him any goods at all, show him how to sell them in turn. This means telling him how to carry his stock neatly, conveniently and attractively; how to make window displays; how to demonstrate machines and Records to prospective customers; how to advertise in newspapers, by mail and otherwise; how to get and distribute printed matter furnished by us through Jobbers, and how to keep up a stock. It means doing everything possible to keep a Dealer informed about trade conditions. This sort of work is being done by many Jobbers and they claim that it has been a great factor in the growth of their business. There is not a firm doing a jobbing business that could not find it equally beneficial if they would do likewise.

NEW MACHINE CATALOGUE.

Copies of a new Phonograph catalogue, Form No. 1010, have just been mailed to the entire trade and the held-up orders from Jobbers have been filled with the new edition for the past three weeks. This catalogue contains thirty-two pages of matter relating to Edison goods. The same style cover as before is used. This cover will continue a feature for probably another year. The title page is headed, "The Edison Phonograph in the Home," and shows a small half-tone cut of the old couple in the Massini picture. Seven pages are devoted to a new introduction. New silhouette half-tone cuts of various Edison Phonographs, reproducers, etc., are given, the Standard, Home, Triumph and Concert being shown with the new style transfer of the name "Edison." The Concert is also shown with a horn crane instead of a horn support as before, the use of the latter having been discontinued. All options in connection with machine equipments have been discontinued and the Triton spring motors have been dropped from this catalogue.

At the top of page 7 in this new catalogue appears this sentence: "Now a disk will revolve faster at the centre than at the circumference." This is a typographical error. The incorrectness of the statement must be apparent to everyone, for the facts are just the reverse. This error was not discovered till the entire edition had been printed. If any of their patrons refer to this statement, Dealers should explain the facts and state that the paragraph was intended to point out the varying surface speed of a disk record and the uniform, unvarying speed of a cylinder record. This difference represents one of the reasons why Mr. Edison regards the cylinder record as the best medium of reproducing sound.

PERSONAL.

Florencio Constantino, the famous Spanish tenor, whose beautiful Edison Records have been so greatly admired, arrived in New York last month. He has made a three year contract to sing with the San Carlo Opera Company as its leading tenor. This company spends considerable time at New Orleans every year and also tours the principal cities of the United States.

J. Frank Stanton has been added to the corps of salesmen of the National Phonograph Co., and he has been assigned to cover Delaware, Maryland, West Virginia and Virginia. Mr. Stanton was formerly a Dealer in Edison goods at Bridgeport, Conn., and has had considerable experience in selling talking machines. He spent several weeks at the Orange factory, learning more about the mechanical side of the Phonograph, and went on the road early in November unusually well equipped for his work.

General Manager of Sales C. H. Wilson returned November 24th from a week's business trip to the West.

AMONG THE JOBBERS.

G. C. Aschbach, Edison Jobber at Allentown, Pa., last month took possession of the large new addition to his store at 539 Hamilton street, and now has one of the finest establishments of its kind in that part of the State. Mr. Aschbach now occupies five complete stories, one entire floor being given up to his Phonograph business. The others are devoted to his piano and music business. Upwards of $20,000 were expended in enlarging and improving the building.

WHAT'S NEW?

Edison Jobbers and Dealers are constantly doing things in connection with their businesses that are interesting to the entire trade and we will be glad to refer in these columns to anything out of the ordinary. Tell us what you are doing in novel advertising and relate some of the interesting incidents that occur from time to time.

An advertising novelty comes from the Stamford Phonograph Co., of Stamford, Conn. It consists of a piece of cardboard 3¾x10¾ inches, headed "Just Out," and followed by a list of new Edison Records. At the bottom is a piece of sand paper for striking matches. The printing is done in two colors and is printed in such a manner that a copy of the Record supplement can be pasted on each month and the whole mailed for one cent each.

HAS GIVEN COURAGE TO DEALERS.

TUSCUMBIA, LA., Nov. 2, 1906.

I cannot help but praise your exchange proposition, as I know it will be an advantage to us all. Though we will re-order some Records sent in for exchange it will give all a new start. I had over 2,000 Records in stock, as many as 15 to 20 of one number. Being a small town, customers soon heard all Records I had. As it is I have advertised in local papers shipment of new Records and note already the result. Your exchange proposition has given courage to all Dealers to order out a better supply of Records. Thanking you for the kind consideration shown all Dealers.

A. E. MALMIOT.

EDISON GOLD MOULDED RECORDS FOR FEBRUARY, 1907.

Perhaps the most interesting fact in connection with the February supplement is the return of John W. Myers as a singer of Edison Records, several years having elapsed since a selection by his fine voice has appeared in our catalogue. Another feature is a selection by the Vassar Girls Quartette, a new group of artists to sing for the Edison public. A soprano and contralto duet by Miss Hinkle and Miss Keyes is another novelty. The life-like reproduction of a hand-organ playing "Miss McCloud's Reel" in "Good-a-Bye John" will make a hit. Mr. Keefe makes another "Uncle Josh" Record, and well chosen selections by the stand-bys comprise a list of twenty-four unusually good Records.

No. 9168, "A Garden Matinee," by the Edison Concert Band, is a delightful *enfr' acte*, written by Rudolph Friml, accompanist for Kubelik, the great violinist, most artistically played by our Concert Band, every member of which is a trained artist. The Record must appeal to those who are constantly asking for the better grade of music.

No. 9459, "When the Snow Birds Cross the Valley," by Harry MacDonough, is a charming sentimental ballad by Alfred Solman (music) and Monroe H. Rosenfeld (words). The fact that Mr. MacDonough makes the Record is sufficient to stamp it as high class, for he has few equals in rendering songs of this character. He is accompanied by the orchestra.

No. 9460, "Kentucky Babe," by the Vassar Girls Quartette, is a new feature in Edison Records, this being the first selection by a quartette of women ever put out by this company. This quartette is well known on the vaudeville stage. Its members have been brought together with special reference to the harmonizing quality of their voices. The artists have been fortunate in selecting "Kentucky Babe" for their initial presentation, for it fits their voices finely, but they could hardly fail of success in any good selection. They sing without accompaniment. Adam Geibel wrote the music of the song and Richard Henry Buck the words.

No. 9461, "Lustspiel Overture," by the Edison Symphony Orchestra, is a charming composition that always makes a most attractive Record.

No. 9462, "A Lemon in the Garden of Love," by Billy Murray, is the principal song hit in Richard Carle's "The Spring Chicken," which ranks among the best successes of the New York theatres this season. Daly's Theatre is crowded to the doors at every performance. This feature song is the plaint of a married man anxious to know why he picked a lemon in his matrimonial venture into the garden of love where only peaches were supposed to grow. In the chorus he sings:

Will some one kindly tell me,
I'd like to get the answer why,
For I'm in a riddle,
And it will be till I die;
A million peaches 'round me
Yet I would like to know,
Why I picked a lemon in the garden of love
Where only peaches grow.

Richard Carle wrote the music and M. E. Rourke the words of this song. Mr. Murray sings with orchestra accompaniment.

No. 9463, "Good-a-bye, John," by Collins and Harlan, is one of the many good things in "The Red Mill," which has been running for months at the Knickerbocker Theatre, New York. The stars are Montgomery and Stone, so widely known as the scarecrow and the tin woodman in "The Wizard of Oz." In this new play they do a number of amusing and novel stunts, one of which is the impersonation of two Italians with a hand-organ and a monkey. They have differed and are about to separate. In the song they refer to the cause of their quarrel and bid each other good-bye. This song is given in Italian dialect, in which Collins and Harlan appear to excellent advantage. A feature of this Record is a hand-organ solo. It is an effort and natural that we know the public will demand a solo record by the same instrument, or at least one in which more of its music is given. This Record will come close to being the most popular in the February list.

No. 9464, "Fancy Little Nancy," by Ada Jones, is a serio-comic song by William Baines and descriptive of the experiences of Nancy Lee, following her first introduction into city ways. The musical setting to the story is much more attractive than many of the present day popular songs. It has a melody easy to catch, and therefore destined to be whistled and sung. With the assistance of the orchestra, Miss Jones makes a fine Record of the song. Between the choruses she introduces a bit of witty talk.

No. 9465, "Regimental Pride March," by the Edison Military Band, is one of the best marches that we have made in some time. Of course, the tempo is of a military character. The drum and bugle effects are something brand new and will please all who hear the Record. This composition was written by J. C. Heed, well known as a composer of several successful marches.

No. 9466, "Uncle Josh in a Chinese Laundry," is another of the "Uncle Josh" series by Andrew Keefe. The experiences of "Uncle Josh" with his wash and the Chinese laundryman are not new to many owners of Edison Phonographs, but they never fail to evoke a round of laughter whenever repeated on an Edison Record. This Record retells the story in the same old way, and Mr. Keefe gives a splendid impersonation of the "down Easterner," with the voice that makes you laugh even when nothing funny is being said.

No. 9467, "Looking This Way," by Miss Hinkle and Miss Keyes, is our monthly sacred selection. It is sung by soprano and contralto, and we believe that it will meet with general approbation. It is especially well recorded and the voices of the artists come out of the horn sweetly and in perfect harmony. The words and music of "Looking This Way" are by J. W. Van de Venter. The orchestra accompanies the singers.

No. 9468, "Good-Bye, Sweet Maryland," by James F. Harrison, is a beautiful descriptive ballad by Monroe H. Rosenfeld. Sung with much expression and feeling by Mr. Harrison, who is a cultured singer, possessing a tenor voice of fine quality. He had the assistance of the orchestra in making this Record. Two bars from "Maryland, My Maryland," are included in the refrain.

No. 9469, "Little Nell," is the February contribution by Albert Benzler, that most versatile Edison artist. It is a bells solo of a tuneful and swingy song and dance composition by Arthur Pryor, the popular band leader. The selection affords an unusually fine opportunity for good work by the bells and orchestra and the most is made of the opportunity.

No. 9470, "Night Time," by John W. Myers, is a Record that will answer in the affirmative the oft asked question: "Will Mr. Myers again make Edison Records?" Mr. Myers was always a favorite among admirers of the Edison Phonograph and Edison Records, and his re-enlistment in the Edison corps of artists will be pleasing news to them. Mr. Myers has selected for his re-appearing number "Night Time," which Ethel Levy is singing nightly in George M. Cohan's play, "The Governor's Son." It is a tuneful song and never fails to be repeatedly encored whenever Miss Levy sings it. Mr. Myers' rendition of it for our Records shows that he is quite the same skilled singer of yore.

No. 9471, "While I," by Miss Trix and Messrs. Murray and Meeker, is still another of the "Red Mill" song successes. When Victor Herbert and Henry Blossom collaborated in writing it they hit upon a new vein in popular songs. It is a combination of three witty verses, interspersed with whistling and followed by a striking melody by the orchestra. In the play the singers are Ethel Johnson, Mr. Montgomery and Mr. Stone. Each sings a verse in turn, and all whistle. Their counterparts in our Record give an attractive rendition of the several features. The first verse runs this way:

There isn't any word a girl can use when she's mad, (whistle)
A man may say most anything, it doesn't sound so bad, (whistle)
A woman may be angry, but by custom she's bound
To be a perfect lady and she mustn't make a sound,
But just let something happen when there's nobody around, (whistle)

No. 9472, "And a Little Child Shall Lead Them," by Byron G. Harlan, is Charles K. Harris's latest ballad and with it he has added another to his long list of song successes. Mr. Harlan was assigned to make a Record of it, for of all Edison's artists he has been most identified with songs of this character. All who hear this Record will agree that we made no mistake in having him sing it. He was accompanied by the orchestra.

No. 9473, "Cherry," by the Edison Concert Band, is an intermezzo, by L. Albert, that is announced by its publishers, Jerome H. Remick & Co., as their "follow-up" number to "Iola," our Record No. 9417. It is a composition possessing many attractive features. It has already been set down as one of the unusually good things of the present season.

No. 9474, "Alice, Where Art Thou Going?" is a fine Record by Billy Murray and Chorus. Considering the wide vogue of this song by Albert Gumble (music) and Will A. Heelan (words) we are a little tardy in putting out this Record of it. Still the hunger of the public will make it all the more desirable, especially since we have given Mr. Murray the assistance of the Edison Male Quartette in making it. Mr. Murray sings the verses and the Quartette joins in the chorus. The orchestra accompaniment is also a feature.

No. 9475, "Cherry Hill Jerry," is the title of the monthly selection by Ada Jones and Len Spencer. No feature of the monthly list of Edison Records is more eagerly looked for than these vaudeville sketches by Miss Jones and Mr. Spencer. This one is descriptive of the love making of "Jerry," an East Side pugilist, who is "all to de merry," and his girl "Lira," who is "all to de candy." The dialogue is typically Bowery, the orchestra playing "He's Me Pal" at one part of it. Miss Jones sings "Cherry Hill Jerry," a new song by John B. Lowitz (music) and Earle C. Jones (words).

No. 9476, "Somebody's Waiting for You," by Harry Anthony, is a new waltz song by Al Gamble (music) and Vincent Bryan (words) that is rapidly coming to the front. It has the easy-to-learn and semi-familiar kind of melody that usually characterizes the march song and whistled song. Mr. Anthony's reputation as a singer of waltz songs is established by his rendition of this ballad. He sings it with orchestra accompaniment. The Record gives one pretty and true chorus.

No. 9477, "Ave Maria," is a 'cello solo by Hans Kronold, who has given Gounod's famous composition a masterly rendering on this Record. It is a fine addition to the several 'cello Records already made for our catalogue by Mr. Kronold. Like its predecessors, it is made with piano accompaniment.

No. 9478, "Because You're You," by Miss Hinkle and Mr. MacDonough, is the repeatedly encored soprano and tenor duet from "The Red Mill." It is entirely different in character from the two other "Red Mill" selections that appear in this month's list. Miss Hinkle and Mr. MacDonough sing it in a manner that compares favorably with the Knickerbocker Theatre presentation. Like the rest of the opera, Victor Herbert wrote the music and Henry Blossom the words of this song. The Record is made with orchestra accompaniment.

No. 9479, "I'm Going Right Back to Chicago," by Arthur Collins, is a lively musical story about Jim Baxter, a Chicago coon, who only whistled Chicago tunes. Jim left town with his board bill unpaid, a fact that made him nervous every time a policeman looked his way, and caused him to cry:

I'm goin' back, back, right back to Chicago,
It's where I hope to die;
I won't have time to get a shine
Or tie a derby right,
I'm goin' right back to Chicago without any cargo,
I've got to weigh me down,
I'll not be a guest on the first train west
But's bound for Chicago town.

No one can sing coon songs like Mr. Collins, and this one is equal to his best work. He sings with orchestra accompaniment.

No. 9480, "A Flower from Home Sweet Home," by the Edison Male Quartette, is a beautiful sentimental ballad, beautifully arranged as a quartette and just as beautifully rendered. Song without accompaniment. The music was composed by Johann C. Schmid and the words written by Charles E. Baer. The chorus:

Only a flower from home, sweet home,
A flower of fairest hue,
A rose from the valley we lov'd to roam
Where first we were always true.
Perhaps you've forgotten the happy years
When our love was fond and true;
Ask your heart for it knows,
Will you cherish the rose?
'Tis a flower from home, sweet home.

No. 9481, "Avrah Wanna Medley," by the Edison Military Band, is the first medley by our Military Band that we have listed in some time, a fact that will make this lively selection all the more welcome. This medley includes "Arrah Wanna," (our Record No. 9447), "Bonnie Jean" (our Record No. 9454), and "When 'Tommy Atkins' Marries 'Dolly Gray'" (our Record No. 9453).

Edison Gold Moulded Records, standard size, are sold in the United States at 35 cents each, or $4.00 per dozen, and in Canada at 40 cents each, or $4.80 per dozen. The Canadian price is higher because of the duty.

Grand Opera Records are sold in the United States at 75 cents each and in Canada at 85 cents each. Grand Opera titles cannot be supplied in Concert Records.

RETAIL PROSPECT LETTER.

P. P. Roland, an Edison Dealer at Contesville, Pa., has written the following letter to each retail inquirer whose name is sent him by this company:

Dear Sir:—The inquirer from you to National Phonograph Company, Orange, N. J., has been forwarded to us for attention, as representing the Edison people in Contesville, and we take pleasure in enclosing in stock and a collection of about 500 Edison Gold Moulded Records which gives any purchaser a fine collection to select from. The Edison Phonographs are without doubt the finest talking machine made this present age and to be convinced will be to purchase one. We can supply you with them in preference to other makes if you desire. Remember the prices on Edison machines and Records are the same all over the United States, and are fixed by the company. In some cases where the purchaser don't know the regular price the dishonest Dealer will charge more. Therefore call on me in case you intend purchasing a machine and I will be pleased to show you. If it be inconvenient for you to call please write me what style machine you desire. I will then come to see you, and have the style with me. Thanking you kindly for your past favor, hoping that I may be successful in selling you a nice Edison machine, which will please every one who hears it talk and sing.

PLAYS "BLIND PIG" JOKE.

E. B. Reith, capitalist, Wilmette, who was falsely accused by several neighbors of keeping a "blind pig," is taking revenge in a novel way. He has arranged on his front porch a dummy figure of a negro, surrounded by liquor bottles, and has placed near by a Phonograph which continually invites passersby to "have a drink." The bottles are, of course, empty.—*Chicago American.*

RECORD RECITALS.

The R. S. Williams & Sons Co., Ltd., Edison jobbers at Toronto, Canada, have adopted a plan of giving an Edison Phonograph recital of the new list of Records each month. As the plan is worthy of emulation by every Jobber and Dealer, we give herewith the matter printed in a four-page invitation they mail to special lists and distribute in other ways. The recitals serve a double purpose. They arouse an interest in the Phonograph and they enable machine owners to hear the entire list of new Records before making selections. Incidentally the recitals make it unnecessary to play the list over many times for individual customers.

Page 1.

EDISON PHONOGRAPH RECITAL
given by
THE R. S. WILLIAMS & SON CO., LTD.,
143 Yonge St.,

Monday Evening,
October 29th, 1906.
Eight o'clock.

Page 2

EDISON GOLD MOULDED RECORDS

THIS PROGRAMME consists of the complete list of November selections. As a convenience to customers who desire to purchase any of these numbers after the Recital, we have provided the upper part so that a check mark can be placed in front of each selection desired, and if left with demonstrator, your order will be prepared and delivered to you at the conclusion of the Recital, or to your residence tomorrow.

Page 3

[List of November Records as printed in the Edison PHONOGRAPH MONTHLY, with lines at the left for checking ones desired.]

ORDER.

Please deliver { *at the conclusion of recital* / *to my residence tomorrow* } *each of the selections checked marked above.*

Name.....

Address.....

ANNOUNCEMENT.

It is our intention to give an EDISON RECITAL on or about the Twenty-seventh of each month here after (authorized date of issue), for the purpose of playing the following month's "New Issue" Records.

All Recitals will be given in the Evening, and you are cordially invited to bring your family and friends.

This will enable our patrons to hear all the New Records as soon as they are issued, and, we trust will prove an interesting feature.

AN INCIDENT OF THE PHONOGRAPH.

The other evening whilst playing Record No. 9081, "Killarney," a crowd of people was listening, and on completion of the song an Irishman came into the shop and said to my saleswoman: "If you will sing the song again I'll give you a shilling." Needless to say, he had the song over again.—*A. Maravue & Son, Sydney, N. S. W.*

PUBLISHERS OF MUSIC IN FEBRUARY, 1907, LIST.

The publishers of the compositions made for our February list of Records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers:

9458 A Garden Matinee—Lyon & Healy, Chicago, Ill.
9459 When the Snow Birds Cross the Valley—Jos. W. Stern & Co., New York.
9460 Entr'acte Ballet—E. Ascher Co., New York.
9461 Lustspiel Overture—Carl Fischer, New York.
9462 A Lesson in the Garden of Love—M. Witmark & Sons, New York.
9463 Gypsy Eye, Jabi—M. Witmark & Sons, New York.
9464 Fancy Little Nancy—Geo. M. Krey & Co., Boston.
9465 Regimental Pride March—Carl Fischer, New York.
9466 Good-bye, Sweet Maryland—Jos. W. Stern & Co., New York.
9467 Little Nell—T. W. Pepper, Philadelphia.
9468 Night Time—P. A. Mills, New York.
9471 Whistle It—M. Witmark & Sons, New York.
9472 And a Little Child Shall Lead Them—Chas. K. Harris, New York.
9473 Cherry Blossoms—Remick & Co., New York.
9474 A Coon—Who Am I?—Joseph Koenig—Jerome H. Remick & Co., New York.
9475 Cherry Ripe Jerry—F. B. Haviland & Co., New York.
9476 Somebody's Waiting for You—Jerome H. Remick & Co., New York.
9478 Because You're Here—M. Witmark & Sons, New York.
9479 I'm Going Right Back to Chicago—Jerome H. Remick & Co., New York.
9480 A Flower from Home Sweet Home—Willis Woodward & Co., New York.

VERY MUCH ALIVE.

[Copy of a circular recently sent to his Dealers by Peter Bacigalupi & Sons, San Francisco.]

San Francisco, Cal., Nov. 15th, 1906

To Our Edison Dealers:

We take pleasure in informing you that our regular stock of Records for December, 1906, has arrived, and will be shipped out promptly at 8 o'clock A. M. on the 27th, as set down in the rules of the National Phonograph Company.

If you have not already sent in your order, please do so, and we will take prompt care of you. Don't let the "other fellow" get the trade that belongs to you.

We seize this opportunity of telling you that we are recuperating very fast from the late catastrophe; notwithstanding circulated reports to the contrary by our competitors. We are going to stay with the Phonograph business, and will carry a complete stock of goods at all times.

We are now in a position to fill 95% of your Record orders, if you will only order Records that are not cut out selections. In fact, as far as filling your orders is concerned, we were never in better shape.

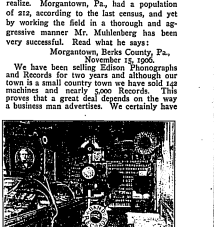
PETER BACIGALUPI & SONS.

Wholesale: 1021 Golden Gate Ave.
Retail: 1113 Fillmore St.

LIKES THE GOODS TOO WELL.

BOWLING GREEN, O., Oct. 4, 1906.

I am still pushing Edison goods with good success and like the goods and business too well not to be in sympathy with your rules and wishes.



R. V. SLAUSON.

FEW TOWNS TOO SMALL.

Dealers frequently complain that their towns are so small that they cannot sell many Phonographs and Records. The letter printed below will show that there is much more business to be done in small places than Dealers realize. Morgantown, Pa., had a population of 212, according to the last census, and yet by working the field in a thorough and aggressive manner Mr. Muhlenberg has been very successful. Read what he says:

Morgantown, Berks County, Pa.,
November 15, 1906.

We have been selling Edison Phonographs and Records for two years and although our town is a small country town we have sold 142 machines and nearly 5000 Records. This proves that a great deal depends on the way a business man advertises. We certainly have

used every means available to introduce the Edison goods. We gave entertainments, advertised along the fences, and the best material we have is the advertising matters you furnished. We are very careful to have our name stamped on each pamphlet and of course this brings us the trade, and as we carry over 1,500 Records in stock, people are sure of getting what they want. One of the best advertisements is Form 935, "The Phonograph." This we have distributed freely and was sought eagerly by the children for the post-card album. This card has created so much comment here that Prof. E. W. Billman, of our High School, has requested that the classes write a composition on the picture. We are well pleased with the business and assure you we will push the business more than ever. I enclose card of my store and think you may use it to advantage in the PHONOGRAPH MONTHLY should you think favorable of same.—*Geo. H. Muhlenberg.*

THEY LIKE INQUIRIES.

Enclosed please find inquiry slip, as asked for. The writer called on party (who is a waiter in restaurant) immediately upon receipt of same, and sold next day. Many thanks. Do it again. The Grand Opera Record by Mme. Jacoby is remarkably fine. Hope you will secure more by her.—*The Winnipeg Piano & Organ Company, Per Joseph M. Tees.*

CONCERT AT AGNEW INSANE ASYLUM.

Father A. Y. Raggio, of the world-known institution, Santa Clara College, gave another of his delightful Phonograph concerts at Agnew Asylum yesterday from 2 to 4 o'clock. Two weeks ago the Reverend Father gave the first concert since the earthquake. Owing to the inconvenience of gathering all patients together in one spot the first concert was given to the women patients. The one yesterday was the gentlemen. The concert was held in the dining room and over two hundred enjoyed for an hour the music of the splendid Edison Phonograph Father Raggio uses. It is a concert size of the best make and produces the Records with a delightfully clear tone. Yesterday all popular music was played and thoroughly enjoyed by these unfortunate people who since the earthquake have missed sorely there entertainments planned for their pleasure.—*San Francisco Journal.*

PHONOGRAPHITIS.

A new disease, not listed in any known text book on medicine, appears to have invaded Pasadena, and those who are most familiar with this latest affliction have styled it phonographitis. Symptoms of the disease have been manifested in the past, but lately it has assumed a more virulent form and its victims are numberless.

"Pasadena is suffering from phonographitis without a doubt," said G. C. Waterhouse, manager of the Waterhouse Music Company, No. 180 East Colorado street, this morning. "It is very evident with us. There is an extraordinary demand for these instruments and it is difficult to fill all the orders that come in. We receive every record now manufactured by the National Phonograph Company and the call for these is unusually brisk. People crowd to the daily afternoon concerts at the store and display great interest in this branch of the musical output. This increased demand is without doubt due to the marvellous improvements made in the modern Phonograph."—*Pasadena (Cal.) Daily News.*

A DEALER'S SUGGESTIONS.

Amherst, Mass., Nov. 6, 1906.

If you think it would benefit the small retail dealer to publish the following system of keeping the Edison records in stock, you are welcome to do so:

Buy at least one hundred Rapke record trays holding four records each, place these on shelves in the most convenient space. On the upper shelf at the left place the four smaller numbers, and run them out to the right; then on the next lower shelf place the lower numbers, and so on until you have the current numbers. Now take the numerical catalogue that is furnished to all dealers, and mark therein with a lead pencil those numbers you have in stock. When a phonograph customer comes in, hand him the catalogue, and you will see how easy it is to sell records by this plan.—*M. F. Keefe.*

WHEN the King of England wants to see a show they bring the show to the castle and he hears it alone in his private theatre. In this country we are all kings as far as having our own private show is concerned. We simply buy an Edison Phonograph and listen to the latest popular song, to the famous tenor opera singer, to a fine old hymn, to a rag-time dance or to a funny dialogue.

Anything that can be spoken, or sung, or played, can be reproduced in the Edison Phonograph with great naturalness.

If you are a king, why don't you exercise your kingly privilege and have a show of your own in your house.

Hearing is believing. The dealer will show you it.

What the "Other Fellow" Is Accomplishing

LANGUAGE STUDY IN CHICAGO.

Lyon & Healy Doing a Big Business With the Course Directed by the International Correspondence Schools.

(Special to The Talking Machine World.)

L. L. Lewis, representing the International Correspondence Schools of Scranton, Pa., is in charge of a special branch in the retail department of Lyon & Healy's devoted to the exploitation of language teaching through the medium of the talking machine. It is said that so far Lyon & Healy have disposed of over 300 outfits, mostly to the better class of customers, the facilities offered by the talking machine plan for studying at odd hours appealing directly to the busy man of affairs. All told, the International Correspondence Schools have disposed of 20,000 outfits, valued at $1,000,000.

I.C.S. LANGUAGE SYSTEM with Thomas A. Edison PHONOGRAPH

Another story of a "dealer who has tried it." And a prominent firm in Atlanta is going to open a regular school of language study with the aid of our phonograph system. They are waking up all along the line to the possibilities of the language feature of the business. How about YOU? Do you realize what I. C. S. Language Outfits will do for YOUR business? Do you know that with these outfits you can reach a class of trade that would not think of using a phonograph for ordinary purposes, that you can reach those people who have become tired of their phonographs as an amusement fad, and that you can quickly interest your regular customers in this PROFITABLE use for the phonograph? "Dealers who have tried it" have increased their business from 10 to 30 per cent. and more. Don't be slow. Get into the game and get YOUR share of this trade. Write TODAY for further particulars.

ABOUT TRADE IN GENERAL.

"Our general Phonograph business is above the average but our Edison business is remarkable," is the way an Edison Jobber stated it in an interview in the early part of December and this remark seems to be typical of the talking machine business everywhere. All makes of talking machines have enjoyed an excellent fall and holiday trade, but the demand for the Edison Phonograph has outstripped them all. The season has been most satisfactory in more ways than in volume and profit. The ability of our factory to practically meet the requirements of the trade for Phonographs and Records, large as they were, has made the doing of a large business easy and pleasant. There has been little of the troubles of a year ago in the matter of getting goods. Few sales have been lost on this account. Much correspondence and needless friction have been saved. What has been our gain in sales has been our competitors' losses, for a year ago many machines of other makes were bought because Edison Phonographs could not be had in sufficient numbers.

The trade must not now look for a falling off in business simply because the holiday season is over. On the contrary, it should prepare for a still larger sale of Edison goods. In January of last year the demand for Phonographs and Records, but especially the latter, took a tremendous upward jump and continued with increasing force right into hot weather. It behooves every Edison Jobber and Dealer to place orders at once that will make his stock as complete as his store or storage facilities will permit. We are preparing at Orange to take care of the greatest business in our history as a company but hardly expect to be able to fill all orders complete. We hardly need tell either Jobbers or Dealers that there is absolutely no risk in carrying a large stock of Edison goods. They are just as sure to find a ready sale as flour in a grocery store.

THE ADVANCE LIST OF MARCH RECORDS APPEARS ON PAGE 2.

4022

NEW EDISON GOLD MOULDED RECORDS.
ADVANCE LIST FOR MARCH, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **February 27th**, all things being favorable, but they **must not be placed on sale by Jobbers or have their places of business, or be re-shipped to Dealers before 8 A. M. on February 27th.** Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after February 26th, but must not be circulated among the public before **February 27th**. Jobbers are required to place orders for March Records on or before **January 10th**. Dealers should place March orders with Jobbers before **January 10th** to insure prompt and complete shipment when Jobbers' stock is received.

9482 The Uhlans' Call (*Eilenberg*) Edison Concert Band
A characteristic piece played with dash and brilliancy

9483 The Mountain King (*Phillips*) Frank C. Stanley
An impressive solo for tenor, with descriptive embellishments by the orchestra

9484 My Irish Rosie (*Jerome and Schwartz*) Ada Jones
An Irish love song as sung by Hattie Williams in "The Little Cherub"

9485 Memories of Home (*Friedrich*) Edison Venetian Trio
Played by a new instrumental trio—Violin, flute and harp

9486 We Have No One to Care for Us Now (*Henry*) Byron G. Harlan
By the composer of "After They Gather the Hay"

9487 Pedro, the Hand Organ Man (*Original*) Len Spencer
A familiar street scene, in which a hand organ is one of the features

9488 I've Got a Vacant Room for You (*Williams and Van Alstyne*) Bob Roberts
A new coon song by the writers of numerous hits

9489 High School Cadets March (*Sousa*) Edison Military Band
If you liked the "Manhattan Beach" March you'll like this. It is performed in the same manner—a la Sousa

9490 In a Chimney Corner (*Von Tilzer*) Harry MacDonough
The tune is the catchy thing about this song

9491 Will There be any Stars in My Crown? (*Sweney*) Anthony and Harrison
The popularity of these sacred numbers is growing with each new selection

9492 All In Down and Out (*Smith and Johnson*) Arthur Collins
A coon song, the moral of which is "A dollar is your only friend"

9493 Not Because Your Hair is Curly Medley (*Original*) Albert Benzler
Xylophone medley made up of three popular songs: "Not Because Your Hair is Curly," "Won't You Come Over to My House" and "Alice, Where Art Thou Going?"

9494 Good Bye, Nellie Darling (*Morley*) W. H. Thompson
An Australian soldier song with some appropriate effects by the orchestra

9495 Flanagan's Troubles in a Restaurant (*Original*) Steve Porter
A finely vaudeville specialty

9496 Waiting for a Certain Girl (*Carle*) Billy Murray and Chorus
A comic song from Richard Carle's "The Spring Chicken"

9497 Lalu, Ma Lubly Queen (*Myddleton*) *A charming selection* Edison Concert Band

9498 We'll Be Sweethearts to the End (*Rose*) J. W. Myers
One of those beautiful "home" ballads, the subject of which appeals to everybody

9499 Bake Dat Chicken Pie (*Dumont*) *A coon song male duet* Collins and Harlan

9500 I Miss You in a Thousand Different Ways (*Cobb and Edwards*) Irving Gillette
One of the season's best sentimental songs, written and composed by two of the foremost producers of popular songs.

9501 The Grandmount Patrol (*Eilenberg*) Edison Symphony Orchestra
A patrol played by orchestra is new to our catalogue. Hear the approach and passing effect

9502 Merry Whistling Darkey (*Anonymous*) S. H. Dudley
One of the old-time darkey songs popular many years ago

9503 Rudolph and Rosie at the Roller Rink (*Original*) Ada Jones and Len Spencer
A Dutch character sketch, declared to be the best Dutch sketch since "Heinie."
Miss Jones sings, "Take Me on the Rollers" (Lone)

9504 Beauty's Eyes (*Tosti*) Edison Male Quartette
An unaccompanied male quartette, well known to music lovers

9505 The Record March (*Englemann*) Edison Military Band
A bright, snappy six-eight march, with plenty of vim and go to it

Edison Gold Moulded Records are made only in Standard Size. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

THE PROPOSED COPYRIGHT BILL.

As many of our readers probably know, very active efforts have been made during the past year to amend the copyright laws of this country, so that they shall apply not only to those intellectual creations heretofore contemplated, but also to many other fields, including perforated music rolls and talking machine records. The proposed copyright bill, in fact, attempts to cover so much that Mark Twain has expressed surprise that oyster culture should have been overlooked! On Monday, December 10 last, Frank L. Dyer, our General Counsel, addressed the Joint Committee of the Senate and House in opposition to the bill. Mr. Dyer's address occupied more than an hour in its delivery and was attentively followed by the members of the Committee. To attempt to reproduce the entire speech, would, of course, be impossible in this publication, but since Mr. Dyer, as the authorized mouthpiece of the company, was speaking in our direct interest and was voicing our own sentiments, a brief statement of his general position may be interesting. It was pointed out in the first place, that any attempt to apply copyright protection to a talking machine record would make the bill unconstitutional, at least so far as concerns the sections applying to those records. Any bill for copyright protection must be based on the Constitution, and that instrument refers only to the protection of "writings." Heretofore, this word as construed by the Supreme Court has been held to apply only to a *visible* embodiment of the author's idea, by which its sense is comprehended by *sight*. According to Mr. Dyer's position, if it was attempted to extend copyright protection beyond a writing, as thus interpreted, or in the case of music, the printed score, and if the law can protect the reproduction of sounds through the sense of hearing, it can be reasonably argued that by means of copyright, performers and confectioners might similarly protect their goods, which appeal to the mind through other senses. Of course, such protection is afforded by means of patents, and not by means of copyrights.

In the next place, it was argued that to attempt at this late day to modify our laws so as to hamper and levy tribute upon the talking machine industry, involving many millions of invested capital, and giving employment to many thousand men and women, would be most unfair and unjust, and opposed to broad considerations of public policy. The purpose of copyrights under the Constitution being "to promote the progress of science and the useful arts," to attempt in any way to restrict the general dissemination of music would have a directly contrary effect. Attention was then called to the fact that although the bill sought primarily to protect composers, it was really introduced on behalf of, and principally supported by, the music publishers. It was pointed out that under existing conditions, the composers are fully protected, since they have only to go to the individual talking machine companies with their new songs, and if the latter are acceptable, they would be liberally paid. In other words, a scoop in this industry is as valuable as in the newspaper business.

An interesting comparison was then made between copyright and patent protection, and it was shown that in the domain of patents, many intellectual ideas were held to be outside of the Constitutional protection. Among these were mentioned the discovery of the anaesthetic properties of ether; the electric telegraph; the rubber tipped lead pencil, and numerous valuable and meritorious suggestions, in all of which the patents were held to be invalid as defining inventions not contemplated by the Constitution. Under the law, an inventor cannot secure protection on a principle or idea, but only on the mechanism or means for carrying the conception into effect. Similarly, a composer, while entitled to a monopoly of his *printed or written* music, cannot successfully contend for such protection of his creation as to prevent its public performance, either on a phonograph, or vocally or instrumentally. To do otherwise, would be to place the composers of this country on a plane enormously higher than its inventors and to give them special privileges that the law has always refused to grant to inventors. Yet the Constitution puts the two classes of intellectual creators in the same category and intended for each the same rights and privileges as the other.

At the present writing, we are not able to state what disposition is to be made of the bill, but it is credibly rumored that the bill when presented to Congress will contain no reference to the talking machine industry. If, however, these rumors are unfounded, it appears very clear from the debates in the Joint Committee, that no bill will be introduced or passed that will in any way prevent us from making full and free use of such current music as we may consider necessary, so that our Jobbers and Dealers need have no fear that anything will be done that will prevent the business from being carried on exactly as it is now and always has been.

NEW GERMAN RECORDS.

By taking advantage of the splendid facilities of the recording department of our Berlin office, both as to artists and record-making skill, we are hereby able to present to Edison Jobbers and Dealers in the United States and Canada a list of thirty-five German selections of unusual attractiveness. The numbers and titles are those of Records that have been or are still appearing in our catalogue of foreign selections, but with one exception they have been made by new artists and are really new selections in every sense of the word. Being made in Germany they are absolutely correct as to music, enunciation, etc., and are sung by artists who sing in no other language. Some of these new selections bear numbers that have been cut from our Foreign Catalogue and still others are selections we have had no stock of for some time and were unable to make a supply because of defective moulds or other causes. All of the new selections, with changes in singers, new numbers, etc., will appear in the next Foreign Catalogue.

The artists whose names are for the first time given in this new list are: Robert Leonhardt, baritone; Max Steidl, tenor; E. Marian Alma, tenor; Carl Jörn, tenor; Siegfreid Adler, tenor; Emilie Kraus, tenor; Josephine Kraus, soprano; Carl Nebe, bass; Hermann Gura, baritone; Emilie Herzog, soprano; Franziska Krug-Elfgen, soprano; Nebe Quartette and the Edison Orchestra, Berlin.

No. 15109, "Stille Nacht, heilige Nacht," given below, takes the place of No. 12388 in our present catalogue. It is a most attractive quartette selection.

We are now in a position to at once fill orders for these selections, and Jobbers and Dealers will find it desirable to put in a stock for the benefit of their German trade.

12237	DAS FRÄULEIN AN DER HIMMELSTÜR (*Grun*) (*Formerly by anne singer*)	Franz Porten, Baritone
12239	AN DER WIESER (*Pesarl*) (*Formerly by Franz Porten*)	Robert Leonhardt, Baritone
12245	ACH, KONNT' ICH NOCH EINMAL SO LIEBEN (*Altivar*) (*Formerly by Hans Hofmann*)	Max Steidl, Tenor
12246	SEI GEGRÜSST, DU MEIN SCHÖNES SOMMER (*Pfaltzmann*) (*Formerly by Hans Hofmann*)	E. Marian Alma, Tenor
12248	ACH, WIE SO TRUGERISCH, "Singleton," (*Verdi*) (*Formerly by Hans Hofmann*)	Carl Jörn, Tenor
12250	AUS DER JUGENDZEIT (*Radecke*) (*Formerly by Hans Hofmann*)	Siegfried Adler, Tenor
12253	VERLORENES GLÜCK, (*Sprohnegker*) (*Formerly by Hofmann*)	Siegfried Adler, Tenor
12258	SCHWANLIED AUS "LOHENGRIN" (*Wagner*) (*Formerly by Hofmann*)	Ernst Kraus, Tenor
12261	ICH WEISS EIN HERZ FÜR DAS ICH BETE (*Rodenwinsky*) (*Formerly by Hofmann*)	Siegfried Adler, Tenor
12262	ZWEI DUNKLE AUGEN (*Heinz*) (*Formerly by Hofmann*)	Robert Leonhardt, Baritone
12264	ARIE AUS "DINORAH" (*Meyerbeer*) (*Formerly by Schumann*)	Robert Leonhardt, Baritone
12275	HAB' ICH NUR DEINE LIEBE, AUS "BOCCACCIO" (*Suppe*) (*Formerly by Emmy Reimann*)	Josephine Kraus, Soprano
12372	DER RATTENFANGER (*Hofmann*) (*Formerly by Porten*)	Carl Nebe, Bass
12375	ACH, ICH HAB' SIE JA NUR AUF DIE SCHULTER GEKÜSST, AUS "DER TETTLESTUDENT" (*Littlitzker*) (*Formerly by Porten*)	Robert Leonhardt, Baritone
12376	FATA MORGANA (*Linzdahafer*) (*Formerly by Porten*)	Robert Leonhardt, Baritone
12379	WALDANDACHT (*Alt*) (*Formerly by Porten*)	Carl Nebe, Bass
12387	MAG DER HIMMEL EUCH VERGEBEN, AUS "MARTHA" (*Flotow*) (*Formerly by Hofmann*)	Carl Jörn, Tenor
12393	BALLADE, "DIE UHR," (*Loewe*) (*Formerly by Schumann*)	Hermann Gura, Baritone
12396	NOCH SIND DIE TAGE DER ROSEN (*Baumgartner*) (*Formerly by Schumann*)	Carl Nebe, Bass
12397	WO DU HINGEHST, TRAUUNGSGESANG (*Hildach*) (*Formerly by Schumann*)	Robert Leonhardt, Baritone
12400	PAGENARIE AUS "DIE HUGENOTTEN" (*Meyerbeer*) (*Formerly by Emmy Reimann*)	Emilie Herzog, Soprano
12409	REICH' MIR DIE HAND, MEIN LEBEN, AUS "DON JUAN" (*Mozart*) (*Formerly by Walter and Hofmann*)	Carl Nebe, Bass, and Hans-Elfgen, Soprano
12410	ICH SETZT' DEN FALL, AUS "DER BETTELSTUDENT" (*Millöcker*) (*Formerly by Walter and Hofmann*)	Hans-Elfgen, Soprano E. Marian Alma, Tenor
12721	RADETSKY-MARSCH (*J. Strauss Sen*) (*Formerly by Peerless Orchestra*)	Edison Orchestra, Berlin
12722	TORGAUER MARSCH (*Preisfisch d. Grosz*) (*Formerly by Peerless Orchestra*)	Edison Orchestra, Berlin

12723	DER ALTE PARISER EINZUG-MARSCH, 1814 (*Formerly by Peerless Orchestra*)	Edison Orchestra, Berlin
12724	HOHENFRIEDBERGER MARSCH (*Friedrich d. Grosz*) (*Formerly by Peerless Orchestra*)	Edison Orchestra, Berlin
12725	MARSCH DER FINNLANDISCHEN REITERER (*Formerly by Peerless Orchestra*)	Edison Orchestra, Berlin
12726	ARMEE-MARSCH, No. 113 (*Formerly by Peerless Orchestra*)	Edison Orchestra, Berlin
12727	KAISER FRIEDRICH, MARSCH (*C. Friedemann*) (*Formerly by Peerless Orchestra*)	Edison Orchestra, Berlin
12728	BARATARIA-MARSCH, NACH MOTIVEN DER OPERETTE "DIE GONDOLIERE" (*Arthur Sullivan*) (*Formerly by Peerless Orchestra*)	Edison Orchestra, Berlin
12729	SONNENLICHT, SONNENSCHEIN (*Liebe*) (*Formerly by Münch*)	Robert Leonhardt, Baritone
12733	BEHÜT' DICH GOTT, AUS "DER TROMPETER VON SACKINGEN" (*Messler*) (*Formerly by Münch*)	Robert Leonhardt, Baritone
12806	DAS LIED VOM SÜSSEN MÄDEL, AUS DER GLEICHNAMIGEN OPERETTE (*Stolzman*) (*Formerly by Peerless Orchestra*)	Edison Symphony Orchestra, Berlin
15109	STILLE NACHT, HEILIGE NACHT (*Franz Gruber*) (*Formerly No. 12388 by Hofmann*)	Nebe Quartette, Berlin

RETROSPECTIVE AND PROSPECTIVE.

The curtain has rung down upon 1906 and with it has closed the greatest year that the Edison Phonograph has ever known. In the language of the times, the year 1906 "made good" from an Edison standpoint. It opened suspiciously with trade in splendid shape and every indication pointing to a twelvemonth of great prosperity. Each new month since then has brought a greater volume of business than the previous one. Month after month the popularity of the Phonograph has grown in an ever-increasing circle. Now it occupies a position of unquestioned supremacy as the musical instrument of the masses, and it is rapidly fulfilling Mr. Edison's expressed wish that one may find its way into every home. Its merit has to a large extent dissipated the prejudice engendered by the early types of machine and by some of those even now before the public.

What is the outlook for 1907? Notwithstanding the great Edison business of the present, there seems to be no reason why the increase in the coming year should not be as large as was that of 1906 over the previous year. The conditions are ideal for an Edison business of still greater volume. There is an Edison Phonograph in nearly one million homes in this country to-day, but this number is small compared to the nearly eighteen million homes occupied by the people of the United States. Nearly seventeen million homes are, therefore, possible customers for an Edison Phonograph. Consequently there is no limit to the possible sales. The Edison Phonograph possesses merit second to no similar instrument extant; its reproductions of sound are unequalled for naturalness, purity of tone and smoothness. Every Edison Dealer is an enthusiastic salesman of Edison goods, for, aside from the money-making possibilities of the line, which are not inconsiderable, he knows that the deal he gets from the National Phonograph Company is the squarest of square. He knows that nothing is being left undone to improve the business for his benefit and he loses no opportunity to show his appreciation. Then more money than ever is being spent for advertising and publicity of all kinds; and the selling force is being urged to greater activity.

With such conditions at work it cannot be questioned that 1907 will be a wonderful year for the Edison product.

PUBLISHERS OF MUSIC IN MARCH LIST.

The publishers of the compositions made for our March list of Records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers:

9482	The Uhlans' Call—Hawkes & Sons, London.
9483	The Mountain King—Jos. W. Stern & Co., New York.
9484	My Irish Rosie—Francis, Day & Hunter, New York.
9485	We Have No One to Care for Us Now—Jos. W. Stern & Co., New York.
9488	I've Got a Vacant Room for You—Jerome H. Remick & Co., New York.
9489	High School Cadets March—Harry Coleman, Philadelphia.
9490	In a Chimney Corner—Harry Von Tilzer, New York.
9492	All In Down and Out—Gotham-Attucks Music Co., New York.
9494	Good Bye, Nellie Darling—Allen & Co., Melbourne, Australia.
9496	Waiting for a Certain Girl—M. Witmark & Sons, New York.
9497	Lily, My Lassie Queen—W. H. Myddleton, London.
9498	We'll be Sweethearts to the End—Willis, Woodward & Co., New York.
9499	The Two Chickens Pie—M. Witmark & Sons, New York.
9500	I Miss You in a Thousand Different Ways—Gus Edwards Pub. Co., New York.
9501	The Guardsmount Patrol—Carl Fischer, New York.
9504	Beauty's Eyes—Geo. Molloy, New York.
9505	The Record March—Orpheus Music Co., Philadelphia.

PRINTED MATTER.

Within the next two weeks we will mail to the entire trade copies of the new numerical and alphabetical Record catalogues, Forms Nos. 1020 and 1025. The former will contain all Records, both domestic and foreign, to and including January. The latter will contain only the domestic list to January inclusive. Jobbers' orders will not be filled till after this mailing is done, and even then only limited quantities will be supplied. These catalogues are for trade use only and should not be used as order blanks for ordering a few Records. Dealers are requested to retain and not throw away the copies mailed to them.

Supplement No. 5, of the Grand Opera Records, to be sent out with these Records on January 27th, is really a complete catalogue of the entire Grand Opera list. Descriptions are printed of the five new titles, and the preceding forty are listed in a more simple form. It is a tastefully printed booklet and should prove an excellent means for getting business for these fine Records.

During January we are going to ship each Jobber a quantity of placards in two colors, showing an enlarged reprint of the advertisement depicting the King of England listening to his own speech. The moral of this advertisement is that we are all kings when we have Edison Phonographs, for we can then have our own shows. Jobbers are asked to give copies to Dealers who will agree to display them. These shipments will exhaust our stock and the form will not be reprinted unless the demand should be unusual.

We have just mailed every Jobber and Dealer a complete set of the advertisements that we are running in magazines and newspapers, the combined circulations of which equal half the population of the country. These advertisements are well worth the careful perusal of every one in the trade.

AN ANNOYING SITUATION.

One of the perplexing problems constantly before our Advertising Department is to find a way to induce the trade to look at the sample forms of printed matter mailed them and to read the PHONOGRAPH MONTHLY. Every day we receive letters which show that even some Jobbers pay no attention to anything of this kind sent to them by mail. In fact, some Dealers seem to feel a pride in saying that they received a certain piece of printed matter but threw it away without looking at it. Or they received the PHONOGRAPH MONTHLY but hadn't had time to read it over. One Jobber recently wrote that eight of his Dealers had asked him for a list of December Records, although they had received a Dealer's order blank and a copy of the October PHONOGRAPH MONTHLY. He wanted us to put a subscription price on the PHONOGRAPH MONTHLY, believing that if they had to pay for it Dealers would read it each month. The large number of Dealers who did not avail themselves of our offer to give them a handsomely framed copy of the Massini picture shows that they did not read the offer, and as they steadily refuse to read our mail matter they probably don't know of the offer yet. It is hard to account for such perverseness. Everything that we send to the trade is intended to improve the business of all Dealers, and it is difficult to understand why they cannot see it in that way and welcome the coming of our literature. Jobbers might aid the cause by calling the attention of their Dealers to their shortsightedness.

JUST A LITTLE PATIENCE.

When Dealers receive advance copies of new catalogues, folders, etc., from us they must not expect to find their Jobbers with a big supply on hand, ready to fill their orders. In most instances the best that a Jobber can do is to take your order and fill it when his own order is filled. By not advising Dealers concerning new forms far from four to six weeks after they had been sent to Jobbers we could arrange to stock up the latter in advance, but we have always felt that this would result in some Dealers getting forms far ahead of others. Under such a plan, Dealers in the habit of calling on their Jobbers would learn about new forms and get supplied ahead of the Dealer located farther away. The latter, in many instances, would find the forms exhausted by the time he knew of their existence. Dealers can help us in our efforts to help them by having a little patience after giving an order for printed matter to their Jobbers. The latter will gladly furnish it as soon as he can.

ODD ORDER CLEVERLY FILLED.

The following telegram was sent by the Sampson Music Co., Edison Dealers at Boise, Ida., to Graves & Co., Edison Jobbers, of Portland, Ore.:

Rush express twenty each, Bullfrog, Waiting Preacher, Rockingchair, Mammoonoon, Sniffy, Father's, Sailor's, Dramatic, Mandy, Tydley, Blacksmiths, Jacksons, Chief, Camp-meeting, Downfarm, Chowder, Housetops, Bullfinches, Widows, Turkey.

The Sampson Music Co. report getting what they wanted.

AMONG THE JOBBERS.

The Western Talking Machine Co., of 1110 Olive street, St. Louis, have disposed of their business and have been removed from the list of Edison Jobbers.

C. B. Haynes, who recently established himself at Richmond, Va., as an Edison Jobber, has bought out Magruder & Co., and is now the only Edison Jobber in Richmond. He reports that he has been successful beyond his expectations.

The Ball-Fintze Co., of Newark, O., who have made a great success in Jobbing Edison goods, have opened a branch house at 108 West 3d street, Cincinnati, and are preparing to duplicate their Newark success in Cincinnati. They will carry a large stock of Edison goods and be prepared to meet every demand of the trade in that section.

Giles B. Miller, an Edison Jobber at Rochester, N. Y., died at his home in that city on December 9th. He was seventy-six years of age. He had been in the piano and music business in Rochester since 1873.

The visiting Jobbers at our New York office or factory during December included G. L. Ackerman, of Scranton, Pa.; H. D. Andrews, of Syracuse, N. Y.; Mr. Fintze, of Ball-Fintze, Newark, Ohio; Theodore P. Bentel, of Pittsburg, Pa.; W. J. Dyer, of St. Paul; D. S. Johnston, of Seattle, Wash.; E. A. Clintsman, of Kohler & Chase, Oakland, Cal.; H. O. Pardee, of H. L. Eilenberger, New Haven, Conn.; A. J. Pommer, of Sacramento, Cal.; J. A. Rickard, of Schenectady, N. Y., and Mr. Carroll, of the Utica Cycle Co., Utica, N. Y.

BUILDING PROGRESS.

There is little new to report concerning the extensions being made to the factory by this company. The new Record moulding building is fully enclosed and should be ready for complete occupancy in a month or six weeks. The extension to No. 17 and the connecting building are both enclosed. Two of the five floors are occupied. The others are being pushed as fast as possible. The building to connect the extension to No. 17 with the proposed extension to No. 2 has been begun, but it is probable that cold weather will interfere with its progress. Across Lakeside avenue from the office building a 200 foot addition to the four-story building of the Edison Storage Battery Co. has been begun, but this, too, will probably be delayed on account of the weather. The one-story addition to No. 1, 15 feet wide by 250 feet long, has advanced to a point where the weather will not affect its completion.

GRAND OPERA RECORDS.

The advance list of Edison Grand Opera Records adds five beautiful selections to the number already issued by the National Phonograph Co. The list introduces a new singer in Mario Ancona, a noted Italian singer, who is one of the stars at the Manhattan Opera House this season. In addition to five new selections, we are giving the titles of the forty Grand Opera Records previously issued, making a complete catalogue for your reference.

Are you giving these Grand Opera Records the attention that they deserve from an artistic standpoint? Are you making the mistake of thinking that, because you cannot sell as many of them as you can regular Records, they are not worth putting in stock? Of course, most of your present patrons want the more popular Records, but don't you also want the business of those who prefer music of an operatic or classical character?

With his order for Grand Opera Records, we shall send your Jobber a supply of handsomely printed booklets, showing the entire forty-five selections and half-tone pictures of the artists who made them. Get some of these booklets and mail one to each of the best families in your town, including those who do not own Phonographs. Write them a letter, pointing out that with an Edison Phonograph and these Records they may have a grand opera concert at any time, to say nothing of the more popular music if they prefer it. Grand Opera Records will often cause the sale of a machine when nothing else will do so.

EASTERN JOBBERS' ASSOCIATION.

The Eastern Talking Machine Jobbers' Association held its first annual meeting in New York on November 23d and elected the following officers:

President, W. D. Andrews, Syracuse, N. Y.; Vice-President, J. Newcomb Blackman, of the Blackman Talking Machine Co., New York; Treasurer, S. D. Davega, New York City; Secretary, A. H. Jacot, of the Jacot Music Box Co., New York City. These officers represented reelections with the exception of Mr. Jacot, who succeeds J. B. Kelsey. The Board of Directors included the above officers and W. A. Pardee, of Pardee-Eilenberger Co., New Haven, Conn. The association has thirty-nine members, representing nearly every Jobbing firm in the East. All but two are Jobbers of Edison goods.

I am a new Dealer in Phonographs, having started only a few weeks ago and am surprised how my business has grown in such a short time.—*Claude Harley, East Greenville, Pa.*

ABOUT INFERIOR PARTS.

The apparently growing practice in the trade of buying parts for Edison Phonographs from other sources than this company, either because they are cheaper or because of ignorance, is causing more trouble than most Dealers are aware of. A large proportion of the complaints made to us by owners of machines are found upon investigation to be due to the fact that inferior parts have been used to repair ones broken or worn-out. These owners were not aware of the imposition until it was pointed out by us, but had supposed they were getting parts as good as those in the machine originally. A further investigation has shown that the Dealer was equally unaware of the substitution, but had likewise thought he was getting parts.

Too much cannot be said in urging Jobbers and Dealers to be sure that they are getting genuine Edison parts when they buy. This statement is not because of the business we are losing through substitution, for it is too small a part of our yearly business. It is because we sincerely want owners of Edison Phonographs to get the best results from them. We do not want to see the reproduction spoiled through the inferior part when a few cents more would have bought a genuine Edison part. If Jobbers would buy Edison parts from us only, if the Dealers would insist upon having Edison parts when they buy, and if buyers of parts would insist upon knowing that they were getting genuine parts, the abuse would soon disappear.

There is no gain to anyone in selling inferior parts beyond the few cents difference in the original cost, and this is nothing compared to the loss of confidence when the buyer finds that he has been imposed upon. And the latter soon finds it out, when he tries to make the bogus parts take the place of the original ones. The Manufacturing Department of our business has seen so much trouble due to inferior parts and is so anxious to have the trade do what it can to lessen the evil, that it prepared the following reasons why genuine Edison parts should be insisted upon by everybody:

Belts—The essential features of Phonograph belts are that they be of a first class quality of soft pliable leather, of even thickness and width throughout their entire length, and when jointed that no extra thickness or lump is found by the joint; any belts that are uneven in thickness or width, or have a lump at the joint, will cause a Phonograph mandrel to run unevenly, thereby causing a waver in the tone. The same trouble will be experienced if a belt is too tight or too loose, as, if tight, it pulls so hard on the driving shaft as to cause undue friction in the same; and, if too loose, it will slip on the pulleys, thereby causing the mandrel to run unevenly, which produces a waver in the tone, or what is technically called poor regulation.

Main Springs—All main springs for Edison machines are made in very large quantities by expert spring makers, and the tempering is very carefully done, also the shape of the hole and bend in the end of the spring must be made exactly right or there is great danger of the spring slipping off from the spring hook in the casing and shaft. Any springs in which these points have not been carefully considered will not work satisfactorily in a Phonograph motor.

Governor Springs and Balls—In replacing governor springs and balls on a Phonograph governor, when the entire set is to be replaced, each spring and ball should weigh exactly the same as the others that are to be used on the governor, and if they do not the heavy ones should be filed down to the weight of the lightest one. If only one is to be replaced the other two should be dismounted from the governor and weighed to see if they are the same as the one which is to be put on. If this is not done and springs and balls are replaced on governors that do not weigh the same the governor will be out of balance and cause the motor to run unevenly, thereby affecting the tone.

Feed Nuts—All Edison feed nuts are made in specially designed tools and have a special shaped thread, and any feed nuts that are not made this way will not run properly on the thread of the Phonograph main shaft or feed screw, as if the pitch of the thread in the feed nut is not exactly the same as the shaft they will not fit together as they should to allow the shaft to run smoothly.

Button Arm Hooks.—These hooks must be made of the exact size wire and bent to the exact shape to work satisfactorily in Edison Reproducers. Poor reproduction will be the result if other size wire or different shape of hook is used.

Sapphires.—The reproducing button and recording stylus on Edison machines are made from genuine sapphire stones, and are made to a special shape and very highly polished so as to fit perfectly the indentations on Edison Records. Any departure from this shape or degree of smoothness will surely cut the Records and wear them out very much quicker than if the sapphire was properly made. Reproducing buttons made of glass should never under any circumstances be used, as they will invariably spoil the Records.

Rubber Gaskets.—The rubber gaskets used each side of the diaphragm in Phonograph reproducers must be made of the very best quality of pure Para rubber, of even thickness and width. Gaskets made of an inferior grade of rubber will not give good tones and will soon become hard and make replacement necessary.

HEARS PARENTS' VOICES FROM ACROSS OCEAN.

Rudolph Walter, of Council Bluffs, Ia., received to-day a unique season's greeting from his parents in England in the shape of a Phonograph Record upon which his parents talked to him. His sister also had songs sung into a Record one of his favorite songs. Walter says he will prepare a Record for his family and send it to them for the Christmas holidays—*Sioux City (Ia.) Tribune, Dec. 1.*

A TIP ABOUT THE FOREIGN LIST.

"It is too bad that so many Dealers know nothing about the Edison Records in the foreign catalogue," said L. Kaiser, manager of the talking machine department of S. B. Davega, New York City, to the editor of the PHONOGRAPH MONTHLY recently. "There are many fine Records in the foreign list that would find a large sale if Dealers knew more about them. For instance, there are about a dozen of these I feature among my trade and the order department at your factory will tell you that I order many of these numbers. They are fine and as good as anything in the domestic list. My Dealers are playing them for their customers and doing a nice business in them." At our request Mr. Kaiser furnished a list of these Records, as follows:

12945	Here, There and Everywhere—British Military Band.
13051	Farewell March—British Military Band.
13061	Kaiser Frederick March—British Military Band.
13065	Austrin March—British Military Band.
13069	With Sword and Lance March—British Military Band.
18578	Vals Poetico—Banda Estado Mayor.
18624	Patria Feliz—Banda Estado Mayor.
12737	Sin Esperanza—Banda Estado Mayor.
12752	Gran Corrida de Toros en la Plaza de "Mexico."
18762	Cebajes de Oro—Banda Estado Mayor.
18781	Monte Cristo—Quintete Jorda.

SALESMEN'S TERRITORIES.

The salesmen of the National Phonograph Co. are now distributed in the following territories:

J. W. Scott—Maine, New Hampshire, Massachusetts, Rhode Island and Connecticut.
C. George L. Holden—Vermont and New York State, except New York City, Long and Buckland Counties, Long Island and Southern.
J. R. Wilson—Greater New York, Long Island and New Jersey.
J. F. Stanton—Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, Kentucky and Tennessee.
W. H. Hoag—Pennsylvania and Ohio.
H. A. Tyrrell—Louisiana, Texas and Arkansas.
W. F. Herr—Wisconsin, Minnesota and Peninsula of Michigan, North Dakota and South Dakota.
A. Benner—Nebraska, Colorado, Wyoming, Utah, Montana, New Mexico and the following counties of Texas: El Paso, Brewster, Presidio and Smith, Randall, Potter, Oldham, Hartley and Dallam.
E. L. Fisher—Indiana and Southern Michigan.
M. H. Rreesch—Iowa and Illinois.
C. E. Roehr—Kansas, Missouri, Indian Territory, Oklahoma, and the following counties in Texas: Hancock, Hemphill, Roberts, Grey, Carson, Potter, Oldham, Hartley, Dallam and Sherman.
H. R. Miller—California, Washington, Oregon, Idaho, Nevada and Arizona.

FOREIGN RECORDS CUT OUT.

Notice is hereby given that we have no more moulds or masters for No. 12159, "Vals Las Golondrinas," and No. 12224, "Ojos Azules," both Spanish selections by Vargas. When our present stock of these selections is exhausted both will be put on our cutout list and omitted from the next edition of the Foreign Record Catalogue.

ADVERTISING EDISON GOODS.

On pages 16 and 17 of this issue are given copies of Edison advertisements that are appearing in the January issues of many of the leading publications of the country. One advertises the Edison Phonograph and the other advertises Edison Records. In magazines they are appearing on opposite pages and in other publications either side by side or one above the other. Each advertisement is strong in itself and each must be a potent factor in making sales. Together they will be irresistible. This plan of advertising in general mediums will be continued for some time at least and with the newspaper campaign being carried on in jobbing cities cannot, in our opinion, fail to make the Edison business in 1907 as much better than that of 1906 as the latter was better than the year before. The demand for Edison goods is bound to continue indefinitely, a fact that the trade should bear in mind both in advertising and in carrying an adequate stock. It will pay to keep a full line of machines and Records and it will pay to advertise the fact. Let us help. Let us help in parts of the country and Canada. A mere list of the names of these advertisements would include a large percentage of the progressive Jobbers and Dealers. This advertising proves that the trade is keenly alive to the advantages of letting the people of their localities know that they have Edison goods and thereby reap the benefit of the general advertising we are doing. A general advertisement in a general medium and a local one in a local paper makes an ideal combination for a Dealer.

JANUARY 28th IS THE DATE.

Since January 27th falls on Sunday, Jobbers should be careful not to allow Edison Records to leave their stores until 8 o'clock on the morning of January 28th. To permit them to go out on the Sunday or Saturday before will be a violation of the rules laid down for the proper regulation of the plan now being followed. This plan is working most satisfactorily to all interested in the business.

ONLY WANTED EDISON RECORDS.

Campbell & King, Edison Dealers at Oelwein, Ia., report that their store was entered by thieves recently but the only goods stolen were a lot of Edison Records. A lot of fine cutlery, revolvers, etc., and even money were available, but the thieves wanted nothing but Edison Records, a fact that seemed very strange to the victimized firm.

EDISON GOLD MOULDED RECORDS FOR MARCH, 1907.

Of all 'round merit and variety is the Edison list for March. At the same time there are several new and attractive features. A new Edison combination, the Edison Venetian Trio, composed of violin, flute and harp, make the first Record by these instruments ever listed in our catalogues. And a delightful Record it is, too. The Edison Military Band plays Sousa's famous "High School Cadets' March" just as Sousa plays it, and it's great. Len Spencer makes a solo Record with a hand-organ as its chief feature. The naturalness of the hand-organ would deceive anyone. Steve Porter's recital of Flanagan's troubles in a restaurant is real fun. J. W. Myers has another well-rendered ballad. S. H. Dudley shows that he is still a whistler of the first rank. There are also good things by Jones, Collins, Harlan, Stanley, Roberts, MacDonough, Thompson and all the old favorites.

No. 9282, "The Uhlans' Call," by the Edison Concert Band, is a composition by R. Eilenberg, descriptive of the different changes required in battle of the Uhlans, a body of lancers in the German army. Played with the dash and brilliancy essential to such a selection.

No. 9283, "The Mountain King," by Frank C. Stanley, is an impressive solo for basso, with incidental music by the Edison Symphony Orchestra, featuring various effects suggested by the words of the song. The music is by Walter A. Phillips, and the words by Percy Campbell Mason. The chorus:

For I am a seeker of lovely delight,
The storm is a song I sing,
My crown is a cloud, it my strength I am proud,
For I am the Mountain King.

No. 9284, "My Irish Rosie," by Ada Jones, is an Irish love song as sung by Hattie Williams in Charles Frohman's musical production, "The Little Cherub." It is an Irish lover's appeal to his Rosie to come out and spoon in the moonlight. The words are by William Jerome and the music by Jean Schwartz. To say that Miss Jones gives the song an artistic rendition is to state what all Phonograph owners know must be so. She sings with orchestra accompaniment.

No. 9285, "Memories of Home," by the Edison Venetian Trio, is a trio by Friedrich Guzman for violin, flute and harp. The first Record by these instruments ever made for the Edison catalogue. It is a thoroughly delightful selection. The air is charming and the effects of the three instruments are so artistic that after hearing the Record one cannot help hoping that others by the same instruments will appear later. An attractive feature is the harp cadenza. A harp Record is a novelty.

No. 9286, "We Have No One to Care for Us Now," by Byron G. Harlan, is a touching song of human interest, by the composer of "After They Gather the Hay." The words are by William Cahill and the music by D. R. Henry. Sung with orchestra accompaniment. Two little children, always at the foot of their class, failed to pass on examination day, and when told that no one would love them if they didn't learn at school, replied:

We have no one to care for us now,
We have no one to love us at all;
No one to bliss and caress us at night,
When our ev'ning prayer is said.
Since our mamma was taken away
We don't get along somehow,
This is why we didn't pass with the rest of the class,
We have no one to care for us now.

No. 9287, "Pedro, the Hand-Organ Man," is a solo Record by Len Spencer. The success of Record No. 9263, "Good-a-bye, John," in the February list, encouraged our Record Department in making a selection in which the hand-organ plays a more prominent part. The scene is laid in a city street and the characters are Pedro and his monkey; Bridget McFadden and a policeman. Pedro begins to play the "Marseillaise," and follows with the "Sailor's Hornpipe." Bridget appears and tries to drive Pedro away. To appease her he plays "Irish Washerwoman." All is well till Pedro wants a "nick." Bridget refuses it. To get square Pedro plays "Washt Ann Hinch." Bridget whacks him three times and cries for the police. Policeman rushes in and arrests Pedro for striking a woman. The patrol drives up. Pedro and his chattering monkey are placed in it. The policeman promises to speak a good word with the judge if Pedro will play "St. Patrick's Day." As the patrol wagon drives away this air can be heard, growing fainter and fainter till it dies away in the distance. These effects are very clever. The Hand-Record is most unusual.

No. 9288, "I've Got a Vacant Room for You," is a coon song by Bob Roberts. The vacant room is in the heart of the darkey lover, and he asks her to prove it by taking a peep inside, for she says that her room will be 23 if any of the other rooms are occupied. A new and rather cute variation of the old, old story. The song is by Egbert Van Alstyne (music) and Harry Williams (words), writers of many other widely known songs. Sung with orchestra accompaniment.

No. 9289, "High School Cadets March," by the Edison Military Band, is one of Sousa's famous marches, written several years ago but quite as popular as ever. It is played by our band in much the same manner as it is rendered by Mr. Sousa's own organization. The music swells from soft to loud and varies from slow to fast. First one and then another of the different instruments pick up the melody and then all play in perfect harmony. A most unusual piece of recording. If you liked "Manhattan Beach March," recently listed, you'll like this one even better.

No. 9290, "In a Chimney Corner," is a song by Harry MacDonough. The tune is the catchy thing about it, although the verses by Andrew B. Sterling are well up to his usual high standard. The music is by Harry Von Tilzer. The words picture the delights of courting in a chimney corner, before an open fireplace, when the winter winds are blowing and it is lulling and snowing. Made with orchestra accompaniment.

No. 9291, "Will There Be Any Stars in My Crown?" is a sacred selection by Anthony and Harrison. The demand for sacred numbers grows with each new addition to our catalogue. This one has been requested many times. That it is rendered by Messrs. Anthony and Harrison will please their many admirers. They sing it with orchestra accompaniment. The music of this hymn was written by John R. Sweney and the words by Elias E. Hewitt.

No. 9292, "All In Down and Out," by Arthur Collins, is a coon song by R. C. McPherson (words) and Chris. Smith and Billy B. Johnson (music), the moral of which is that a dollar is your only friend, and that when you are "all in down and out" and touch a friend for a loan the best that you can get is "Sorry I ain't got it; you could get it if I had it," etc. Sung with orchestra accompaniment.

No. 9293, "Not Because Your Hair is Curly Medley," by Albert Benzler, is a new xylophone medley arranged especially for our Record and made up of the following numbers in recent lists: "Not Because Your Hair is Curly" (Record No. 9268), "Won't You Come Over to My House" (Record No. 9324), and "Alice, Where Art Thou Going?" (Record No. 9274).

No. 9294, "Good-Bye, Nellie Darling," by W. H. Thompson, is an Australian soldier song, very popular here and tuneful enough to be a favorite anywhere. Some appropriate military effects by the orchestra enhance its attractiveness. Both words and music of this song were written by Arthur Marchant.

No. 9295, "Flanagan's Troubles in a Restaurant," by Steve Porter, is an Irish monologue, with incidental songs for a setting. Flanagan tells his troubles in an irresistibly funny manner. It's one of those Records that you can't laugh aloud while it's being played for fear you will miss some of the fun. You can only grin till it's ended. Then you have your laugh out and want it played over again. Mr. Porter has taken part in several other Edison Records, but this is the first one he has made alone.

No. 9296, "Waiting for a Certain Girl," by Billy Murray and Chorus, is a serio-comic song from Richard Carle's "The Spring Chicken," in which it is repeatedly encored at every performance. The Edison Male Quartette assists in the chorus and the orchestra accompanies the singers throughout. The music is by Milton W. Rush and the words by Richard Carle.

No. 9297, "Lolly Lolly Queen," by the Edison Concert Band, is a composition by W. H. Myddleton, of London, who styles it a coon serenade. A feature of the concerts by Sousa's Band. The composer's synopsis runs this way: Sambo, enamored by the beauty of Lalu and anxious to gain her love, visits her cottage one beautiful summer night to sing his love song in praise of her many charms. A nightingale, attracted by Sambo's melodious voice, joins in the serenade. The sweet warblings of the bird, united with Sambo's earnest pleadings, finally wake in the bosom of Lalu love's tender passion, and appearing at the window she gives her sweet consent to their union.

No. 9298, "We'll Be Sweethearts to the End," by J. W. Myers, is one of those beautiful "home" ballads, the subject of which appeals to everybody. The loving husband is telling his wife that they have been sweethearts for two score years and will be sweethearts to the end. No less appealing is the unusual musical setting. Samuel M. Lewis wrote the words and Dave Roze the music. Splendidly sung by Mr. Myers, with orchestra accompaniment.

No. 9299, "Bake Dat Chicken Pie," by Collins and Harlan, is a coon song built around this theme: "If you want to make a nigger feel good I'll tell you what to do; borrow a chicken from a neighbor's back yard and take it home with you." It has the old-fashioned swing that keeps your feet moving, and Collins and Harlan sing it as though they had the chicken and couldn't wait till it was baked. Sung with orchestra accompaniment. Frank Dumont wrote both words and music.

No. 9300, "I Miss You in a Thousand Different Ways," by Irving Gillette, is one of the season's best sentimental songs. Written by Gus Edwards (music) and Will D. Cobb (words), two of the foremost producers of popular songs. It is a song that exactly fits Mr. Gillette's voice. Sung with orchestra accompaniment.

No. 9301, "Guardmount Patrol," is a fine selection by the Edison Symphony Orchestra. The patrol effect is one of the best pieces of recording ever produced by our Recording Department. It begins so faintly as to be barely audible, gradually swells in volume and then passes away in the same remarkable manner as it begins. At the same time the air is most attractive. This Record is something new for our orchestra, previous patrols having been played by the bands. Richard Eilenberg is the composer.

No. 9302, "The Merry Whistling Darkey," by S. H. Dudley, is one of the old-time darkey songs, popular many years ago. The whistling and singing strains alternate with the delightful swing generally characteristic of these songs. Mr. Dudley shows that he has lost none of his skill as a whistler. It is some time since he has made a solo Record for our lists.

No. 9303, "Rudolph and Rosie at the Roller Rink," by Ada Jones and Len Spencer, is a Dutch character sketch, declared to be the best Dutch sketch since "Heinie." The title and the names of the artists making the Record are a sufficient guarantee as to its fun-making qualities. An opportunity is given Miss Jones to sing the new skating song, "Take Me on the Roller," written by W. H. Long, Jr., and Barney Gilmore.

No. 9304, "Beauty's Eyes," by the Edison Male Quartette, is an unaccompanied male quartette, well-known to music lovers. It is of the standard variety and offers a change from the male quartettes of the many popular order listed. The selection is one by Tosti, the composer of many delightful ballads. Sung with unusual spirit by our quartette.

No. 9305, "The Record March," by the Edison Military Band, is a bright, snappy six-eight march, with plenty of vim and go. It makes a good Record and is already a favorite.

It is said that Europe has eight papers devoted to the talking machine industry. They are published in England, Germany, France and Italy.

MR. EDISON AT WORK IN HIS LIBRARY, DICTATING TO THE BUSINESS PHONOGRAPH.

EDISON BUSINESS PHONOGRAPH—HOW THE TRADE MAY HANDLE IT.

Now that the holiday season is ending, with its many demands for Edison Amusement Phonographs and Records, there are many Jobbers and Dealers who wish to turn their attention to the introduction of the Edison Commercial System in their locality.

January presents the best time to make a canvass for the Edison Business Phonograph, because it is the time of year that firms are ready to consider new office systems, and practice economy which they would not do in the latter part of the old year, when stock taking was in progress, or when it was not desirable to add to the furniture in their offices.

Jobbers and Dealers, in order to understand the requirements of the Commercial Department, should send for the three booklets, together with the catalogue, the three booklets being entitled, "Asked and Answered," "How to Sell the Edison Commercial System" and "How to Install the Edison Commercial System." With these four pieces of literature the representative will clearly understand the responsibility and the expectations of entering into the commercial business.

Representatives who have had experience in the past few months have found that it is a good plan to go out and meet the large business firms of the city with an attractive proposition, like the Edison Commercial System. In canvassing and circularizing the business firms, the local representative becomes well advertised and prominent in business circles, where heretofore he has been practically unknown. The circularizing is done by the main office, who also furnish plenty of attractive literature for general distribution.

Aside from the time of year the commercial prospects were never so bright. Business firms are rapidly coming to understand that the Edison Commercial System is not an experiment, but an established success which they must look into sooner or later or else become one of the class of firms who refuse to advance with the age and expect to drop out of the business race.

"Voice writing" is the best way to speak of the Business Phonograph to a customer who wishes to know all about the commercial proposition. If you simply explain that by dictating to the Business Phonograph the man writes automatically with his voice instead of obliging another operation of writing these sounds phonetically in a note book, you have made a comprehensive statement which is very impressive. After this, if you enlarge upon this simple statement and show how the machine, the numbered box, the correction slip, the scale and all members of the system have been worked out to duplicate the very best service of a human amanuensis, there are few brainy business men who can resist the temptation to make a trial of the system.

It is proper for us to repeat again the importance of a Jobber understanding that he cannot take up the Commercial line without purchasing at least one Business Phonograph and more probably two, which must be used to write his correspondence and thus demonstrate the system to customers who will ask about it. Furthermore, we want the local territory thoroughly worked by a representative if he is to take up the line; there is nothing in it for a representative to place a Business Phonograph in his office and wait for inquiries to come to him. It is necessary to visit the prospective enstomers in their business offices, and, if possible, show the machine there without waiting for a call at the store.

In answer to some Jobbers who have asked if they may not represent a certain large territory, we would say that the whole idea of representation is to establish a local service, without which no Commercial Department can be a success. The Jobber or Dealer who receives a commission for the sale of our machines is not paid for making the sale alone, but also for the service which he expects to give the customer in the matter of advice and inspection of the appliances during the next year. It is because there has been no serious consideration of this organized effort to guarantee the success of the commercial machines that the system of "voice writing" has not been more extensively adopted throughout the country.

The question of local representation is one that will now be presented by the Commercial Department of the National Phonograph Co. more forcibly than ever before. We wish to sell every large business firm in the United States and can only do it through a local representative, who will carry out the Edison one year guarantee. To provide for a large extension of business through local representation, a system of main office advice and assistance has been arranged, consisting of a report to the main office of the requirements of a business firm, explaining exactly where the appliances are to be used, and the peculiar situation of the dictators and transcribers. When the outfits are sent to the local representative to be installed there is a complete letter of advice sent with it, based on the representative's report. This and other important plans are in progress to extend "voice writing" into every business center in the United States. The Commercial Department will gladly explain further the advantages of taking up their line and the assistance they expect to render.

A CLEVER WINDOW DISPLAY.

In connection with window displays, we have what we think an attractive window displaying Records. While the actual display of Records in any quantity is not there, yet the result is attained.

Taking into account the wording on the Record boxes, that "Edison Records Echo All Over the World," we have taken a globe of the world and on the brass rim showing the degrees we have placed five Record boxes by cutting a slit in the bottom of each box, and putting them over the rim. These form a sort of half circle over the globe. Hanging under the globe, we have a small picture of Mr. Edison. The floor of the window is dark red and the sides and back are all red. In the front of the window we have placed an electric light, which throws the light just on to the globe and Record boxes, and a sign displayed at the back reads, "Edison Records Echo All Over the World." Over this sign is suspended the framed picture of the old couple listening to the Phonograph, and at the back corners a framed lithograph of Edison show cards. The only light in the window is the one throwing on the globe.

The idea may not be original, but we give it to you for what it is worth.—*M. W. Watt & Co., Ltd., Victoria, B. C.*

WOULD YOU?

[Copy of circular sent out by an Edison Dealer at McGraw, N. Y.]

A crow can make as much noise as a canary.

If you were buying a bird for music would you buy the crow because it was cheap?

Then why should you choose a noise machine instead of a music machine?

There is the same difference between the cheap machines and the Edison Phonographs as there is with the noise bird and music bird.

I have sold a large number of Edison Phonographs and Records, and am still selling them.

I have sold them to many music lovers in McGraw, Cortland, Truxton, Solon, Cincinnatus, Cuyler and Preetown, Willet, etc.

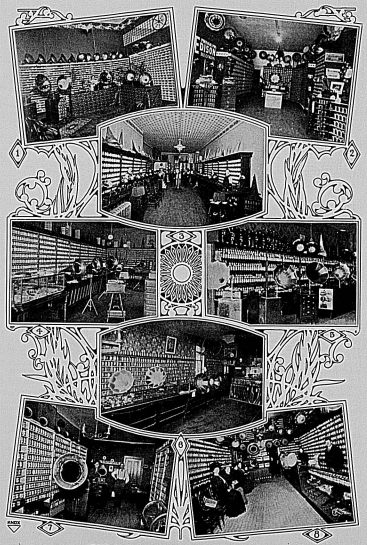
Ask these people if they did not get a square deal and are not satisfied.

If you would like the best machine made I will sell it to you for the next thirty days for One Dollar down and One Dollar a week until paid for.

This is guaranteed to be the very latest model Edison Phonograph and first class in every respect.

The price is the lowest for which the same machine can be bought for cash anywhere in the United States. You get the use of the Phonograph while paying for it.

I have the largest and best stock of Edison Records carried by any exclusive retail dealer in this section of the State.



I have just returned to factory all defective and soiled goods and have a clean stock. I receive the latest Records on the 25th of each month.

I expect to move into my new quarters on Main street about Jan. 1 and will then carry a still larger stock.

Come in and hear the band play and make yourself or some one else a Christmas present which will wear and will not be forgotten in a week.

B. T. BURLINGHAM,
Postoffice Building. McGraw, N. Y.

E. F. Hubner, an Edison Dealer at Stillwater, Minn., recently wrote: "I have recently concluded a sale to the Minnesota State Prison of an Edison Triumph, which will undoubtedly prove to be a source of a great deal of enjoyment and pleasure to the inmates."

GROUP OF STORES OF EDISON JOBBERS AND DEALERS.

1, George Beach, Houston, Tex. 2, Portland Phonograph Agency, Portland, Ore. 3, Minnesota Phonograph Co., St. Paul, Minn. 4, C. B. Wyeth, Newark, Ohio. 5, Frank Rogers, South Bend, Ind. 6, George E. Bass, New Philadelphia, Ohio. 7, St. Paul Phonograph Co., St. Paul, Minn. 8, Spokane Phonograph Co., Spokane, Wash.

A PACIFIC COAST PHONOGRAPH STORE.

In the group of Jobbers' and Dealers' stores on the opposite page is a view of the rear half of the store of the Portland Phonograph Agency, E. B. Hyatt, proprietor, Portland, Oregon. Mr. Hyatt accompanied the photograph with a description of his store that will be interesting to the trade in general, for it includes some novel features. Mr. Hyatt said:

The table immediately in front has a larger top revolving on the under top, the former having a quarter-inch thick strip extending one inch above the top of table which keeps Records or machines from slipping off the table. This top will readily accommodate 1 Gem, 2 Standards, 2 Homes and 1 Triumph. The horn in front remains stationary but can be instantly raised or lowered or extended outward to accommodate a 28-inch horn. You can readily see the great advantage of this table, as you can show the different styles without lifting a single machine, horn or stand. The legs are made of 1½-inch gas pipe, joined together in the centers of each leg with ¾-inch gas pipe threaded. On the top and bottom of the legs are 4-inch flanges screwed on. This gives stability to the table. The upper top is veneered and then shellaced, which virtually makes it one piece.

Immediately to the right in the picture is a better view of one of the Record cases—the one on which is tacked the "Records made to order" sign. You can readily see the general plan of these cases. Each one holds 800 Records, each Record always forward and showing an empty space when a Record is out. The case holds six deep, all Record roll, the case in front being labeled with Rapke's labels with titles. Each case is portable and I find it in my estimation the greatest time saver I have ever used. On the right I put the slow sellers in wooden boxes I had made. These boxes hold 12 Records, or two each of six different selections. On these boxes I use the numbers without titles but had the boy cut the names from the catalogue and paste them immediately beneath the numbers. This rack holds 2,400 Records, while the cases on the opposite side hold 4,800 Records, giving me a total of 7,200 Edison Records, every one within reach and always able to know when the stock is getting low. In the room behind the partition I have another large row of shelves on which I can place in boxes about 3,000 additional Records. Here is where I have my surplus stock, excepting the ones I carry from 25 to 50 of.

I have made the Phonograph business a study and really believe I cannot at present improve in any way whatsoever on the keeping of the Records in the display, saving of time and the fact that all stock is within reach. In the window I have 16 Edison Phonographs, and that fact alone will cause a nasserby to believe I have some faith in the Edison product.

If these facts, or rather suggestions, meet with your approval you are certainly at liberty to use them in any way you may see fit. The entire number of racks, shelves, boxes, labels, etc., complete cost about $100, but the saving in breakage, time and other advantages more than pay the difference of a cheap rack. The table costs about $14.

STIMULATES MUSICAL TASTE.

I have often seen it stated that the Phonograph is a means of cultivating a taste for the better class of music among the people, and from experience I have found this to be a fact. Only a few years ago, when the price of talking machines was not within the reach of people of ordinary means, I noticed that most especially in the smaller towns and hamlets, a traveling musician, an organ grinder or a "barn-stormer" show proved a great attraction and was received with the warmest of welcome. The people, most in particular those of the rural class, were anxious to hear music, regardless of quality—anything, just so it had some of the characteristics of music about it. But there has been a decided change since the talking machine has made its way into many of the homes. The Italian organ grinder and his cunning friend, the "monk," are a thing of the past. The traveling musician is now rarely if ever seen, and poor class shows are getting scarce. People have been cultivated to the best class of music and entertainments through the marvelous little entertainer—the Phonograph—and the above-named class of vendors could now not get a hearing, to say nothing of a recompense for their labor if they put in an appearance. Some time since, a gentleman who is somewhat of a musician himself, remarked to me: "These talking machines, I tell you, have spoiled matters for the average musician. One cannot get any appreciation from the people now unless he is a first-class performer on an instrument." And it is true. Another evidence of the Phonograph's power as an educator to the better class of music is that many people, especially of the rural class, who possess less knowledge of the musical art than their city brothers, when they first purchase a talking machine their selection of records will be composed of popular music, but after they own a machine for a time they begin to pick on some of the classic selections. It is evident that the Phonograph has a great future before it, and will replace many other instruments of amusement, as I believe it has a wider scope of usefulness than any other musical device. All that remains necessary is for the manufacturer to keep pace with the times in its improvement, and from present indications they have in the past year certainly put forth every effort to this end. To state that the present products of the best manufacturers in this line are wonderful, is not expressing it, but I candidly believe that another twelve months will lay present results deeply in the shade. And as a gentleman who had listened to one of the latest makes of machines, I was playing for him the other day, remarked: "Wonderful! wonderful!" Where will this end?—*Wm. P. Hunt in the Talking Machine World.*

New Edison Records for January

SEND for these three books to-day. They are the Edison free library for lovers of the Phonograph—new every month; free to every asker. Mailed December 27th.

Do you remember to buy new records for your Edison Phonograph? Have you forgotten how you liked the records you now have when you first got them? Do you notice how entertaining they are to your guests who hear them for the first time? Then bear in mind that every new record renews your interest in your phonograph. It is time you had some new music.

When you bought your first supply of records, you possibly bought the things you liked at that time. There are other good things—perhaps different from what you liked then, but which appeal to you now; which appeal to your friends. Besides, there are new records every month. The Edison Phonograph is the same phonograph. It is the records which change.

Go to your dealer and hear the new records.

Three Books Free—Send for the complete catalogue of Edison Records, the Supplemental catalogue of Edison Records for January and the Phonogram, describing the records for January. All published December 27. They will give you a new interest in your Edison Phonograph.

Thomas A. Edison.

National Phonograph Company
Lakeside Avenue **Orange, N. J.**

[Magazine Advertisement for January, 1907]

EVEN John Philip Sousa, who has no use for phonographs, has been forced to recognize the Edison Phonograph as a formidable competitor. The two-step king says that people will no longer go to concerts if they can have music in their own homes so easily and so cheaply as they can with the Edison Phonograph.

This is an unwilling tribute, but it nevertheless is a tribute. The man who has an Edison Phonograph has a concert in his own home. Even a king could not have more. At a store in your town you can hear the Edison Phonograph right away.

A GOOD SOLICITING LETTER.

[The letter printed below is one being used by A. F. Smith, an Edison Dealer at Holstein, Ia., for sending to prospective customers in his territory. It is printed in imitation of a type-written letter and is accompanied by a stamped post card for the reply of the recipient. It is reprinted in full because it seems to us to contain the requirements of so many Dealers who do not feel equal to the task of writing one themselves. Holstein is a place of less than 1000 population, but Mr. Smith carries the complete Edison catalogue of Records].

Holstein, Iowa, December 20, 1906.

Dear Sir:—I have sold 67 Edison Phonographs since I started with them a little more than a year ago; I want to make it a hundred before this year's up.

Mr. Edison himself made a statement not long ago that he would like to see a Phonograph in every home, and since I have from my own experience and that of every one of my Phonograph customers learned the true value of one in the home, in added pleasure, entertainment, instructiveness and comfort, I have that same enthusiastic feeling myself—not because of the pecuniary benefit, as I could make just as much money doing something else, but it is a genuine pleasure for me to sell an Edison Phonograph.

Not one of my customers would part with his Phonograph outfit. Isn't that a good recommendation?

If I had time I would pack up one (like most everybody around here has bought), with the proper size amplifying horn for the home and a dozen select records and bring it out to you and let you try it for a week or so and see just how it would suit you anyway, and then if you didn't want to buy it, I would take it to someone else, but just at this season of the year I am too busy at the store to take the time this would require and I am anxious to make my 100 sales as stated, so I am going to ask you to come in after this outfit I have mentioned and take it out and keep it a week or ten days on trial and then return it, if you want to.

I will charge you nothing for the use of it, whether you buy or not, and you will be perfectly welcome to return it if you want to.

This way is the most satisfactory to both of us. It saves me time and it gives you an opportunity to test the Phonograph where it is to be used, and you will have plenty of time to make up your mind whether you would like to have one, and it won't cost you a cent unless you buy it—and you needn't buy it unless you think it is worth the money.

Regarding price—Machines and records are the same everywhere and no one can make them any different, viz: Gem, $10.00; Standard, $20.00; Home, $30.00; Triumph, $50.00. Records, 35 cents each, $4.20 per dozen, but I have spent considerable time experimenting with different combinations to get the best results and can therefor be a decided help to you in selecting the outfit best suited for you.

I have amplifying horns from $1.50 to $15.00. Naturally some one of these would be the best for home use; I have found it.

I also have the largest stock of Records to be found in this part of the country.

Now will you take one of these on trial as suggested? If so, fill out the enclosed card and mail it to me at once.

Please return the enclosed postal card at once, as I need to know how to gauge my orders.

Yours truly,

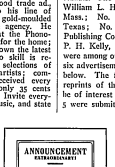
A. F. SMITH.

COULDN'T FIND A PRICE CUTTER.

We are going to drop you a few lines to pass to you a compliment, that, to us, seems to be one of the highest that could be paid you, regarding the method of placing your goods in the hands of the public. Yesterday our Mr. Hampton accidentally came across a man who buys everything possible from department, bargain house and catalogue stores. In fact, the man makes a fad of this class of purchases. Incidentally the conversation drifted around to Edison Phonographs and he told Mr. Hampton that he had written to every bargain house he knew, looked up all the catalogues of mail order houses, etc., and had been unable to strike a variation in price from that quoted in direct Edison advertisements, or the prices we had shown him on our wall as dealers' retail prices. Knowing the man as we do, we can realize what this means better than you. But it certainly proves the care you have taken to prevent injury to the trade and your goods by price cutting. And you will permit us to express our highest compliments to you for your thorough system, and constant watchfulness regarding this particular feature of the Phonograph and Record business. As Dealers we appreciate it most highly, as everyone connected with the distribution of Edison goods must do.—*Geo. D. Hampton Piano Co., Newport News, Va.*

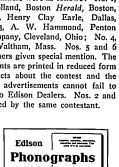
AN INTERESTING CONTEST.

The Inland Printer, of Chicago, one of the brightest publications in this country, makes a feature of conducting in its columns a series of "ad." setting contests open to all printers. In its July issue it announced the conditions of Contest No. 20. At the suggestion of a Texas subscriber it submitted the following copy to prospective contestants:



"W. T. Herrick, of 320 Washington street, the hardware dealer, wants a good trade ad, giving especial prominence to his line of Edison Phonographs and gold-molded records, for which he has the agency. He wants to impress the public that the Phonograph is the greatest entertainer for the home; that for $20 to $30 any one can own the latest improved machine, and that no skill is required to produce the finest selections of music by the world's greatest artists; complete list of latest records received every month, which can be had at only 35 cents each—and they can't wear out. Invite everybody to the store to hear the music, and state that he is having a large sale on this line of goods, and no dissatisfaction from any purchaser, etc."

It was stated that the copy was wholly fictitious. The contestants were required to set their advertisements to uniform size of two columns wide and six inches deep.



The winners of the contest were announced in the November issue, with reproductions of the advertisements of the successful individuals. The winners were as follows: No. 1, William L. Holland, Boston *Herald*, Boston, Mass.; No. 2, Henry Clay Earle, Dallas, Texas; No. 3, A. W. Hammond, Penton Publishing Company, Cleveland, Ohio; No. 4, P. H. Kelly, Waltham, Mass. Nos. 5 and 6 were among others given special mention. The six advertisements are printed in reduced form below. The facts about the contest and the reprints of the advertisements cannot fail to be of interest to Edison Dealers. Nos. 2 and 5 were submitted by the same contestant.

THE PHONOGRAPH IN THE FIELD OF SCIENCE.

The Record-Office of the Academy of Science in Vienna has been lately enriched with numerous records, says the *Phonographische Zeitschrift*, particularly in connection with five expeditions, which supplied interesting material for the study of philological science.

Prof. Dr. J. Schatz gathered in North Tyrol and Vorarberg specimens of German dialects on 41 cylinders. Dr. Pöch had taken with him a Phonograph of the Record-Office to New Guinea, and had sent back 32 excellent Records, which contained the language and music of the natives, especially of the Meumbo tribe. Particularly interesting are the war songs with drum accompaniment, and the drum signals with which the tribes are in communication from village to village.

Dr. Felix Exner recorded in India old Sanscrit songs and brought 68 unapproachable records of same.

Franz Scheierl, who specialized in Pinegau Dialects, supplied 32 cylinders to the Record-Office.

In addition to these, Field-Marshal Lieutenant Freiherr von und zu Eisentein placed at the disposal of the Record-Office cylinders made in connection with his trip to South America. These were made with an Edison Phonograph.

As well as the language and dialect records mentioned above, a quantity of records of the voices of celebrated personalities have been lately acquired. The recording of the voices of famous individuals is being carried on systematically.

The Record-Office expects shortly the return of an expedition from Australia, and this spring a machine and a supply of blanks is being sent to Greenland where Dr. R. Trebitsch and Dr. von Eisster will make records for the Record-Office.

THE WAY THEY ALL ARE THINKING.

The following interesting letter was written in reply to a "follow-up" inquiry sent to a gentleman who had some time previously asked us for catalogues:

South Coventry, Conn.

I was enjoying the beautiful music of an Edison Phonograph when my daughter brought me a letter from you inquiring whether or not I had purchased an Edison Phonograph. I did not intend to purchase one until Christmas, but I went to Willimantic a few days after I got your reply to my letter and called at the store of the A. C. Andrew Music Co. I was in a hurry, but finally told Mr. Andrew that I would listen to just one Record, "I Surrender All." Well! I have listened to talking machines every chance I have had since they were placed on the market but never heard one that was so beautifully clear, smooth and distinct as that one. As soon as the singing stopped I said, "I will take that Phonograph and Record." I have 39 Records. There are a good many phonographs and talking machines in town, but every one that hears this one says it is the best one they ever heard. It is a "Standard," with a horn 256 inches long and 22 inches wide at bell. I could write more about it but for a long time, but will not intrude further on your valuable time. With best wishes for your continued success.—*C. G. Coombs.*

What the "Other Fellow" Is Accomplishing

LANGUAGE STUDY IN CHICAGO.

Lyon & Healy Doing a Big Business With the Course Directed by the International Correspondence Schools.

(Special to The Talking Machine World.)

L. L. Lewis, representing the International Correspondence Schools of Scranton, Pa., is in charge of a special branch in the retail department of Lyon & Healy's devoted to the exploitation of language teaching through the medium of the talking machine. It is said that so far Lyon & Healy have disposed of over 200 outfits, mostly to the better class of customers, the facilities offered by the talking machine plan for studying at odd hours appealing directly to the busy man of affairs. All told, the International Correspondence Schools have disposed of 20,000 outfits, valued at $1,600,000.

Another story of a "dealer who has tried it." And a prominent firm in Atlanta is going to open a regular school of language study with the aid of our phonograph system. They are waking up all along the line to the possibilities of the language feature of the business. How about YOU? Do you realize what I. C. S. Language Outfits will do for YOUR business? Do you know that with these outfits you can reach a class of trade that would not think of using a phonograph for ordinary purposes, that you can reach those people who have become tired of their phonographs as an amusement fad, and that you can quickly interest your regular customers in this PROFITABLE use for the phonograph? "Dealers who have tried it" have increased their business from 10 to 20 per cent. and more. Don't be slow. Get into the game and get YOUR share of this trade. Write TODAY for further particulars.

THE YEAR OPENS WELL.

January has performed its part in making 1907 the greatest year in the history of the Edison Phonograph and the National Phonograph Company. It has broken all past records and set a pace that succeeding months will find it difficult to keep up with. In volume of orders, goods manufactured and shipped, collections, hands employed and, naturally, in expenditures the month of January outdistanced all of its predecessors. December had not closed before Jobbers began to place unusually large orders for stock Records, not waiting as heretofore until they had taken the yearly or semi-yearly inventory, and the orders are still coming. The increased business found our factory force fully prepared and waiting. Some of the increased facilities afforded by the new buildings came into play at once, making it easy to add to the Record making force and thereby increase the output. As a result many days in January exceeded the highest output of any single day in the past. In the same way, but not to the same extent as Records, the demand for machines has made it necessary to turn out more of them than was ever done in one month before. We regret that it is not deemed good policy to give figures showing the January output. It is doubtful, anyway, if we would get credit for telling the truth, for the actual figures would not be believed by the general public. Even men more familiar with the business would be incredulous.

These statements are of little interest to the trade and would not be made did we not desire to impress upon them the fact that the business in Edison Phonographs and Records is not something for a day or a week, but for an almost unlimited time to come. It is a business in which it is as safe to invest money in as that of a grocer or butcher. It has grown and grown, is growing and growing and will grow and grow in the future for every man with the faith necessary to put his money into it and push it. To the man who doesn't believe in it and who won't hustle for it, it offers little.

THE ADVANCE LIST OF APRIL RECORDS APPEARS ON PAGE 2.

NEW EDISON GOLD MOULDED RECORDS. ADVANCE LIST FOR APRIL, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **March 27th**, all things being favorable, but they **must not be placed on sale by Jobbers or leave their places of business, or be re-shipped to Dealers before 8 A. M. on March 27th.** Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after March 20th, but must not be circulated among the public before **March 27th.** Jobbers are required to place orders for April Records on or before **February 10th.** Dealers should place April orders with Jobbers before **February 10th** to insure prompt and complete shipment when Jobbers' stock is received.

9506 Gambrinus Polka (*Diel*) Edison Concert Band
The old, familiar and much played instrumental piece.

9507 Let It Alone (*Williams*) Ada Jones
A unique coon song by the writers of "Nobody". The semi-conversational way in which it is sung marks it a decided and interesting departure.

9508 Captain Baby Bunting (*Heil*) Byron G. Harlan
A real "Mamma's Boy" song, by the same composer.

9509 Angel's Serenade (*Braga-Hasselman*) Charles Schuetze
A harp solo unaccompanied.

9510 Farewell Killarney (*Edwards*) Irving Gillette
A new sentimental Irish march ballad. "Killarney" is the sweetheart to whom the Irish lad is bidding farewell.

9511 The Precious Name (*Doane*) Edison Mixed Quartette
The well known gospel hymn, sung by a quartette of mixed voices.

9512 If Anybody Wants to Meet a Jonah, Shake Hands with Me (*Hoyt*) Arthur Collins
A "hard luck" coon song that already has a good start on the road to success

9513 National Fencibles March (*Sousa*) Edison Military Band
One of John Phillip Sousa's first and best marches, also performed in a Sousa.

9514 Far Away (*Richmond*) Harry Anthony
A beautiful ballad. Its sub-title is "Some One Thinks of You To-night."

9515 When Bob White is Whistling in the Meadow (*Rosenfeld*) Harlan and Stanley
A sentimental song with a pretty melody and real touch of nature in the the story.

9516 If You Want to Pick a Fuss, Wait 'till the Sun Shines (*Furth*) Bob Roberts
A coon song, genuinely characteristic and, of course, funny.

9517 The Silvery Brook Waltz (*Brohan*) Edison Symphony Orchestra
One of the best orchestra selections that we have recorded in some time

9518 That's What the Rose Said to Me (*Edwards*) Louise Le Baron
A ballad of a somewhat higher order, sung by contralto.

9519 My Kickapoo Queen (*Reed*) Collins and Harlan
A Zulu-Indian kind of a coon song, sung as a male duet.

9520 Ida-Ho! (*Von Tilzer*) Billy Murray and Chorus
A western song, called the "melodious cyclone," that is sweeping the country.
The Edison Male Quartette joins in the chorus.

9521 Popularity March (*Cohan*) Vess L. Ossman
A lively march played as a banjo solo. George M. Cohan is the composer.

9522 The Tale the Church Bell Tolled (*Van Alstyne*) Harry MacDonough
A new descriptive song destined to become widely popular.

9523 How Matt Got the Mitten (*Original*) Ada Jones and Len Spencer
A vaudeville specialty describing a down eastern courtship. Miss Jones sings "I Don't Like Your Family" (Howard).

9524 The Bowery Grenadiers (*Kelly*) J. W. Myers
The late J. W. Kelly entertained thousands with this song.

9525 Sunbeam Dance (*Rolfe*) Albert Benzler
A sparkling instrumental number in schottische tempo, played as a belle solo.

9526 Do, Re, Mi, Fa, Sol, La, Si, Do (*Burt*) Edward Meeker
A comic song with an odd title.

9527 Flanagan on a Broadway Car (*Original*) Steve Porter
Another vaudeville specialty in which, as in the restaurant, "Flanagan's trouble" is the chief feature.

9528 When the Roses Are in Bloom (*Nattus*) Edison Male Quartette
A pathetic rustic-sentimental song, specially arranged as a male quartette.

9529 My Mariuccia Take-a Steamboat Medley (*Original*) Edison Military Band
Includes: "My Mariuccia Take-a Steamboat" "In a Chimney Corner" and "My Irish Rosie."

Edison Gold Moulded Records are made only in Standard Size. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

NEW YORK PHONOGRAPH CO. SUITS.

Jobbers and Dealers in the State of New York, against whom suits were brought by the New York Phonograph Company, have recently been served by registered mail with a notice wherein that company's attorney calls attention to a section of a code which gives him a lien upon **his clients** cause of action.

This does not effect or concern the Jobbers and Dealers, and no such notice was necessary to protect the attorney of that company, and we believe **the real purpose of the notice is to create the impression that the New York Company obtained a decision in its favor,** which is not the case, in fact the suits have not yet been brought to final hearing. **The only hearing so far has been on the motion for preliminary injunction, which was denied.**

UP TO THE DEALERS.

Judging by letters occasionally received from Dealers, there is an evident chafing in the trade over the sales made in Dealers' towns by those engaged in selling Phonographs on the mail order plan. Few of these Dealers realize that they have materially aided the mail order houses in making these sales. If a mail order man was asked for some of the reasons for his success, he would say that he advertised liberally and sold on installments. Pressed further, he would admit that he sold outfits, and even Records, in Dealers' towns because the average Dealer does not carry a proper stock of goods. Thus the Dealer contributes to his own undoing.

Now, there is nothing about a mail order business that a Dealer can not duplicate. He can advertise, he can carry an adequate stock and he can sell on installments. He can do even more. He can deliver to his trade and save the freight charges.

He can advertise. It is not necessary in a small place to spend much money. If a town is too small to have a weekly paper, two or three dollars a month will mail a folder or a circular to every possible purchaser in the place. The larger the town, the more money can be expended and the larger number of sales made. The success of any advertising will depend upon the stock a Dealer carries.

He can carry an adequate stock. On January 1st there were 1,387 jobbers in the complete domestic list of Edison Records. One of each will cost $291.27. One of each of the four popular styles of Edison Phonographs will cost $66.00 more. A system for carrying 1,387 Records will cost from $15 to $60. One each of the half dozen popular styles of horns may be had for $20 or less. With this equipment and proper facilities for getting more goods and accessories from a Jobber, no Dealer need fear outside competition. He can get and hold the business of every man or woman having a bit of local pride. He will also make money and will continue to make it as long as he keeps up his stock and keeps it clean and neatly arranged.

He can sell on installments. The average Dealer declares that he hasn't the necessary capital and cannot afford it. Now, does it require much capital? The machine most sold on installments is the Standard. This costs a Dealer $12. Most installment sales are made on the basis of from $3 to $5 down and weekly payments of $1. Suppose the first payment is $3. The capital required to carry the sale is $9, or an average of $4.50 for seventeen months costing eight cents if borrowed at 6 per cent. interest, and the deal makes $8. With a capital of less than $100 (worth $1.67 at 5 per cent. per four months) a Dealer can sell one Standard machine every week for twenty weeks and have a steady income of $8 a week, with no extra work than keeping a record of the weekly payments.

Some Dealers recognize the desirability of having a purchaser get a stock of Records, when an installment sale is made, for when he does he is not likely to tire of his Phonograph and want to return it or give up his payments. Therefore, they let him have the machine on a payment of $1, providing he will buy one dozen Records or more. This plan requires a little more capital, but it is more profitable in the long run.

Then, having installment purchasers come into a Dealer's store once a week is a source of much additional business. Few machine owners can resist the inclination to buy one or more new Records. This feature is so much thought of by some Dealers that they induce an installment purchaser to buy Records with his weekly payment and defer the final payment a week. This plan is quite safe after a machine has been at least half paid for. It is safe to estimate that three dozen Records will be sold to every purchaser of a Phonograph on the installment plan.

The above statements have been made to show that even small Dealers can easily sell Phonographs on installments and with a comparatively small capital. They are not to be taken as a desire on our part to induce any Dealer to follow the plan against his own judgment or inclination. Unless a Dealer believed in it, he would be wise not to sell on installments. Because installment selling has mainly been carried on in cities, the claim has been made that it is not adaptable to smaller places. This is not so, for where a Dealer knows all about the people of his town he is less liable to make bad accounts than the man in the large city. As a matter of fact, where ordinary care is taken to look up a purchaser's character and antecedents, there are few bad sales in the installment business. The plan of selling goods has been, and is, wonderfully successful. It is making the fortunes of thousands of men, and no man having an opportunity to follow it should pass it by without a thorough investigation.

GO AFTER NEW DEALERS.

An Edison Jobber recently commented upon the ease with which his salesman had established eighteen new Dealers in his State, which is one of the smallest in the Union. He had long ago felt that he had covered it quite thoroughly. He said that his man went into twenty-one towns of 1,000 or less population, and created a Dealer in all but three of them. One of the towns was four miles away from a railroad and the Dealer had to go after his goods in a wagon. Being asked for a reason for this success, he said it was because the Edison proposition had become so well known that it required little more than a presentation of the case to sell the goods.

The volume of the Edison business to-day bears out this statement that the Edison Phonograph has become well known. It has achieved popularity because it is the greatest music-making instrument of the day, because it is backed by the Edison name for quality and merit, because its standard is always maintained, because it has the good will of nearly 10,000 loyal Jobbers and Dealers, because it is sold under conditions that guarantee a "square deal" to all, and because it is and has been extensively advertised. To no one of these features is its success due. Without advertising none of the others would avail much, but without the others advertising would soon fail.

The aim of this company is to see a Dealer established in every city and town in the United States and Canada, and when that is done we shall be in a position to get the greatest benefit from our advertising appropriation. Jobbers can do much toward establishing Dealers in unoccupied towns by making a list of such in their territories and taking steps to cover them. The fact that they have tried some time ago and not been successful should not deter them from trying again. The Jobber named above had before failed in most of the eighteen towns referred to. When he tried again he found it comparatively easy. The Edison Phonograph is one of the best known propositions in this country to-day, and its fame is increasing in an astonishing manner. Jobbers who are relying upon the non-success of their previous efforts to sign new Dealers will find the situation quite different if they will again go after them. They should make up a list of towns where they know there are no Edison Dealers; get the names of firms in those towns who have stores and can sell Edison goods. If a salesman cannot be sent because of the cost, write each a carefully prepared letter, setting forth the advantages of carrying a stock of Edison Phonographs and Records, and then follow them up with other letters until a reply is received or a Dealer established. A systematic campaign along these lines will bring results that will surprise most Jobbers.

EXPENSIVE BUT IT PAYS.

The February advertising of this company in magazines and weekly publications again comprises two full pages or double spaces in each medium on our list. Copies of these advertisements are printed on pages 22 and 23. The Record page is given up to exploiting the Grand Opera Records, while the other page is devoted to Phonograph advertising, the copy being one of the silhouette series. This advertising, together with the newspaper advertising being done in every large city of the United States and Canada, is creating a tremendous demand for Edison Phonographs and Records. It is daily inducing nearly 1,500 persons to put Edison Phonographs in their homes. It is creating a splendid business for Edison Dealers, and only the conversatism of the latter in not doing their share of local advertising prevents them from doing a still larger business.

PRINTED MATTER.

The *Phonogram* continues to be very popular among the trade as a means of getting Edison Record business. Its edition grows larger each month and it is seldom that an order for copies is cut down. Beginning with the March issue, the *Phonogram* will appear in a new dress. It will have a new title page, a feature of which each month will be a funny design illustrating one of the selections in the monthly list. "Rudolph and Rosie at the Roller Rink" will be featured in the March issue. The descriptions of the Records will be made more interesting by the use of bright little silhouetted illustrations of the titles. Other features will be new headings and a new arrangement.

Dealers occasionally write for a supply of forms to be used for selling Phonographs on installments. It has never been possible to get out a form for this purpose, owing to the different legal requirements in each State. Dealers should not use blanks of this kind without making sure that they comply with the statutes of their States.

The Kern Music Company of Jersey City on January 4th, received a money order on account of a Phonograph sale, which had been mailed at St. Michael, Alaska, on November 7th. Nearly two months were occupied in transit.

AMONG THE JOBBERS.

Visiting Jobbers at our New York office during January, in addition to those who attended the informal dinner on January 17th, were the following: Theodore F. Bentel of Theodore F. Bentel Company, Pittsburg, Pa.; J. W. Dittrich, of Rudolph Wurlitzer Company, Cincinnati, Ohio; H. M. Holleman of Texas Phono. Company, Houston, Tex.; G. L. Ackerman of Ackerman & Co., Scranton, Pa.; J. N. Willys of Elmira Arms Company, Elmira, N. Y.; W. O. Pardee of the Pardee-Ellenberger Company New Haven, Conn.; John Sykes, Trenton, N J.; Robert Loud, Buffalo, N. Y.; Henry Weyman of H. A. Weymann & Son, Philadelphia, Pa.; H. Wonderlich of J. Samuels & Bro., Providence, R. I.; Mr. Marschalk of Musical Echo Company, Philadelphia; J. T. Leimert and Mr. Long, of Cable Company, Chicago, Ill.; D. R. Harvey and S. J. Francis of Iver Johnson Sporting Goods Company, Boston, Mass.; Mr Dyer of W. J. Dyer & Bro., St. Paul, Minn.; Mr. Brickett of Flint & Brickett, Springfield, Mass.; Fred Babson of Babson Bros., Chicago, Ill.

The Montenegro-Riehm Music Company have succeeded C. A. Ray as Edison Jobbers at 608 and 610 Fourth avenue, Louisville. Mr. Ray will remain with them as manager of the talking machine department.

M. W. Waitt & Co., of Vancouver, Canada, became Jobbers in Edison goods last month. They have been Edison Dealers for some time, having stores at Vancouver and Victoria. They will make Vancouver their wholesale headquarters and will continue the branch store at Victoria.

The style of the Edison Jobbing firm of the Wells Phonograph Company, at 45 North Ninth street, Philadelphia, has been changed to Louis Buehn & Bro. This involves no change in ownership or management. Mr. Buehn and his brother have been owners of the business for nearly five years.

NOT MERELY A TALKING MACHINE.

Too many people look upon the Phonograph as a talking machine. Usually these are the people who have not heard the Edison Phonograph. Of course, the Edison Phonograph is a talking machine, but it has far greater claims to the name "musical instrument" than the majority of other instruments. Dealers should not let a possible customer think of the Edison Phonograph as a talking machine pure and simple. Emphasize the fact that, with Edison Records, the Phonograph is undoubtedly the finest musical entertainer your customer can have in his home. A piano, violin, or guitar, or mandolin, or musical box, or organ—these all have their limits. But with Edison Records and an Edison Phonograph one can listen to the music of any instrument, and it is just as easy to listen to orchestral music or to marches played by well-known bands.

Remind your customer that the vast majority of Edison Records are of music and songs—comparatively few are talking Records pure and simple.

Then play over half a dozen Records which will bear out your arguments that the Edison Phonograph is the ideal musical entertainer. Play one of the Edison Grand Opera Records, then a band selection, next a humorous song, then a violin solo, then a Record introducing chimes and bells, and finish up with either a talking Record or one of a song introducing talking.

By the strong association of music with Edison goods Dealers can make many a sale to people who, because they have never heard the Edison Phonograph, look upon it as a "talking machine."

PERSONAL.

President W. E. Gilmore and General Sales Manager C. H. Wilson made a trip to Chicago last month partly for the purpose of conferring with the Western members of the selling force. A feature of the trip was a dinner at the Auditorium, at which reports from salesmen were heard and plans for the future discussed.

A FURNITURE FIRM'S LETTER.

[The letter printed below is one of a series being sent to their customers by Brown & Durham, a furniture firm at New Haven, Conn., who are selling Edison goods on installments.]

We have recently received a complete line of Edison Phonographs, and all the records now published, numbering 1,500, and shall also have the twenty-four new records which are published each month as soon as they appear.

We have fitted up the department, which is on the first floor near the front door, with comfortable chairs, and we cordially invite you to call and hear the new records.

If you have not heard of the new Edison you will be surprised and pleased at the absence of tone and the absence of the metallic sound so noticeable in the earlier machines.

We have selected your name from those on our books as one to whom we would like to sell an Edison Phonograph, and we offer you an instrument on exceptional terms at the regular cash prices, $10.00, $20.00 and $30.00.

If you are paying on an account we will add the Phonograph for the additional payment of one dollar weekly. If your account is closed at present, we will accept three dollars per week, which will cover the first payment, and one dollar a week after.

If you already own a Phonograph, we hope you will find our store a pleasant and convenient place to hear the latest new records. You are welcome whether you intend buying or not. We are sure that you and your family would be delighted with an Edison, and that it would prove a great source of entertainment and education.

BROOKLYN EAGLE COMMENDS IT.

The Edison Commercial System for dictation is in use throughout the offices of the Brooklyn *Eagle*, and that the system is popular is shown by the following article published in a recent issue of the *Eagle*:

The Business Phonograph is one of the latest developments in office time saving devices. It has the advantage of being always ready for work, and never has to be called away from some other task to take dictation. In brief, it is a Phonograph, built for the office desk, whose motive power is electricity, easily connected with a chandelier or by a direct wire with the electric current that supplies every business building nowadays. It is ready for action when a cylinder is placed in position and the current turned on. The cylinder will hold from fifteen to twenty letters, and as soon as the cylinder is full, it may be transferred to another machine in another room, if necessary, or desired, where the letter is reproduced in the ears of the typewriter, and by her transcribed on a machine. It is, of course, one of the devices of the wizard Edison, and has within the past ten years been brought to a high state of perfection. The idea of the Business Phonograph is not new. The first ones were put into commission as long as fifteen years ago. The idea then did not receive the favor that has come to it of late. The first machines, moreover, were not a business success. The new machines are complete mechanically, easily handled and skilfully made, and contain intricate mechanical devices and small in bulk.

The advantage in their use lies in this: That the Phonograph is always ready for action. The letter may be put upon it at any time, correspondence does not pile up on the office desk, memoranda may be put upon it, before the matter is forgotten or overlooked. Further advantage lies in the fact that the transcriber wastes no time in waiting for letters to write. As soon as a cylinder from one machine is finished another one may be taken up. It is thus possible for a business concern to lessen the number of typewriters employed in keeping them busy all the time.

Business men who have tried the machine are enthusiastic in its praises. It is coming into use very largely in concerns where a large amount of correspondence is handled. Those whose business it is to write letters find it a great convenience to have a device at hand which is ready at all times to take the matter that is to go out.

DEALERS' ADVERTISING.

Apropos of the prevailing popularity of the specially written letters and post cards for advertising purposes, George E. Buss, Edison Dealer at New Philadelphia, O., sent an unusually clever letter to his trade just before the holidays. Each letter was written in long hand, on fine correspondence stationery, the salutation comparing with the first name of the recipient, and each was sealed and mailed under two-cent postage. The letter is given in full below. Whether or not the recipient realized that the letter was an advertisement, the effect was all that the sender could desire:

NEW PHILADELPHIA, O.,
Thursday afternoon.

DEAR FANNY:—

I have been worried to death till now, to know what to get you for a present, but I've decided. You know it is hard to tell what they do want and like.

But a few minutes ago I stepped into George E. Buss's, and the pleasant clerk there, told me exactly what I wanted. I got the youngsters an air rifle, a pair of boxing gloves, a pair of skates, and I bought Tom Lawrence a razor, and another a dandy Phonograph.

I'm thinking, somewhat, of getting John a watch and a mouth organ, and you (well, you'll know Christmas morning.)

If you want to get me anything, go to George E. Buss's, he's the Phonograph man, and tell him I sent you and he will appreciate it. Don't *forget*.

Yours lovingly,
LILLIAN.

C. V. Mills, Edison Dealer at Battle Creek, Mich., sends photographs of several excellent window displays of Edison goods.

GOOD LETTER FOR DEALERS.

[One of our salesmen, who has been most successful in his efforts to assist Dealers in Edison goods, sends the letter printed below, as one that he has many times suggested to his Dealers and which has been used by them with excellent results. Any Dealer can readily adapt it to his own business.]

DEAR SIR:—I am enclosing you printed matter and catalog relative to the most wonderful invention and the most entertaining home convenience at present day.

The Edison Phonograph is the original and the only genuine Phonograph, manufactured by the only company manufactured by Thomas A. Edison, the most successful inventor the world has ever known. You may have been disgusted with some imitation Phonographs, you surely will be delighted with the genuine Edison Phonograph, which I have for sale at my store.

There are no interruptions at times for Edison records. You can understand them. Their volume and brilliant quality of tone is especially adapted to parlor use. This is a feature that Mr. Edison certainly, the inventor of the smallest detail or the natural tone of the voice are devoted out by mechanical, scientific means. Your home is not complete without an Edison Phonograph in your home. Most valuable as an educator and indispensable as a versatile entertainer. The most reasonable priced machine and the only pure life-like toned records on the market.

With the "Edison" you can make perfect records of your friends' voice—of grandpa's—of the baby's! Why not have "phonograph" of these in your home as well as of their faces to remember them by when they are gone?

I want to demonstrate to you how badly you need "Edison music" in your home.

It will be a real pleasure to me, and to you, if you will call and hear the wonderful Edison Phonograph of to-day. Or, we will be glad to bring one to your home for demonstration if it not convenient for you to call at the store.

Be yourself, your family, your friends and us a favor and let us hear from you soon regarding the Edison Phonograph.

A UNIQUE ADVERTISEMENT.

About seven years ago F. C. Pethick, agent for the Edison Phonograph, took a record of John Hennings' voice, who sang, "Nearer, My God, to Thee," into the instrument. Mr. Hennings died the 18th of December. On Christmas day, Mrs. John Morris, daughter of Mr. Hennings, and who has had the record put away ever since, reproduced his voice on the Phonograph. The Edison is the only machine on which this can be done. Why not buy the best? —*Bonnanville, Ont., News.*

DOUBTFUL POINTS LEGALLY INTERPRETED.

For the information of Jobbers and Dealers, and so that they will be in a position to answer certain questions which have been raised of late, the following series of questions and answers have been prepared by our Legal Department, and a copy furnished all our travelling salesmen. They should be carefully studied by every local Edison Jobber and Dealer, all of whom should not only comply with their interpretations, but should render us every assistance in our efforts to strictly enforce them.

1. *What constitutes a proper initial order from a new Dealer, and what is meant by a suitable store?*

The strict letter of the Dealers' Agreement requires a new Dealer to purchase at least three machines, *each of a different type*, and 150 Records; and such new Dealers must have an established store, suitable for the display and handling of goods of our manufacture, and at all times carry a representative stock. These provisions are becoming more important every day, owing to the fact that Jobbers' travelling men overlook these requirements, or wilfully disregard same in their efforts to secure new business for their houses.

A great many cases have been called to our attention recently where Jobbers have established Dealers who do not measure up to these requirements, particularly in respect to "an established store," and in most cases we have received strong complaints from the old Dealers. In many cases Dealers who do not measure up to this "Store" requirement, develop into price cutters. They take all chances of being suspended, because, as a rule, their investment is small, and if suspended they will not be left with a store or stock of goods on their hands. You will readily appreciate the unfairness of this toward an existing Dealer who has spent considerable time and money in building up his business.

On the question of the initial order of three machines, each of a different type, we are advised that in many instances Dealers prefer to order three or more machines, but do not like to order three types of machines. This would be permissible where all other conditions are complied with, *and where there is absolute certainty that the order is a bona fide Dealers' order.* But, in order to be on the safe side and avoid complaints, you should always endeavor to obtain the order for three machines, each of a different type, and instruct all Jobbers and their salesmen that these conditions must be strictly adhered to. We have had many cases called to our attention where three machines have been ordered, say two Standard and one Home, or two Homes and one Standard, by storekeepers who never had any intention of becoming regular Dealers, and who obtained the machines for themselves and their friends. This is one of the conditions that we try to prevent by the requirement of three machines, each of a different type, etc., and the requirement of a suitable store.

The requirement to purchase an initial order of not less than the quantity stated, applies to all new Dealers, also to old Dealers (except suspended Dealers) who discontinued the handling of our goods, and to existing Talking Machine Dealers who never handled our goods.

On the question of a store, we do not, of course, insist that a Dealer must have an elaborate store, or that he must have a store used entirely for his own business; that is to say, a Dealer will comply with requirements if he hires part of a store from another storekeeper for displaying and selling Phonographs. Where a man occupies a small private house, and arranges one of the rooms, say the front room on the first floor, exclusively for business, we would have a case where the Phonograph business conducted from a private house would comply with all of the requirements, since a room so fitted up would be fully equivalent to a store. Where, however, a Dealer is living, say, on one of the upper floors of an apartment house, and devotes part of his living rooms to the business, we could not consider this compliance with our requirements, since such use of the living apartments could not in any sense be equivalent to a store.

2. *Can an authorized Dealer sell out his business to another party, provided his successor continues the sale of our goods?*

This is permissible, provided the successor immediately signs the Dealers' Agreement, and we are promptly notified that he has succeeded to the business. As regards the initial order in such a case, we must look to the purpose of the requirement of the initial order. The object of the requirement to purchase three machines and 150 Records, and also to maintain a suitable store for the display of our goods, is: First, to prevent a Dealer obtaining our goods at less than list prices by pretending to become a Dealer; second, to prevent three or more persons getting together and having one of them purchase outfits for each at Dealers' prices, on the pretense of going into the business as a Dealer; and, third, to prevent, as far as possible, the handicapping of an active Dealer, who carries a representative stock, by a Dealer who merely makes purchases to fill orders from customers.

Having these points in mind, you will see that it would not be necessary to insist on the successor to the business making an initial purchase, for the reason that the business is already established and undoubtedly would have the required amount of goods on hand. If, however, the party selling out has not a representative stock of our goods on hand, then the successor would immediately have to order a sufficient amount of our machines and Records to make the stock a representative one. A representative stock undoubtedly means an amount equal to the initial order.

3. *Can a Dealer who has sold out his business open up in another town without placing the initial order required of a new Dealer?*

In answer to this question we will state that such a Dealer would be required to again sign the Agreement covering his new place of business, and must comply fully with all requirements of the Agreement, including the purchase of the initial order. This must be obvious, since it is evident that by selling out his former business he has no stock on hand, and in order to measure up to the require-

ments as to a representative stock he would certainly have to buy the initial quantity provided for in the Dealers' Agreement.

4. Is a Dealer allowed to pay a commission, and may the commission be paid in Records?

A Dealer is permitted to pay anyone for services rendered, but under no circumstances can commissions be paid in goods of our manufacture. If the person making or aiding in making the sale is not an employee of the Jobber or Dealer, and happens to be the owner of an Edison outfit, the situation obviously becomes all the more objectionable. If anyone sells or is instrumental in selling for a Jobber or Dealer goods of our manufacture, the sale must be made in the name of the Jobber or Dealer, and they must receive the full list price, and subsequently the commission may be paid. The object of this requirement is to have their books show the complete transaction, and to prevent, as far as possible, the agent of the Jobber or Dealer splitting his commission with a purchaser.

Commission schemes in various forms have been proposed, and while our Conditions of Sale do not prohibit them, we are opposed to any arrangement of this kind, for the very simple reason that price-cutting would be carried on indirectly and in a way difficult to prevent. We have always urged against commission schemes, and insist that commission should only be paid to persons regularly in the employ of the Jobber or Dealer. Even then the trade will find it necessary to be extremely careful, since it is a well-known fact that, no matter how small a house may be, salesmen or agents working on a commission basis are always willing to split commissions rather than lose sales.

The following are several good reasons why we do not approve of same:

First, a commission scheme, particularly one designed to induce owners of outfits to create business for a Jobber or Dealer, eventually, if not immediately, resolves itself into nothing more or less than price-cutting, for the reason that intending purchasers will get together and obtain machines at reduced prices by having one of their number purchase an outfit at the full list price, and subsequently supply the others with outfits, and divide the commissions between them.

Second, any commission scheme would enable Dealers to cut prices and claim that the cut represented a commission on a sale made in their behalf.

Third, under any commission scheme Jobbers would be in a position to pay commissions on single outfits or on Records equal to Dealers' discounts, and in that way injure regularly established Dealers, who are required to comply with our requirements as above outlined.

Fourth, we would have practically no control over the handling of goods manufactured and sold by us. While Jobbers and Dealers would be responsible for the acts of their agents, still all sorts of excuses would be raised and endless and constant friction would be created between Jobbers, Dealers and ourselves.

We undoubtedly can proceed against anyone in the courts for violating the restrictions which go with our goods, but this would involve keeping watch on a very much larger number of persons, and the probability of carrying on an endless number of suits, all of which, as you can readily see, would work injury to the contract system.

5. Can Jobbers or Dealers enter into contracts with newspapers to handle premium machines and exchange such machines for Edison machines, and also enter into a Contract with a subscriber for the purchase of Edison Records as a part consideration for the delivery of the premium machine without violating the Conditions of Sale?

This scheme, as it appears to us, works as follows: The Jobber or Dealer enters into an arrangement with a newspaper under which the newspaper agrees to advertise the proposition and also to canvass for new subscribers for the paper; and the newspaper further agrees to refer all subscribers, both old and new, who wish to take advantage of the premium scheme, to the Jobber or Dealer who, upon receiving a form of certificate issued by the newspaper, will deliver to the subscriber the premium machine *free of cost* (except a small payment to cover packing and delivery charges); and the subscriber on his part agreeing to purchase a given number of Records within a given time.

The premium machine costs the Jobber or Dealer about $2.00 net, for which he receives nothing from the subscriber *except a promise to purchase a given number of Records*, and hence the giving away of this premium machine constitutes an inducement to the sale of Records, and is a violation of Section 3 of the Jobbers', and Section 2, of the Dealers' Agreements.

Thereafter, if the subscriber wishes to exchange the premium machine for a more expensive machine, the Jobber or Dealer agrees to allow the subscriber a specified sum, for instance, $4.00, for the machine which cost the subscriber nothing; therefore, the Jobber or Dealer takes back a machine which cost him $2.00, and gives the subscribed the benefit of $2.00, in addition, for which the Jobber or Dealer receives no consideration in return. In this transaction the subscriber pays, say for an Edison Standard machine, in cash, $16.00, and a machine which costs $2.00, making a total of $18.00, and hence our list price is cut to the extent of $2.00, thus violating Section 1 and 2 respectively, of the Jobbers' and Dealers' Agreements. This basis of calculation, however, is entirely in favor of the Jobber or Dealer, while, as a matter of fact, the subscriber pays nothing more than $16.00 for the Edison machine. The subscriber pays absolutely *nothing* for the premium machine, and hence neither gives, forfeits nor loses anything when he returns the machine, so that the Jobber or Dealer in reality presents the subscriber with $4.00, or cuts the price on the Edison machine to that extent. This situation is exactly parallel to a Jobber or Dealer giving away a Talking Machine or any other article valued at $4.00, and the next day or later sells to the recipient an Edison Standard machine for $16.00 upon returning the gift. If this were permissible, then it should be equally permissible for a Jobber or Dealer to give away free an Edison Gem machine, or any other low-priced machine, as a trial machine, and accept that machine at list price in part payment for a higher-priced Edison machine. This manifestly is not permissible under our Conditions of Sale.

We understand it has been suggested that a violation of our Conditions of Sale would be avoided in the exchange of machines, if the premium machine be accepted in exchange for a large horn and crane and other supplies, and charge, or, rather pretend to charge, the full list price for the Edison machine. This suggestion, however, does not avoid our Conditions of Sale. Following out the figures above indicated, the subscriber would obtain there additional articles at less than current prices, and thus there would still be a violation of Sections 2 and 1, respectively, of the Jobbers' and Dealers' Agreements, since additional articles would be included with an Edison outfit at less than the current prices, which constitutes indirect price-cutting. Furthermore, the transaction would involve the giving away or selling of other goods at less than current prices as an inducement to the sale of Edison machines, which is a violation of Sections 3 and 2, respectively, of the Jobbers' and Dealers' Agreements.

There are additional points involved in this premium scheme which are contrary to our Conditions of Sale, but the foregoing are the important ones.

WHY IT GROWS.

The growth of the talking machine industry in the United States is the marvel of the business world. Even the bicycle boom was not more striking in the rapidity and permanency of its growth. The reason for its volume is advertising. Considering the small number of companies engaged in manufacturing talking machines, it is the best advertised business in the country to-day. Every manufacturer is a liberal advertiser. The combined effect of their efforts is proving an irresistible power in breaking down prejudice and building up in its place a widespread demand for these unique musical instruments. The advertising done by the National Phonograph Company helps its competitors and in precisely the same way we are benefited by the advertising of other companies. The effect upon the public of the combined advertising is to unconsciously arouse an interest in talking machines as a general proposition. A little later comes a desire to know about the different kinds. Then the announcements of each company perform their special function and the Dealers do the rest.

THE EDISON WON.

Adolph Bernath, an Edison Dealer at Pine Bluff, Ark., writes that Woodmen of the World Lodge, No. 6, of Pine Bluff, recently had a competition to determine what kind of a talking machine the lodge should buy. The Edison Phonograph won over three other kinds, two being disc machines and the other a cylinder.

PUBLISHERS OF MUSIC IN APRIL LIST.

The publishers of the compositions made for our April list of Records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers:

9506	Gaukeiana Polka—Carl Fischer, New York.
9507	Let Us Wander—The Gotham-Attucks Music Co., 36 W. 26th St.
9508	Captain Baby Bunting—Helf & Hager Co., New York.
9509	Angel's Serenade—G. Schirmer, Jr., New York.
9510	Farewell Killarney—Gus Edwards Music Pub. Co., New York.
9512	If Anything Should Happen to Meet a Lonah, Shake Hands With Me—Maurice Shapiro, New York.
9513	National Emblem March—Harry Coleman, Philadelphia.
9514	Away Up, Witmark & Sons, New York.
9515	Whistling Coon—Stern's Whistling in the Meadow—Jos. W. Stern & Co., New York.
9516	If You Want to Find Your Way Back You Can Shine—Maurice Shapiro, New York.
9517	Silvery Brook Waltz—Carl Fischer, New York.
9518	That's What the Rose Said to Me—Gus Edwards Music Publishing Co., New York.
9519	My Unknown Queen—M. Witmark & Sons, New York.
9520	Ida Is—Harry Von Tilzer, New York.
9521	Popularity March—F. A. Mills, New York.
9522	The Good Old Church Bell Tolled—Jerome H. Remick & Co., New York.
9525	Sunbeam Dance—Walter Rolfe Music Co., Rumford Falls, Me.
9526	Do, Re, Mi, Fa, Sol, La, Si, Do.—Jos. W. Stern & Co., New York.
9528	When the Roses are in Bloom—Willis Woodward & Co., New York.

FOREIGN RECORDS.

Two of the special list of twelve Foreign Records furnished by L. Kaiser and printed in the JANUARY EDISON PHONOGRAPH MONTHLY were given as 12737 and 12752. They should have been 18732 and 18752.

Notice is hereby given that we have no more moulds or masters for the following selections:

12082	El Celoso (Spanish).....Vergara
12145	Te Amo (Spanish).....Vergara
12152	Adieu,Mignon! Courage (French).....Barret
12362	Je vis dans la tempête ancrée (French).Lacroix
12380	Auf Fliegels des Gesanges (German)...Hofman
12386	Deine Mutter Augen (German).....Hofman
12498	Cielo e mar (Italian).....Sala
12507	Le so che il torto é mio (Italian).Gambardella

When the present stock of these selections is exhausted they will be put on our cutout list and omitted from the next edition of the Foreign Record Catalogue.

CORRECTION.

In the group of photographs of Jobbers and Dealers' stores in the EDISON PHONOGRAPH MONTHLY for January No. 1 was given as that of George Beach, of Houston, Texas. Mr. Beach was the photographer who made the photograph and an error was made in copying his name. The store was that of Taylor Bros., one of our most progressive Southern Dealers.

EDISON GOLD MOULDED RECORDS FOR APRIL.

Consider the April list as a menu of entertainment, but remember that it is prepared with the tastes and whims of over a million people in mind. That is why its range extends from the sublime to the ridiculous and back again. Some people think it is a waste of time to listen to anything but grand opera; others consider ragtime the one supreme proof of a Phonograph's ability to entertain, while still others have an ear only for sentimental songs. But whatever the individual taste of a Phonograph owner may be, the monthly output of new Records always includes much to his liking.

Dealers should not let a Phonograph owner lose interest in his machine. It is just as able to entertain him to-day as it was when he first bought it. Then he listened to it for hours at a time. He will do so again if you provide it with the new Records. Have him look over the list for April set forth in the following pages; pick out the ones that look good to him; then hear them reproduced. They will sound good to him also, on his own instrument, in his own home, to his whole family circle.

He is not tired of his Phonograph. He may be tired of the comic recitations he has and think the Phonograph has outlived its usefulness. If his instrument does not give him the pleasure it used to give, have him make it up with some of the good new things here offered. Every new Record means a new sensation.

No. 9506, "Gambrinus Polka," by the Edison Concert Band, is an old, familiar and much played instrumental selection. Every one accustomed to hearing band music will recognize this composition as an old-time friend. It was written by the late Rudolph Bial, formerly of Koster & Bial, the former well-known New York amusement managers. It was a favorite in the days of wax Records, but has not until now been made by the gold moulded process.

No. 9507, "Let It Alone," by Ada Jones, is a new song by Bert A. Williams and Alexander Rogers, that is full of good philosophy. The moral that it teaches is to mind your own business and don't meddle with that of others. Miss Jones sings the song in a conversational way that will make a hit. The Record gives two verses and two choruses. One of the latter runs this way:

Let it alone, let it alone,
If it don't concern you, let it alone.
Don't go four-flushin' and meddlin' on airs,
Quit stickin' into other people's affairs,
Mind your own business, and let it alone.

This song is being featured by Mr. Williams, who is a member of the famous Williams and Walker team.

No. 9508, "Captain Baby Bunting" (of the Rocking Horse Brigade), by Byron G. Harlan, is a march song by J. Fred Hager (music) and Ed. Gardenier (words), that will be met with that cordial welcome in thousands of homes always accorded to songs on childhood themes. One verse and two choruses are given. Mr. Harlan occupies an almost unique position in the talking machine world as a singer of these songs. This is because no one else has as yet been able to sing them quite as well as he. The words of "Captain Baby Bunting" are as cute as the music is attractive. Mr. Harlan makes the Record with orchestra accompaniment.

No. 9509, "Angel's Serenade," is a harp solo by Charles Schnetzer, a member of the Edison Venetian Trio, which last month made our Record No. 9286, "Memories of Home." Mr. Schnetzer's harp playing was a charming feature of this delightful Record, and it was at once decided to put out a solo for the harp. We feel especially gratified that the first harp solo made for the Edison Phonographs is such a splendid rendition of Bragn's well-known composition. Mr. Schnetzer is also a member and harp soloist of the New York Philharmonic Society.

No. 9510, "Farewell Killarney," is sung by Irving Gillette. The Killarney of this melodious, sentimental ballad is not the music song about locality in Ireland, but a sweet little Irish maid, to whom her soldier lover is saying farewell. Most artistically sung by Mr. Gillette, with orchestra accompaniment. The music is by Gus Edwards and the words by Ed. Madden. The chorus is:

Farewell Killarney,
Speak through your tears,
Don't mind the blarney,
I love in the present years, Acush-la!
Kiss me, Marvourneen,
But for love's sweet sake,
Re-ma-chree we'll meet
By Killarney's lake.

No. 9511, "The Precious Name," is a sacred selection by the Edison Mixed Quartette. This gospel hymn by W. H. Doane and Mrs. Lydia Baxter is perhaps better known as "Take the Name of Jesus With You." Its reproduction on our Record cannot fail to please the many thousands to whom these sacred selections appeal so strongly. The singers are unaccompanied.

No. 9512, "If Anybody Wants to Meet a Jonah, Shake Hands With Me," is a coon song by Arthur Collins. Two verses and two choruses of a real hard luck story are given in Mr. Collins' monthly solo contribution. It is a coon's harrowing tale of his daily race with ill-fortune, with the latter always finishing first. This is the way he sings of his woes in the chorus:

If anybody wants to meet a Jonah,
Shake hands with me.
I can't get rid of my troubles,
Such a mystery.
If luck was a thing people sold by the slice,
When I would go to buy it they would raise the price.
If anybody wants to meet a Jonah,
Shake hands with me.

Harry Hoyt wrote both the words and music. Mr. Collins sings with orchestra accompaniment.

No. 9513, "National Pencibles March," by the Edison Military Band, is another one of John Philip Sousa's first and best marches. It is also played in the characteristic manner of Mr. Sousa's own organization; that is, it is played with many lights and shades. Our Military Band has made a splendid Record of this selection.

No. 9514, "Far Away," by Harry Anthony, is a sentimental ballad by Frank J. Richmond (music) and Collin Davis (words). It has a sub-title of "Some One Thinks of You Tonight," that is more explanatory than the main title. Mr. Anthony's rendition of the song meets every requirement of the composers as to expression and artistic effect. The words of the chorus are very attractive:

Far away a vine of ivy twines around a kitchen door,
Far away a robin redbreast sings as sweetly as of yore,
Far away a light is burning in a window clear and bright,
Far away you're not forgotten, some one thinks of you to-night.

No. 9515, "When Bob White is Whistling in the Meadow," by Harlan and Stanley, is a sentimental song with a pretty melody and real touch of nature in the story. The beauty of the selection is enhanced by its rendition as a tenor and baritone duet. The voices of Messrs. Harlan and Stanley blend finely. They are accompanied by the orchestra. Both music and words of this song are by Monroe H. Rosenfeld.

No. 9516, "If You Want to Pick a Fuss, Wait 'Till the Sun Shines," by Bob Roberts, is a genuinely characteristic and funny coon song. It is another of those tales of colored connubial infelicity, and the concluding line of the chorus, "Cause I ain't a goin' to leave home in de rain," tells why he wants the fuss postponed 'till the sun shines. The music is by Seymour Furth and the words by E. P. Moran. The Record is made with orchestra accompaniment.

No. 9517, "Silvery Brook Waltz," by the Edison Symphony Orchestra, is one of Edward Hrabm's most delightful compositions. Splendidly played in concert style by our Symphony Orchestra, with introduction, waltz and coda. One of the best orchestra selections that we have made in some time.

No. 9518, "That's What the Rose Said to Me," by Louise LeBaron, is really a formal introduction of Miss LeBaron to the Edison clientelle, although she acquired a limited acquaintance from having made over Record No. 8223, "Whisper and I Shall Hear," formerly sung by Miss Morgan. Miss LeBaron has a clear, powerful, resonant contralto voice. She will at once become a most useful addition to the list of Edison artists. Her selection is a ballad of the higher order. Sung with orchestra accompaniment. Its chorus:

Somebody loves you, I know,
Some one cares for you so,
Somebody longs to be near you,
Somebody's heart beats true,
Somebody's thoughts are of you,
Wondering where you are,
When you are out sight,
Somebody does sigh,
That's what the rose said to me.

No. 9519, "My Kickapoo Queen," by Collins and Harlan, is a Zulu-Indian kind of a coon song. The idea of the words is quite new and the music is exceptionally catchy and odd. Dave Reed, Jr., wrote the music and words. Messrs. Collins and Harlan have caught the spirit of the song and given it a clear rendition, being accompanied by the orchestra. The chorus:

In Zulu land
I have a Kickapoo lady,
My castle grand
Is her wigwam green;
I've won her hand,
Keep a-tippin' your caddy,
All understand
She's my Kickapoo queen.

No. 9520, "Hi-de-Ho!" by Billy Murray and Chorus, is a Western song, called the "Melodious Cyclone," that has been sweeping the country and is now popular from coast to coast. The Edison Male Quartette joins in the chorus, and all the singing is accompanied by the orchestra. The chorus runs thus:

Ida the wheat when I don't go so fast, dear,
My pony won't last, dear,
So be patient, dear,
My bridle, I'll kiss you if I catch you,
Won't you stay, dear,
Don't run away, dear, my Ida-ho.

No. 9521, "Popularity March," by Vess L. Osmun, is a lively selection, played as a banjo solo by one of the best banjoists of the country. Written by George M. Cohan, composer of scores of popular songs. The orchestra accompaniment provides an attractive background to the banjo music.

No. 9522, "The Tale the Church Bell Tolled," by Harry MacDonough, is a new descriptive song by Egbert Van Alstyne, that has become widely popular. The story is on a new and impressive theme, and the musical setting is fully up to the merit of the composer's past successes. Nicely sung by Mr. McDonough with orchestra accompaniment.

No. 9523, "How Matt Got the Mitten," by Ada Jones and Len Spencer, is a funny vaudeville specialty describing a Down-East courtship that resulted unfortunately for Matt. Sal's reason is given in the chorus of the song, "I don't like your family," the words of which are by Hough and Adams and the music by Joseph E. Howard; sung by Miss Jones:

I don't like your family,
They don't want to visit with me
I don't want to be
Leading many blues in your father
While your wife's relations live with me.
I can't think your Uncle John
Ever had a collar on,
You can't get a wife
But what I get attached for life
I want an answer, no.

No. 9524, "The Bowery Grenadiers," by J. W. Myers, is a revival of an old song that will awaken more than ordinary interest. It will recall by-gone days, when the late John W. Kelly entertained thousands with it. Thirty or more years ago it was one of the most popular songs of the day. Sung with orchestra accompaniment.

No. 9525, "Sunbeam Dance," by Albert Benzler, is a sparkling instrumental number in schottische tempo, played as a solo with the bells. The bell tones are particularly clear and combine with the orchestra accompaniment to make an unusually attractive Record. Walter Rolfe is the composer.

No. 9526, "Do, Re, Mi, Fa, Sol, La, Si, Do," by Edward Meeker, is a comic song with an odd title. The music is by Benjamin H. Burt and the words by William Cahill. Sung with orchestra accompaniment. The Record possesses the unusual feature of four verses and three choruses. We quote the chorus to give its character:

Do, re, mi, fa, sol, la, si, do.
That's what my father used to teach me many years ago,
Dough nuts money, ain't it funny, everywhere we go
It' do, re, mi, fa, sol, la, si, do (dough).

No. 9527. "Flanagan on a Broadway Car," by Steve Porter, is another Irish dialect specialty, in which Flanagan tells in a funny way about what took place in a Broadway car. It is just as humorous as "Flanagan's Troubles in a Restaurant," issued last month. Mr. Porter has the brogue down to a nicety.

No. 9528. "When the Roses are in Bloom," by the Edison Male Quartette, is a pathetic, rustic-sentimental song, especially arranged as a male quartette. The solo part by the basso, and the duet by first and second tenors stand out prominently in their harmonious surroundings. Sung without accompaniment.

No. 9529. "My Mariuccia Take-a Steamboat Medley," by the Edison Military Band, includes three popular songs, "My Mariuccia Take-a Steamboat" (Record No. 9430); "In a Chimney Corner" (Record No. 9490), and "My Irish Rosie" (Record No. 9484).

GRAND OPERA RECORDS.

The fifth instalment of Edison Grand Opera Records are now in the hands of all Edison Jobbers. Every Dealer who has not already done so should put in a stock of the entire forty-five Grand Opera Records thus far issued, get a supply of supplements and go after some of the best people in his town. These high class Records will aid in affecting the sale of many Phonographs to people who with ordinary selections could not be induced to listen to one.

A LITTLE BEHIND THE TIMES.

Ralph C. Young, an Edison Dealer at Oliver, Neb., recently wrote to the H. E. Sidles Cycle Company, of Lincoln, Neb., as follows:

"Here is one that is too good to keep. You might send it in to the PHONOGRAPH MONTHLY:

"One of my customers from this city went to one of our neighboring towns, and, going into a Dealer's store, asked if they had any of Ada Jones' Records. He got this reply: 'Why, I didn't know Ada Jones was selling records.' The customer said he really did not think he would know it if she was, for all his records were at least a year old."

KING OF TALKING MACHINES.

"I am an Edison crank and think it is the king of all talking machines," wrote H. Sweetman, an Edison Dealer at Waco, Texas., just before the holidays. "Of course, I sell some of the other makes, but in my opinion the Edison has them all bent a city block. I advertise it and push it all I can. This month I am running two electrical trains in my show windows. They have attracted great crowds. I expect to have a big holiday trade."

OPERAS REPRESENTED.

The operas represented in the Edison list of Grand Opera Records are as follows:

"Aida,"	Italian...2
"Carmen,"	French...1
"Cavalleria Rusticana,"	Italian...1
"Der Fliegende Holländer,"	German...1
"Faust,"	German...8
"Die Meistersinger von Nurnberg,"	German...2
"Die Walkure,"	German...1
"Don Giovanni,"	German...1
"Don Pasquale,"	Italian...1
"Faust,"	French...1
	Italian...2
"The Huguenots,"	French...1
"Il Barbiere di Siviglia,"	Italian...1
"Il Trovatore,"	Italian...1
"Konigen von Saba,"	German...1
"La Favorita,"	Italian...1
"La Traviata,"	Italian...2
"La Gioconda,"	Italian...1
"La Sonnambula,"	Italian...1
"Lohengrin,"	German...3
"Mignon Lescaut,"	French...1
	German...1
"Martha,"	Italian...1
"Pagliacci,"	Italian...2
"Rigoletto,"	Italian...1
"Romeo et Juliette,"	French...1
"Tannhauser,"	German...1
"Tosca,"	Italian...1

INFORMAL DINNER.

The automobile show in New York City brings to the city each year a number of Edison Jobbers who sell automobiles (shall we say as a side line?) in addition to Edison goods. Following its usual custom, the National Phonograph Company became the hosts of such Jobbers as could be induced to attend an informal dinner at the Cafe Martin, Broadway and Twenty-sixth street, on the night of January 17th. Thirteen Jobbers, with ten of our own representatives, sat down. A number of other Edison Jobbers were in town during the week, but returned home too soon to attend the dinner. It was the intention of President W. E. Gilmore to be present, but he was unavoidably kept away. Those who attended were:

Representing the Jobbers—E. F. Taft, Eastern Talking Machine Co., Boston; C. F. Andrews and Mr. Corey, Boston Cycle and Sundry Company, Boston; T. H. Towell, Eclipse Musical Company, Cleveland, Ohio; C. B. Haynes, Richmond, Va.; W. D. Andrews, Syracuse, N. Y.; Louis Buehn, Louis Buehn & Bro., Philadelphia; W. E. Henry, Powers & Henry, Pittsburg; Mr. Gerson, Musical Echo Company, Philadelphia; H. E. Ellenberger, of Pardee-Ellenberger Company, New Haven; W. D. Griffin and Mr. Becker, American Phonograph Company, Gloversville, N. Y.; W. N. Davis, Forsyth & Davis, Kingston, N. Y.

Representing the National Phonograph Company—C. H. Wilson, A. Westee, F. K. Dolbeer, L. C. McChesney, William Pelzer, John E. Hehn, A. C. Ireton, B. R. Barklow, J. W. Scott, W. H. Hug, J. F. Stanton.

DID EDISON INVENT THE TALKING MACHINE?

The letter given below was written by Frank L. Dyer, General Counsel of the National Phonograph Company. It was addressed to J. R. Schermerhorn, Chairman of Directors of the National Phonograph Company, Limited, London, and published in the London edition of the EDISON PHONOGRAPH MONTHLY for January. This letter will be found very interesting by our readers. It sets at rest a controversy that has been carried on in London talking machine publication and straightens out some errors that have found believers through the persistency of companies and individuals unfriendly to Mr. Edison.

"My attention has been diverted to the two letters in the "Talking Machine News" and the issues of Octo-ber 15th and November 1st last, over the signatures of Otto Verfilz and Henry Seymour, in which they criticise Mr. Edison and The Edison Patent in Talking Machines. There are so many misstatements of fact and conclusions in the communications that I hardly think that they will be long allowed to disturb the verdict of history. Yet I cannot let the matter pass entirely without saying again what every well informed person ought to know concerning this invention.

"I have been associated with Mr. Edison as his counsel for years, am familiar with all his patents, have personally prepared this note books, have read the contemporaneous letters relating to his inventions, have considered the testimony given in the courts and in litigations within a few years after the development of these inventions, have frequently talked with Mr. Edison himself about his experiments and with representatives in order to develop a true history of his work, and I can therefore say that I shall have to say on the subject comes with a high degree of authority.

"It is a fact that long previous to Mr. Edison's association with the Talking Machine, experiments in the direction of recording sound waves upon tin foil were and then they had been attended with complete success. This was the well known 'Phonautograph' of Scott, by the employment in which a long bristle was vibrated by a diaphragm so as to develop a wave-like line on a blackened surface. This was not a talking instrument, however, was used only for the purpose of recording sound, and not for its synthesis. Although the Phonautograph had been well known for many years previous to Edison's work, no one ever perceived the possibility of reproducing the human voice by means of sound therefrom. The test of any invention is not that a thing appears obvious after somebody has invented it, but that it must follow as a necessary consequence of an original suggestion. When this test is applied to the Talking Machine invention of the latter must be given a very high place, and in fact, I think it is generally admitted by scientific men that the invention is one of the most remarkable mechanical accomplishments of any kind. Yet Mr. Edison's characteristic modesty reduced to writing even when he was never better shown than when he saw a Phonautograph for the first time in the Smithsonian Institution, Washington, and he was never more impressed with the possibilities of a machine. I regret that Scott having gone so far had not seen that the step which he missed could have been made comparatively easily and have been used to obtain a reproduction.

"It is not a fact, as stated by 'Verifax,' that the reproduction of sound in the method of the talking machine is identical with the original vibrations. That is not astonishingly so. Again 'Verifax' bases his statement he properly qualified. Again in this letter, shortly after Edison's invention had been made, but before his patents had issued Charles Cros deposited with the French Academy a sealed paper, substantially describing the modern graphophone, but that paper was not opened until long after Mr. Edison had been actually exhibited his machine in Europe and Edison were undoubtedly independent inventors. In the Edison Company, even contemporaneously Edison was slightly ahead of his French co-worker. Cros did not actually construct a machine, based his ideas solely on theory. Edison, however, built an actual working Phonograph and demonstrated the practicability of the art. The claims of Edison and Cros have been subjected to judicial determination and Edison has been declared the prior inventor.

"So far as Mr. Berliner is concerned, it is well known that his work followed Edison's by many years; he was not in any sense a contemporary.

"Regarding the claim that the Phonograph was the result of the joint work of Edison and Mr. Tainter, Mr. Arnold—if not wholly the work of Tainter—this absurd claim has not in my knowledge ever been asserted in Edison's lifetime. Arnold was merely a skilled mechanic in Edison's employ and constructed the first machine who was associated with Mr. Tainter. Testimony of everyone who might be familiar with the facts, as the time, and from whom Arnold was requested to build the first machine, expressed the view that Mr. Edison's ideas were far in advance of Tainter's. I do not question the statement that the Phonograph in its original form was a mere philosophical toy, but Edison, as many men realized, saw plainly that Mr. Edison had in the germ of its possibilities. As a matter of fact in 1878, Edison, in writing of the future applications of the invention, said:

"Among the many uses to which the Phonograph will be applied are the following:

1. Letter writing and all kinds of dictation without the aid of a stenographer.

2. Phonographic books, that will speak to blind people without effort on their part.

3. The teaching of elocution.

4. Reproduction of music.

5. The "Family Record"—a register of sayings, reminiscences, etc, by members of a family in their own voices, and of the last words of dying persons.

6. Music boxes and toys.

7. Clocks that should announce in articulate speech the time for going home, going to meals, etc.

8. The preservation of languages, by exact reproduction of the manner of pronouncing.

9. Educational purposes; such as preserving the explanations made by a teacher, so that the pupil can refer to them at any convenient time, thus saving the teacher's labor and enabling the Phonograph for convenience in committing to memory.

10. Connection with the telephone, so as to make the invention an auxiliary in the transmission of exact records of languages, whereby any sum of the present unnecessary and fleeting communications.

"I have no doubt that the defect from the credit which should be given to Edison, Bell and Tainter for their work in this field, but to the extent that the original phonograph, with its soft stanniol cylinder, its steel recording and reproducing needles, and its limited sound reproduction, must admit that this machine was simply a "toy" as the original tin-foil phonograph. It was not until Edison took up the Phonograph, about 1887, and succeeded in developing it commercially, that a practical instrument was actually established, and in this work I have no hesitation in saying that Edison's genius was pre-eminent. The accomplishment was that of Mr. Edison himself. He adopted the present standard wax record, the invention of the record, he invented the motor, and of the sapphire recorder and reproducer; he was the first to make a record with a curved edge; he was the first to make the improved stylus with a rounded bearing surface; he first made the thin diaphragm which did away with all of the adjusting screws previously used; he suggested the modern diaphragm clamping devices, and in this way shaped the present instrument from the crude modern Phonograph. What else has been done that has been done in connection with this accomplishment? When we come to the moulded Record we find that as early as 1888 Edison had made moulded records of paraffine process, and considered that from them in his laboratory up to the time that the moulded wax record was put on the market. Even in a controversy with Mr. Seymour, stated by Mr. Seymour, that the Columbia Company had made moulded records, Mr. Seymour, The National Phonograph Company put out its records one month before any of the Columbia Company's crude first moulded productions of the Columbia Company was marketed. As is well known, it was not until the Columbia Co. had fifteen months afterwards, that the Columbia Co. began to market its present type of moulded records.

"If, therefore, the truth is to be ascertained, there can be only one answer to the question raised by 'Verifax' and 'Henry Seymour,' that is, that Mr. Edison was invent the talking machine. Mr. Edison made he was the father of every essential part of the modern talking machine business, but of the modern moulded record.

FRANK L. DYER."

THE PHONOGRAPH—MY PET INVENTION AND THE POSSIBILITIES I SEE IN IT.

An interview with Thomas A. Edison, by Clarence Arwood, in the Music Trades.

The world's greatest inventor, Thomas A. Edison, whose genius has for years furnished one sensation after another to the scientific world, has in the Patent Office in Washington models for more than six hundred productions which originated in his brain. Despite the fact that some of these are the automatic telegraph, the quadruplex, the mimeograph, the telephone transmitter, as it is used at present, and the kinetoscope, Mr. Edison has the warmest spot in his heart for the talking machine. This confession was made by the great inventor to a representative of *The Music Trades*, who saw him recently in his laboratory at Orange, N. J.

"Why do you feel so warmly toward the Phonograph, when it is only one of the many great inventions that you have to your credit?" I asked him.

CHEAPEST ENTERTAINMENT FOR MILLIONS.

The wizard of the scientific world nestled deeper in his chair, shifted his cigar to one corner of his mouth, and, bringing his teeth down sharply upon it, said:

"Because it is not only a great entertainer, but a wonderful force for education. The talking machine not only entertains hundreds of thousands of persons, but is their cheapest mode of entertainment. It is the cheapest entertainment in the world for the money. The price is so low that it is within the reach of all. There is no family in America so poor that it can not buy a talking machine, provided that there is any fund at all available for amusement.

"It is a clean entertainment. There is yet to be made a record containing any sentiment to which the most religious can object. The Phonograph is as much at home in the parlor of the country minister as in the brightly lighted cafe in the crowded city. It is easy to transport, and for the miner and the farmer, the summer cottager and the flat dweller, the yacht owner and the huntsman who lives in a log cabin, it is equally available.

"One of the tributes paid to the Phonograph as an educator that delighted me most was the sentiment in the gold record presented me at Orange by the National Phonograph Company Jobbers, when they were entertained by the company last summer. They called the Phonograph the greatest of all modern forces as an educator, and this, of course, was pleasant to me. While their kind sentiments toward me, as evidenced upon many occasions, probably caused them to exaggerate, at the same time one can easily see how the Phonograph has taken its place as an instructor, particularly in the field of languages. I have been informed that thousands of students, not only in America, but abroad, are learning English, French, German, Spanish and other tongues with the assistance of the Phonograph, while there are a number of schools which teach languages in no other way.

A GREAT MUSIC EDUCATOR.

"Then, the Phonograph has educated the people to a better knowledge of music and an appreciation of a higher class of music. The Phonograph will give you 'I Guess I'll Have to Telegraph My Baby' or 'The Flower Song' of 'Faust' with equal impartiality. The family which has a Phonograph and begins by thinking that 'Waltz Me Around Again, Willie,' is the finest specimen of music and song-writing, often winds up by learning that numbers from 'Carmen' and 'Rigoletto' are much more charming and delightful.

"I think that more lusty strokes have been struck at cheap music, and for high-grade and classic music, by the Phonograph than through any other agency. The advantages of the Phonograph to music students is also inestimable. Many of the students can't afford to hear the great operatic singers, at the opera houses, or are too far away from the places where they sing. The Phonograph not only brings these singers to the students, but does it cheaply.

"These are a few of my reasons for feeling proud of the Phonograph. Every time a Phonograph is sold, some good is done somewhere."

* * * * *

EDISON AND HIS LABORATORY.

Clad in a crash suit and wearing the string necktie, which type he has worn for years, Mr. Edison was found seated in a big armchair in his laboratory building, looking tired from a long siege of work, but smiling affably. The big laboratory building is plainly furnished, and no attempt is made to decorate it with rugs or pictures. The inventor is in good health and says that he will continue active for years yet. His hair is growing grayer every year, and the only wrinkles on his face are those about his mouth which come from an abysmal well of good nature, and those in his forehead that arise from deep thought. His eyes are blue, and in conversation have little of the dreamer about them. He is a constant smoker, but says he is indifferent to the quality of tobacco he smokes.

* * * * *

HOW THE PHONOGRAPH WAS INVENTED.

"A great many stories have been printed about the manner in which you invented the Phonograph," Mr. Edison was asked, "Did you discover it accidentally?"

"Yes, it was as much of a surprise to me as to any one. At the time I was working on a telegraph apparatus whereby dots and dashes were indented into a disk. After working for a while, I thought, 'I don't see why I can't record the vibrations of a diaphragm.' I took out Morse's apparatus and substituted the diaphragm with a point in it and substituted a tinfoil for paper. I got some little results, but they didn't amount to anything. Then I made it into a cylinder form, and experimented. It talked the first time.

"That first talking machine is now in the South Kensington Museum, in London. The selection was 'Mary Had a Little Lamb.' That was in '77."

"Had you any idea at that time that the result would be a Phonograph which would achieve the remarkable popularity that eventually came?"

"No, we did not. Naturally, we thought the new invention was very interesting, but none of us had any idea that it would become so popular. We did think, however, that the Phonograph would be more than a toy. Our idea at first was that it would be a wonderful help in a business office, and save endless time. We did install a few in shorthand schools, and they met with determined opposition there. Why, in those days many of the teachers of stenography thought that the Phonograph would eventually drive them out of their profession, and they played all sorts of tricks on our instruments, putting them out of commission whenever they could.

PHONOGRAPH TRIUMPHS OVER ENEMIES.

"But the Phonograph triumphed despite them and now you have seen how our Commercial Phonograph department has grown. Many of the greatest corporations in the country are using the Edison commercial machine, and find that it is of remarkable value to them. At the same time, no one has lost employment because of these machines."

In telling how the Phonograph has grown in popularity, Mr. Edison took out a pencil and tracing the growth of the Phonograph with each year. The increase often has been so great that, despite the fact that new buildings are constantly being erected, the company are still behind on their orders, and one month it was necessary to discontinue issuing new Records in order that the company might catch up on the old orders.

"I suppose you get some unique letters about the Phonograph?"

"Hundreds of interesting letters about the machines and records come in," Mr. Edison replied, "but few of them reach me. Occasionally, when one contains some information or comment that is particularly interesting, they turn it over to me.

"I remember one that was put on my desk last week. It was from a man who said he was organizing a company to exploit on street cars a Phonograph that would call out the names of street corners, and thereby do away with the necessity for conductors shouting them. Your have seen, of course, that some of the railroad companies are using the Phonograph as announcers in stations. There is one advantage in this, for the Phonograph pronounces the names correctly, and hasn't yet learned the jargon of mispronunciation which is characteristic of some of the announcers. The Phonograph as an orchestra furnishing music in ballrooms for dancers is an old story now. The Phonograph is also being used to make political speeches, to deliver sermons in pulpits and for many other purposes.

EXPERT'S OPINION OF THE PHONOGRAPH.

"Some of the letters we receive tell of the

Phonograph being met in all sorts of out-of-the-way places in the world. A man who went exploring up the Amazon River got hundreds of miles from civilization. He was sure that he and the natives with him had reached a region never before visited by the white man. One night he was surprised to hear a song that was popular a few years before on the talking machine. He and his companions hastened through the woods to where they heard the music and were surprised to find a talking machine. It told them that other white men had been there before.

"During the days when men were climbing the Chilkoot Path to reach the Klondike, during the gold fever there, talking machines often formed part of their pack, which otherwise were as light as they could make them. There are hundreds of the machines in the Klondike to-day. South African explorers have found the Phonograph in the African jungles, many it has been on board ships which have sought the North Pole. We have an agency in North Finland now. Many of the ships which hunt whales have talking machines on them."

"Have any of the crowned heads of Europe a Phonograph?" the inventor was asked.

KINGS LIKE RAGTIME.

"Oh, indeed, yes. All of them. They were placed with the royal families long ago, and we have many letters from the rulers of Europe and other parts of the earth, telling of pleasure derived from hearing the Phonograph. It is peculiar that the monarchs like American 'ragtime,' those records having a big run with them."

Mr. Edison was asked what he thought of the recent attack upon the talking machine by the bandmaster-composer, John Philip Sousa.

"I don't think his attack will hurt the industry any," Mr. Edison answered. "Mr. Sousa is only injuring himself in attacking the talking machines. He may not know it, but by carrying his selections to all parts of the world they increase the sales of his music wherever they go."

"Do you think that the talking machine means a deterioration in music, and that it will have the effect of causing a decline in piano playing?"

"Indeed, I do not." Mr. Edison said, vigorously. "When a piano goes to one person, talking machines go to 1,000. By the way, how many pianos are made a year, and at what is the cheapest a person can buy one of those instruments?"

The Music Trades representative told the inventor of the number of piano factories there were in the country in 1905, the figures being taken from the 1905 government census, and some facts about commercial piano prices.

"Well, those figures give you the answer to your question," Mr. Edison remarked. "As long as there are people who love music, and as long as there are hundreds of thousands of people on the earth who cannot afford to buy pianos, there will always be a wide popularity for the Phonograph. The talking machine is not a fad. It has come to stay. At first we did not think its reign would be so strong, but now every one tells us that nothing can displace the Phonograph in the hearts of the people."

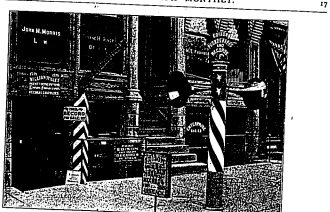
THE OLD AND THE NEW METHOD.

In a recent interview with J. Newcomb Blackman, proprietor of the Blackman Talking Machine Company, New York City, the subject of the necessity of a proper system for carrying records was discussed, and Mr. Blackman gave his experience as follows:

"When I first started in the talking machine business in 1897 a record catalogue was issued, but to find a dealer who carried a complete catalogue stock was like looking for a four-leaf clover. We used to carry our records in peg boxes, offering a selection of bands, orchestras, vocal solos, etc., and a customer did not consult a catalogue as a rule. It was a case of looking over the dealer's assortment and making a choice accordingly. This plan continued very largely until the introduction of the dealer's contracts, which made it impossible to offer any price inducements, either by a cut in price or otherwise, and by the time the moulded record was placed on the market the public expected and were satisfied to pay the restricted price. They were satisfied not only because they knew they were buying at rock bottom prices, but the quality of the goods proved that they were getting full value.

"It was realized by the dealer as well as the public, that competition must exist, however, even in the face of restricted prices, and enterprising dealers, therefore, knew the advantage a dealer who carried a complete stock would have over a competitor who had only a small part of the catalogue. It was natural for the record buyer to give his patronage to the dealer who offered him a complete catalogue stock to select from. The service cost no more, and the record was purchased for the same price. The increased demand, together with the larger stocks necessary, soon gave the successful dealer confidence, and the old plan of stocking records is now as much a back number as one of the records of that time would be if offered for sale at the price of a moulded record. A customer now buys his records very much as he asks for a railroad ticket. He does not expect any special price, but he does insist on your having what he calls for and without delay.

"I have carefully watched the success of our dealers in the last two years, and almost without exception found that a dealer carrying a complete stock and using a system whereby all records are in numerical order, so that any number can be found immediately, or the customer informed that it is not in stock, he has made steady progress, and usually at the expense of other dealers in his locality who did not adopt up-to-date methods. It has also been proven that the use of record labels, containing the number and name of the record selection on the front of wire racks, or record trays, not only removes the desire to put off ordering records, but really makes it a pleasure, for every vacant space, together with the label, tells its complete story. It also provides a wall catalogue and encourages the customer to purchase records which his eye might not locate in the catalogue. A system of carrying records, together with the attractive appearance of a store, always wins with the customer, and the dealer who uses every spare moment in learning every point regarding machines and records he sells, enjoys the confidence of the prospective customer.



"In most cases where dealers accuse their competitors of using unfair methods and cutting prices, their principal argument has been the loss of a certain sale that they think they should have made. They do not seem to realize that the impression that they make on the prospective buyer, not only by their remarks, but by the appearance of their store and their methods, either encourages or discourages a purchase. The sooner the dealer realizes that to get the full benefit of his profit which the price restriction is intended to give him, he must give his customer a full measure of service, his sales will increase and his complaints will be less. My policy as a jobber is not to simply sell a dealer as much as possible, but help him in turn to get his profit, for it is the continued patronage that insures success.

"Dealers and jobbers are selling restricted goods, and the service is what counts. The jobbers that are giving the best service are reaping the benefit, and in a town where there are several dealers, the up-to-date ones, who are always awake to use a method that insures the best service, are making fast inroads on the business of their competitors. The talking machine business is a paying one, but a dealer who expects to make a big success must not overlook any small details that will cause his customer to go elsewhere."—*Talking Machine World.*

AN ENTHUSIASTIC DEALER.

Notification of suspensions received and it will be a sorry day when I am one of them. I have been intensely interested in all the tightening of screws, which seems to be your bent. Not one single move has you made which does not redound to your Jobbers' and Dealers' benefit first: to yourselves, secondarily. Never, so far as my information goes, in the history of corporations, has a company or corporation acted so like a foster father as does the National Phonograph Co. You are a dear old lien and we chicks feel doubly safe under your wings.

In Edison goods it is so hard to tell "dead stock." For instance, one customer who selected (after looking at a Standard and Gem machine), a Home, a large flowered Horn, Crane, and as fast as I could play the older make of Records would say "I want that," and only stopped when he got seared at the number he had selected fee he should be longer paying for the whole than he intended (60 days). Did I stay unloaded of the "dead stock?" No! I duplicated the whole lot in my next order. Another time (last November), a customer called for "Sauerkraut is Bully" (4023). I had sidetracked it. I put my hand on it at once and duplicated it. We have got to try to keep up with the Wizard Edison and get there Ed. We are in the swim, not for the fun of it, but for business. It's a grand good school to be in. We are up against every phase of human nature and when we have a prospective customer who *knows it all*, have patience and let him run amuck.—*W. H. Dougal, New Preston, Conn.*

AN ADVERTISING NOVELTY.

The above picture shows the plan followed by William J. Stilley, an Edison Dealer at New Castle, Ind., to advertise Edison goods. Mr. Stilley writes as follows:

"I run a galvanized pipe from the inside of the building under the sidewalk up the inside of the post, the post being hollow. With a two-way connection for the horns, a large Edison machine, with Repeater, is connected with the pipe. All I have to do is to set my machine in place, attach it to this pipe by a rubber connection, wind up my machine, set it going and attend to my other work. I think it is certainly one of the best ways of advertising and selling Records and machines. It attracts the attention of all passersby, and it can be heard for three squares away. I have a large card hanging close by on the post or on the front window. I originated this method of advertising May 22, 1905, and have used it with great success ever since."

FROM NEW ZEALAND.

The following interesting letter was written by B. G. Holton, manager of the New Century Talking Machine Company at Wellington, New Zealand:

"I have pleasure in penning these few items that may prove of interest to you for use in the EDISON PHONOGRAPH MONTHLY. One amusing letter from a country client, who has an Edison machine and also a ——— is writing for Records says: 'Dear Sir—I think the ——— is a thing of the past,' so concludes Cylinder Records, and you will oblige,' etc. Another one says: 'The only fault I find with my Edison machine is that it draws too much company.' He says that he had to sie up all midnight, and then they wanted him to play on till Monday morning. Had to play some Records six times. The aforementioned customer lives in the country and his machine is the only one handy at present. A third client says: by John Kimmble, that he'd put his accordion on the fire when he got home. Until he heard Kimmble he thought he could play, hence the resolution.

"A very amusing incident occurred the other evening. Opposite the 'boarding house' where I'm at present residing, a family has a talking machine and we can sit on the verandah and hear the selections very distinctly, as they leave the door open. After we had all finished dinner, most of the boys were on the verandah and the music hadn't started opposite, so the boys all shouted in one voice: 'We want some music' and soon after the Phonograph started, it every evening. Wishing you the compliments of the season."

A SCANDAL IN A TROUSERLESS HOTEL.

The New York *Sun* is authority for the statement that a scandal was narrowly averted at the Hotel Martha Washington, a trouserless hostelry in that city, a few nights ago. No mere man is allowed above the parlor floor, but at the hour of midnight a masculine voice was heard distinctly saying something like this:

"Je vais faire des emplettes ce matin. Je vais, tu vas, il va."

There were many screams among the kimono clad, especially when a delegation of girl clerks went upstairs on a hunting expedition and heard the voice continue as follows: "Je Connais de fie fie du pardinier, which means 'I know the son of a gardener.'"

Upon knocking strenuously at the door the searching party found a pretty girl giving herself language lessons with the assistance of an Edison Phonograph.

UNCLE JOHN AND THE PHONOGRAPH.

There was great excitement on our plantation when it became known to the darkies that "Marse Nat" had returned from New York and "brought a horn dat could talk like er man." "Uncle" John, better known as "Sugar" John in the neighborhood, because of his fondness for sugar cane, had never even heard of a Phonograph. He had long predicted that the day would come when "they'd have steam buggies," and had felt vindicated when the first automobile went puffing through Lincoln County; but he was skeptical about the Phonograph. He refused to believe that a horn could talk, and hurried along with his liveliest hobble toward the "big house," to see with his own eyes what it all meant.

We had no record for the machine giving a sermon or scriptural reading, which would have pleased "Uncle" John most—for he is a pious man—and, strangely enough, the nearest thing to it in our stock was the late Colonel Robert Ingersoll's oration, "At the Tomb of Napoleon." The record was adjusted, and after the Phonograph finished with the preliminary sputtering and popping it began:

"A little while ago I stood by the grave of the old Napoleon," thundered the deep, sepulchral voice in the big brass horn, and a look of intense anxiety came over the face of "Uncle" John. He leaned forward; his gray beard crushed in the withered black hand he had raised to his ear.

"A magnificent tomb of gilt and gold," the Phonograph went on, "and I gazed upon the sarcophagus of black Egyptian marble, where rest at last the ashes of that restless man!"

"Amen!" groaned "Uncle" John, just as he does when in the pulpit at camp-meeting times.

"I leaned over the balustrade, and thought about the career of the greatest soldier of the modern world. I saw him walking upon the banks of the Seine, contemplating suicide. I saw him at Toulon. I saw him putting down the mob in the streets of Paris. I saw him at the head of the army of Italy. I saw him in Egypt, in the shade of the pyramids. I saw him conquer the Alps, and I saw him mingle the eagles of France with the eagles of the crags. I saw him at Marengo, at Ulm, at Austerlitz"——

"Preach on, man, preach on," shouted "Uncle" John, who could no longer restrain himself. I wonder how an uneducated man who knew absolutely nothing about Napoleon and his great battles could become so emotional.

"I saw him in Russia," roared the relentless Phonograph, "where the infantry of the snow and the cavalry of the wild blast scattered his legions like winter's withered leaves. I saw him at Leipzig in defeat and disaster, driven by a million bayonets back upon Paris —clutched like a wild beast, banished to Elba!"

"Praise de Lamb," groaned "Uncle" John.

"I saw him escape and retake an empire by the force of his genius. I saw him upon the frightful field of Waterloo, where Chance and Fate combined to wreck the fortunes of their former king; and I saw him at St. Helena, with his hands crossed behind him, gazing out o'er the sad and solemn sea."

"Show pity, Lawd," sobbed "Uncle" John.

"I thought of the widows and orphans he had made," thundered the voice of Robert Ingersoll, striking his antithesis with telling effect, while "Uncle" John shouted aloud, "Dar, bless Gawd!"—"of the tears that had been shed for his glory; and of the only woman that ever loved him, pinioned to his side by the cold hand of Ambition. I thought of these things and I said to myself I would rather have been a French peasant and worn wooden shoes"——

"Ain't it de truth?" exclaimed "Uncle" John.

"I would rather have lived in a hut with a vine growing over the door, and the grapes growing purple in the kisses of the autumn sun—I would rather have been that poor peasant with my loving wife by my side, knitting as the day died out of the skies, with my children about me—I would rather have been that man and gone down to the tongueless silence of the dreamless dust than to have been that imperial impersonation of force and murder known as Napoleon the Great?"

"Amen!" moaned "Uncle" John, slapping his hands and rubbing them on his ragged trousers legs in turns. It was explained to him that he had been saying "Amen" to the words of an infidel, a man who believed there was no God.

"Look heah, Marse Nat," he replied, "dat man may say he don't believe in no Gawd—he may say he don't, but he's got Gawd Ermighty in ev'y word dat comes out uv his lips!"

He sat silent for a long time, rolling his eyes and moistening his lips with his tongue. He veiled his word.

"And as for dat," said "Uncle" John at last, pointing a quivering finger toward the instrument which shone resplendent in the slant rays of the sun, "dat's the Lord's own horn."—*Rensen Crawford in the Broadway Magazine.*

ARABIAN NIGHTS' WONDERS.

From articles that appear semi-occasionally in the daily newspapers it is evident that the Phonograph, as a wonder-worker, has the Arabian Nights, the brothers Grimm and the mediæval legends "frayed to a frazzle." The return of the dead to life is one of the wonders related in the fairy tales, but the Phonograph almost succeeds in doing this by preserving a record of the voice. The Rev. Dr. Talmage talked a speech into a Phonograph and should he die or be killed to-morrow his voice would still be heard. An old preacher in an Illinois village has talked his favorite benediction into a machine, so that his flock can hear him bless them, when his coffin is placed in the ground. Rather gruesome this, and reminiscent of the Arabian Nights. A dying wife has recorded some of her utterances in the same way, so that the husband can be comforted and lifted up in spirit after her soul has departed.

Not quite so poetic was the trick of the Hungarian peasant, who, fearing he had been cut off by his father's will, impressed the talking machine's aid in an attempt to secure the whole estate. He made a Phonograph Record son, Alois Szabo, all my lands and chattels," and when the old man had passed away he stationed a confederate under the bed with a talking machine, and, calling in the peasants, told them his father was dying and would announce the provisions of his will in their presence as witnesses. The peasants then heard a hollow voice pronounce the words as above, and matters looked very rosy for Alois until the confederate gave the snap away. At least, so runs the tale.

A recent remarkable use of the Phonograph is that adopted by W. R. Hearst in his New York governorship campaign. He had a Record made of one of his bustling speeches and the kinetoscope, to picture him in the act of talking the speech. The kinetoscope and the Phonograph are supposed to keep time, and thus reproduce it possible for any audience that is unable to meet the great man face to face to come pretty near to it by means of this combination.

The Salvation Army in Cleveland has also impressed the service of the Phonograph in a manner that many will think is a decided improvement on their regular method of soul-saving. Prayers and hymns are recorded on discs and repeated at street corners to passers-by, who put their contribution in a slot in the machine. As the cheapest Phonograph is less disagreeable to the ear than the ranting, whining tone of a Salvation Army dame, a rain of nickels ought to reward the scheme.

The idea of frightening a burglar away by starting a Phonograph in a distant room was used effectually in a Harlem flat, and has been adopted on the stage, we believe.

The Phonograph has been used to represent the voice of some famous singer when an act in a play is supposed to take place in the foyer, the greenroom or outside of a theatre.

An amusing employment of the instrument was that made by a man in a Western city, who silenced the terror of a certain block, a creaky violin, by turning on his Phonograph in the open air whenever the piercing dissonances of the fiddle were wafted abroad.

But it is not our aim to tell all that the Phonograph can do. It is a wonderful enough contrivances in itself, without regard to its possibilities in the way of preserving a beloved voice or its usefulness in frightening away burglars, violins and other nuisances.—*The Indicator.*

WOULD MAKE LIFE EASY.

I am heartily in sympathy with your efforts along lines indicated by said list. If all manufacturers would handle their products on the same plane as that adopted by the National Phonograph Company, the life of the average retail merchant would be comparatively easy one. Assuring you of my heartiest co-operation, I subscribe myself, as ever, an Edison admirer.—*S. B. Gjerde, Hobart, Wash.*

A year ago we had two machines and 200 Records. We now carry 25 machines and 2,500 Records, and are still adding.—*Eagle Piano House, San Jose, Cal.*

*Added since January 1st, 1907.

Jobbers and Dealers are asked not to supply any of the above named firms with our apparatus, either at addresses given or any other address.

WHEN a man leaves home in the evening it is because he seeks amusement. The best way to keep him home is to give him the amusement there. Make home a competitor of downtown, the club, the café, the theatre and the concert hall. No one thing will furnish so much amusement for so many people, so many times, and in so many ways as the Edison Phonograph.

Talk about versatility! If you had a brass band on tap and several leading concert hall singers on salary, and two or three funny men to crack jokes, and a beautiful soprano to sing ballads, you could not give the same amount of varied entertainment that the Edison Phonograph gives by simply changing records.

You can hear the whole program at some nearby store in this town.

Grand Opera *for the* Edison Phonograph

"Wilt thou recall that day" *from* "The Flying Dutchman"

THIS is the month of grand opera in New York. A new interest in the great singers of the world has been given by the opening of Hammerstein's Manhattan Opera House, and now New York City is the only city in the world where grand opera is given on a grand scale in two opera houses at the same time. This unusual interest in grand opera gives a special point to our announcement of five new grand opera records.

B 41—"Nobil Dame" ("Noble Lady"), "Gli Ugonotti" ("The Huguenots")—Meyerbeer. By Mario Ancona, Baritone. Sung in Italian. Orchestra accompaniment.
B 42—"Guardate pazze son' io" ("Behold Me, I am Mad"), "Manon Lescaut"—Puccini. By Fiorenzo Constantino, Tenor. Sung in Italian. Orchestra accompaniment.
B 43—Gebet (Prayer), "Allmechtige Jungfrau" ("O, All-powerful Virgin"), "Tannhauser"—Wagner. By Mme. Rappold, Soprano. Sung in German. Orchestra accompaniment.
B 44—"Bella siccome un angelo" ("Beautiful as an Angel"), "Don Pasquale"—Donizetti. By Antonio Scotti, Baritone. Sung in Italian. Orchestra accompaniment.
B 45—"Willst jenes Tags" ("Wilt thou recall that day"), "Der Fliegende Hollaender" ("The Flying Dutchman")—Wagner. By Alois Burgstaller, Tenor. Sung in German. Orchestra accompaniment.

Comment on this list is almost unnecessary. Wherever music is known and loved these songs are great. Rappold, Scotti and Burgstaller have sung in grand opera all over this country. Ancona is Hammerstein's new baritone. Constantino is now singing in the South with the San Carlos Opera Company. Two selections are from Wagner, including the always popular "Flying Dutchman." Puccini is of special interest not only on account of his "Madame Butterfly" playing here, but also on account of the fact that he is now visiting in this country and conducting his own operas in New York.

If you love good music, go to the nearest Edison store and hear these grand opera records. Those five make forty-five Edison Grand Opera Records. The complete list will be sent to any one on request. If you like grand opera music, write for it to-day. Ask for Grand Opera Records, Supplement No. 5. Anyway, if you care for music, let us send you the following Edison Musical Library. Ask for it to-day, but it will not be mailed until January 25th:

Phonogram for February — Supplemental Catalogue — Complete Catalogue

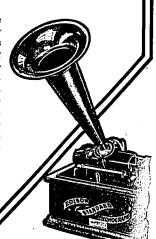
20 Lakeside Avenue **National Phonograph Company** ORANGE, N. J.

[Record Advertisement in February Magazines.]

Listen!

To the voice of the greatest and most perfect language teacher in the world. He says:—I do not want to boast of my achievements. No. But I would like to tell my friends, the phonograph dealers, how I can help them, how I can increase their business from 10 to 80 per cent.—and just stop and think what this means to **you.**

Why there is a dealer out West who is doing a business of $15,000 a year on his I. C. S. Language Outfits exclusive of his amusement records, outfits, etc. This shows the possibilities that exist in the



I.C.S. LANGUAGE SYSTEM

WITH

Thomas A. Edison

PHONOGRAPH

Any wide-awake dealer who will give me a fair trial will be helped in every way possible to make a success of his language business. Free advertising literature will be furnished him for distribution, copy for newspaper ads will be given him—in fact everything will be made easy for him to make large sales of language outfits, and, thru his increased advertising, to very appreciably enlarge his regular sales. Just write me a postal. Address it to the Professor, care of the

MEETING A GREAT DEMAND.

Machines enough to keep the trade from losing a single sale but none for surplus stock. Records enough to fill all orders completely and promptly. Such is the status of affairs at our factory in Orange, N. J. Although the machine output is double what it was a year ago, we are still unable to make a sufficient number to give Jobbers all they want. There is scarcely a Jobbing firm that gets its order filled completely, and at the time it wants the machines. In other words the demand still exceeds the capacity of our factory, notwithstanding the many enlargements in buildings during the past year. The demand still shows that the need for more room, more machinery, more employees and more of everything is quite as important to-day as it was when the daily output was only a quarter what it now is. It shows that the buildings now in process of erection and in contemplation cannot be completed too soon. They will be sorely needed before ready for use.

Since the manufacture of Records does not require anything like the room that machines do, the added Record making facilities gained last summer and fall are proving ample for all the demands of the trade. The Record orders are the largest ever received and the total demand something phenomenal, yet all orders are being filled with less friction and delay than when one-third the present production was considered a great business. We feel that we can now easily take care of the Record business even though it continues to grow as fast in the future as it has in the past two years.

BEGINS ITS FIFTH YEAR.

This issue begins the fifth year of the EDISON PHONOGRAPH MONTHLY. Notwithstanding its many shortcomings, we believe that on the whole it has been useful in assisting in the work of knitting the trade together. We hope in the near future to make it a still more valuable factor in extending the Edison business.

THE ADVANCE LIST OF MAY RECORDS APPEARS ON PAGE 2.

NEW EDISON GOLD MOULDED RECORDS. ADVANCE LIST FOR MAY, 1907

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **April 27th**, all things being favorable, but they **must not be placed on sale by Jobbers or leave their places of business, or be re-shipped to Dealers before 8 A. M. on April 27th.** Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after April 20th, but must not be circulated among the public before **April 27th.** Jobbers are required to place orders for May Records on or before **March 10th.** Dealers should place May orders with Jobbers before **March 10th** to insure prompt and complete shipment when Jobbers' stock is received.

9530 The Mill in the Forest *(Eilenberg)* — Edison Concert Band
A descriptive instrumental selection. The old mill imitation is a feature.

9531 Poor John *(Pether)* — Ada Jones
Vesta Victoria's great comic song success—greater than her "Waiting at the Church," judging from the way all New York is humming it.

9532 While I Have You *(Scamuno)* — Irving Gillette
A sentimental ballad somewhat out of the popular class.

9533 Good-a-Bye John Medley *(Original)* — Albert Benzler
Xylophone solo introducing "Good-a-bye, John," "Somebody's Waiting for You," "Captain Boby Bunting" and "Ida-Ho."

9534 I've Told His Misses All About Him *(Yale)* — Helen Trix
A sequel to "Waiting at the Church," as sung by Vesta Victoria. Miss Trix gives a fine performance of the song.

9535 Oh! Mister Brown *(Von Tilzer)* — Arthur Collins
Sterling and Von Tilzer's new coon song hit.

9536 Something for Jesus *(Lowry)* — Anthony & Harrison
A sacred selection.

9537 The Thunderer March *(Sousa)* — Edison Military Band
One of John Phillip Sousa's earlier successes.

9538 No Wedding Bells for Me *(Furth)* — Bob Roberts
A comic song on the subject of marriage from a bachelor's point of view.

9539 Nobody's Little Girl *(Morse)* — Byron G. Harlan
A pathetic song of the kind to which Mr. Harlan's voice is so well suited.

9540 Flanagan On a Farm *(Original)* — Steve Porter
Another Flanagan vaudeville specialty.

9541 Dixie *(Emmett-Eeke)* — Edison Symphony Orchestra
A special arrangement for our record.

9542 'Neath the Old Acorn Tree, Sweet Estelle *(Heil)* — Harry Anthony
A beautiful new sentimental ballad.

9543 That Welcome on the Mat Ain't Meant For Me *(Edwards)* — Collins & Harlan
A coon male duet with a fine swing to the melody.

9544 When You Know You're Not Forgotten By the Girl You Can't Forget *(Heil)* — Frank C. Stanley.
A waltz song of exceptional interest.

9545 Fanella—Intermezzo *(Keiser)* — Edison Concert Band
A new instrumental concert selection.

9546 The Last Rose of Summer *(Flotow)* — Edith Helena
A delightful soprano record of the ever popular song.

9547 San Antonio *(You Alstyne)* — Billy Murray & Chorus
The new cowboy song that became popular so quickly.

9548 Let Me Hear the Band Play, "The Girl I Left Behind" *(Casey)* — Frederick H. Potter.
A stirring march song.

9549 Love's Serenade *(F. V. Blon)* — Edison Venetian Trio
Another beautiful and dreamy selection played by the violin, flute and harp.

9550 Stand Up For Jesus *(Webb)* — Edison Mixed Quartette
This sacred selection is too well known to call for description.

9551 Ask Me Not *(Cobb and Edwards)* — Will F. Denny
A laugh-provoking song of a topical character.

9552 Meet Me Down At the Corner *(Original)* — Ada Jones & Len Spencer
A crisp Irish dialect vaudeville sketch. Miss Jones sings the popular Irish song, "Meet Me Down At the Corner." (Hoyt.)

9553 Georgia Sunset *(Brown)* — Edison Military Band
This lively instrumental sketch is described as "A Southern Tone-poem."

Edison Gold Moulded Records are made only in Standard Sizes. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

DINNER TO MR. EDISON.

The entire civilized world knows Thomas A. Edison for his achievements and for his great contributions to the welfare of mankind. To millions of people his name is almost a household word. Probably the career of no man living to-day is better known than that of Edison. Several thousands of persons have met him personally, but the men who know him in his everyday working life are few. They are confined to those engaged in his laboratory work and the men whose duties as officers and department managers of the various Edison companies bring them in contact with him. These men know him for all that the outside world does and for many other things that to them are an inestimable privilege. They know him as the man who esteems those who are loyal to his interests, who can and will work, who do things and who "make good." They know his kindly eye, his winning smile, his willingness to meet and listen to them. They know him as one who would rather meet them as man to man than receive the homage of kings. To know Mr. Edison in this manner must, therefore, be our apology to the Edison Phonograph trade for this article about ourselves. We would not publish it did we not feel so deeply honored by our association with him.

As all the world knows, Mr. Edison reached his sixtieth birthday on February 11th. In honor of the event an informal dinner was tendered to him at the Krueger Auditorium, Newark by the officials and department heads of the Edison Companies. Knowing that the more democratic the affair was the better pleased he would be, no attempt was made to arrange a formal banquet. The affair was a simple beafsteak dinner and was attended only by those identified with his interests.

Mr. Edison was among the first to arrive. A red rose adorned his coat and he declared that he felt no older than a man of thirty years. He was the only guest. His hosts were the following: William E. Gilmore, President and General Manager of the National Phonograph Co. and the executive head of the other Edison Companies; Alphonse Westge, Secretary; C. H. Wilson, General Manager of sales of National Phonograph Co.; Frank K. Dolbeer, Credit Manager of all companies; William Peeler and John E. Helm of the Legal Department; Peter Weber, Superintendent; Walter Stevens, Manager Foreign Department; L. C. McChesney, Advertising Manager; A. T. Moore, Manager Kinetograph Department; William M. Brodie, Manager Battery Department; F. A. Burnham, Jr., Sales Manager Bates Manufacturing Co.; Nelson C. Durand, Manager Commercial Department; Walter H. Miller, Manager, and W. H. A. Cronkhite, Critic of the Recording Department; J. H. Moran, Manager Purchasing Department; H. F. Miller, Cashier; A. M. Hird, Order Clerk; E. F. Aiken, Assistant Superintendent; A. C. Ireton, Assistant Sales Manager National Phonograph Co.; C. S. Osborne, Assistant Credit Manager; R. B. Bachman, Laboratory Superintendent; Fred Ott, Assistant to Mr. Edison; H. I. Moyer, Engineer of concrete construction, William Bee, Sales Manager Edison Storage Battery Co.

Three hours of jollity and good fellowship followed the dinner. Stories were told by Mr. Edison, Mr. Gilmore, Mr. Moore and others, all of these being of a reminiscent character. Byron G. Harlan, Arthur Collins, Billy Murray and Steve Porter sang solos; Mr. Collins and Mr. Harlan sang duets and all sang quartettes. Mr. Porter gave some of his Flanagan recitations. Eugene Jaudas played violin solos. Mr. Frantzen played piano solos and accompanied the singers. The surprise of the evening was the singing of two parodies, in which Mr. Edison, Mr. Gilmore and various of their assistants were referred to in a manner that provoked much merriment. One of these was sung by the quartette to the tune of "Everybody Works but Father." This was the contribution of W. H. Miller. The other was sung by Mr. Collins and Mr. Harlan to the air of "Arrah Wanna," the words being "composed" by Messrs. Cronkhite and Hird. We print the words of both below, again apologizing for the personal equation:

(Tune: "Everybody Works But Father.")
A man who liked work came to our town, a
wonder, you all know,
His name is Thomas Edison, full of push and go
He hired a lot of workers, see them all around;
Ask him what he pays them for, and you'll
never hear a sound.

Canus.
Nobody works but the old man,
He's at it all night long,
Tinkering with experiments
Until the break of dawn.
Glimmer lights and orders,
Water goes to the motor,
Nobody works but the old man.
Ain't that an awful shame.

There was a time when Edison would give no
rest to work,
He'd only build a lot of shacks, no wonder we
did stick,
But now it is quite the reverse, new buildings
are no nobby,
The chances are he'll never stop, cement building
are his hobby.

He's always, always at it, it's a wonder he ain't
dead,
With only five hours sleep at night, so it has
been said,
But if this sleep is not enough and of the proper
kind,
He takes more in the day-time, but we're all
blind.

He's working on a battery, perfect it soon will be
He's trying every kind of dope to get electricity,
Watch them in your autos and send Gilmore
Your gift
If they can't climb up the steepest grade,
Just watch them go down hill.

(Tune: "Arrah Wanna.")

At the factory in West Orange, seated in his office,
You can find the chief "Heap Big Smoke" tearing out his hair.
Each day comes little Wester with a sugar fine,
Cries the lions in accents frenzied, "Can't you read that sign?"

Chorus.

Mr. Gilmore, Mr. Gilmore, we are proud of you,
You are tried and true,
You will never rot, old stew,
In an office built of concrete strong,
You could make your lunchcon smile,
If you'd only set us rules to let us smoke a little while.

At his desk he ponders deeply, letters by the score,
Mr. Gilmore, gen'ral manager, gee, but he gets sore,
In comes Walter Stevens with an armful of old trivet,
Walter says, can you see me now, I can't go on, I'm stuck.

Chorus.

Mr. Gilmore, Mr. Gilmore, up in the air you go,
It is time we know,
Your job is a peach, oh, oh,
In a year or two your golden locks
All white will brightly shine,
Then the office boys, come in late boys,
may work overtime.

When you run a great big factory, you must have the dough,
Mr. Gilmore, keep much big chief, knows that it is so,
The Jobbers to the Waldorf came, from far and near did hike,
F. K. Dolbeer said to them, you may go as far as you like.

Chorus.

Mr. Gilmore, the Committee, did their work up fine,
At the bar on time,
Didn't wait to get a shine,
In Room three was a lively pace,
In Room three was a bunch,
Cocktails plenty, then said gently, charge it to the room.

Wilson, Dolbeer, Weber, Pelzer, Walter Miller, too,
Cronkhite, Hird and Len McChesney put it up to you;
Shall we list the latest balled, "Pedro and the Monk?"
Come your answer, short and heated, "Not that thing is punk."

Chorus.

Mr. Gilmore, Mr. Gilmore, we're surprised at you,
We thought it would do,
It stood out in you and when you
Pound the solar noon, at thirty-two
Stint with a smile so bland,
"It's the worst thing, but the rank thing sells to beat the band."

NEW QUARTERS FOR MEXICO CITY BRANCH.

On account of its rapidly increasing business, our Mexican Company, located in Mexico City, have found it necessary to procure much larger accommodations, to successfully handle its trade in the Republic of Mexico. We have, for several years, enjoyed a large Mexican business, and, until the early part of last year, this was handled by our Foreign Department at Union Square, New York. Believing, however, that a much larger trade could be secured by direct representation, and following out the policy of extending our business in foreign territory, a company was organized (the Mexican National Phonograph Company), and Rafael Cabañas was appointed Manager. Immediately this company was organized, quarters which were thought ample to meet their requirements were secured at Calle Prolongación del Cinco de Mayo, 67-77 Mexico, D. F.

After the lapse of a few months, however, it was realized that the accommodations at the address above given were inadequate to care for their constantly increasing trade, and the matter of securing larger and more commodious quarters was given careful attention. A thorough canvass of the City of Mexico resulted in our people securing the greater part of a large building on one of the main thoroughfares of the city, No. 117 Avenida Oriente. The several floors will be utilized for office, exhibition, stock, packing and shipping rooms, and with this increased space, our Mexican Company will be enabled to carry a much larger stock, and more successfully meet the requirements of their constantly growing trade.

MARCH ADVERTISING.

The March advertising of this company again comprises two full pages in most of the monthly magazines of national circulation and similar double space in the weeklies like Collier's and the Saturday Evening Post. The Phonograph copy is another of the silhouette series. The Record copy gives the list of March Records. It is reprinted on page 15 of this issue. This advertising is making Edison's business greater every day and the Dealer who is letting people in his locality know that he represents the Edison Phonograph is also getting a lot of good from it. This national advertising is making it easier every day to sell Edison Phonographs and Records.

A CONVERT WITH ONE HEARING.

Here is an incident which will of itself show the high regard in which the Edison Gold-Moulded Records are held. A customer in our store selected twelve Records for a disc machine and stopped to listen to an Edison machine which was being played for a lady purchaser. So great was the impression created by the Edison Records that he returned the disc records at once. The next day he purchased a Edison Home machine and three dozen Records. As he left with his purchase he remarked, "I will never play that disc machine again."—*Voltz Music House, Perth Amboy, N. J.*

AMONG THE JOBBERS.

Kohler & Chase, Edison Jobbers at Oakland, Cal., have opened a jobbing branch at Seattle, Wash. They placed the same initial order as now required from all Jobbers, whether already in the business or not.

The Regina Company, of 41 Union square, New York City, have become Edison Jobbers, having bought the Edison Jobbing business of Sol Bloom, of 3 East 42d street.

A. O. Petit, Edison Jobber at Newark, N. J., who for several years has been located at New and Halsey streets, has just moved to 57 Halsey street, about 100 feet north of his former location. At the new number he is occupying an entire building and has more than double the space afforded by the old quarters. He will continue his branch store at 12 New street.

William Ross, head of the firm of W. H. Ross & Son, Edison Jobbers at Portland, Maine, died at his home in that city on February 12th. The business will be continued under the same firm name, with Frederick Smith as manager. Mr. Smith has been a member of the firm and manager for some time.

Visiting Jobbers at our New York office during February were the following: Harry Weymann & Co., Weymann & Son, Philadelphia; Mr. Shields, Denver Dry Goods Co., Denver Colo.; W. O. Pardee, Pardee-Ellenberger Co., New Haven, Conn.; Mr. Coleman, R. S. Williams Co., Toronto, Canada; Mr. Willys, Elmira Arms Co., Elmira, N. Y. and Chas. Andrews, Boston Cycle and Sundry Co., Boston.

PERSONAL.

F. K. Dolbeer, Credit Manager of the National Phonograph Company, left on February 13th for a two weeks business trip in the South and West.

Mr. and Mrs. Thomas A. Edison and family left on February 25th for their annual visit to Mr. Edison's Florida plantation. They will be absent about six weeks.

CUT-OUT FOREIGN RECORD.

Notice is hereby given that we have no more moulds or masters for the following selection: No. 12158, "Toros de Punta Zanga," Spanish song by Vargas. When the present stock of this selection is exhausted it will be put on the cutout list and omitted from the next edition of the Foreign Record Catalogue.

"If this Phonograph business keeps on growing, we will have to buy a warehouse in which to transact it."—*Extract from letter from Lyon & Healy, Chicago.*

ABOUT ORDERS.

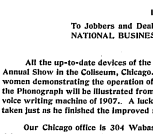
Our Sales Department has in its possession an order for 161 records which it has not been able to identify. It was received at our factory in Orange on February 6th. It was made out on regular Record order sheets, but bore neither name, date or location. Unless this meets the eyes of the firm sending the order, or an inquiry is made as to why it has not been filled, no attention can be paid to it. Jobbers and Dealers cannot be too careful in signing all orders, for an instance like the above causes much annoyance and trouble. The trade should also have in mind that all orders should be sent to our New York office. They are then acknowledged, approved and forwarded to Orange. To send them direct to Orange causes a loss of time and not a gain, for they are sent to the New York office to be put through in the usual way, before getting any attention at the factory.

NO. 9366 CUT FROM STOCK.

The trade is hereby advised that no more orders will be filled for Record No. 9366, "Uncle Confession," a violoncello solo by Hans Kronold. It will, however, be continued in the Record catalogue for some time so that the trade may dispose of any supply that may be in stock.

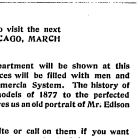
I. C. S. TO THE RESCUE.

During the latter part of January an old man wandered into Waterloo, Iowa, speaking a language that none could understand. After every means at hand failed to discover what the old man's words were meant to convey, the local agent of the International Correspondence Schools took up the case. He had the old fellow tell his wants into a Phonograph and the record was forwarded to the Home Office of the International Correspondence Schools at Scranton, Pa. Prof. Lamme, after some trouble, discovered that the tongue was a dialect of the Hungarian language, spoken by a people called Horvarts who dwell in a forest district in Austria. The old man gave his name as Theodore Yoleb; his home as Buchdeva, Austria. It is now proposed that the Chief of Police of the town of Waterloo send to the I. C. S. the questions that he wishes to ask the old man. These will be translated on a Phonograph record by the Schools into this peculiar form of Hungarian dialect. The Phonograph record will then be sent to Waterloo and the questions that it hears spoken to the old man. The latter will answer these questions on another record, which will be sent to the Schools to be again translated into English and the result sent back to Waterloo. In the most unique manner of interpretation, it is expected that a satisfactory disposition will be made of the old man.



INVITATION

To Jobbers and Dealers who wish to visit the next NATIONAL BUSINESS SHOW, CHICAGO, MARCH 17-23.



All the up-to-date devices of the Commercial Department will be shown at this Annual Show in the Coliseum, Chicago. Two large spaces will be filled with men and women demonstrating the operation of the Edison Commercial System. The history of the Phonograph will be illustrated from the original models of 1877 to the perfected voice writing machine of 1907. A lucky chance also gives us an old portrait of Mr. Edison taken just as he finished the improved machine of '88.

Our Chicago office is 304 Wabash avenue. Write or call on them if you want tickets, hotel accommodation reserved, or any favors after you arrive in Chicago.

THE 1907 MODEL OF THE EDISON BUSINESS PHONOGRAPH.

READY FOR USE.

NOT IN USE.

PUBLISHERS OF MUSIC IN MAY, 1907, LIST.

The publishers of the compositions made for our May list of records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers:

9530 The Mill in the Forest—Carl Fischer, 6 Fourth avenue, New York.
9531 Vo' Jerusalem, Days—Howley, Haviland & Dresser, 13 W. 36th street, New York.
9532 While I Have You—Jos. W. Stern & Co., 34 E. 21st street, N. Y. C.
9534 I've Told His Mama All About Him—Francis, Day & Hunter, 14 W. 30th street, New York.
9535 Oh! Mister Brown—Harry Von Tilzer Pub. Co., 37 W. 28th street, New York.
9537 The Thunderer March. Henry Catleman, Philadelphia.
9538 Sweet Adeline. Bells for Me—Maurice Shapiro, 1658 Broadway, New York.
9539 Nobody's Little Girl—Howley, Haviland Pub. Co., 28 W. 30th street, New York.
9540 'Neath the Old Acorn Tree, Sweet Estelle—Leo. F. Singer, 48 W. 38th street, New York.
9543 That Welcome on the Mat Ain't Meant For Me—Gus Edwards Music Pub. Co., 1512 Broadway, New York.
9544 When You Know You're Not Forgotten By the Girl You Can't Forget—Ilett & Hager, New York.
9545 Panella—Ilett & Hager, New York.
9547 San Antonio—Jerome H. Remick & Co., 219 West 46th street, New York.
9548 Let Me Call You Sweetheart—"The Girl I Left Behind"—Jos. W. Stern & Co., New York.
9551 Ask Me Not—Gus Edwards Music Pub. Co., New York.
9553 Georgia Sunset—Lyon & Healy, Chicago.

PRINTED MATTER.

Beginning with the April issue, the monthly Record supplement will consist of four pages. This increase in size is made for the purpose of adding more matter of a descriptive character to the new Records. The title page will be printed in two colors as before and the fourth page will be given up to a reprint of the selections of the previous month. It will be a more useful form than before for the sale of Records, and we hope that the trade will see that every Phonograph owner gets one every month.

ADVANCE LIST EDISON GRAND OPERA RECORDS.

SUPPLEMENT No. 6, MAY, 1907.

THE five Grand Opera Records listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **April 27th, 1907,** all things being favorable, but they **must not be placed on sale by Jobbers or leave their place of business, or be re-shipped to Dealers before 8 A. M. on April 27th.** Supplements will be shipped with Records. These may be distributed to Dealers after April 20th, but must not be circulated among the public before **April 27th.** Jobbers are required to place orders for these Grand Opera Records on or before **March 10th, 1907.** Dealers should place orders for these with Jobbers before **March 10th** to insure prompt and complete shipment when Jobbers' stock is received.

B. 46—"Tarantella" *Rossini*
By GIUSEPPE CAMPANARI, Baritone.
Sung in Italian, Orchestra accompaniment

B. 47—"L'Air des Fleurs" de Siebel ("Siebel's Flower Song") "Faust" *Gounod*
By MME. JACOBY, Contralto.
Sung in French, Orchestra accompaniment.

B. 48—"In diesen heil'gen Hallen" ("Within these Sacred Halls") "Die Zauberflöte" ("The Magic Flute") *Mozart*
By ROBERT BLASS, Basso.
Sung in German, Orchestra accompaniment

B. 49—"O Paradiso in terra" ("O Paradise on Earth") "L'Africaine" *Meyerbeer*
By FLORENCIO CONSTANTINO, Tenor.
Sung in Italian, Orchestra accompaniment

B. 50—"A tanto amor" ("To so Much Love") "La Favorita" *Donizetti*
By MARIO ANCONA, Baritone.
Sung in Italian, Orchestra accompaniment

TO THE TRADE

The above Advance List of Edison Grand Opera Records, Supplement No. 6, comprises five new selections, four being from well-known operas. Three are sung in Italian, one in French and one in German.

The names of two new artists appear in this list, Robert Blass, basso, and Giuseppe Campanari, baritone. Mr. Blass is a member of the Metropolitan Opera House, New York City. He sings in German and Mr. Campanari in Italian. The latter sang in the Metropolitan Opera House for five years and is now engaged in concert work in this country. Both are artists of high rank.

Prior to a year ago, many requests were received from the trade for a series of really first class grand opera records, sung by high grade artists in their own languages. The National Phonograph Company has now supplied the demand. Its list of Edison Grand Opera Records comprises fifty selections from the leading operas, sung by artists of world-wide reputation.

Now, are you doing your share in letting the public know about them? Are you carrying a stock and are you doing what you can to push their sale? Are you in a position to fill orders for them after we have created a demand by advertising?

Edison Grand Opera Records are an unqualified success from every standpoint, but we want them to be even more successful. We want every dealer to put in a stock and then go after the patronage of the people in his city or town who demand the music of the great composers.

Supplement No. 5, issued in February contained a complete list of the forty-five Edison Grand Opera Records issued to that time. Get some of these from your Jobber, together with a supply of supplement No. 6, and put both in the hands of some of your best people.

NATIONAL PHONOGRAPH CO.

TWO USEFUL LISTS.

Emile Garnier, an Edison Dealer at 1601 N. Robertson street, New Orleans, La., issues two lists of much interest to the Phonograph trade. One is a monthly catalogue giving the numbers and titles of every talking machine Record made in this country, no matter by whom manufactured. It is kept corrected from month to month. It is sold by subscription at three dollars a year. The other is a list of about 600 popular songs, of which Mr. Garnier supplies printed copies of the words for five cents each. These are printed to supply the demand of hundreds of talking machine owners who want the words but will not pay the price of sheet music.

COMMENTS ON EDISON GOLD MOULDED RECORDS FOR MAY, 1907.

The owner of an Edison Phonograph who cannot find a number of selections in the May list of Edison Gold Moulded Records to suit his or her taste will be hard to please. There is something here for everybody; something for every mood. Two new Edison artists are introduced, Miss Edith Helena, soprano, and Frederick H. Potter, tenor. Both are heard to excellent advantage. Two of Vesta Victoria's famous songs are given by Miss Jones and Miss Trix. The Edison Venetian Trio has another artistic violin, flute and harp trio. So widespread has been the popularity of the monthly sacred numbers that two are again included in the May list. The comedy element is especially strong this month, the list including eight funny ones. Mr. Denny sings another of his old time rapid-fire mirth provokers. The other fun makers are Arthur Collins, Bob Roberts, Ada Jones, Helen Trix, Steve Porter, Len Spencer and Billy Murray.

No. 9530. "The Mill in the Forest," by the Edison Concert Band, is a descriptive instrumental selection of wide popularity. Composed by R. Eilenberg. The old mill imitation is one of the features of the Record. The entire rendition is fine.

No. 9531. "Poor John," by Ada Jones, has many points of similarity with "Waiting at the Church," admittedly one of the greatest song successes of recent years. It was written by the same people: Henry E. Pether and Fred W. Leigh; is being sung with equal success by Vesta Victoria; has an air that is quite catchy; a humor fully infectious, and our Record of it is made by Miss Jones, whose rendition of "Waiting at the Church" did much to spread the popularity of the song. "Poor John" is what his mother said when he brought his future wife home on a visit. This remark followed a most scrutinizing looking over of the girl by the mother. The chorus tells the story:

John took me round to see his mother; his mother! his mother!
And when he introduced us to each other,
She weigh'd up my'rything that I had on.
She put me thro' a cross-examination,
Plainly boiled with aggravation,
Then to my horror I heard her say,
Looked at me and said: "Poor John! Poor John!"

The Record is made with orchestra accompaniment.

No. 9532. "While I Have You," by Irving Gillette, is a new sentimental song of the better class. The words and music are by Frances S. Seamans. The air is more than usually attractive and the words are above the average as the following chorus in it will show:

I used to love the roses
And pretty violets, too,
My heart was true to the daisies, too,
And o'er'y flow'r that grew.
Your cheeks are now my roses,
Your eyes the violets blue,
My dreams I sigh if the flow'rs all die
While I have you.

Mr. Gillette sings with orchestra accompaniment.

No. 9533. "Good-a-Bye John Medley," is a xylophone solo by the versatile Albert Benzler, whose work is ever that of the real musician, whether playing the piano, bells or xylophone, or taking part in the orchestra or band. This medley is made up of four songs of recent popularity as follows: "Good-a-bye, John," (Record No. 9464); "Somebody's Waiting for You," (Record No. 9476); "Captain Baby Bunting," (Record No. 9508), and "Ida-Ho," (Record No. 9520).

No. 9534. "I've Told His Missus All About Him," by Helen Trix, is another of Vesta Victoria's song hits and a sequel to "Waiting at the Church." The latter song tells of a girl who made all arrangements to be married and was waiting at the church when her intended sent around a note, stating that he could not marry her because his wife wouldn't let him. The sequel relates how the "upset" girl got "multi" with Obadiah by visiting his wife and telling her all about his perfidy. The "missus" hears the story with much symmathy and promises to "lay on handel" when he comes home. As they part Mrs. Binks shows her large, fine teeth, at which the visitor exclaims: "I've been unlucky, or they might have both been mine." Miss Victoria in making such a success with this song that it would not be surprising if it achieved a popularity equal to "Waiting at the Church." It has a catchy air and the words are funny. Miss Trix's singing is an almost perfect imitation of Miss Victoria's stage rendition. The Record is made with orchestra accompaniment. James W. Tate wrote the music and John P. Harrington the words of this new song.

No. 9535. "Oh! Mr. Brown!" is the solo contribution for the month of Arthur Collins. When Harry Von Tilzer and Andrew Sterling write the words and music of a coon song, and Arthur Collins sings it, all the ingredients are at hand for a successful Record. This song is fully equal to the best coon song efforts of these composers, a statement that means much when their many clever songs are considered. Mr. Collins sings it for our Record with the skill that has made him famous as an interpreter of coon songs.

No. 9536. "Something for Jesus," is a sacred selection by Anthony and Harrison. Robert Lowry wrote the music and S. D. Phelps the words of this well-known hymn. Our Record has been made in a most artistic manner by Messrs. Anthony and Harrison, whose sacred selections have endeared them to all admirers of church music. They sing with orchestra accompaniment.

No. 9537. "Thunderer March" by the Edison Military Band, is still another of John Phillip Sousa's popular marches and played for our Record with as much dash and vim as if the March King's own organization was playing it. The series of Mr. Sousa's marches made recently on Edison Records has awakened a new interest in his work.

No. 9538. "No Wedding Bells for Me," is a bachelor song by Bob Roberts. Three verses and three choruses of a most comical tone are given. The words and music fit Mr. Roberts like a glove. Had the song been written for his use only it could not have been more successful. Since each verse and each of the choruses are different, the singer gives six reasons why he will not marry. No one fond of a funny Record will fail to get this one. Seymour Furth wrote the music and E. P. Moran and Will A. Heelan the words.

No. 9539. "Nobody's Little Girl," is a touching song by Byron G. Harlan. When Theodore Morse and Jack Drislane collaborate in writing the words and music of a song, it may be depended upon to possess more than ordinary merit and attractiveness. Such is their latest effort. Mr. Morse has fitted Mr. Drislane's pathetic words with an air that will at once please all lovers of songs of this kind. Mr. Harlan, with the assistance of the orchestra, sings the selection in a manner that must receive the approval of its composers, as it certainly will his army of Phonographic friends.

No. 9540. "Flanagan On a Farm," is an Irish vaudeville selection by Steve Porter. After singing a ditty on the joys of the farmer's life, Flanagan tells how he once took a job on a farm. He arrived at four o'clock in the morning. He ate a fine breakfast and got up perfectly satisfied. The farmer urged him to sit down again and eat his dinner, which he did. He was then invited to eat his supper. To his great surprise he disposed of another big meal. The farmer then said, "Now that you have had your breakfast, your dinner and your supper, you can go out in the field and work all day without stopping." But Flanagan was "on to him" and declared that he always went to bed after supper.

No. 9541. "Dixie," by the Edison Symphony Orchestra, is the famous song of the South so dear to the hearts of the American people. Next to our national anthems, no song is more popular. Whether played in the North, South, East or West, it never fails to evoke enthusiasm and applause. It awakens tender memories in the breast of the Southerner, and brings to the men of the North, of the East and of the West a realization that, no matter what our past differences may have been, we are to-day one nation and one people; brothers, not foes. Our Record of "Dixie" is a special arrangement by Leader Ecke and a number of appropriate effects are introduced.

No. 9542. "Wenth the Old Acorn Tree, Sweet Estelle," by Harry Anthony is a new beautiful sentimental ballad by J. Fred Helf, the composer of many delightful songs. The words are by C. M. Denison. Although not by the same composer, this song reminds one of "In the Shade of the Old Apple Tree," and it will not be surprising if it duplicates the success of the latter ballad. Mr. Anthony excels himself in his interpretation of the song. He sings with orchestra accompaniment.

No. 9543. "That Welcome on the Mat Ain't Meant for Me," is a coon duet by Collins and Harlan. Salamanda Jones was a bones artist with a colored show, which went broke at Kokomo. Samanda dug both feet in the snow and humming "Homeward bo", he beat it back to Hasbeenacks. Reaching his shack he was greatly pleased at reading the word "Welcome" on the rubber mat. A glance inside, however, caused him to realize that "Welcome" was not his password, for he exclaimed:

"Somebody's hat is a-hanging on the rack
Where my hat used to be;
Somebody's face is a-flirting with that fork
That used to belong to me;
Somebody's there occupying my bar too,
Somebody's saying I'm not welcome, or throw';
Well I dont have to put on any glasses to see
That welcome on the mat ain't meant for me."

Messrs. Collins and Harlan sing with orchestra accompaniment.

No. 9544. "When You Know You're not Forgotten by the Girl You Can't Forget," by Frank C. Stanley, is a waltz song of exceptional interest by Fred Helf (music) and Ed. Gardenier (words). The pretty sentiment in the story is enhanced by a musical setting full of character. Mr. Stanley's fine baritone voice is heard to splendid advantage. The Record is made with orchestra accompaniment.

No. 9545. "Funelli—Intermezzo," by the Edison Concert Band, is a new instrumental selection of unusual attractiveness from a musical standpoint. It has been taken up by many musical organizations. It is appearing in band programmes everywhere and will undoubtedly be much heard in the coming summer. Its composer is Robert A. Keiser.

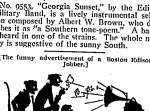
No. 9546. "Last Rose of Summer," by Edith Helena, is a delightful soprano Record of this ever popular song, in which is introduced as a special feature, the brilliant high note finish which has earned for Miss Helena a world-wide fame. Miss Helena is an English singer possessing in especially fine voice for Record making. To do that Miss Helena's voice had to be at its best is universally known. Miss Helena sings with orchestra accompaniment.

No. 9547. "San Antonio," by Billy Murray and chorus, in a new cowboy song, by Egbert Van Alstyne (music) and Harry Williams (words) that has rapidly achieved popularity from coast to coast. As a Record it is exceptionally entertaining and tuneful. The Edison Male Quartette assists Mr. Murray in the chorus.

No. 9548. "Let Me Hear the Band Play The Girl I Left Behind," by Frederick C. Potter, is a stirring march song, the subject of which is a wounded trooper's last request to "see Old Glory waving" and hear the band play "The Girl I Left Behind." This Record introduces a new tenor singer in Mr. Potter, although he has made over one or two catalogue selections sung originally by other artists. He has a fine tenor voice and promises to be an excellent addition to the corps of Edison artists.

No. 9549. "Love's Serenade," is another selection by the Edison Venetian Trio. The trio for violin, flute and harp (No. 9485, "Memories of Home") put out in the March list met with a most cordial reception at the hands of music lovers, and requests for others of the same character were made at once. "Love's Serenade" is by special arrangement of F. von Blon's composition of that name. It is a delightful selection and is exquisitely played by the Edison Venetian Trio. The members of the trio are Charles Schuetze, harp; Eugene C. Rose, flute, and Eugene Jaudas, violin.

No. 9550, "Stand Up for Jesus" by the Edison Mixed Quartette, is an unaccompanied rendition of this widely sung hymn by G. J. Webb (music) and G. Duffield (words). Mixed quartettes have been found by churches generally to be ideal combinations for sacred music. That this is so is shown by the Records being made by the Edison Mixed Quartette. No more satisfactory Records of hymns could be imagined.



No. 9551, "Ask Me Not," by Will F. Denny, is a comic song by Cobb and Edwards and is one of those topical compositions with which Mr. Denny has been prominently indentified in the past. It is written to be sung in race-horse time, and keeps its hearers on the *qui vive* to catch the story. It tells of the things wifey does from time to time, but why she does them is met with:

Ask me not, ask me not, ask me not I pray,
Why she does this and that and various every day.
Take my wife, take my life, but me on this spot
But why she does just what she does,
Oh! ask me, ask me not!

No. 9552. "Meet Me Down at the Corner," by Ada Jones and Len Spencer, is a vaudeville sketch of that part of the love-making of Kitty Carney and Barney McCue which leads up to Barney's proposal and acceptance. The sketch opens with Kitty singing of her disappointment at Barney's delay in keeping his appointment. A messenger boy enters with a note from Barney, but before she can read it Barney appears in person. Barney is apologetic and loving; Kitty is inclined to scold and find fault because of the delayed appointment. Barney manages her to read his note. It proves to be a proposal and Kitty sings it. Barney presses for a reply and gets it in this manner: "Well, all I can say is, I think it's about time." Miss Jones' solo parts are a verse and a chorus of a new song: "Meet Me Down at the Corner," by Harry Tlerf (music) and Will Cobb (words). The singing has an orchestra accompaniment.

No. 9553, "Georgia Sunset," by the Edison Military Band, is a lively instrumental selection composed by Albert W. Brown, who describes it as "a Southern tone-poem." A banjo is heard in one of the strains. The whole melody is suggestive of the sunny South.

[The funny advertisement of a Boston Edison Jobber.]

Round the horn
with Edison, a delightful voyage—
sail into our Phonograph department and hear the latest records.
Phonographs, $10 to $50.
Edison Records, 35c each.
Wholesale and retail.

Iver Johnson's Sporting Goods Co. 169 Washington St.

JOBBER'S NEW BUILDING.

James K. O'Den, Edison Jobber at Paterson, N. J., recently began the erection of a handsome new building at 115 Ellison street, adjoining his present quarters, and the Paterson *Evening News* made Mr. O'Dea the subject of an interesting sketch, part of which follows:

"It was while engaged in the dry goods store that Mr. O'Den became interested in Phonographs and as a side line handled a few samples. This was when his father severed his connection from the firm of Brown & O'Dea and opened a store for himself on Market street near Railroad avenue. Here it was that the subject of this sketch branched out as a Phonograph and Record merchant, and by strict attention to business built up a nice trade. When the fire of Feb. 1902, destroyed most of the luminous section of the city, Mr. O'Dea determined to enter into the Phonograph business for himself and as a consequence rented his present quarters, 117 Ellison street, and began catering to the patrons of Edison's invention, the Phonograph and Records.

"Mr. O'Den proudly boasts of the fact that the building he occupies was the first one erected after the fire and points with pride to the foundation of his own new structure.

"The new building will be two stories high and will be built of white brick and terra cotta with the frontage arranged to conform with modern ideas and fire protection throughout. It will cost in the neighborhood of $10,000 and when completed will be a credit to the city. The first floor will be devoted to Mr. O'Den's business, while the second floor will be set aside for offices. A new feature of the store will be the erection of private booths for the demonstration of Phonographs and Records."

D. S. JOHNSTON CO. TO BUILD.

[From the Seattle Sunday Times, February 8, 1903.]

The D. S. Johnston & Co., the largest dealers in pianos and organs on the Coast, are to build a beautiful seven-story structure at the northwest corner of Third avenue and University street. The present quarters of the D. S Johnston Co., at 905 Second avenue, have for several years been far too small and unsatisfactory to permit of the proper display of the instruments for which the firm are factory agents.

The structure will be seven stories high from the Third avenue level, but will actually contain nine and one-half floors, counting the basement, a sub-basement and a mezzanine floor. The building will occupy a sixty-foot front on Third avenue and seventy-one feet on University street.

The basement and sub-basement will contain a thoroughly complete piano repair department.

The main floor will permit of 150 feet of plate glass, which will allow a beautiful display of pianola-pianos, talking machines, etc. In addition, four large piano parlors will be partitioned off, each being independent of the other and sound proof.

On the second floor will be located the talking machine department, subdivided into ten rooms arranged en suite. Here also will be found the player piano department with a large library and spacious rooms adjoining in which patrons can try the various rolls.

The third floor contains the Recital Hall, which will comfortably seat from 250 to 350 persons, according to arrangement. This hall will be used exclusively for recitals and other musical events. The hall is twenty-one feet high, extending through two floors.

Surrounding the hall on both the third and fourth floors are eighteen large well-lighted outside rooms arranged single and en suite with reception rooms intended for the use of artists and music teachers' studios.

The fifth, sixth and seventh offices are arranged as commercial offices, singly, or in two, three, four, five-room suites intended for corporations. Two large electric elevators will also be installed, one for passenger and one for freight. The building will be heated by steam.

It is contemplated to have the building ready for occupancy by August 15.

NOT A HARDSHIP.

Not infrequently a Dealer in Edison goods, who has been doing the entire line in his town, complains when another is permitted to take up the line in the same place. Even though he has been doing the talking machine business and making no effort to push it, he still feels that he has not been given a "square deal" when the new man is supplied with Edison goods. Many such Dealers have since found that this attitude was a mistake. They have learned to their great surprise that it helped their business instead of injuring it. Many a Dealer has been aroused from his lethargy to a determination not to let the new man get ahead, and he has been astonished at the possibilities of the Edison business. He has advertised in his local paper, sent out printed matter and circularized possible buyers, all because of a desire to spite and possibly injure his new competitor. He has been amazed, however, to find the business coming his way. He has found the expenditure making money for him, instead of being the loss he expected. As a result he has become a live, aggressive Dealer, carrying a constantly increasing stock and finding the business pleasant and profitable, instead of the annoyance it was in the old days. Then, too, his awakening has been met in an equally aggressive spirit by the new man. He has likewise let the public know that he has Edison goods and has been quite successful in finding purchasers. As a result of this competition, each Dealer has done four times the amount of business that the first one did before it was brought about, and the whole community has been aroused to the desirability of having an Edison Phonograph in its homes. This is no fanciful or imaginary situation. It is the common experience of salesmen for Jobbers and of this company. Not one time in ten does the signing of a second Dealer in a town fail to increase the sales in that town many times. It happens sometimes that a Dealer is pushing this business in a manner to cover this field thoroughly. In such a case it is a detriment to put in another Dealer.

MOST POPULAR OF ALL MUSICAL INSTRUMENTS.

With the Edison factories turning out machines at the rate of two a minute every working day there is no longer any question that the Edison Phonograph has become the most popular musical instrument of the present day. Probably more Phonographs are now sold than all other musical instruments combined. The Edison Phonograph is no longer to be considered as in the class with those machines against which many are so prejudiced. Mr. Edison and his assistants studied long to determine the cause of this prejudice. Finding it due to loud and unnatural sound reproductions, blatent horn tones, harshness, scratching and other needless noises, they have eliminated every vestige of such faults, and produced a machine that sings, plays and talks, naturally, smoothly and without scratching or horn tones. It is impossible to compare an Edison Phonograph with any other style of machine without realizing that the former is infinitely better. To those who want real music, naturally reproduced, the Edison Phonograph asks for no other test than to be played alongside of any talking machine in existence. Such a test will win all but those who want noise and are not looking for quality.—*The Phonogram.*

FROM JAMAICA.

Since the earthquake and fire in Jamaica, our Foreign Department has received several communications from its Dealers there, and we quote as following from one of the letters:

"I have a few hundred Records, and have not lost one, although my house was destroyed, and at present I am living in a tent erected on the race course. Thank God, all the Phonograph owners are still alive, and I doubt very much if any of the machines have been destroyed."

THAT THANKSGIVING MENU.

The Thanksgiving menu card printed in the January PHONOGRAPH MONTHLY and credited to a Dealer in Ohio, has proved to have been originated by the Buffalo Phonograph Company, Buffalo. It was put out by them in November, 1905. It has since been used by other Dealers, some of whom did not know where it originated.

NOT ONE OF THE INDIFFERENTS.

I read with surprise, the article headed, "An Annoying Situation," in the January PHONOGRAPH MONTHLY. I think the articles that appear monthly in this periodical would be inducement enough to anyone who receives it and takes the least interest in his business as a Jobber or Dealer and cares to increase his business in the sale of your goods (which is one of my greatest pleasures), that he would not let up on it until he had read every word in it and then lay it down, feeling sorry that it is not again as large and full of information which is a help to anyone in this line. If this paper is not inducement enough to have it read by everyone who receives it, I think it will remain a perplexing problem for you to solve as to having them do so. I look forward to the arrival of them, monthly, with the same interest that I look for my daily paper.—*H. T. Kraus, Newport, Pa.*

EDISON AND THE PHONOGRAPH.

Thomas A. Edison gave the following interview recently to our representative, says the *Musical Age:*

"I believe that I do not amount to much as a musical critic. A few years ago, when the talking machine business was still a dubious proposition, a list of the new records was often handed me for approval. After hearing them, I would mark 'good,' 'fair' or 'rotten' against the compositions so as to class them for trade. The 'rotten' records always made a hit with the public. *Now*, all I have to do is to condemn a bit of music and the factory works overtime to supply the demand.

"The development of the Phonograph business has been as great a surprise to me as it must be you. I did not think much of it until a boy of mine—who was eight years old then—persisted in working the machine and breaking record after record. I said to my wife, 'If that kid is hardest to by I guess there must be something in it.' And the result shows there was.

"While the possibilities are broad for the development of the Phonograph business it is hard to say what direction the next improvements will take. For one thing, the horn meets with objection. For another thing, there's that grating noise. There's also fault to be found here. I do not think the horn feature will ever be eliminated, though, of course, you never can tell. As for the grating buzz, that also seems to be one of the necessary faults of sound production.

"I am still constantly experimenting with the Phonograph. It is one of my loves. When I strike a snag along other lines, back to it I come. In this shows, I'm finding, that I myself do not think it perfect. Its further development will be gradual, like all other things.

"We will soon be able to have opera producing Records, and these Records will play forty minutes.

"There are changes going on in everything. There is no standstill in anything. The Phonograph, therefore, will broaden out into something beyond criticism in time."

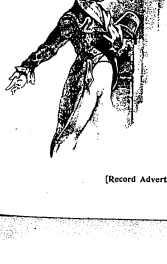
Buy the New Edison Records for March for Your Phonograph



If you haven't a Phonograph, go to some dealer and hear them. Then you will want both the Phonograph and the Records.

The March selections, a complete list of which is given below, cover the whole field of entertainment, from pathos to roaring comedy. Each is the work of an Edison artist. Everybody will enjoy Ada Jones' rendition of "My Irish Rosie," a new song hit made famous by Hattie Williams in her musical comedy, "The LittleCherub." It's a real Irish love song, catchy and bright. All New York is whistling

"My Irish Rosie"

The power of the Edison Phonograph as an ever popular entertainer cannot be half appreciated unless its repertoire is occasionally replenished.

New Edison Records for March

On Sale February 27th

9482	The"Uhlans' Call	Edison Concert Band
9483	The Mountain King	Stanley
9484	My Irish Rosie	Ada Jones
9485	Memories of Home	Edison Venetian Trio

Thomas A. Edison

[Record Advertisement in March Magazines.]

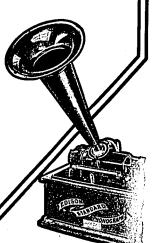
Listen!

To the voice of the greatest and most perfect language teacher in the world. He says:—I do not want to boast of my achievements. No. But I would like to tell my friends, the phonograph dealers, how I can help them, how I can increase their business from 10 to 30 per cent.—and just stop and think what this means to **you.**

Why there is a dealer out West who is doing a business of $15,000 a year on his I. C. S. Language Outfits exclusive of his amusement records, outfits, etc. This shows the possibilities that exist in the

I.C.S. LANGUAGE SYSTEM

WITH



Thomas A. Edison

PHONOGRAPH

Any wide-awake dealer who will give me a fair trial will be helped in every way possible to make a success of his language business. Free advertising literature will be furnished him for distribution, copy for newspaper ads will be given him—in fact everything will be made easy for him to make large sales of language outfits, and, thru his increased advertising, to very appreciably enlarge his regular sales. Just write me a postal. Address it to the Professor, care of the

MORE THAN FIFTY PER CENT. INCREASE.

The fiscal year of the National Phonograph Company closes on the last day of February in each year and consequently much time has been taken up during March in "footing" up things. The factory at Orange was closed down from the night of February 28th to the morning of March 4th to take the annual inventory, although we could hardly spare the time for the task. Figures were not needed to tell any Edison official or employee that the year has been most prosperous, for everybody knew in a general way that the business of the twelve months had been phenomenal in its volume. It has been none the less gratifying, however, to see the exact figures. These have told a fascinating story of success. We thought that the volume of business for 1905-06 was a wonder, and it was a record-breaker —yet the year 1906-07 showed an increase of more than fifty per cent. over its predecessor. Still, many people are surprised that Phonographs are yet sold. Such individuals would find it hard to believe that for every 1,000 Edison Phonographs made in 1905-06, more than 1,500 had been manufactured in the past year.

What is still more interesting is the outlook for the new fiscal year. The demand for Phonographs and Records has greatly increased in the past few weeks. The orders for Records have been especially heavy. Since March 1st the factory precedents for both machines and Records have been exceeded, with every prospect of an equally great demand for months to come. Hands are being added in every department, new machinery is being installed, new buildings are being occupied and nothing else left undone that will assist in meeting the demand for Edison goods, no matter what its volume may be.

From a selling standpoint, the outlook is none the less rose tinted. Applications from firms who want to become Edison Jobbers are

(Continued on page 2.)

THE ADVANCE LIST OF JUNE RECORDS APPEARS ON PAGE 2.

NEW EDISON GOLD MOULDED RECORDS.
ADVANCE LIST FOR JUNE, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **May 27th**, all things being favorable, but they must not be placed on sale by Jobbers or leave their places of business, or be re-shipped to Dealers before **S A. M. on May 27th.** Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after May 28th, but must not be circulated among the public before **May 27th.** Jobbers are required to place orders for June Records on or before **April 10th.** Dealers should place June orders with Jobbers before **April 10th** to insure prompt shipment when Jobbers' stock is received.

9254 Golden Rod—Intermezzo (McKinley) ..... **Edison Concert Band**
An instrumental selection of exceptional interest. Miss Mabel McKinley's latest composition.

9255 With You in Hierarity (Solman) ..... **Irving Gillette**
A new love song by Arthur Lamb and Alfred Solman.

9256 Cavalierin Rusticana—Intermezzo (Mascagni) ..... **Edith Helena**
A vocal imitation of a violin playing this celebrated intermezzo.

9257 Protest Pete (Durand) ..... **Vess L. Ossman**
A solo for banjo played in march tempo, in which bits of popular German airs are suggested.

9258 In Washington (Hoffman) ..... **Billy Murray**
The biggest comic song hit in Anna Held's "The Parisian Model."

9259 Reed Bird (The Indian's Bride) (Rood) ..... **Collins & Harlan**
A characteristic Indian selection in both story and music.

9260 It's a Long Way Back to Dear Old Mother's Knee (Mohr) ..... **W. H. Thompson**
A ballad song in Lew Dockstader's minstrels this season.

9261 The Telescope March (Seltzer) ..... **Edison Military Band**
The latest popular composer of "The American Standard" and "The Royal Trumpeters."

9262 School Days (Cobb & Edwards) ..... **Byron G. Harlan and Chorus**
A new version of the song, reminiscent of the days "when we were a couple of kids."

9263 Sometime We'll Understand (Granahan) ..... **Anthony & Harrison**
A beautiful record and one sure to appeal to the lovers of entirely new selections.

9264 Mrs. Clancy and the Street Musicians (Original) ..... **Edison Vaudeville Co.**
Cast of Characters:
Mrs. Clancy (A favorite with the boys and girls)..... Steve Porter
Pedro, the Hand Organ Man (In Trouble)..... Billy Murray
Leader of the German Band (Very Poor)..... Edward Meeker
Leader of the Street Band (Prayed for with the Dutch)....Steve Porter
Boys, girls, musicians, etc.

9265 The Dreamer Waltz (Keith) ..... **Edison Symphony Orchestra**
A dreamy waltz played as a concert number.

9266 Monte Cristo (Snyder) ..... **Bob Roberts**
A comic song with topical verses and a melody full of swing.

9267 In the Wildwood Where the Blue Bells Grew (Taylor) ..... **Harlan & Stanley**
A duet of more than ordinary tunefulness. In the chorus is introduced a part of "The Old Oaken Bucket."

9268 You'll Have to Get Off and Walk (Rood) ..... **Will P. Denny**
A comic song that keeps a-moving from beginning to end.

9269 Petite Tambouine (Scotto) ..... **Edison Concert Band**
An instrumental selection from Paris.

9270 Ephraham Johnson (Greene & Werner) ..... **Arthur Collins**
A coon song telling of the troubles of "Eph," a plous coon and "pillar of the Hardshell Church in Blackville, Tenn."

9271 The Last Rose of Summer is the Sweetest Song of All (Sidney) ..... **Harry Anthony**
A sentimental ballad having for its theme the melody a part of "The Last Rose of Summer."

9272 Becky and Izzy (Original) ..... **Ada Jones and Len Spencer**
A Yiddish courtship. Becky tells Izzy, among other things, of the fire in her father's store (fully insured) and sings for him "You are my Pie-ing" (Cobb & Edwards).

9273 Dainty Dames (Blake) ..... **Albert Benzler**
A dainty bells solo of an exceptionally pretty gavotte.

9274 Lulu, and Her Lu, Lu, Lu (Von Tilzer) ..... **Helen Vrie**
A novelty comic song. It tells of Percy's experience with a concert hall artiste, Miss Lulu from Paree.

9275 Flanagan's Married Life (Original) ..... **Steve Porter**
Flanagan relates his marital experiences and tells all about Mrs. Flanagan.

9276 The Land Beyond Band (J. W. Kelly) ..... **J. W. Myers**
A lively and march song popular a generation ago.

9277 Poor John Medley (Original) ..... **Edison Military Band**
Four hits from the May Supplement: "Poor John," "Tell Welcome on the Mat Ain't Meant for Me," "I've Told His Missus all about Nancy," and "San Antonio."

Edison Gold Moulded Records are made only in Standard Size. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

(Continued from page 1.)

constantly being turned down, it being our policy at present to establish no jobbing firms except at such places as the general welfare of the business makes it desirable and not merely to sell goods. The report of the Sales Department on March 2d shows a total of over 10,000 Edison Dealers in the United States and Canada. These are not agents, but bona fide dealers, each with an established store and doing a legitimate business. Nor are they "dead" dealers, as we make every effort to determine who are the "dead ones" and remove them. From 10 to 50 of these firms are removed every week.

With such a record for "past performances" and such a "sure thing" for the new year, it follows that every member of the Edison organization is feeling much elated just now. If it is true that nothing succeeds like success, the Edison business for 1906-07 will be a marvelous example of success.

AN IMPORTANT EDISON PATENT SUSTAINED.

A decision has just been handed down by the United States Circuit Court of Appeals for the Second Circuit in New York, involving Mr. Edison's patent on the camera used for taking moving pictures. This patent marked the practical beginning of the moving picture art, and was the first example of a camera arranged to take a series of uniformly spaced negatives on a single film, to permit the direct printing of positives therefrom. The original patent was granted August 31, 1897, and a suit for its infringement was brought against the American Mutoscope & Biograph Company of New York. The case was originally heard by Judge Wheeler, in Vermont, who decided that the patent was valid and that it was infringed, but upon appeal, the United States Circuit Court of Appeals at New York, held that the claims were too broad, and that the patent for that reason was invalid. The patent was thereupon re-issued with new claims on September 30, 1902, and a new suit was brought against the same defendant. The new suit was first argued before Judge Ray, United States District Judge in New York City, and it was held that while the new claims were valid they were not infringed. Upon appeal the present decision has just been rendered affirming Judge Ray's opinion on the subject of validity, but reversing him on the question of infringement. This decision practically gives to Mr. Edison a monopoly on all modern moving picture cameras.

In considering the question of infringement Judge Ray regarded the patent as being limited to the specific device invented by Mr. Edison for feeding the film, but with this the Court of Appeals did not agree, and said:

"Such novelty, however, cannot be predicated solely on the circumstance that the intermittently moving parts operate directly upon the film; *the meritorious feature of the device is that they seize hold of the film firmly, move it positively, regularly, evenly and very rapidly without jarring, jerking or slipping, producing a negative which can be printed from and reproduced as a whole without rearrangement to correct imperfect spacing of the successive pictures.*"

Although the particular device suggested by Mr. Edison in his patent for intermittently moving the film was a sprocket wheel which always engaged the perforations therein, the Court held that defendant's arrangement, consisting of an oscillating fork which only periodically engaged the film to move it intermittently, was an infringement. They said:

"But the 'intermediate section' is moved across the lens by the interlocking engagement between a sprocket or pin and a hole in the film, thereby moving it positively, regularly, evenly, and very rapidly, without jarring, jerking or slipping—the parts being arranged so that the movement shall be intermittent. In our opinion the bifurcated fork with studs is a fair equivalent of the well known sprockets, and the combination shown in the Warwick camera is an infringement of claims 1, 2 and 3 of the reissued patent."

Although this decision comes almost ten years after the original patent was granted, and after many vicissitudes, we are glad to say that Mr. Edison's claim to inventorship in the moving picture art is fully and completely recognized, and we are sure that all of his friends will join with us in congratulations.

MR. EDISON AND THE NEWSPAPER MEN.

If people thought at all about Thomas A. Edison's age they would have guessed he was older than 60. At the banquet given to him by some of his employees in this city last Monday night he said he meant to play hereafter. Of course, everybody understood that joke. He is a great joker, but never said anything more ridiculous than that he did not mean to work. He knows nothing about playing. The reason many would have supposed him older than 60 is that he has so long been famous. Thirty years ago Newark newspaper men were "writing him up" pretty regularly, and he was very widely known before that. Whenever a Newark reporter needed a story on a dull day he could find one at Edison little place, in the old Advertiser building, or on Ward street. Newspaper men owe him a big debt. He has furnished them with more salable copy than any living American, including even Theodore Roosevelt.—*Newark Sunday Call.*

SALE OF INFERIOR PARTS NOT A "SQUARE DEAL."

The National Phonograph Company is not getting a "square deal" from a certain proportion of Edison Jobbers and Dealers. There may be no intention to injure us on the part of such firms but the "deal" is none the less an unfair one. No manufacturing concern in business in this country to-day makes greater efforts to advance the interests of its Jobbers and Dealers. None is entitled to greater consideration at the hands of the trade. Dealers should be anxious to advance the welfare of the Edison Phonograph and this company, instead of being parties to practices designed to hurt it.

We refer to the purchase and sale of main springs, feed nuts, sapphires, and other parts for the various types of Edison Phonographs. Most of these parts being manufactured by other concerns and sold to the trade for use in our machines are absolutely unreliable. They find a market because they are cheaper than genuine Edison parts, and when a Jobber or Dealer puts them into Edison Phonographs, or sells them without informing the purchaser of their true nature he becomes a party to a questionable transaction. It is a transaction that is positively injurious to the Edison reputation and we are determined that it shall be stopped. If the trade will not work with us, but will persistently do things that are detrimental to our interests, we will take severe measures to protect ourselves.

We recently sent a man to a western city to investigate some complaints made by a Jobber that our machines were not working satisfactorily. In several instances he was puzzled to get the machines to operate, but finally located the trouble in the mainspring. In these cases the original springs had been removed from the machines and others substituted. The new ones were found to be soft and not of the same quality as we furnish with the machines. Just where or why the substitutions were made we do not know. We do know that for the time being our reputation suffered.

In the same way complaints about belts, governor springs and balls, feed nuts, button arm hooks, sapphires and rubber gaskets have been found to be due to inferior parts manufactured by other concerns, who, having nothing at stake, are indifferent as to quality.

Jobbers are strongly urged to buy all parts for Edison Phonographs direct from us and to refuse to handle any of other manufacture. Dealers are also urged to buy no parts from any Jobber or outside firms except upon a positive guarantee that they have been made by us. The difference in profits is too small to pay anyone to take part in transactions that work an injury to every one except the manufacturer of the inferior parts.

PRINTED MATTER.

Dealers who write us direct for a supply of printed matter are again asked to get it from their Jobbers, bearing in mind that even the latter cannot supply it in unlimited quantities. The task of printing catalogues, booklets, supplements, folders, etc., for about 150 Jobbers and over 10,000 Dealers has become formidable, and it is a great deal easier for the trade to dispose of printed matter than it is for us to produce it. For instance, it is a matter of weeks to print an edition of 2,000,000 circulars, but the trade can put them into circulation in a day and be ready to ask for more. A million Record catalogues is an average of less than 100 for each Jobber and Dealer—truly a small quantity to last four months—and yet it requires nearly three months to turn them out. At present, practically all of our printing is distributed through Jobbers and as the business grows larger it becomes more and more necessary to continue this plan. Not selling direct to Dealers, we have no means of knowing the extent of a Dealer's business, or how much printed matter he would require. Then, too, the quantities that most Dealers could use would have to go by express, because too small for freight shipment, and neither Dealers or we could afford the cost of expressage. Therefore, Mr. Dealer, ask your Jobber for moderate quantities of our forms, and be patient with him when he tells you that he does not have them, for at times he has trouble in getting what he wants from us, just as we have difficulty in producing forms fast enough to meet the demand on us. It has become a big game, and it is getting bigger by the minute.

The April issue of the Record Supplement appears for the first time in four-page form, and because of the more lengthy descriptions of our Records it should be a more useful form than ever for getting Record business. In addition to giving the list of April Records on pages two and three, the March list is given in condensed form on page four. Dealers who have not been in the habit of mailing supplements to machine owners each month should lose no time in making up such a list and sending a copy of the supplement to them regularly. Dealers who have been doing this, find it a splendid means of increasing their business in Edison Records. We anticipate a great increase in the demand for this form.

The new form of the *Phonogram* has proven to be very popular. The change in style has given its use a fresh impetus. This is shown in the many increased orders from Jobbers. We have also received numerous letters from Phonograph owners commenting favorably upon the change. We hope that no Jobbers will furnish the *Phonogram* to Dealers on any other than the usual conditions.

ABOUT ADVERTISING.

We print on page 19 of this issue, a copy of our Record advertisement being published in the standard magazines and weeklies of the country for April. Two pages are again being printed in the magazines and double space in the weeklies. The Phonograph advertisement is another of the clever silhouette series, which have attracted much attention all over the country. The circulations of the mediums being used in April are upwards of ten millions and these advertisements should be read by half the population of the country. Then too, we are running a series of advertisements in newspapers in every jobbing city, which should reach the other half of the population. No better evidence of the success of these advertising campaigns could be desired than the great and ever increasing output of the factories at Orange. The growth of the Edison business is a marvel even to those who are at work in their efforts to make it larger. At the present rate a Phonograph in every home must eventually become a certainty. Do a little local advertising, Mr. Dealer, and then our advertising will do more for you and more for us. Thousands of people will not write here for catalogues, but they will go to your store if you let them know where you are and that you are anxious to tell them more about the Edison Phonograph.

PERSONAL.

Peter Weber, General Superintendent of the Edison factories at Orange, N. J., has been spending the past month at Fort Myers, Florida, where he and Mrs. Weber have been the guests of Mr. Edison. Mr. Weber's health has not been the best in the past six months, due to the tremendous and long continued demand upon him and his assistants for more goods than they have been able to produce. At the same time, he has had the burden of making more additions to the factory in two years that most businesses make in a life time. At least another year of strenuous building is before him and he has returned in fine condition for the work.

PUBLISHERS OF MUSIC IN JUNE LIST.

The publishers of the compositions made for our June list of Records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers:

9554 Golden Rod—Leo Feist, 134 W. 37th street, New York.
9555 With You in Eternity—Jos. W. Stern & Co., 34 East 21st street, New York City.
9557 The Sheik—Will Rossiter, Chicago, Ill.
9558 In Washington—Jerome H. Remicke & Co., 45 W. 28th St.
9559 Reed Bird—M. Witmark & Sons, 144 W. 37th St., N. Y.
9560 It's a Long Way Back to Dear Old Mother's Knee—Peter Dachstetter Pub. Co., N. Y.
9561 The Telegram March—Cornille-Seltzer, Philadelphia, Pa.
9562 School Days—Geo. Edwards Music Pub. Co., 1512 B'way, N. Y.
9564 The Last Rose of Summer is the Sweetest Song Tho'—Jos. W. Stern & Co., New York City.
9565 The Dreamer Waltz—Walter Jacobs, Boston, Mass.
9566 Monte Cristo—P. A. Mills, 48 W. 29th St., N. Y.
9567 In the Wildwood Where the Blue Bells Grow—Forest View Music Pub. House, New York City.
9568 Yiddy Yiddy Yum—Leo Feist, 134 W. 37th street, N. Y.
9569 Pestle Pounding—Jos. W. Stern & Co., N. Y.
9570 Ephraham Johnson—Barron & Thompson, 49 W. 28th St., N. Y.
9573 Dainty Dames—Jerome H. Remicke & Co., 45 W. 28th St.
9574 Lolo, and Her Lo, Ee, La—Harry Von Tilzer Music Pub. Co., 37 W. 28th St., N. Y. City.

WINDOW DISPLAY.

The advance made in the art of window trimming in the past few years is as noticeable as that made in advertising. Any retailer who recalls the windows of ten years ago can't help but mark the contrast that greets his eye today. At that time the displays presented a conglomerate mass of everything in general, and not much of anything in particular. The passer-by had the same sight to gaze upon day after day, and no doubt wondered why people showed such poor taste.

But to-day it is another story. The idea of utilizing this valuable space has been grasped by every live dealer. Glance in these same windows and you see something. You see, back of the exhibit, the idea standing out bold and strong. The chances are that the moment you look it will flash into your mind how that display reminds you of the excellent ad. that appeared the day before describing the very articles you saw in the window.

A display to attract attention must possess sufficient originality to at once arrest the eye with an unique arrangement so harmonious and beautiful as to be truly artistic, as a publicity expert would probably say. The most cultured admire a fine exhibit. The most ignorant are influenced by it. Dollars and cents are hypnotized by it. The great mass of shoppers are swayed by it, and the merchant who in wise always remembers this.—*Talking Machine World.*

TO THE TRADE.

Attention is called to the article in the February number of the EDISON PHONOGRAPH MONTHLY, entitled "Doubtful Points Legally Interpreted," and particularly to section 5 of that article on page 8, having reference to the disposal of talking machines or other articles as premiums, or in connection with newspaper subscription schemes, and the like; and in which section it is pointed out in what respect such schemes are violations of the Conditions of Sale, forming part of our Jobbers' and Dealers' Agreements.

All schemes involving the giving away or the disposal at less than current prices of any talking machine, or, for which advertising is considered a part-payment, and which article is taken in exchange in whole or part-payment for goods manufactured or sold by this company, is a violation of the Conditions of Sale governing the sale of goods manufactured and sold by this company; and any advertising or premium scheme which directly or indirectly involves the exchange or sale of goods manufactured and sold by this company, is a violation of such Conditions of Sale.

All Jobbers and Dealers are hereby warned that after this date, all goods manufactured and sold by this company, must not in any way be coupled with advertising or premium schemes, or exchanged for goods of other make or nature involved in such schemes. Jobbers or Dealers who hereafter dispose of goods of our manufacture in this way, will be immediately suspended from the advantages and privileges of our Jobbers' and Dealers' Agreements.

NATIONAL PHONOGRAPH CO.,
W. E. GILMORE, President.

Section 5 of the article "Doubtful Points Legally Interpreted," referred to above, reads as follows:

5. *Can Jobbers or Dealers enter into contracts with newspapers to handle premium machines and exchange such machines for Edison machines, and also enter into a Contract with a subscriber for the purchase of Edison Records as a part consideration for the delivery of the premium machine without violating the Conditions of Sale?*

This scheme, as it appears to us, works as follows: The Jobber or Dealer enters into an arrangement with a newspaper under which the newspaper agrees to advertise the proposition and also to canvass for new subscribers for the paper; and the newspaper further agrees to refer all subscribers, both old and new, who wish to take advantage of the premium scheme, to the Jobber or Dealer who, upon receiving a form or certificate issued by the newspaper, will deliver to the subscriber the premium machine *free of cost* (except a small payment to cover packing and delivery charges); and the subscriber on his part agreeing to purchase a given number of Records within a given time.

The premium machine costs the Jobber or Dealer about $2.00 net, for which he receives nothing from the subscriber *except a promise to purchase a given number of Records*, and hence the giving away of this premium machine constitutes an inducement to the sale of Records, and is a violation of Section 3, of the Jobbers', and Section 2, of the Dealers' Agreements.

Thereafter, if the subscriber wishes to exchange the premium machine for a more expensive machine, the Jobber or Dealer agrees to allow the subscriber a specified sum, for instance, $2.00, for the machine which cost the subscriber nothing; therefore, the Jobber or Dealer takes back a machine which cost him $2.00, and gives the subscriber the benefit of $2.00, in addition, for which the Jobber or Dealer receives no consideration in return. In this transaction the subscriber pays, say for an Edison Standard machine, in cash, $10.00, and a machine which costs $2.00, making a total of $18.00, and hence our list price is cut to the extent of $2.00, thus violating Sections 1 and 2 respectively, of the Jobbers' and Dealers' Agreements. This basis of calculation, however, is entirely in favor of the Jobber or Dealer, while, as a matter of fact, the subscriber pays nothing more than $16.00 for the Edison Machine. The subscriber pays *absolutely nothing* for the premium machine, and hence neither gives, forfeits nor loses anything when he returns the machine, so that the Jobber or Dealer in reality presents the subscriber with $4.00, or cuts the price on the Edison machine to that extent. This situation is exactly parallel to a Jobber or Dealer giving away a Talking Machine or any other article valued at $4.00, and the next day or later sells to the recipient an Edison Standard machine for $16.00 upon returning the gift. If this were permissible, then it should be equally permissible for a Jobber or Dealer to give away free an Edison Gem machine, or any other low-priced machine, as a trial machine and accept that machine at list price in part payment for a higher-priced Edison machine. This manifestly is not permissible under our Conditions of Sale.

We understand it has been suggested that a violation of our Conditions of Sale would be avoided in the exchange of machines, if the premium machine be accepted in exchange for a large horn and crane and other supplies, and charge, or rather pretend to charge, the full list price, however, does not avoid our Conditions of Sale. Following out the figures above indicated, the subscriber would obtain there additional articles at less than current prices, and thus there would still be a violation of Sections 2 and 1, respectively, of the Jobbers' and Dealers' Agreements, since additional articles would be included with an Edison outfit at less than the current prices, which constitutes indirect price-cutting. Furthermore, the transaction would involve the giving away or selling of other goods at less than current prices as an inducement to the sale of Edison machines, which is a violation of Sections 3 and 2, respectively, of the Jobbers' and Dealers' Agreements.

There are additional points involved in this premium scheme which are contrary to our Conditions of Sale, but the foregoing are the important ones.

GRAND OPERA RECORDS.

Jobbers' orders for Supplement No. 6 of the Grand Opera Records, are being shipped with the regular May Records and will go on sale at the same time, April 27th. Dealers who have not placed orders with Jobbers for a supply of these Records still have time enough to do so and have them come forward with their May Records. Every Dealer carrying any considerable number of Edison Records should include with them one or more of each of the 50 Grand Opera Records thus far listed. These Records have been very widely advertised, and Dealers should profit by the interest of Edison Phonographs anywhere should be unable to get them because Dealers did not have them in stock. Dealers ordering Grand Opera Records will be supplied by their Jobbers with special supplements that can be mailed or otherwise sent to the better class of Phonograph owners. A judicious use of these can hardly fail to make sales. It is true that sales of Grand Opera Records will not be as numerous as those of regular Records, but even those who buy high class Records also want other kinds and they buy these when they come to your store. We again print the advance list of the May Grand Opera Records. Dealers who do not know about the forty-five Grand Opera Records previously issued can have a list mailed from the Advertising Department upon request.

GRAND OPERA RECORDS.

Supplement No. 6, May, 1907.

B. 46—Tarantella Rosetti
By GIUSEPPE CAMPANARI, Baritone
Sung in Italian *Orchestra accompaniment*

The Tarantella is a dance native to Southern Italy, the music being in 6-8 time, and in very fast time pace. Its name is now supposed to be derived from Taranto, but it was long connected with the idea that the lively dancing the dance was a cure for the bite of the poisonous spider called the tarantula. The fascinating character of the music of the dance has caused it to be used as a model by many modern composers for instrumental pieces and songs. Rosetti's Tarantella was composed for the great bass singer Lablache. It has a swinging rhythm and rapid movement, and is one of Rosetti's most captivating tunes.

B. 47—"L'Air des Fleurs" de Siebel ("Siebel's Flower Song") Gounod
By MME. JACOBY, Contralto
Sung in French *Orchestra accompaniment*

Siebel is the simple and unfortunate lad in "Faust" who is *Marguerite's* lover. Unfortunate upon whom the scene to attract her happiness through the malignant power of *Mephistopheles*. Siebel, standing in a garden, in the beginning of the third act, with a bouquet of flowers which he leaves at her door as a token of his love, sings this joyous and delicious melody of mingled tenderness and rapture: "Gentle flowers in the dew, beautiful flowers," he interrupts it for a moment to pluck a flower which he noticed in the previous act by *Mephistopheles*, and presents it to his hand. He is sadly disheartened, but tries dipping the hand in Holy Water, when at once the power of the demon is gone, and the flower is restored. He continues the joyous air.

B. 48—"Ihr diesen heiligen Hallen" ("Within These Sacred Halls") "Die Zauberflöte" ("The Magic Flute") Mozart
By ROBERT BLASS, Basso
Sung in German *Orchestra accompaniment*

The scene of "The Magic Flute" is laid in Egypt. *Sarastro*, the High Priest of Isis, has carried away to its lonely home *Pamina*, the daughter of the Queen of the Night. He comes to his temple to learn the ways of wisdom and virtue. There are numerous adventures, as a result of which *Tamino*, *Pamina* and *Papina*, an Egyptian Prince, are initiated into the mysteries in the Temple of Isis. The Queen of the Night seeks revenge. The second act opens in the temple of Isis. *Sarastro* enters. The Queen enters seeking revenge. *Sarastro* sings the great air, "Within these sacred halls revenge is unknown." It is one of the greatest airs for bass in the opera, requiring a sonorous and deep voice, and the finest art of the singer.

B. 49—"O Paradiso en terra" ("O Paradise on Earth") Meyerbeer
By FLORENCIO CONSTANTINO, Tenor
Sung in Italian *Orchestra accompaniment*

"L'Africaine" introduces the Portuguese explorer, *Vasco da Gama*, an historical character of imaginary adventures in the East, whence he has brought back a slave girl named *Selika*, with whom, in Spain, *Vasco* is enraptured. She is in love with *Vasco*, as is also the High Priest, *Don Pedro*, and *Inez*. As a result of intrigues, *Vasco* is sailing in the East, with *Selika*, to prove his discovery of the new land. *Vasco*, alone on the deck of his vessel, sings his great air of a beautiful island with her. He is bewildered and overcome with the beauty of the scene—with the rich gardens, the magnificent temples, the smiling landscape. He bursts out in the exclamation, the finest in the opera, an exquisite melody set to an exquisite and ethereal accompaniment.

B. 50—"A tanto amore" ("So much Love") Donizetti
By MARIO ANCONA, Baritone
Sung in Italian *Orchestra accompaniment*

This air is sung by *King Alfonso*, in the third act of the opera, addressed to his mistress, *Leonora*, whom he desires to marry after repudiating his queen, though threatened by the Pope with excommunication. *Leonora* refuses his offers and *Alfonso* loves her more ardently, resorting to the victorious campaign at the head of the Spanish army in Naples, and returning to her the most independent for his faithfulness by his marriage vows, as a part of his reward. *Leonora* extends the hand of *Lorenzo*. *Fernando* is lieutenant of the army of *Alfonso* in the King and she is in despair at the result of the battle, when she learns that the King carries through his noble soul in this aria impressively bestows the hand of *Leonora* upon his victorious general.

MORE MEXICAN RECORDS.

George Werner, a member of our recording force, left early in March for Mexico City, Mexico, for the purpose of taking another series of Mexican Records by native artists. The recording will be done at the office of our Mexico branch, Avenida Oriente, No. 127, of which Rafael Cabanas is manager.

AMONG JOBBERS.

The Vim Company has moved its Des Moines, Ia., branch from 828 West Walnut street, to 204 Seventh street.

The Ross P. Curtice Co., large dealers in pianos and musical merchandise at Lincoln, Neb., became Jobbers in Edison Phonographs and Records last month.

The Theo. F. Bentel Co., of Pittsburg, among the older Jobbers in Edison goods, have been succeeded by the Standard Talking Machine Co., which will continue the business at the same address, 437 Wood street.

McGreal Bros., Edison Jobbers, at Milwaukee, Wis., now located at 173 Third street, have leased the Ogden Building on Third street, which will give them much more space. The building is a four-story, solid brick structure, located at 172-174-176 Third street. It has a frontage of 60 feet on the street, and extends back 150 feet. McGreal Bros., who are located across the street from the Ogden building, will move their stock of Phonographs to the new quarters about May 1. The store will be conducted in 174 Third street, and on October 1 the firm will take charge of the entire building. The change is necessitated by the growth in the business of McGreal Bros. At the present time the wholesale business of the company is conducted at 317-319 Milwaukee street. This business will be moved to the new quarters. The building is to be remodelled at a cost of about $10,000. The members of the firm—E. E. and H. J. McGreal—began business in a small street in 1902. L. E. McGreal was a Western salesman for the National Phonograph Company. The company was started in a small way with a small capitalization. The first year's sales amounted to about $60,000, while the sales of last year amounted to over $300,000.

Niehaus & Dohse, Edison Jobbers, at Dayton, Ohio, were the subjects of a half-page "write-up," with illustrations, in the Dayton *Daily News* on March 7th. We append the following extract from the article:

"There is no more complete establishment in the city than that of Niehaus & Dohse of 35 East Fifth street, wholesale and retail dealers in bicycles, sporting goods, talking machines, etc.

"Ten years ago these two young men started a small repair shop on Fifth street, near Brown, where they also sold bicycles in a small way. About one year later they moved to 36 South Jefferson, where they put in a complete stock of bicycles and kindred goods. Three years afterward the business had outgrown the quarters and the firm removed to its present quarters, 35 East Fifth, where they carry a most complete line of bicycles and sporting goods.

"In the first room they occupied on East Fifth they had space 8 by 22 feet, giving floor space of 176 square feet. At 36 South Jefferson the store was 22 by 60, with a floor space of 960 square feet. In their present quarters, where they have been established for six years, they have ground floor and basement 22 by 100, giving them a total floor space of 4,400 feet."

MR. EDISON'S PLAYDAY.

In commenting editorially on the recent birthday of Mr. Edison, the New York *World* said:

"Thomas Alva Edison was 60 years old yesterday. In accordance with a lifelong belief about a man's duty to himself, he will now give himself over to a play-spell. For an opening frolic he will perfect the Phonograph. Then he will inquire into a few scientific mysteries and suggestions which have presented themselves to him from time to time during the last forty years, while he has been busy. He made notes of them, you see, knowing that some day he should want them to play with.

"Plainly, it is to long days of inquisitive joy that the great inventor looks forward, now that he is resolved to be no more a slave to commercial exploitation. Everybody will hope that he may realize them. He always did like fun, he has earned the right to a lot of it, and it is highly probable that he will let the public share in much more of it than that coming with a perfected Phonograph.

"It has been told that Mr. Edison is sixty. This is calendar reckoning. He himself admits that, counting by eighteen-hour workdays, he is 103.

"The important Edison inventions began with a repeating telegraph instrument, worked out while the wizard-to-be was an operator. A vote recorder came later. It recorded all right but did not commend itself for practical use. From this failure the inventor drew the lesson that he should always be sure a device was wanted before going ahead with it. There has been no trouble about introducing the Edison stockticker, duplex telegraph system, telephone appliances, phonograph, incandescent lamp, kinetoscope and magnetic-ore treatments. Nor do these and the just-perfected storage battery for automobiles begin to make up the whole list of wonders from the Edison laboratories.

"In the face of his calculated calendar age, his workday age and his potential age, this wizard of Llewellyn Park goes on to assure us that he is really a young man of thirty. It is easy to believe him. Very preservative of energy and hope are the impulses of one whose interest in doing things worth while work itself into pastime."

CONCRETE WORK AGAIN UNDER WAY.

Now that freezing weather is past, active work has again been begun upon the new concrete buildings which are to comprise the great Edison factory of the near future. Fourteen of these buildings were nearly completed last year, work being brought to a standstill in December, by the frost. These buildings will now be completed, and about half as many more new buildings put up. It is expected that another year will be required to carry out the building plans now under consideration.

COMMENTS ON EDISON GOLD MOULDED RECORDS FOR JUNE.

There is nothing surprising after all about the great success of the lists of Edison Gold Moulded Records put out month after month, as evidenced by their phenomenal sales, for they comprise selections of such a varied character as to appeal, in part at least, to all tastes. There is something for everybody. Each list is a delightful evening's entertainment. In addition to good things by all the Edison stars in the June list, there is a clever vocal imitation of a violin by Edith Helena, and a funny Record by the Edison Vaudeville Company, from whom other good things will come later. Steve Porter's contribution is irresistible in its drollery. The following paragraphs tell more about the list:

No. 9254, "Golden Rod," by the Edison Concert Band, is a charming intermezzo by Mabel McKinley, a niece of the late President. Miss McKinley has achieved a national fame as a composer of popular music. Among her best known works are: "Amoa" (our Record No. 8274); "Feather Queen" (our Record No. 9337) and "Karama" (our Record No. 8783). This new selection is quite as attractive as her previous efforts.

No. 9255, "With You in Eternity," by Irving Gillette, is not a sacred selection, as its title at first suggests, but a sentimental and pathetic ballad in which the lover sings his devotion to the memory of the dear one who has passed away. The music is by Alfred Solman and the words are by Arthur J. Lamb. Mr. Gillette sings the words with much feeling. He is accompanied by the orchestra. The chorus:

Although in this world we may meet no more;
Although in this world love's dream is o'er,
Some day, my sweet, we'll happy be,
With you in eternity.

No. 9256, "Intermezzo from Cavalleria Rusticana," by Edith Helena is a vocal imitation of a violin playing Mascagni's well known composition. It is one of the most novel and at the same time most clever Records so far made for the Edison catalogue. Miss Helena sings this on the vaudeville stage, playing a violin in pantomime the while. In our Record the final notes are sung just to convince the listeners that the violin is being imitated.

No. 9257, "Pretzel Pete," by Vess L. Ossman is a banjo solo, with orchestra accompaniment, with which Mr. Ossman has placed to his credit another splendidly rendered Record. His banjo work never fails to please his admirers of this instrument. "Pretzel Pete" was written by Hampton Durand. Suggestions of German airs are woven in the melody.

No. 9258, "In Washington," by Billy Murray, is a topical song. Mr. Murray sings of the foibles and peculiarities of life at the nation's capital. These points upon the cost of living, the lack of limit of its games, the hotel charges and finally the practice of sending statesmen to the Senate when they need a change and rest. Charles Bigelow makes a big hit with this song in Anna Held's "The Parisian Model" at the Broadway Theatre. The music was written by Gertrude Hoffman and the words by Vincent Bryan. Mr. Murray sings with orchestra accompaniment.

No. 9259, "Reed Bird," ("The Indian's Bride") in an Indian song by Collins & Harlan. Songs of the noble Red Man continue to compete with coon songs for the center of the stage of popularity. Reed Bird is the squaw beloved by a "big, bold Indian brave." She is stolen by the foes of the tribe. The rivals fight, the squaw is rescued and "the big chief weds her in the morning." Dave Reed, Jr., is responsible for both the music and words. Of course, the song is much more attractive than anything actually produced by Indians, but the words are Indian, there are whoops of the braves and the tom tom's beat, therefore, it is an Indian song. Collins and Harlan sing with orchestra accompaniment.

No. 9260, "It's a Long Way Back to Dear Old Mother's Knee," is a sentimental song by W. H. Thompson.

It's a long way back to dear old mother's knee,
And it's there to-night I long to be!
And I'd gladly live life o'er
To retrace my steps once more;
It's a long way back to dear old mother's knee.

Thus the singer views in retrospect the days of his childhood, when his mother took him on her knee, crooned to him a love song sweet and low and read from the family Bible the sweet story of Bethlehem long ago. The music to the tenth line sentiment of the verses and Mr. Thompson's splendid voice Mr. Thompson seems to sing better with each new selection. The music of this song was written by Halsey K. Mohr and the words by Alfred Bryan. The Record is made with orchestra accompaniment.

No. 9261, "The Telescope March," by the Edison Military Band, is a new composition by Frank R. Seltzer. The orchestration includes some attractive effects.

No. 9262, "School Days," by Bryon G. Harlan and Chorus, is a new descriptive song by Cobb and Edwards, with a subtitle "When we were a couple of kids" and the two titles give a fair idea of the story in the song. The chorus tells it more fully, as follows:

School days, school days, dear old golden rule days;
Readin' and 'rite and 'rithmetic,
Taught to the tune of a hickory stick,
You were my queen in calico,
I was your bashful lover boy,
And you wrote on my slate, I love you Joe,
When we were a couple of kids.

Mr. Harlan's excellent rendition of the song is enhanced by the Edison Male Quartette, who join in the chorus, all being accompanied by the orchestra.

No. 9263, "Sometime We'll Understand," is the monthly sacred number by Anthony & Harrison. Ever since our sacred Records have been so successful we have had scores of requests for this hymn by James McGranahan (music) and Maxwell N. Cornelius (words). It is one of the most attractive of sacred selections. The Record is made with orchestra accompaniment.

No. 9264, "The Last Rose of Summer is the Sweetest Song of All," is sung by Harry Anthony, who has not in some time made a more

attractive Record than this new ballad by Harry Sidney (music) and Arthur Gillespie (words). He sings with orchestra accompaniment. The song throughout somewhat suggests that famous ballad by Balfe and a complete strain from "The Last Rose of Summer" is included in the chorus.

No. 9565, "The Dreamer Waltz," by the Edison Symphony Orchestra, from a musical standpoint is the most artistic number in the June list. It is a composition by Lester W. Keith. The performance of our orchestra is fully in keeping with the high class character of the music.

No. 9566, "Monte Cristo," is rendered by Bob Roberts. When Ted Snyder and Alfred Bryan wrote this song they struck a new note in humorous topical selections, for it is quite unlike any comic song now before the public. It makes ludicrous references to Henry Green, Count Castellane and the Rockefellers, but to appreciate the fun, the Record itself must be heard. Mr. Roberts is always easy to understand, and consequently no part of "Monte Cristo" is lost. The Record is made with orchestra accompaniment.

No. 9567, "In the Wildwood Where the Blue Bells Grew," by Harlan & Stanley, is a sentimental composition by Herbert H. Taylor, that must become one of the most popular airs of the season. The words are well chosen and the music charming. The orchestra accompanies the singers.

No. 9568, "You'll Have to Get Off and Walk," is a funny one by Will F. Denny. Dave Reed, Jr., must have had Mr. Denny in mind when he wrote the words and music of this comic song, for it fits his voice and style perfectly. Several and two choruses are given on the Record, one part telling of the singer's lack of success in trying to ride a horse to town and the other of misfortunes that befell him when he took his girl out in automobile. On the latter trip his rival Jones appeared on the scene just as his gasolene gave out and carried off the girl.

No. 9569, "Petite Tonkinoise," is played by the Edison Concert Band. So delicately is this charming composition given that it almost seems as if the Record was being made by the orchestra instead of the band. "Petite Tonkinoise" is written in a delicate subdued manner. The composer is V. Scotto.

No. 9570, "Ephraham Johnson," by Arthur Collins, shows that it is still possible to produce a good comic song, both for catchiness of music and humor of words. Ephraham Johnson was a genuine coon and he was ever praying to the angel Gabriel to take him to the sky. But when some boys, to test his nerve one night, blew a big fish horn and hollered, "Ephraham," Eph cried out:

Ephraham Johnson don't live here no ma',
He came left this place more than a week ago;
Eph's gone away, he's never coming back
Ephraham Johnson don't live here no mo'.

No. 9571, "Mr. Clancy and the Street Musicians," is a clever Record by the Edison Vaudeville Co. It has the following cast of characters:

Mrs. Clancy, (a favorite with the boys and girls.....
.....Steve Porter
Pedro, the Hand Organ Man (in trouble).....
.....Billy Murray
Leader of the German Band (plays first violin).....
.....Edward Klekner
Mulligan, the Street Piano Player ("Down with the Dutch").....Steve Porter
Boys, Girls, Musicians, etc.

Mrs. Clancy hails Mulligan and he plays his street piano for her and the boys and girls. When he wants money he is sent on his way. Pedro appears with his hand organ. Mrs. Clancy plays it herself, to the delight of the children. Now comes the German band. The leader stops the organ and the band plays a schottische. Mrs. Clancy appeals to Mulligan to keep up the Irish end and he breaks in on the band with his street piano. Cheers are given for the Irish and the Record closes with laughter and cheers. The Record is unique. It will come close to breaking all precedents in the way of sales.

No. 9572, "Becky and Izzy," is by Ada Jones and Len Spencer, who enter the Yiddish field this month and present a very funny Record of a Yiddish courtship on the East side of New York city. The Record is a laugh from beginning to end. The dialogue touches upon noses, fires, diamonds, failures, etc. Here are some of the laughs:

Becky—But why when you kiss me do you hold your head away back?
Izzy—Because your noses are (music, "Always in the Way") that's it, always in the way.
Izzy—Vat's de news, anyway?
Becky—Nothing, only a fire in fadder's store.
Izzy—Oh, ol. when is it?
Becky—It was last night.
Becky—You promised me a diamond necklace for my birthday, but you failed to buy it.
Izzy—Vell, vat I'd have to do to buy you a diamond necklace?
Becky—What's dat?
Izzy—I'd have to fail.

Izzy wants to be called by some pretty and sweet name. Becky calls him her firebug and sings: "You Are My Firebug," written by Will D. Cobb (words) and Gus Edwards (music).

No. 9573, "Dainty Dreams," by Albert Benzler, is a composition by Charlotte Blake, written in gavotte time and played as a bells solo. One of the best rendered bells Records that Mr. Benzler has made. The music is of a character to bring out the tones of this peculiar musical device to the best advantage. The orchestra accompaniment is a feature.

No. 9574, "Lulu and Her La, La, La," by Helen Trix, is a thrilling tale of the adventures of Percy of Omaha, who came to New York, went to a concert hall, saw and fell in love with Lulu of Paree, who pranced and danced, and sang "La, La, La." He followed her about, tried to talk to her in French, and finally called at her home to ask for pap, for her hand. Alas! He found Lulu rocking twins to sleep and singing, "La, La, La." Percy took the next train back to Omaha, for he was through with "Lulu, and Her La, La, La, La." There are five verses and three different choruses on the Record, and Miss Trix shines to especial advantage in her rendition of the song.

No. 9575, "Flanagan's Married Life," is by Steve Porter, who has unquestionably struck twelve with this Irish Vaudeville specialty, for

it includes more laughs than it is usually possible to get on one Record. Flanagan's reflexences to his married life are funny in the extreme. Here are some samples:

"Now before you're married you can't live without a woman and after you're married you can't live with her."

"I'll never forget the first day I met my wife. She says to me: 'The man I marry must be a hero and my first love was right.'"

"I asked her to say that one sweet word that would make me happy for life, but she didn't; she said 'yes'."

"I had a terrible shock the other night: She stopped talking and I thought I'd lost my hearing."

Flanagan precedes and follows his dialogue with bits of song quite as funny as the spoken words.

No. 9576, "The Land League Band," by J. W. Myers, is a lively old march song popular a generation ago. It will recall pleasant recollections to the "older boys." Sung with orchestra accompaniment.

No. 9577, "Poor John Medley," by the Edison Military Band, is a specially arranged medley of the following four popular hits in the May list of Edison Records: "Poor John" (Record No. 9531); "That Welcome on the Mat Ain't Meant for Me" (Record No. 9543); "I've Told His Missus All About Him" (Record No. 9534), and "San Antonio" (Record No. 9547).

A SEVENTEEN CENT PHONOGRAPH MADE BY BOYS.

[From the Newark (N. J.) Evening News, February 16, 1907.]

A unique phonograph, made by two Harrison boys at a cost of 17 cents, was sent to Thomas A. Edison to-day as a birthday gift. The machine is able to reproduce selections from any wax record, a practical demonstration of its powers having been given to-day in the *News* office, when the phonograph played "God Save the King" almost as plain as a high-priced machine of the latest type.

The phonograph is the work of Harry Clarkson, fourteen years old, of 23 Davis street and David Duncan, fourteen, of 408 Cleveland avenue. The work was done under the direction of Charles Weslow, of 331 Central oveune. Harrison, who has been instructing a number of young boys in mechanics for several months.

The articles used in the construction of the phonograph are: Cigar box, knitting needle, small spool, penny lead pencil, two small staples, two matches, half a dozen pins, 100 feet of soft wire, ball of twine, three pill boxes, penny hat pin, square foot of stiff paper and glass follower, commonly known as a sapphire.

The cigar box formed the body of the machine and on this the knitting needle was set with a pill box upon each end, forming the cylinder upon which the record rested. The two staples held the cylinder in place with the help of the matches placed between the needle and staples. Ordinary pins were used in different parts of the machine to hold it together. The hat pin was used as a crank for the balance wheel, which was composed of the wire and twine tightly wound. The paper was made into a cone, at the small end of which was placed the sapphire, seated on a pill box. A lead pencil stuck into a spool held the "horn" in place.

The idea of constructing the phonograph was conveyed to the boys by Mr. Weslow quite recently, and after several hours' work the young inventors were gratified to hear their home-made machine reproduce the songs and sayings on any of the Edison Records. The device was offered to Mr. Edison as a birthday gift, and the inventor notified Mr. Weslow he would be pleased to accept it. Mr. Edison's letter was as follows.

"I duly received your letter of February 11, advising me that yourself and a few of your boys had constructed a phonograph wholly from the reading of your letter, and very successfully indeed.

"I regret that I was not able to acknowledge this before as a birthday gift, inasmuch as my time is so fully occupied that I do not get my correspondence daily, hence the delay in answering you.

"You naturally, are interested to see the very unique instrument which the boys have gotten out and caused to work in accepting it. You will oblige me by most carefully, and then place it in my custody, so that it may be guarded, so as to always remind me of the donors. You may, therefore, deliver same to me, in case it should be absent, kindly deliver to Mr. Randolph, my secretary, who will see that it is brought to my attention."

VISITING JOBBERS.

Visiting Jobers at our New York office and Orange factory during March included the following: Mr. Henry and P. A. Powers, of Powers & Henry, Pittsburg; William Werner, Easton, Pa.; Theo. F. Bentel, Pittsburg; E. H. Dakin, of S. L. Crosby Co., Bangor, Me.; Mr. Davis, of Forsyth & Davis, Kingston, N. Y.; Rudolph Wurlitzer, Howard Wurlitzer and E. H. Uhl, of R. Wurlitzer Co., Cincinnati and Chicago; Jay A. Rickard, of J. A. Rickard & Co., Schenectady; Henry Babson, of Babson Bros., Chicago; F. C. Smith, of W. H. Ross & Sons, Portland, Me.; and E. H. Droop, of E. F. Droop & Sons Co., Washington, D. C.

THE BUSINESS CARD NOVELTY OF A PHILADELPHIA DEALER.

Hello Bill. I was looking for you last night.
Where at?
Why, at the wedding.
Who's married?
Two lemons. All suckers were invited.
I bought a talking machine last night and found I had a lemon, as I'm not satisfied with it.
I'm satisfied with mine. I bought an Edison Phonograph from John S. Smith, 311 East Girard Avenue, Philadelphia.

Reproduced from a photograph taken June 16, 1888, the day Mr. Edison completed the first Commercial Phonograph.

Every representative of the Edison Phonograph will be interested in this historical photograph of Mr. Edison, taken June 16, 1888—just as the first commercial model was completed. The lasting quality of the inventor's work may be traced in the similar feature of the swivel plate holding both reproducer and recorder, found in the '88 and 1902 models. Marshall Field (wholesale) Chicago, are still using the '88 model and say that when the machines wear out they will install the present Edison Commercial System.

THE HUMAN VOICE IN COLD STORAGE.

[*Jack Reed in The Star Monthly.*]

I am sure many of *The Star Monthly* readers have read that quaint, delightful story of "Frozen Speech," the story of the hardy explorers who awoke one bitter morning to find that 'tho they might go thru the motions of speaking, no sound issued from their lips. During the long cold winter all communications had to be carried on by sign language. Try as he would, no one could break the silence. Suddenly one morning the sun shone, and the wind grew warm and a faint hissing was heard. Then upon the ears of the astonished mariners were borne spoken words, curses, the barking of dogs, and a thousand and one noises, all jumbled up in one great blooming confusion. Words spoken but not heard at the beginning of the cold snap were now heard, altho no one was speaking. The long period of silence was accounted for.

On that first bitter cold day each man's words were frozen as soon as he spoke them, so no sound was heard. The words had been kept in cold storage all winter, but now as the air grew warm the words began to thaw, and the things said three months before were now heard.

The chaplain was horror struck as mouth filling oaths and forcible epithets assailed his ears. Run where he would he could not escape the volley of dark blue language. But more trouble yet was to be the good man's portion. The sailors professed to be shocked at the awful language and looked sadly at the chaplain as at a golden idol that had become clay, and mighty poor clay at that. They as one man voiced the opinion that their spiritual adviser was responsible for the violet hued curses. When he expostulated they shook their heads sadly as if the spectacle of their spiritual mentor's fall from grace wrung their very hearts, "and to think, he makes it worse by lying" said "Rum Bottle Pete" in an "aint it awful" tone. The poor chaplain wilted under the accusations of the practical jokers, and kept to himself during the rest of the voyage. On his return to England he immediately shipped as a missionary to the South Sea Isles, where it never freezes.

Of course this highly interesting and entertaining tale was a lie, told by a man with a truly wonderful imagination, yet things are being done daily which surpass this old romancer's wildest flights of fancy. I refer to the machine which talks. Now, we not only store words and music to be repeated time and again, but we can ship the storehouses of sound all over the world so that the Chinaman, the Indian, the Boer of South Africa, the Moro of the Philippines, the Bushman and the Eskimo can hear, at the same moment, the speech of the great statesmen at Washington or the bird-like notes of the great opera singer at the Metropolitan Opera House of New York. Thus has science made "truth stranger than fiction."

The machine that talks, that plays, that sings is truly the wonder of the nineteenth century. When the talking machine was first heard, people who understand nothing of the scientific principle upon which it was constructed regarded it with a superstitious awe as if it were some uncanny supernatural device. Yet it was based on a principle that was understood by scientists years before; the identical principle upon which the telephone works —the principle of sound waves.

If a tuning-fork is made to vibrate, one hears a sound. The faster the vibrations the higher the pitch. When the tuning-fork vibrates it makes waves in the air. These waves strike the tympanum of the ear and cause it to vibrate. A book of physics will tell you that the waves are of a peculiar kind, namely, a rarefaction and condensation, but it is sufficient for us to know that a vibration, whether it be of our own vocal cords, or what not, make waves in the air, and these waves striking the tympanum or ear-drum, cause corresponding vibrations there. The thing that interests us in connection with the Phonograph, or talking machine, is the tympanum, or ear-drum. This, as my readers doubtless know, is simply a piece of membrane stretched tightly across the ear-opening, just like a drum-head.

This being the case, it is possible to construct an artificial ear-drum. When a chord on the piano is struck the vibrations are communicated to the air in waves, which in turn communicate vibrations to the talking machine's diaphragm, in exactly the same manner it does to the ear-drum.

If you look into the mouth-piece of a telephone you will see that a sheet of some substance is stretched across it. This is the diaphragm. The best diaphragms are made of isinglass, or mica. When you speak into the mouth-piece the vibrations of your vocal cords are carried thru the air to this diaphram and cause it to vibrate. This vibration causes a duplicate vibration in the diaphragm in the receiver at the other end of the line by the agency of electricity. These vibrations make sound waves in the air again, and these waves strike the tympanum in the listener's ear and cause it to vibrate.

After the invention of the telephone, Edison and several other scientific men tried to devise a plan by which records of vibrations might be made, so they could reproduce them at any time. Edison was the first one to reproduce a practical record. He called it a Phonograph, which is derived from the Greek word *phonos*, sound, and *graphe*, to write—meaning, sound-writing.

Roughly, the successful plan was as follows: A smooth wax cylinder or disc was prepared. Near this was a mouth-piece, like a telephone mouth-piece, in which was a diaphragm. Attached to this diaphragm was a needle, the point of which just touched the surface of the wax cylinder. This cylinder or disc was then made to revolve slowly. As it revolved a person talked into the mouth-piece and this, of course, made the diaphragm vibrate, and the vibrations of the diaphragm caused the needle to make impressions in the wax.

When the impressions were made in the wax cylinder, the machine was stopped. Now if one wanted to hear what he had said, he used a diaphragm, on which was fitted a similar needle, and started the cylinder or disc revolving at the same speed it was going when he made the record. The needle fitted into the previous "impression" curves and caused the diaphragm to vibrate just as it had done when he talked into it. The vibrations made waves. These waves made the listener's tympanum vibrate and he heard what he had previously spoken or sung. If a person made the disc or cylinder revolve faster than it did when he made the record, the whole tone was higher, for the vibrations were more rapid.

Since the time of the first talking machine great improvements have been made, but the principle remains the same. The first machine, owing to imperfect recording instruments and diaphragms, did not reproduce things in the exact tone in which they were said, but the best machines now on the market reproduce sounds perfectly, and one is not exasperated by scratching needles and whirring wheels. Nothing is heard but the sound intended to be reproduced.

This little machine which reproduces the human voice, the notes played by band or orchestra, the liquid tones of a Melba, the oratorial outburst of the great orator, or the crow of a rooster, equally well, requires the greatest nicety in its construction.

Improvement has trod so closely upon improvement that there is little resemblance between the original squeaky machine of fourteen years ago, and the perfected types of today. The different makes of machines today have been developed on different lines. One manufacturer will use a cylinder record, another will use a disc one. One maker uses a steel point to make and reproduce records, while another uses the sapphire point for the same purpose.

The great factories employ an army of specialists, for no machine is made by any one man; it must go thru many hands before it is a complete talking machine. Each set of employes has a particular line of work for which it is held responsible. If one set makes a minor error the whole machine is imperfect. Some employes make the bases; others do the fancy lettering and designing; to others the work of grinding the points which carry im-

pressions to the mica tongue or diaphragm is intrusted; still thru others makes the diaphragm, and so on thru many processes until the complete machine—a true talking argument for the manufacturer—reaches the man who packs it in a box.

In the inspection department each part is examined with a microscope for flaws or imperfections that might in the slightest degree impair the ideal result. Then it is sent to the stock room, from which it passes to the assembling room. Certain men in the assembling room put certain parts together. Each main part is made of a number of smaller parts. When the men at one table finish one part, it is sent to the stock room; from there it goes to another table where something else is added, and so on, till it reaches the last table, all complete. Altho each minute process has been tested the machine is then tested as a whole after it is complete. Then it is ready for the packing.

The greatest skill of all is required in the making of records. The records which are sent out with machines are not the originals. They are duplicates of the original, made by a molding process of infinite delicacy and accuracy. These records are, of course, much more durable than the original.

In making the original record, the greatest care is taken. Sometimes twenty impressions are taken and tested before the men in charge find one which meets with their approval. Great singers, orators, brass bands, orchestras and monologue artists are hired to make records. Some great singers charge as much as $2,000 for singing into the recording machine. But the manufacturers find it pays to get the best, for they can sell thousands and thousands of duplicates of the records made by a world-renowned artist.

The thousand and one things which would interest a visitor to a great talking machine factory would be impossible to enumerate here. I have only touched upon the very high points, and on looking over this article I find I have even missed some of those.

It is a rather funny sight to see a great orator talking into a machine for he addresses the vacant looking funnel as if it represented a great audience, which indeed it does later, and gesticulates with all the grace and abandon that are his, when he is thrilling with his eloquence a great audience at Madison Square Garden and knows that a moving picture machine is recording his every gesture. In the same way the prima donna sings to the machine with all the fervor and passion that makes her the greatest in the world, for she knows that her song will reach an audience greater than she ever reached before.

People have the idea that these wonderful machines are simply a means of entertaining people, but it has other uses. It is in daily use in business offices. The business man's machine has a blank record cylinder. Into this he dictates his letters. He sends the records to his stenographer, who writes directly from the spoken words of the machine. If she misses a word she stops the machine and turns back. As she can regulate the speed of reproduction, it never goes too fast for her.

The machine that talks has passed the stage of being a scientific toy. It is a valuable business assistant, and the greatest home entertainer in the world. By its aid the greatest singers, bands and actors are constantly at one's command. What an invaluable record it will be of great people when they are dead. By its aid the voices of the world's greatest singers and the speeches of the world's greatest statesmen can be preserved for the delight and education of generations yet unborn.

We salute the greatest invention of the greatest age in the world's history.

Store of T. E. W. WILLIAMS, Adelaide, South Australia.

The above reproduction of the store of one of our most active Dealers in South Australia shows that in the matter of enterprise, fine display, etc, that country is fully awake to the opportunities for selling Edison goods.

JOBBERS' TRADE LETTERS.

Below are given copies of letters sent out by the American Phonograph Co., of Detroit, Mich., to dealers and prospective dealers.

To Dealers.

Gentlemen: In expressing to you our sincere thanks for the business you so kindly gave us in the past we take the opportunity to solicit a continuation of your favorable patronage, pledging the assurance of prompt services.

The past year has been the most prosperous one in our history, and naturally the opening of a new year finds us better prepared than ever before. We have a force in a position not excelled by any other jobbing house in the country, in that we have a large stock on hand of Phonographs, Graphophone Supplies, Talking Machines and accessories, Graphophones, Horns, in Cabinets, in Records.

We are in a position to give orders immediate attention, shipping the same day they are received, and we have the facilities to get goods to you quicker than any other jobbing house in the country. Where time is a factor we can save you time and money. If you are in an urgent hurry you can either wire us or at a very slight expense, call us over long distance phone, and you will have the goods ordered in a very short time.

Other jobbing points to the exceptional value a connection with us affords you, but we would say, in the matter of price we are never undersold and the quality of the goods we sell is always standard.

The large amount of general advertising being done by the National Phonograph Co., is having its influence throughout the length of the people, and the Phonographs are becoming more popular everywhere. We suggest that you take advantage of the benefit of this advertising in your local papers. The people have money; crops have been good; all industries have prospered; wages are better than ever before; there is more money in the country than ever before; people are feeling more independent than ever before—in fact the country's harvest is ripe. Let us get the most we can out of it.

Again thanking you for your kind patronage in the past, and assuring you of our continued desire to serve you faithfully, believe us to be,

To Prospective Dealers.

Dear Sir: We have stepped into a New Year, and while good bare allusion to records in the volume of business, we have every reason to look to present year will put last year in the shade, and it is a matter of individual duty on your part and our part to take advantage of the unrivaled prosperous business condition that is prevail over this great land of ours.

Never before in the history of the people as a whole been so well supplied with money. Never before has labor been so plentiful and wages so good. Never before has there been such an incentive to ambitious effort on the part of business men as there is to-day. The country is ripe for the harvest. There is not a cloud on the business sky. Every prospect pleases.

The large volume of general advertising which has been done and is being done by the National Phonograph Co., naturally creates a constantly growing demand among the people. It is up to you and ourselves to supply the demand.

All the conditions point to the fact that we are in a position to supply you to better advantages than any other firm.

We keep every line of stock continually full, so that we can ship your order the day it is received. We can ship goods to you quicker than any other firm. We guarantee that no firm can undersell us in any line of goods we handle.

Now, if this is so, and we know it is, why cannot we have your trade? Just "feel us" out with a sample order. You cannot make good connections any too quick. Remember, good thing you will find, and that is that we are constantly working in the interests of our customers.

Wishing you an abundant prosperity in 1902, and earnestly soliciting the opportunity to serve you, we remain,

New Edison Records

THE delight with which you heard the first Record on your Edison Phonograph returns with every new Edison Record that you buy. Every month twenty-four new Records are added to those which are available for your enjoyment. They are on sale at all Edison stores on the 27th of the month. The new records for April are especially good. Go to your store the day they are ready and hear them. You will not leave the store without at least half a dozen to try on your Phonograph at home.

The April List

On Sale at All Edison Stores on March 27th

In the Words of Others

"Sell I. C. S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 30 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for you? Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

THE DENVER DRY GOODS CO.
WHOLESALE AND RETAIL.

Denver, Colo. 11/21/05.

International Correspondence Schools,
Scranton, Pa.

Gentlemen:

In reply to your letter of the 17th inst., will say we considered the demonstration of Mr. Hartnett very successful and while he was here we sold several language outfits. We have also sold some to parties who did not hear the demonstration, but who had been spoken to by parties who received your text matter, so will congratulate with the parties to whom demonstration was given that you have got out such a satisfactory line of literature, and that the results obtained from the outfits sold by us, have been satisfactory, as we have placed several orders with you since the demonstration; and would like to know if we could arrange with you whereby we could get this line through your Denver office as we have had to do several times recently, when we had to wire to or by you. This would be quicker and more satisfactory to us.

We will keep you advised from time to time of the results of sales of I. C. S. Language Outfits.

Yours very truly,
THE DENVER DRY GOODS CO.,

EVER GROWING IN VOLUME AND PRESTIGE.

The business of the National Phonograph Company is noteworthy in these days of many unusual things, but perhaps the most remarkable of all of them is the demand for and the output of Edison Gold Moulded Records. The facilities we had at the beginning of the year were thought sufficient to meet every requirement until the new record-making building could be equipped with the necessary machinery and put in operation. No one deemed it possible that a volume of business could be secured that could not be easily taken care of by existing conditions. And yet this has happened. For more than two months past our record making department has been run continuously day and night with all the machinery it has at its command and with the most complete force of hands in the history of the business. The daily output would not be credited if stated in cold figures. Even the trade would think we were giving them some of the extravagant stories so easily told and of which the talking machine industry has its share. Even this great production has not been sufficient to keep pace with the demand of the trade. The orders each week have exceeded it and we have been running behind. This difference is not enough to cause the trade inconvenience, for Jobbers and Dealers are placing orders farther ahead nowadays and delays do not cause the annoyance they once did, when smaller stocks were are carried. The difference, however, has acted as a prod upon the work of adding ten more tanks to the present number. It will be at least another month before these can be completed and put in operation. They will add 40 per cent. to the present production and this "will help some."

At the same time the machine end is all that the most sanguine could desire. The factory is working up to a schedule that will produce seventy per cent. more Phonographs than were

(Continued on page 2.)

THE ADVANCE LIST OF JULY RECORDS APPEARS ON PAGE 2.

NEW EDISON GOLD MOULDED RECORDS.

ADVANCE LIST FOR JULY, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before June 27th, all things being favorable, but they must not be placed on sale by Jobbers or leave their places of business, or be re-shipped to Dealers before 8 A. M. on June 27th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after June 25th, but must not be circulated among the public before June 27th. Jobbers are required to place orders for July Records on or before May 25th. Dealers should place July orders with Jobbers before May 30th to insure prompt shipment when Jobbers' stock is received.

9278 **Ballet Music from Faust—Part 3** (Gounod) **Edison Concert Band**
The conclusion of the series. Although complete in itself it may be played in connection with Parts 1 and 2—Nos. 8450 and 8510.

9279 **Tm, Tm, An Revair, I'm Goin' to Go.** (Lovitz) **Ada Jones**
But she walked back, and says she'll "never say it again." A new coon song.

9280 **I Want You for My All Time Girl** (de Koven) **Irving Gillette**
"Then I want you for a few years more." Song hit from the comic opera "The Snow Man."

9281 **Kimmble March** (Kimmble) **John Kimmble**
A great march played by the composer on the accordion.

9282 **And a Little Bit More** (Fischer) **Arthur Collins**
Coon song by the composer of "Every Little Bit Helps." "Handsome Jimmy Snow" is the hero of the story.

9283 **While the Birds are Singing to Me** (Fulton) **Harlan and Belmont**
Whistling and singing duet, very much like No. 9022, "Beautiful Dreamland Waltz Duet."

9284 **I'd Live or I Would Die For You** (Tilla) **Harry Anthony**
A new sentimental ballad by the writers of "Love Me and the World is Mine."

9285 **Dreams of Ragelyl Forest** (Thurban) **Edison Military Band**
All the different stages of the Welsh Barebit Fiend's dream instrumentally described.

9286 **Because, I'm Married Now** (Ingraham) **Billy Murray**
A new comic song now making a hit. "I would if I could, but I can't"—what's the answer?

9287 **Speed Away** (Woodbury) **Edison Mixed Quartette**
A sacred quartette by mixed voices, unaccompanied. A beautiful number.

9288 **You'll Not Be Forgotten, Lady Lee** (Meyer) **Frederick H. Potter**
A captivating ballad, with the scene laid in the "Land of Cotton." Don't overlook it.

9289 **The Broken-Hearted Sparrow** (Dondix) **Edison Symphony Orchestra**
An orchestral number with a pathetic appeal, from a suite of four numbers entitled "A Love Episode in Birdland."

9290 **You'll Have to Wait 'Till My Ship Comes In** (Evans) **Bob Roberts**
"Then I'll have money to burn." A catchy waltz song recorded with characteristic effects.

9291 **I Know But I'll Be Happy 'Till I Die** (Hogan) **Collins & Harlan**
"I'd be just the same without a cent." A laughter provoking, happy-go-lucky coon duet.

9292 **Hymns of the Old Church Choir** (Solman) **Frank C. Stanley**
A descriptive song cleverly intermingling old sacred hymns, such as "Nearer My God to Thee."

9293 **Anvil Polka** (Parlow) **Edison Concert Band**
A thoroughly finished performance of a selection familiar to everybody.

9294 **Flanagan and His Servant Girl** (Original) **Steve Porter**
A vaudeville specialty, in which Flanagan tackles the servant girl problem, giving his experience with Anastasia.

9295 **Sweet Jessie Dear** (Frontelle) **Edison Male Quartette**
A sweet balled recorded as a male quartette, featuring the tenor and bass in solo parts.

9296 **Save a Little Money for a Rainy Day** (Silver) **Edward Meeker**
"Then's the time, you'll value a dime." A rattling good coon song with the right swing to it.

9297 **The Chorus Lady March** (Kingsbury) **Albert Benzler**
A xylophone solo of the bright and merry march composed especially for the comedy "The Chorus Lady."

9298 **Tale of the Bucket** (Bald) **Will K. Denny**
A comic song of seven verses. The idea of the song is something like No. 9142, "Fol-the-rol-lol."

9299 **Blondy and Johnny** (Original) **Ada Jones and Len Spencer**
A dance hall scene in which "Blondy" (Miss Jones) is kept busy, and at the finish sings the new waltz song "Blondy" (Meyer).

9300 **It's Great to be a Soldier Man** (Morse) **Byron G. Harlan**
An inspiring soldier march-two-one of the season's best. Hear the soldiers on parade effect.

9301 **Shoulder Arms March** (Rose) **Edison Military Band**
The most attractive march since No. 8587, "The New Colonial."

Edison Gold Moulded Records are made only in Standard Size. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

(Continued from page 1.)

made last year. It is expected that the new schedule will shortly be in full operation and that it will be maintained right through the year, regardless of the mid-summer falling off in the retail trade. The present demand makes it certain that it will not be possible to begin to accumulate a stock of machines till after July 1st, leaving only July and August to get ahead for the fall and winter. This plan of keeping the factory running to its capacity right through the summer was followed last year and worked out admirably, there being little of the trouble of previous years in keeping the trade supplied.

The total of the April business again exceeded that of any previous month, further illustrating the great and ever-growing popularity of the Edison Phonograph.

TO OPEN A BRANCH AT BUENOS AIRES.

The Foreign Department of the National Phonograph Company, whose office is at 31 Union Square, New York, and of which Walter Stevens is Manager, is about to open a branch office at Buenos Aires, Argentine. It will be known as La Compania Edison Hispano-Americana. The company has been incorporated under the laws of New Jersey with a capital of $25,000. The new branch will be in charge of Thomas J. Kennedy, who has been connected with our Foreign Department for the past two years. He sailed on April 17th. Although of American birth, Mr. Kennedy speaks Spanish fluently. He also speaks French and German. He possesses excellent business ability and is thoroughly familiar with the Phonograph game. The decision to open this branch in South America is due to the belief of our people that the future business relations between this country and South America is certain to be an important factor in the growth of both countries. Mr. Kennedy will push the business aggressively, establishing Jobbers in all of the principal countries. Quarters in Buenos Aires will not be secured till Mr. Kennedy reaches that city.

PERSONAL.

Walter Stevens, Manager of our Foreign Department, with headquarters at 31 Union Square, left on April 22d for a business trip to Mexico. He will pay his first visit to the office of our Mexican Branch, Avenida Oriente No. 117, Mexico City, and will also spend some time looking into general trade conditions in Mexico.

MR. GILMORE TO GO TO EUROPE.

William E. Gilmore, President of the National Phonograph Co., will sail for England about May 8th on a business trip of two months' duration. He will spend some time at the various branch offices of the company in London, Paris, Berlin and Brussels. For nearly two years past John R. Schermerhorn, Assistant General Manager of the parent company, has been in charge of the London company, with the title of Chairman of Board of Directors, and has also had a general oversight of the European branches. Mr. Schermerhorn will return with Mr. Gilmore in July and resume his duties at Orange. He will be succeeded in London by Thomas Graf, as Managing Director. Mr. Graf has been the manager of the Berlin Office since its inception and his marked success in that position led Mr. Gilmore to choose him as Mr. Schermerhorn's successor. Mrs. Gilmore will accompany Mr. Gilmore and they will do as much sightseeing as duty will permit. Mr. and Mrs. Gilmore, son, and two daughters spent the first part of April at Hot Springs, Virginia.

AND THE WORK GOES ON.

In spite of the cold weather during April, excellent progress has been made on the new concrete buildings of the Edison plant at Orange. The remaining two stories of the four-story addition to the factory of the Edison Storage Battery Company, is "poured," including the roof, and the building will be ready for occupancy in another month. New freight sidings have been laid into the yard and the removal of the old ones has made it possible to continue the five-story concrete building on Lakeside avenue. This will be extended 100 feet along Lakeside avenue. It will then turn north and be continued 450 feet to Alden street. The latter extension will stand on ground now occupied by a one-story brick building, about 75x350 feet in size, and known as No. 2. This brick building will be torn down in sections as the work progresses, the work now conducted in the building being moved to the new structure as fast as ready for occupancy.

RECORDS CUT FROM CATALOGUE.

The trade is hereby advised that we have no more moulds or masters of Record No. 7013, "Toreador Song from Carmen," by Clifford, and Record No. 12302, "O Richard! o Mon Roi!," French song, by Lacroix, and as soon as our present stock of these selections is exhausted, no more orders for them will be filled.

(Copy of Notice being Mailed to the Entire Trade.)

EDISON RECORDS TO BE WITHDRAWN.

The 150 Edison Gold Moulded Records named in the printed matter herewith [folder and bulletin] will be cut from our next Record Catalogue, and no orders for any of them will be filled after August 1st, 1907.

The sole reason for this action is to comply with the demand of the trade that a certain number of selections be cut from the catalogue each year.

The primary object of this advance notice is to give Dealers ample time to dispose of any stock of cut-out selections they may have on hand; but we also think there is an excellent opportunity to get considerable business for them before they are finally retired. Almost without exception they are as desirable as any in our catalogue. Thousands of Phonograph owners would later regret it if we did not give them a chance to buy them.

We have therefore prepared the enclosed bulletin and folder. Hang the bulletin in a prominent place. Get some of the folders from your Jobber if you can use them to advantage. He will have a supply about May 1st.

Place orders for cut-out selections as needed and handle your present stock of them so that you will have none on hand after August 1st.

NATIONAL PHONOGRAPH CO.,
C. H. WILSON,
General Manager of Sales.

LIST OF 150 CUT OUT RECORDS.

5212	Down Upon a Vine	Harlan
5242	Khdedey	E. C. Band

JAMESTOWN EXPOSITION.

The National Phonograph Company will have no official exhibit at the Jamestown Exposition, which opened on April 26th. A fine display of Edison Phonographs and Records will, however, be made by C. B. Haynes & Co., Edison Jobbers at Richmond. Special assistance will be given them from Orange, and they will have part of the material used in past exhibits of this company. The Jamestown exhibit will be purely for advertising purposes. It will not be entered in competition for awards of any kind and no effort whatever will be made to secure prizes.

FIRE AT 304 WABASH AVENUE, CHICAGO.

A fire that caused the main offices in Orange and New York some anxiety until the details were learned took place in the building at 302 and 304 Wabash avenue, Chicago, on the afternoon of April 22d. In this building were located the branch offices of the Commercial Department of the National Phonograph Co. and the Chicago office of the Edison Manufacturing Co. The wholesale department of Babson Bros. was also located in the same building. The first report made it appear as if the entire building would be destroyed. The next day it was learned that the fire was confined to the 302 side of the building and that the damage to our offices and Babson Bros. was trifling.

AMONG THE JOBBERS.

E. F. Droop & Sons Co., Edison Jobbers at Baltimore, have moved from 100 North Charles street to 231 North Howard street.

Kohler & Chase, Edison Jobbers at Seattle, Wash., have moved from 1305 Second avenue to 720 Pike street.

The Silverstone Talking Machine Co., of 1010 Olive street, St. Louis, Mo., became Edison Jobbers during the past month. They have been Edison Dealers for some time.

The Vim Company, of Des Moines, have moved from 808 W. Walnut Street to 204 Seventh street.

The Rudolph Wurlitzer Company, of Cincinnati, have moved from 16-18 West Fourth street to 121 East Fourth street.

McGreal Bros., Edison Jobbers at Milwaukee, Wis., will open a jobbing and retail branch at 29 East Fifth street, Cincinnati, about May 15th. They will also have a loft at Sixth and Morris streets for carrying their wholesale stock.

Visiting Jobbers at our New York office during April included the following: H. Wonderlich, J. Samuels & Bro., Providence, R. I.; L. E. McGreal, McGreal Bros., Milwaukee, Wis.; J. H. Towell, Eclipse Musical Co., Cleveland, O.; Fred K. Babson, Babson Bros., Chicago, Ill.; C. E. Goodwin, Lyon & Healy, Chicago, Ill., Mr. DeForrest, W. C. DeForrest & Son, Sharon, Pa.; Chas. J. Schmelzer, J. F. Schmelzer & Sons Arms Co., Kansas City, Mo.; Mr. Kelly, Jr., Montreal, Canada; W. O. Pardee, Pardee-Ellenberger Co., New Haven, Conn.; George R. Youmans, Waycross, Ga.; Thos. Wardell, Lowell, Mass.; E. F. Taft, Eastern Talking Machine Co., Boston, Mass.; A. E. Mandy, R. S. Williams & Sons Co., Toronto, Canada; C. B. Haynes, Richmond, Va.; B. L. Crew, Phillips & Crew Co., Atlanta, Ga.; J. L. Wagoner, Pittsburg Phonograph Co., Pittsburg, Pa.; W. D. Andrews, Syracuse, N. Y.: C. N. Andrews, Buffalo, N. Y.; Jno. Rogers, Knoxville Typewriter & Phonograph Co., Knoxville, Tenn.; Ross P. Curtice, Ross P. Curtice Co., Lincoln, Neb.

GLAD HE'S A DEALER.

Allentown, N. Y., April 9, 1907.

I am pleased with the way you handle this business, as it protects all dealers. I am also glad I am a Dealer. I have only had the Phonographs in for a couple of weeks, but have sold a number of them, and lots of prospects ahead. This is only a small place. Am sure this is going to be a successful addition to my business.

A. E. BRANDOW.

(Copy of Letter being Mailed to the Trade.)

NOTICE ABOUT ADVERTISING NEW RECORDS BEFORE THE 27TH.

TO EDISON DEALERS.

Orange, N. J., April 20, 1906.

Under date of August 4, 1906, we advised the trade that Jobbers might supply Phonograms, Supplements and Bulletins to Dealers at any time after the 20th of each month, provided the latter did not mail or distribute them to the public before the 27th.

This notice is still in force and this class of printed matter must not be supplied in any other manner.

We realize, however, that by our issuing a list of new monthly Records, in the Phonograph Monthly and on Order Blank Forms, so far in advance they practically become public property, and some Jobbers and Dealers, taking advantage of this fact, have seen fit to advertise new Records, or print and distribute supplements of their own, in advance of the 27th. It has therefore been decided that we will permit Jobbers and Dealers to advertise the list of new Records in advance of the 27th of each month, or to print and distribute supplements of their own, provided such advertising and printed matter distinctly state that the new Records will not be on sale until the 27th. Under no circumstances, however, can we furnish Phonograms, Supplements or Bulletins to be distributed except as stated in the first paragraph of this letter, as it would be utterly impossible to have them printed in time to do so, and, furthermore, it would be impossible to attempt to send them out so that they would reach each and every Jobber or Dealer at the same time.

This notice is given to clear up certain misunderstandings that have arisen between the trade and ourselves concerning advertising the new Records in advance of the date of sale.

NATIONAL PHONOGRAPH COMPANY.

ABOUT MACHINE EQUIPMENTS.

The letter printed below was sent to all Jobbers and Dealers, under date of July 27, 1906. It is reprinted to remind some Dealers of facts that they may have forgotten, and also to furnish information to new Dealers on a subject about which they should keep well posted:

New York, July 27, 1906.

Dear Sirs:—Referring to the option allowed in the equipment of Edison Phonographs, whereby a speaking-tube or hearing-tube may be included, in place of the 14-inch horn, please take notice that beginning this date this option is withdrawn, and that hereafter we will supply all machines with the regular equipment only listed to go with them, that is:

"Gem" with Model C Reproducer, 10-inch horn, winding crank, oak carrying cover, camel's-hair chip brush.

"Standard," with Model C Reproducer, 14-inch horn, camel's-hair chip brush, winding crank, antique oak cabinet.

"Home," with Model C Reproducer, improved Edison Recorder, 14-inch horn, antique oak cabinet and cover, winding crank, camel's-hair chip brush.

"Triumph," with Model C Reproducer, improved Edison Recorder, 14-inch horn, sapphire shaving-knife, antique oak cabinet and oak cover, winding crank, camel's-hair chip brush.

"Balmoral," with Model C Reproducer, improved Edison Recorder, 14-inch horn, sapphire shaving-knife, camel's-hair chip brush.

"Opera Reproducer," with the same equipment as the "Balmoral."

"Concert," with Model D Reproducer, improved Edison Recorder, sapphire shaving-knife, oak body box and cover, 14-inch black and gold horn, and stand, (Nonesuch), winding crank, camel's-hair chip brush.

"Home" and "Oratorio," with the same equipment as the "Concert."

Also, please take notice that all Phonographs must be delivered with the horn and other parts or accessories furnished by us; and that under no circumstances or conditions can a credit be allowed in any way, shape or manner for the horn or other parts furnished by us as part of the equipment; neither can any allowance whatever be made for the horn or other accessories in exchange for a horn of different size or style or for any other article not regularly included by us as a part of the Phonograph outfit. In other words, the outfits must be sold by you as furnished by us, and at the regular scale of prices. In cases where a larger or a different style horn, or any other accessory or article is desired, it must be sold entirely separate from the Phonograph outfit, and at the full price of such horn, accessory or other article.

Any violation of these requirements will be considered a violation of our conditions of sale.

C. H. WILSON,
General Manager of Sales.

WEDDINGS.

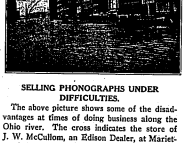
Two weddings of interest to the Edison trade occurred last month. On the 3d Lawrence E. McGreal, of McGreal Bros., Milwaukee, was married to Miss Helen Gannon, daughter of Mayor Gannon, of Dixon, Ill. They will make their home at 200 Hackett avenue, Milwaukee. Ben Lee Crew, of the Phillips & Crew Co., Atlanta, Ga., was married on the 8th to Miss Miriam Donaldson, daughter of John Donaldson, of Bainbridge, Ga., a prominent man in the South. Mr. and Mrs. Crew spent their honeymoon in the North and are now keeping house in Atlanta.

HOW THE EDISON DEALER IS MAKING MONEY REPRESENTING THE COMMERCIAL DEPARTMENT.

The organization of the Commercial Department in the large cities, containing an Employment Bureau, an Installation Department with a number of mechanics, several salesmen and a District Manager, have shown the Edison Jobber in the large cities that he cannot hope to duplicate this service in connection with his regular business. But in smaller cities and towns the Commercial Department calculates to instruct an auxiliary force which will not be obliged to give so much service and with this assistance reach every manufactory or industrial plant in the United States. The Edison Dealer is the logical man for this out-of-town work if we can interest him.

In the large cities stenographers are in touch with four or five Employment Bureaus and are more or less independent, while business firms finding it so easy to obtain good help in the stenographic field are more difficult to approach in introducing the Edison Commercial System. This is not true with out-of-town firms where the number of good stenographers are scarce and conditions in other ways are more favorable.

A notable instance of success in this field among out of town manufacturers, was the successful sale of over $600 worth of Edison Business Phonographs to the Morgan Engineering Co., Alliance, Ohio, by C. W. Schooley, the local Edison dealer. Mr. Schooley complied with the requirements of the Edison Commercial representative in buying a sufficient number of machines to conduct his correspondence and used one of these machines for demonstrating before the Morgan Engineering Co. He was successful in securing a trial with this concern and finally furnished them with seven machines and a shaving machine for conducing their entire correspondence.



Edison representatives are allowed a discount of 20 per cent. on machines that they purchase and a commission of 20 per cent. on sales in their immediate vicinity where they can install and constantly watch the installation. They are not allowed a commission on machines which they do not personally install and take care of afterward. Although 20 per cent. may not seem a large commission, it is in fact sufficient because the average firm will install three or four machines, amounting to $400 or more, which pays our representative well for his trouble.

The Commerical Department will give its best information to any inquiring dealers, sending literature and contracts for examination. The department should be addressed at Orange, N. J.

PUBLISHERS OF MUSIC IN JULY LIST.

The publishers of the compositions made for our July list of Records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers:

9578 Ballet Music from Faust, Part 3—Chappell & Co., London, Eng.
9579 The Cats An' Dogs, I'm Goin' To Go—Willis Woodward & Co., 49 W. 28th street, New York.
9580 I Want You For My All Time Girl—Jos. W. Stern & Co., 34 East 21st street, New York.
9582 And A Little Bit More—F. B. Haynes Co., 125 W. 44th street, New York.
9584 I'd Love To Live Around Dis Town—M. Witmark & Sons, 144 W. 37th street, New York.
9585 The Dream of the Rarebit Fiend—Shapiro, Bernstein & Hunter, 14 W. 28th street, New York.
9586 Because, I'm Married Now—Shapiro, New York.
9587 You'll Not Be Forgotten, Lady Lou—Jos. W. Stern & Co., 34 East 21st street, New York.
9589 The Broken-Hearted Sparrow—Theo. Bendix, New York.
9590 You'll Have to Wait Till My Ship Comes In—F. A. Mills, 48 W. 29th street, New York.
9591 I Know That I'll Be Happy Till I Die—Leo Feist, 134 W. 37th street, New York.
9592 The Rhyme of the Rocker—Jos. W. Stern & Co., 34 East 21st street, New York.
9593 The Anvil Polka—Carl Flacker, 52 Fourth avenue, New York.
9595 Sweet Jessie Dear—M. Witmark & Sons, 144 W. 37th street, New York.
9596 Now I'll Have to Get a Down Day—F. A. Mills, 48 W. 29th street, New York.
9597 The Chorus Lady Waltz—Theo. Bendix, New York.
9598 The Tale of the Bucket—M. Witmark & Sons, 144 W. 37th street, New York.
9600 It's Nice to Get Up in the Morning—P. B. Haviland Pub. Co., 11 W. 32d street, New York.
9601 Shoulder Arms March—Willis Woodward & Co., 49 W. 28th street, New York.

SELLING PHONOGRAPHS UNDER DIFFICULTIES.

The above picture shows some of the disadvantages at times of doing business along the Ohio river. The cross indicates the store of J. W. McCullom, an Edison Dealer, at Marietta, Ohio, with the water twelve feet deep all around, caused by the rise in the Ohio and Muskingum rivers from March 12th to 19th.

COMMENTS ON EDISON GOLD MOULDED RECORDS FOR JULY.

Every possessor of an Edison Phonograph will recall the delight with which he played his first lot of Records. He will also recall how he played them over and over till he could whistle and sing their airs at his pleasure. The new Edison Gold Moulded Records issued every month make it possible for Phonograph owners to duplicate these pleasures of the past. The regular catalogue contains many selections that belong in every collection and which fill every requirement for newness and novelty. A few of them bought from time to time keep up the interest. The new monthly list, however, does all of this and also serves to keep one up-to-date in new songs and music. As a means of knowing and being able to whistle or sing all the latest music, an Edison Phonograph is unrivalled. Look over the list for July.

No. 9278, "Ballet Music from Faust, Part 3," by the Edison Concert Band, is another Record from this charming ballet music, and with Parts 1 and 2 (Nos. 8450 and 8516) just about completes the selection. No. 3 gives the "Entry of the Nubian Slaves" and "Cleopatra's Pole Dance." A very satisfactory performance of the entire selection may be had by playing the three Records one after the other.

No. 9279, "2, 2, Ta, Au Revoir, I'm Goin' to Go," by Ada Jones, is a new coon song by John B. Lowitz that has attracted a great deal of attention for a song so new. Harvey Tan's better half gives him a good calling down for his shortcomings and "flies the coop," so to speak. Back she comes though, in short order and promises never again to say to Harvey:

> Ta, a, au revoir, I'm goin' to go;
> I'm tired of you, and it, get my ticket
> On the 6 o'clock
> Train an waitin' at the station,
> Hear the whistle blow,
> Ta, ta, au revoir, I'm goin' to go.

No. 9280, "I Want You for My All Time Girl," by Irving Gillette, is the tenor ballad success from the new comic opera "The Snow Man," by Stanislaus Stange (book and lyrics) and Reginald de Koven (music). The song is very pretty. It is of a different style than the usual ballad and is a big hit in the opera. Made with orchestra accompaniment.

No. 9281, "Kimmble March," is an accordion solo by John Kimmble. The enormous success of our two previously listed accordion solos prompt us to list another by the same artist. It is one of Mr. Kimmble's own composition—a march and a fine one, too. To hear it played is to admire it at once, for no composition ever before listed is better adapted to the accordion and few marches are more tuneful. Played with piano accompaniment.

No. 9282, "And a Little Bit More," by Arthur Collins, is a new coon song by Fred Fisher (music) and Alfred Bryan (words), who also wrote "Every Little Bit Helps." It is every bit as entertaining, and many will like it even better. It is the kind of tune that will be sung a great deal. Sung with orchestra accompaniment. The story tells of the love-making of Jimmy Snow, the chorus running this way:

> I'd like to be a friend to you,
> And a little bit more;
> I'd like to be your sweetheart, too,
> And a little bit more;
> I'd like to be your honey bee
> And buzz around at your door;
> Then I'd get all that's coming to you,
> And a little bit more.

No. 9283, "While the Birds are Singing to Me," by Harlan and Belmont, is a whistling and singing duet, similar to No. 9282, "Beautiful Birds, Sing On." The harmonious blending of Mr. Harlan's and Mr. Belmont's voices is well adapted to selections of this character. The Records are also made more interesting by the realistic bird imitations by Mr. Belmont. Records of this kind are not numerous in our catalogue, as selections permitting this particular form of treatment are by no means plentiful. Written by Joe Fulton and made with orchestra accompaniment.

No. 9284, "I'd Live or I Would Die for You," by Harry Anthony, is a new sentimental ballad by Ernest R. Ball (music) and Dave Reed, Jr. (words) the writers of "Love Me, and the World is Mine." They have given the lovers of this kind of songs a composition that will interest them. It is just as beautiful as their former song and some may like it even better. Sung with orchestra accompaniment.

No. 9285, "Dream of the Rarebit Fiend," by the Edison Military Band, is a strikingly unique band Record. As its title indicates, it portrays instrumentally the rarebit fiend's dream. All the different stages are gone over, from the highly fantastic to the deep and ponderously tragic. The selection is without its pretty and tuneful selections, descriptive of the victim's moments of roposeful sleep. Written by T. Thurban.

No. 9286, "Because I'm Married Now," by Billy Murray, is a new comic song by Herbert Ingraham, and a big hit with singers of humorous selections and their audiences. "Because I'm Married Now" is the reason given by the man about town for denying himself the pleasure of his bachelor days. The crowd, in unison, interrogates him in the chorus with "Why?" to which he replies with the title of the song. The effect is great. Sung with orchestra accompaniment.

No. 9287, "Speed Away," by the Edison Mixed Quartette, is an addition to our list of sacred selections that will be welcome. The growing demand for sacred music continues uninterrupted. "Speed Away" may not be as universally known as some previously listed hymns, but it will become a favorite with admirers of sacred music as soon as heard. It is a beautiful number and makes a good Record. The music is by I. B. Woodbury and the words by F. J. Crosby. Unaccompanied.

No. 9288, "You'll Not Be Forgotten, Lady Lou," by Frederick H. Potter, is a sentimental song in which the story is interesting and pretty. Of particular interest, though, is the melody. There is a refreshing newness about this melody itself and also the rhythm that is lingeringly attractive. The song is confidently

expected to become very popular. The music is by George W. Mayer and the words by Alfred Bryan. Orchestra accompaniment.

No. 9289, "The Broken-Hearted Sparrow," by the Edison Symphony Orchestra, is an orchestra selection of high order and attractiveness. The music is symbolic of the sparrow's pathetic appeal, and is delightful. It is one of a suite of four numbers, entitled "A Love Episode in Birdland." The suite is the crowning effort in the career of Theodore Bendix as a composer. Mr. Bendix has given the musicloving public many pronounced successes.

No. 9290, "You'll Have to Wait Till My Ship Comes In," by Bob Roberts, is a catchy waltz song by George Evans (music) and Ren Shields (words) that is becoming very popular throughout the country. It has that quality of entertainment that appeals to everybody. The characteristic effects introduced by our Recording Department, such as water effects and shouts of sailors, add much to a song already a big success. George Evans wrote "In the Good Old Summer Time." Sung with orchestra accompaniment.

No. 9291, "I Know Dat I'll be Happy Till I Die," by Collins and Harlan, is a song of a happy-go-lucky coon who goes through life with the refrain:

> Well I know dat I'll be happy till I die,
> I've got no room for trouble, dat is why,
> I'm always smilin' and contented,
> I'll be happy till I die, dat's a cert',
> Well I know dat I'll be happy till I die.

The song is full of ginger, both in words and rendition. Songs introducing laughter are always interesting, especially if the laughter is real and convincing. In this selection there is lots of it and it is a quality that goes the real article one better. Ed. Rogers is the composer. The singers are accompanied by the orchestra.

No. 9292, "Hymns of the Old Church Choir," by Frank C. Stanley, is a descriptive song introducing sacred pieces. "Nearer My God to Thee;" "Hosanna;" "Holy, Holy, Holy" and "Rock of Ages" are beautifully interwoven in a melody and story that will doubtless be another "Holy City" in popularity. The music is by Alfred Solman, the words by Arthur J. Lamb and the Record is made with orchestra accompaniment. The bells are features in the latter.

No. 9293, "The Anvil Polka," by the Edison Concert Band, is a band selection that is well-known to everybody. Its composer is A. Parlow. It is a descriptive number made especially realistic by the addition of anvil effects. Few have not heard this polka in some form, but not many have heard it played as this Record will reproduce the thoroughly finished performances given by our Concert Band.

No. 9294, "Flanagan and His Servant Girl," by Steve Porter, is Mr. Porter's latest addition to his clever and laughable Flanagan series of vaudeville specialties. It deals with the servant girl problem, and every family who has kept a "maid" will appreciate the satirical fun of this Record. It's a "scream." When Flanagan engaged the girl at the intelligence office, he asked:

"Were you working any place last week?"
"Oh, yes; I lived wid five families last week."
"That's not a good record."
"I'll wor the best I could do; I wor sick two days."
"Well, you can come to work at 10 o'clock in the morning."
"I'll sooner come at 8 o'clock, and then if I don't like the place I can be back in time to go to the matinee."

Flanagan gave a party and the girl put a piece of soap in Reilly's finger-bowl. Flanagan later wanted to know why she did it and she replied: "You told me if I seen anyone at the table in need of anything I was to get it and say nothing." After a snow-storm Flanagan told her to clean off the snow. She said that it didn't need it; it was clean enough. Finally she said she was going to leave because she didn't like the way Mrs. Flanagan did the work and Flanagan says to her: "Haven't we always treated you as one of the family?" "You have," she answered, "and I can't stand it any longer."

No. 9295, "Sweet Jessie Dear," by the Edison Male Quartette, is a sweet ballad beautifully arranged as a male quartette. The music and words are by Ella J. Fontelo. The tenor voice has an effective solo part as does also the bass. These two parts are features of the Record, and combined with the humming effect and general ensemble work make a quartette Record of exceptional interest and entertaining merit. Sung unaccompanied.

No. 9296, "Save a Little Money for a Rainy Day," by Edward Meeker, is an exceptionally good coon song on a subject ever popular and true. The music is by Maxwell Silver and the words by Ren Shields. Both are appreciative the humor as well as the good advice contained in it, and also the melody, which has a fine swing to it. Every word can be clearly understood which gives an added charm to the excellent coon dialect employed. Sung with orchestra accompaniment.

No. 9297, "The Chorus Lady March," by Albert Benzler, is a xylophone solo with orchestra accompaniment of a bright and merry march composed especially for and played nightly in the comedy success, "The Chorus Lady." Both as a Record and a selection it couals if it does not take precedence over any xylophone Record in our catalogue.

No. 9298, "The Tale of the Bucket," by Will F. Denny, is a comic song something after the order of "Fol-the-Rol-Lol," which is so popular in our catalogue. The story is told in seven short verses of how "Sam ran away with a man," and how they took her father's bucket in which he kept his cash. There is a point at the end of each verse in the shape of a pun. The whole idea is extremely ludicrous. There is a laugh in each verse. The melody, too, is attractive. The music and words are by Joe A. Budd. The Record is sung with orchestra accompaniment.

No. 9299, "Blondy and Johnny," by Ada Jones and Len Spencer, is descriptive of a scene in a Bowery dance hall, with a snappy dialogue in the vernacular between Johnny and his girl Blondy, and a number of incidental effects that add to the realism of the Record. Blondy tells Johnny that she is a mind reader and to prove that she knows what he is thinking of she sings the chorus of "Blondy," a new song by Alfred Bryan (words) and George W. Myers (music).

No. 9000, "It's Great to Be a Soldier Man," by Byron G. Harlan, is an inspiring march song by Theodore Morse (music) and Jack Drislane (words) which on our Record is a sure-fire hit the first time it is heard. The enthusiasm pictured in the Record finds a response in its hearers. The singing stops for a moment and there is given a view of soldiers passing in parade with commands of officers and plaudits of people. The song begins again, concluding with "Gee, It's Great to be a Soldier Man." Sung with orchestra accompaniment.

No. 9001, "Shoulder Arms March," by the Edison Military Band, is without a doubt one of the best Phonograph marches ever listed. It embraces all the variety and change effects found in the most popular marches previously listed. All the different sections of the band stand out prominently and in one of the strains the reed instruments are featured in a way that made the "New Colonial March" so much admired. Dave Rose is the composer.

WHAT THE FULL LINE DOES.

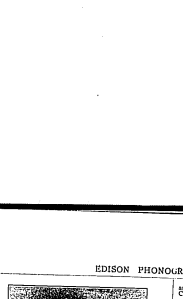
Gardner, Mass., April 15, 1907.

Thinking it might please you to know of the success of one of your Dealers I am writing you this letter. About December 15th, 1905, I was persuaded by George A. Winslow, of the Boston Cycle & Sundry Co., to adopt the box system made by his company and also carry every domestic record in stock, and a full line of Edison machines and sundries. Previous to this time I had been doing a small business in five different lines of talking machines, and a very incomplete line of Edison goods. At this time I had only 103 of your records and only one Standard machine. Where I was ordering 50 records for the first shipment, I am now ordering not less than 250 records and use at least 600 during each month. During the first six months under this system I placed 90 outfits, five of them being Triumph. Before that I never considered it practical to talk the $50 machines. It took me about three weeks to arrange the system, but the business at once began to boom even while the system was in an incomplete state. I can assure you it required a great deal of persuasion on the part of Mr. Winslow to induce me to place this large order, at the time when I considered the business almost flat. I had almost decided to throw out the entire talking machine business. In the past year my trade has increased many, many times. In the past week I have placed nine outfits. We are now carrying 4,000 Edison Records and a very representative line of machines, with exclusion of all other lines. I wish to congratulate the National Phonograph Co. on their method of business and also their contract of protection to agents, knowing that it is the life and soul of the business. You may use this letter if you consider it to your advantage to do so.

F. L. GILSON.

PRINTED MATTER.

Copies of the April edition of the domestic Record Catalogue, Form No. 1070, have just been mailed to all Dealers. It includes all selections listed to and embracing the April list. This mailing has been delayed so as to give Jobbers an opportunity to receive a supply before they were asked for by Dealers. This new catalogue only differs from the previous edition, No. 1069, in the addition of the lists for December to April inclusive. Through an error No. 9360, "Simple Confession," violoncello solo by Hans Kronold, appears in part of the edition. The selection was cut from the catalogue some time ago.



"Four Irresistible Entertainers," is the title of a new four-page folder now being mailed to the trade. It is printed in two colors. The first page shows a hand in black, with an orange background, the prices of the four principal Edison Phonographs, $10, $20, $30 and $50, appearing on the tips of the four fingers. Pages two and three show half tones of the four machines, with an argument on the desirability of having one in the home. These folders are very useful for mailing and circulating purposes. Most Jobbers have been supplied with liberal quantities.

Whether or not they have on hand any stock of the 150 Records to be cut from our catalogue on August 1st, Dealers are urged to post the Bulletin mailed them a few days ago and make an effort to advise their patrons about this cut-out list. Every time after we have retired a lot of Records in this manner we get letters from Phonograph owners, asking if we cannot furnish some of the selections. This shows that many sales would be made if the public knew that they could not get these cut-out numbers after a certain date. By a little judicious pushing Dealers can readily dispose of any stock they may have on hand and relieve themselves of the trouble of having to return them later.

Jobbers who find it desirable to furnish prospective dealers with detailed information concerning prices, discounts, terms and conditions of sale of Edison goods, may get from our Advertising Department a supply of single sheet contracts, which have been printed for this purpose, making it unnecessary to use the triplicate form. Ask for "Specimen Agreements."

REMOVAL OF PARIS BRANCH.

The Paris office of this company has been moved from 31 Rue du Quatre Septembre to 42 Rue de Paradis.

FLORENCIO CONSTANTINO.

From the issuance of our first list of Grand Opera Records all who have heard the Records made by Florencio Constantino have been aware that he was the possessor of a voice of wonderful power and beauty. This judgment of his voice is being amply borne out by the attention he is now attracting in the West. Mr. Constantino is the leading tenor of the San Carlo Opera Company and shares the stellar honors with Nordica. We print below some notices taken from daily papers on the Pacific coast.

From the San Francisco Chronicle, March 29th.

Perhaps the most brilliant vocal success of the night was scored by Constantino. He was a surprise, in spite of the many laudatory words which had been said of his singing. Oakland never heard such a magnificent tenor, and his rendition of the famous aria of the second act, "Cielo e Mar," evoked a scene of most accented enthusiasm. From the first moment of his appearance upon the stage Constantino captured his audience. He possesses a tenor voice, of beautiful quality, which mounts to the highest notes with ease and sonority. In the middle register it is mellow and dulcet. At all times Constantino uses his voice with consummate art. He is a finished actor, dramatic, graceful and emotional.

From the San Francisco Call, March 29th.

But Constantino, with stellar honors yet to be heaped upon him, stirred the imagination of Oakland people, who loved mightily in discovering his voice. Carusos and Scotis and clever opera lovers and when Caruso leaves will have to be brought out and dusted off and applied to Constantino. Caruso is the best fortnight, and one or two additional bits of descriptive embroidery perhaps must be invented.

Constantino can sing and does sing as no tenor besides Caruso ever has sung in the annals of grand opera performances on this coast. There is power and yet fineness in his singing. It ravishes that is almost cloying, and yet strength. It is the perfect combination of passionate virility; there is gold and velvet and perfume in the man's voice and art allied to an almost perfect organ wherewith to interpret masterly music.

From the San Francisco Chronicle, March 22d.

Of the individual triumphs of the night the greatest of all was won by Constantino. At the first note of this marvelous tenor, it seems inevitable that in the annals of the opera of the day it is to be written, Constantino first, Caruso second.

The vocal gem of the scene is the tenor solo, "Cielo e Mar," which revealed the quality of Constantino's marvelous voice and the perfection of his art as the prince of manhood, handsome, modest and magnetic in appearance, his artistic qualities, be it an interesting parenthesis, made his stage with equal facility in both the lyric and dramatic scenes of the opera with which he swells a tone from the pianissimo to tone is almost supernatural. Especially in the means voice, the exclusive voice remarkable for tone beauty. In the recitative passages he showed that he was a past master of vocal declamation, of long delivery, of wielding the staccato passages with the precision of a violin virtuoso. The virtuosity he exhibited in the use of the upper notes of beautiful tone he gave as it brought forth volleys of applause and bravos from the audience. Nordica in this song that Constantino clearly surpassed Caruso, for while he has not the sensuous tone quality of the Caruso tenor he is the more perfect artist.

From the San Francisco Chronicle, March 26th.

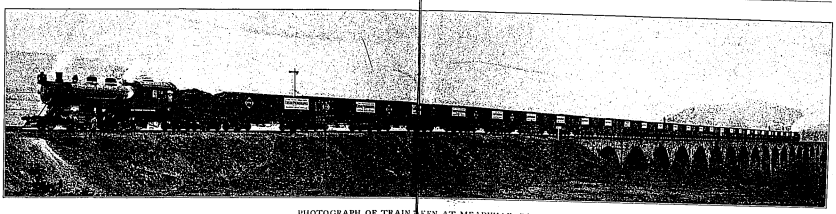
The honors of the evening easily fell to Constantino, who, as the mesmerly irrepressible Duke of Mantova, was by turns fascinating and careless abandon. A fine artistic characterization was more than impressive. The ballad, delivered by the Spanish tenor, is a cleverly artistic rendition.

And how he sang! With the utmost ease and with ever pleasing quiescence, the sweet lyric tones floated over the utmost chasm. Indeed, here is a most congenial role for the young, but gifted artist.

From the Seattle Times, April 8th.

Constantino's entrance was the equal not only for applause, but for spontaneous cheers that came from the audience, for some moments he was unable to sing, but stood up on the stage waiting, a striking and picturesque figure, for the applause to be stilled.

The beauty and exquisite modulation of his voice, especially in the third act, gave such opportunity to the two principals to show their warmest admirers wished, and the familiar and ever beautiful sextette was sung with a fervor and beauty that was thrilling. The tenor's strength and such demands a fervor that the house rose almost to its feet with cheers and applause. At this time again the favorites were brought back, and now the curtain rose on the stock piano and Mr. Ivancy Thomas appeared with Miss Nielsen for her accompaniment for the favorite old encore of prima donnas, "Home, Sweet Home," which Miss Nielsen sang with sweetness and simplicity, but the applause which had ebbed only for this broke forth with redoubled ecstasy at Constantino. When he rose and began to sing the "Questa o Quella" from "Rigoletto" the house was silent instantly, but would not let him go after the conclusion. And being in a very gracious mood he sang another encore, "Ah, Moon of Middle," from the same opera. It is Constantino's has been the surprise and the great delight of the San Carlo Company. It is his fame which will receive through America in the years to come as it already has through Europe. He is probably the most beautiful tenor voice in the world to-day, certainly the combination of appearance, of personality, of voice combines in him more perfectly with knowledge of his art and ability to use it than any other artist known. He has succeeded De Reszke, Caruso and Nionel in this country, and is inferior to none of them.



WHAT TWO DEALERS SAY.

We inclose some circulars and cards of one of the most popular Sporting Camps in Northern Maine, where we have recently sold a Standard Phonograph and five dozen Records. We expect to sell a lot more Records and Machines this summer after the trout fishing opens. We have handled the Edison Goods for several years and are well pleased with them. Other makes of machines have been offered to us but we say we have no room for any others. We carry about 2,000 Records in stock. J. N. & I. J. SMITH,

Skowhegan, Me.

I am pushing the Edison Machine and getting lots of business. E. A. GYNE,

Aitkin, Minn.

PHOTOGRAPH OF TRAIN TAKEN AT MEADVILLE, PA.

An Entire Train of Edison Phonographs and Records for Babson Bros., Chicago--Largest Shipment of Talking Machine Goods Ever Made.

We present above a photograph of the largest single shipment of talking machines and records ever made in this or any other country and one that will probably not be duplicated for some time to come. It is a freight train of twenty-seven cars loaded with nothing but Edison Phonographs, Edison Gold Moulded Records, horns, cranes, and a quantity of catalogues and other printed matter. The shipment comprised approximately 8,000 Phonographs, over a quarter million Records, and 8,000 horns and cranes. The invoices for the shipment were considerably in excess of $100,000. The shipment was made to fill a straight-out bona fide order from Babson Brothers, Chicago, who are making a most phenomenal success of selling Edison Phonographs and Records by installments on the mail order plan. In other words they are sending these goods anywhere in the United States and permitting the purchasers to pay for them on the easy payment plan. Their plan is one of the most daring that the talking machine trade has ever known and their success is not begrudged by any one.

The principal reason for this unusual shipment is the fact that Babson Brothers have just completed and moved into a five-story pressed brick and stone building, 80x150 feet, at the corner of Nineteenth street and Marshall Boulevard, Chicago, providing a floor space of 60,000 square feet, without doubt the largest space in this country devoted to the sale of talking machine goods only. The picture of the new building shown here was taken before the structure was completed. Babson Brothers have been conducting their retail business at 140 Michigan avenue and their jobbing business at 304 Wabash avenue. Both will hereafter be carried on in the new building at Nineteenth street and Marshall Boulevard. The special shipment was made so that the new building might be completely and adequately stocked before May 1st, and so that the removal of both the retail and jobbing branches could be accomplished with no other friction than having employes stop work at the old places Saturday and resume in the new building Monday morning. The stock at the Michigan avenue and Wabash avenue addresses will be moved to the new building in a leisurely manner. By this plan the great business of the firm will not stop for a single hour. Although involving the outlay of a considerable amount of money, the plan is just such a one as these sagacious business men might be expected to evolve.

The first floor of the new building will be occupied by the shipping room. The offices will be on the first floor, and the second, third and fourth floors will be given up entirely to stock-rooms. The wholesale record stock will occupy the entire fifth floor. This floor has been designed especially for records, and has immense skylights running the entire length of the building. The bins for the wholesale stock have been constructed after special designs of G. M. Nisbett, wholesale manager. The bins will have a total capacity of 2,000,000 records. The firm has unobstructed light on all four sides of the building. They also own 400 feet of additional frontage on Nineteenth street, and thus have plenty of room for expansion. The rear of the building is right on the C., B. & Q. tracks, and the firm have their own private switches in their own yard. The building was put up in less than sixty days by the employment of an immense force of mechanics working overtime. It is of the best and most durable construction throughout.

The special train left Orange on Monday night, April 12th, and went west over the Erie railroad. As the photograph shows, each car bore banners on both sides reading "Edison Phonographs for Babson Bros., Chicago."

The train was drawn by Engine No. 1655 and was in charge of the following crew: Charles Johnson, engineer; Edward Carlough, fireman; William Lynch, conductor; James Dwyer, brakeman; George F. Mack, flagman. Because of the difficulty of stopping the train long enough in the vicinity of Jersey City without interfering with traffic, arrangements were made to photograph it at the end of the first division. H. T. Leeming, Traffic Manager of the National Phonograph Co., accompanied by two photographers from G. P. Hall & Co., New York, went ahead by passenger train, and early Tuesday secured the photograph shown herewith. The train was standing on a bridge over the Susquehanna river at Meadville, Pa. The location was ideal for the purpose. Between Jersey City and Chicago seven changes of engines and crews were made. By special arrangements most of the trip was made by daylight, so as to get as much advertising from it as possible. It is hardly necessary to state that the spectacle of an entire train of cars filled with Phonographs, Records, etc., attracted much attention throughout the entire trip.

The train reached Hammond, Ind., at 6 o'clock Saturday morning. It was there met by representatives of the Erie Railroad, Babson Bros. and the National Phonograph Company. Additional photographs were made and the train proceeded to its destination, reaching 51st street at 12.20 o'clock. Its contents were transferred to the new building of Babson Bros. on Monday.

Another remarkable incident connected with this great shipment was the receipt from Babson Brothers on the day the special train left Orange, of an additional order for 100,000 Edison Records, shipment to be made as soon as possible.

It may not be out of place at this time (and certainly we will be pardoned if we appear egotistical in mentioning it) to quote an incident that occurred when Babson Bros. had

demonstrated that their plan was an unquestioned success. Knowing that they had had considerable experience with other kinds of talking machines, a friend asked one of the firm why they sold Edison Phonographs on the mail order plan and no other kind. The reply was that in their experience it was the only machine that stood sold when once sent out; the only one that did not come back. Could any manufacturer want a more eloquent or a more convincing argument for the merit of his product than this?

BARSON BROS. GREAT BUILDING.

AS A SINGING TEACHER.

A few lines by which I wish to acquaint you with a new use for an Edison Phonograph. I am a member of the firm of Gerhart & Hassler, Dealers in Edison Phonographs and supplies. By profession I am a school teacher. I am teaching a rural school of fifty pupils. I teach singing in my school with the aid of the Phonograph. For instance, when a Record of my fancy comes out, I write off the words, and have them printed on cards for my pupils. Then, having a Phonograph in school, I place the machine in front of the school, play the song a few times, and then the school sings along. In a short time the entire school can sing the song, on correct time and correct pitch. It is better than a piano. I find Ada Jones' pieces excellent for this purpose; she is a good leader, and is virtually the singing leader in my school. Bob Roberts is also a good leader; so are some others. I think every school should have an Edison Phonograph. A few lively marches, played at recess or dinner time, puts new life into all the youngsters. I would not teach without it.—*J. Irwin Gerhart, Wernersville, Pa.*

BOTH ARE CORRECT.

(Extract from a Dealer's Circular.)

I have been asked what effect simplified spelling would have on the word Phonograph. Both Phonograph and Funny-graft are correct.

I am still selling Edison Phonographs at the rate of three a week (which is pretty good for a little burg of 1,000 inhabitants) because every one knows that the Edison Phonograph is correct.

I am selling them for cash or a Dollar down and a Dollar a week until paid for.

I carry in stock every American Edison Record made, and have them arranged in wire racks with each record plainly labelled. You can see what you want and get it.

Funny-graft is correct for some of the machines you see advertised. You get them with a pound of tea, for selling gum, or have a few records thrown in with one.

If you want a Phonograph that you and your children and grandchildren can enjoy for the next hundred years come in and buy an Edison. All styles in stock. $10.00, $20.00, $30.00 and $50.00.—*B. T. Burlingham, McGraw, N. Y.*

RAILROAD ADVERTISING SIGNS.

Above is a reproduction of one of our railroad signs now so familiar to all who have travelled any distance east of the Mississippi River. For some months past we have had nearly 200 of these signs on the principal railroads in that section. We have just made contracts for 230 more of them, making over 400 in all. The new boards will be placed as far north as Bangor, Me., as far south as New Orleans and as far west as California. When these new signs are put up it will be practically impossible to travel any considerable distance in any direction without seeing this presentation of the Edison "Old Couple." This is but one of the many forms of advertising Edison Phonographs and Records for the benefit of the Edison trade.

GIUSEPPE CAMPANARI, BARITONE.

ROBERT BLASS, BASSO.

NEW ARTISTS IN GRAND OPERA SUPPLEMENT No. 5 JUST ISSUED.

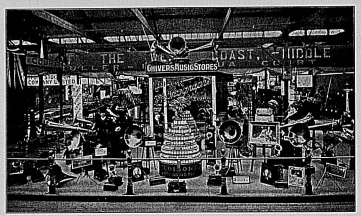


EXHIBIT OF CHIVERS MUSIC STORES, CHRISTCHURCH, N. Z.

EDISON GOODS AT THE CHRISTCHURCH, N. Z., EXHIBITION.

The largest international exhibition ever held in the Southern Hemisphere closed on April 15th, at Christchurch, New Zealand. It opened on November 1st last, and was a most successful affair. Every country was represented among the exhibitors. Two of the most progressive Edison Jobbers in New Zealand had exhibits. Photographs of both are given herewith. The display made by the Chivers Music Stores could not be better. It is equal to anything of the kind made anywhere. That of F. C. Smith was not as large as the Chivers exhibit, but Mr. Smith had the sole selling rights for talking machines for the Exhibition, and therefore used a large part of his space as a demonstrating room.

EXHIBIT OF F. C. SMITH.

THE PHONOGRAPH AS A PROMOTER.

That there seems to be no end to the benefits accruing from scientific discovery is illustrated by a novel use to which the phonograph was applied by an American Captain in the South Seas.

While one of the naval vessels of the United States was patrolling that part of the Pacific Ocean last spring it chanced upon a sailing vessel, which an officer from the war ship at once boarded. The stranger proved to be a craft commanded by a New Englander who for some years had been engaged in recruiting Kanakas for the plantations of Queensland, Australia.

The naval officer noticed that there was on board an instrument that is not usually considered essential for purposes of navigation—a Phonograph—and asked why the talking machine should have been included in the ship's outfit. He was told that before the vessel left Queensland the Captain had visited some of the sugar plantations where South Sea Islanders were employed, taking with him a camera and a Phonograph. Here he went into the business of photographing groups of islanders on the plantations, also taking individual pictures of well known men from the New Hebrides and the Solomon Group.

Edison's invention was then brought into service, the best known among the islanders being asked to speak into the Phonograph anything they would like to tell their friends at home. In this way large numbers were induced to give an account of the sort of life the Kanakas were having on the plantations, and to tell any other news likely to interest the old folks at home in Malikolo, Ambrym, San Christoval, Malnita, and other islands.

When he had secured a good supply of these messages, the ingenious master sailed for the islands, and at last advice was making good use of his material. Many of the photographs had been transferred to glass for use with the limelight, and with the pictures and the Phonograph he was able to give exhibitions of life on a plantation that changed the doubts of the natives into an enthusiastic desire to emigrate.

At the limelight show the Captain would produce a full sized picture of an absent friend, a native well known on the island, and to the amazement of his dusky audience would make him speak words of greeting from his plantation home in Bundaberg, a thousand miles away. Whatever misgivings had been felt before the Phonograph was produced were at once dispelled when the limelight picture of their friend addressed them in their own tongue and in the voice they had known so well when he dwelt among them.—*Associated Sunday Magazine, April* 8, 1907.

VALUE OF SEPARATE ROOMS.

Almost every week we read of some progressive firm having their quarters redecorated and in almost every instance the fact is mentioned that separate rooms have been arranged and specially decorated for the purpose of displaying the various lines handled.

The larger dealers everywhere are realizing that best results are obtained when a machine may be tested and its good points brought out to much better advantage, while it is separate from the general stock. Where the customer is confronted with only three or four styles he or she, as the case may be, is not confused and a selection is more readily made because the mind is concentrated upon the contents of the parlor alone instead of an open warerooom, where other customers are examining and testing instruments. Of course, many dealers will fitting up the rooms attractively. Even so, it may be safely said that of five sales that are lost on the warerooom floor because the prospective customer could not arrive at a decision, two will be saved by the separate room where comfortably seated, among attactive surroundings, the tendency to find objections is reduced to a minimum and the salesman finds a more fertile field for his arguments.—*Talking Machine World.*

EDISON PHONOGRAPHS AND RECORDS BY THE CARLOAD.

What is unquestionably the largest single shipment of Phonographs and Records ever imported by any firm in B. C., came to hand on Thursday last, when the well-known firm of M. W. Waitt & Co., Ltd., received a full carload of the celebrated Edison Phonographs, and their superb Cylinder Records. Messrs. M. W. Waitt & Co., Ltd., have been appointed jobbers for these goods by the National Phonograph Company of Orange, N. J., and the present shipment is but the advance guard of much larger ones expected to follow, as the popularity of Edison Machines and Records is so great that the demand is growing by leaps and bounds; the Vancouver public are invited to look over this handsome stock, when they will commence to appreciate what an important point this city is becoming as a distributing centre. Messrs. M. W. Waitt & Co. are now building a large addition to the rear of their present premises in order to take care of their vastly increasing trade; when completed their Phonograph parlors will be the finest in Canada.—*Daily News-Advertiser, Vancouver, B. C.*

A TIME-CONTROLLED PHONOGRAPH.

A recent article referring to the personality of Andrew Carnegie stated that the great ironmaster is awakened every morning by the melodious strains of a pipe organ, played by a well-known musician, and from a psychological viewpoint of theory and practice this is much better than to be rudely aroused to the day's activity by the clanging gong of a sa-cent alarm clock. Unfortunately all of us cannot afford the luxury of a private organ and organist, but thanks to the genius of Dr. J. E. Hett, of Berlin, Ontario, the next best thing has been done for a sleepy and long-suffering humanity, and that is a time-controlled Phonograph, an arrangement of clock and Phonograph, so that at any predetermine d time of night or day, but especially in the early morning, sweet sounds may fill the sleeper's room and so awaken him.

Now the sounds that are first impressed upon the brain may be a march by Sousa or any other musical selection that may be desired, but as it is generally believed that the first thoughts which are induced on awakening by external suggestion cling to a person more or less tenaciously throughout the day, it is obvious that these should be sweet and pleasant instead of harsh and unconforting. To determine the correctness of the above supposition the doctor commenced a series of experiments, and as the result of numerous investigations upon himself he became convinced of the verity of it, and in the end devised the combination shown in the accompaning illustration.

The mechanism is very simple and consists

of a spring which trips a lever attached at one end to an ordinary alarm clock, while at the other end a cord which passes over a pulley is connected to the starting lever of the Phonograph. The case contains three ordinary dry-cell batteries, and when the alarm lever of the clock is tripped the Phonograph is not only started but a miniature four-volt lamp is also turned on and lighted. The light may, however, be turned on or off at pleasure and the Phonograph operated likewise at will.—*Scientific American.*

LETTERS SENT BY DEALERS TO RETAIL INQUIRERS.

From C. H. Olney, Coporsdt, Mich.

Dear Sir:—I am enclosing you printed matter and catalog relative to the most wonderful invention and the most charming home entertainer of the present day.

The Edison Phonograph is the original and the only perfect talking machine. Every instrument is inspected and manufactured by Thomas A. Edison, the most wonderful inventor the world has ever known. You may have been disgusted with some imitation phonograph—you surely will be delighted with the genuine Edison Phonograph and the Edison Gold Moulded Records.

Words are no disagreeable noises in the Edison Records, but are reproduced with the same clearness and brilliant quality of tone is especially adapted to parlor use. This is a feature that Mr. Edison notes to. Neither the musical detail or the natural life-like tones of the voice are drowning out by a mechanical or metallic ring. Edison Records can be used without an Edison Phonograph by anyone blessed with an ear as an educator and indispensible as a veranda or sitting talker. They must complete prized machine and the only pure life-like toned records on the market to-day.

With the "Edison" you can make perfect records of your own voice, your grandpa's—or the baby's. Why not have records of the children's voices, so that in their years to remember them by when they are men?

Let us demonstrate to you how badly you need "Edison, genius" in your parlor.

It will be a real pleasure to us, and to you, if you will call and hear the wonderful Edison Phonograph of to-day. Come in and be glad to bring one to your home for demonstration if it is not convenient for you to come to our store.

Do yourself, your family, your friends, and us a favor and let us hear from you soon regarding the Edison Phonograph.

Edison Standard Phonograph, Flower Horn and Stand and your choice of 12 records for $27.50. Payments made easy.

From Hardy's Music House, Ludington, Mich.

Dear Sir:—Are you too busy to spend one moment with us on the subject of Phonographs? We want to interest you in this very popular musical instrument. We have different styles and sizes, from cut two compplete machines per minute every month, up, and are working 24 hours per day, so there is no question or question that ours is the most popular music maker of the day.

We take pleasure to think what a wonderful invention the Phonograph really is. Now that is just where we wish to interest you. It will be very interesting study, to say nothing of its entertaining features and store, it is educational in many ways and a continual source of amusement for the entire family.

We have sold a great many Edison Phonographs in Ludington and have yet to hear a kick. We have no dissatisfied customers. Our stock is always fresh and up-to-date, and is the largest in Western Michigan.

We have different sized machines, so necessarily different prices; also several sizes of horns which set the prices somewhat. But we do not have two prices on the same machine, for terms differ according to the responsibilities of the buyer. Everything is sold on easy almost on their own terms. If you will take time to call on us we will appreciate it and will be pleased to show you the merits of the Edison Phonograph. We know we can interest and even surprise you with our Edison Gold Moulded Records.

Thanking you for your time and attention and assuring you that any patronage you favor us with will be appreciated, we are

From F. R. Pancoast, Hastings, Mich.

Dear Sir:—I am inclosing you catalog of the most wonderful invention and the most charming entertainer of the present day—the Edison Phonograph.

The Edison Phonograph is the original talking machine—invented, perfected and manufactured by Thomas A. Edison, the most wonderful inventor the world has ever known. Possibly you have heard "talking machines" and have not cared to own one, but remember there are none that reproduce sounds and noises, but look that human voice. The Edison Phonograph is the voice and music which is only to be found in that ideal home entertainer, the Edison Phonograph.

You can sit at home by your own fireside and listen to the most famous artists in Grand Opera, enjoy the latest popular songs, dances and music of your choice, or, if you can have all the musical talent, the old songs of long ago, so filled with pleasant memories. There is something for every member of the home and for the guest as well, no matter what the taste may be.

With an Edison Phonograph you can make records of your own voice, your loved ones, "voice photographs," someone calls them.

Kindly look over the catalog—you will find it quite interesting—and at your earliest convenience come in, when I will show you the machines and play for you some of the records. This will be a real pleasure for me and I would like to explain the plan as "Edison" in your home would be a welcome guest to pay cash, my easy payment plan will interest you.

Hoping to be favored with a call from you soon, I am

AN ARTICLE WORTH READING.

William F. Hunt, an Edison Dealer at Wanatah, Ind., who is a frequent writer on talking machine subjects, has the following interesting article in a late issue of the *Talking Machine World*:

"To be a successful talking machine dealer it is very important that he should keep thoroughly posted on all the improvements that are brought out by the manufacturers in this line. As soon as a person buys a talking machine he becomes enthusiastic over the possibilities of improving the same, and he eagerly watches for the appearance of anything in that line, and the oftener you have something new to offer him the oftener he will visit your store. Great care should, however, be exercised to offer only articles which you have tried and which you know are practical and reliable in every way, and he will be your ever-confiding friend and customer. In the struggle to improve the Phonograph there are a number of so-called improvements on the market which are faikes pure and simple. Do not try to sell these to your customers because they present a tempting profit. They are poison to your business, and will prove not profitable but sadly unprofitable in the end. You do not have to put in stock of any article until you have been fully convinced of its merits. Handle a complete and give it a thorough trial. Many dealers are not successful because they do not treat their customers with due respect. It is to your benefit to do so. No matter how unpromising the prospects for a sale may be from appearances, I have yet to find the salesman that can judge the size of a man's pocketbook or the amount of the purchase a man intends to make; in fact, the customer himself does not know the latter. It will depend entirely on your own tactics, as to how large a purchase he will make. Be ever ready to give the customer any information along your line which he may desire, and always treat him with the best of courtesy, whether you think he will

make a purchase or not. It is sometimes a hard thing to do, I know, but nevertheless it is a most important point in conducting a successful business. If a customer calls for anything you have not got in stock do not put him off by trying to sell him something which you know he does not want, but tell him that you would be pleased to order it for him, even if you know that you would not be making anything on the sale, as the express charges would eat up the profit. This plan is not altogether satisfactory; but as it is impossible to at all times carry a complete stock of everything in the talking machine line, it is better than to abruptly say to the customer that you have not got it and do not care to get it. Chances are that he would go to a competitor and purchase the article, and not only that particular article, but more, and continue to trade with him when through a little talk you could induce him to let you order the article for him and thereby retain his future patronage. Study the line which you carry thoroughly, so that you will be able to bring out all the good points in favor of it when you are trying to make a sale. When the customer once becomes convinced that you are handling the article, not only for what money there is in it but for the merits it possesses the sale is completed; all that is left for you to do is to wrap it up for him to take home. Furthermore, do not throw the literature sent out by manufacturers into the waste basket without proper care, but read everything, and read it carefully. You may think you have not the time to spare, but take time—it is time profitably spent. You will add to your knowledge, as this literature is gotten up with brains. Above everything else keep posted on what is going on in the talking machine trade."

FORM LETTERS TO "FOLLOW UP" INQUIRIES.

The letters printed below have been written to meet the frequent requests of Edison advertising and those furnished by us to Dealers. These should be written on a typewriter, but should be specially written and signed personally by a member of the firm or company. A prospective customer is much more favorably impressed when he receives such a letter than with one that it printed or written and signed by a clerk:

FIRST LETTER.

[To be mailed as soon as notification is received from National Phonograph Co.]

Dear Sir—The National Phonograph Company advises that in response to a request from you they have supplied you with printed matter pertaining to the Edison Phonograph.

Printed matter at all very well in its way, but in order to fully understand and appreciate this great entertainer you must hear it play, sing or talk.

We have on hand Edison Standard Phonographs and a complete line of Records, ranging from grand opera to the popular airs of the day.

Will you not call at an early date and hear the kind of music you like as rendered by richness of tone, the wide range and the fine construction of these instruments, and nothing but personal investigation will do it.

There is nothing you could put into your home that would bring you, your family and all the music of the world, is always ready to entertain, is never out of tune or out of practice.

A call from you for the purpose of getting acquainted with the merits of the Edison will not obligate you in any way. We merely wish the opportunity of demonstration in order to help you to a decision.

Very truly yours,

SECOND LETTER.

[To be mailed from two to four weeks later to the same inquirer unless a sale has been made.]

Dear Sir—We trust you have not abandoned the idea of putting a Phonograph in your home. As we have already written you, no printed matter can adequately tell what this instrument is or what it will do.

We want to show you. We want you to call, select the music you like and hear it played or sung. We want you to operate the instrument—to put on the Records, wind the motor—in short get acquainted with it.

Until you do you cannot decide whether you want it or not with fairness to yourself or to the Phonograph. The Phonograph is a home proposition; it delights every member of the family; it plays and sings when you want it to and plays and sings what you want.

The Phonograph affords a life-time of enjoyment. It never becomes a bore any more than the theatre does, because the bill continually changes. New Records, including all of makes the Phonograph new.

We do not believe you fully appreciate the possibilities of this instrument and it is to prove that it is more than the most enthusiastic descriptions of it would indicate that we are asking you to call.

Very truly yours,

A New Pleasure in Each New EDISON RECORD

For MAY

IT is the Record that is new—not the Phonograph. Each May Record is as entertaining as any you ever heard when you heard it for the first time. The way to keep up your pleasure in the Edison Phonograph and get from it all the enjoyment you should, is to hear the new Records and pick out those you like.

Every owner of an Edison Phonograph should send for these three books, the Edison Free Library of Music: The Phonogram for May, the Supplemental Catalogue for May, and the General Catalogue. Ready for distribution April 27, but write to-day.

Thomas A. Edison.

NATIONAL PHONOGRAPH COMPANY, Lakeside Ave., Orange, N.J.

Here are the New May Records

Hear them at your dealer's on and after April 27th, and give him your order

9529	The Mill in the Forest (Hlinsberg)	Edison Concert Band
9530	Over the Waves (Rosas)	Ada Jones
9533	Gems from "Mary" (Herbert)	Irving Gillette
9534	I've Told His Mother Not to Spank Him (Tate)	Albert Benzler
9535	Oh! Mister Brown (Von Tilzer)	Helen Trix
9537	Something for Jesus (Lowry)	Harry H. Collins
9538	Sousa's Twenty-fourth March (Sousa)	Anthony & Harlan
9539	No Whistling Bells for Me (Furth)	Edison Military Band
9539	Nobody's Coming Home (Furth)	Bob Roberts
9540	Flanagan On a Farm (Gribbon)	Byron G. Harlan

In the Words of Others

"Sell I. C. S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 30 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for **you?** Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

THE DENVER DRY GOODS CO.
WHOLESALE AND RETAIL DRY GOODS
DENVER, COLO. 11/21/06.

International Correspondence Schools,
Scranton, Pa.

Gentlemen:

In reply to your letter of the 17th inst., will say we considered the demonstration of Mr. Eastman very successful and while he was here we sold several Language Outfits. We have also sold some since he left us. We expect to advertise these Language Outfits during the month of December, and will be glad to have you send us the name of parties to whom demonstration was given and who have not as yet made a purchase. We think the plan of advertising or demonstrating these Outfits a very successful and look to sales which could not be obtained otherwise.

We have placed several orders with you since the demonstration and would be glad to have you send us prices on Spanish, French and whatever we need in this line through your Denver office as we have had to do several times recently; same can be billed to us by you. This would be a great convenience to us.

We will keep you advised from time to time of the results of sales on I. C. S. Language Outfits.

Yours very truly,
THE DENVER DRY GOODS CO.,

THE PHONOGRAPH IN SUMMER.

There was a time when the Phonograph was looked upon as a winter entertainer, to be used when the evenings were long and people had to stay indoors. This is still perfectly true, but it is just as much an entertainer in "the good old Summer time" when the evenings are warm and too fine to waste in sleep; and the Dealer who believes this, and talks his belief to his customers, will find no falling off in his sales during what is supposed to be the dull season of the months. People take vacations to find amusement and rest; and as the amused holiday seeker is the rested one, the Edison Phonograph and Records cannot be left behind. From what other source can the family at some lonely lake shore or mountain resort obtain dance music or songs with choruses at an instant's notice? Dealers should not regard the good Record customer as lost because he or she happens to be staying at a distance. The owner of an Edison Phonograph is certain to acquire the Edison Record appetite and it must be gratified as much in summer as in winter. Send the monthly list of Records to your customers and see that they carry away a good stock of them before they go. They will be bought from some Edison dealer somewhere, and, as the popular song has it "it might as well be you". Every night of the summer the voice of the Edison Phonograph is heard making melody for all sorts and conditions of men. It is certain that the sale of Records does not stop in summer, and if it does not, some enterprising man is making money, while his fellows are waiting for winter profits. The Edison Phonograph is not like an oyster—it is never out of season. With our vastly increased facilities for the output of Edison Goods, we are doing all we can to meet the demands of the coming season, which will probably be the largest in the history of the Phonograph, and it will not be our fault if it is not the most profitable our Dealers have experienced.

THE ADVANCE LIST OF AUGUST RECORDS APPEARS ON PAGE 2.

NEW EDISON GOLD MOULDED RECORDS ADVANCE LIST FOR AUGUST, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before **July 27th**, all things being favorable, but they must not be placed on sale by Jobbers or leave their place of business, or be re-shipped to Dealers before **8 A. M. on July 27th.** Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after July 28th, but must not be circulated among the public before July 27. Jobbers are required to place orders for August Records on or before **June 10th.** Dealers should place August orders with Jobbers before **June 10th** to insure prompt shipment when Jobbers' stock is received.

9002 **Minuet and Gavotte from "Paglieci"** (Leoncavallo) **Edison Concert Band**
An instrumental selection from R. Leoncavallo's music drama, well known and popular with music lovers.

9003 **He Never Even Said Good Bye** (Gumble) **Ada Jones**
"I miss him but I'm glad he's gone"—the new crying coon song now making a successful bid for popularity.

9004 **My Dear** (Ball) **Reinald Werrenrath**
A new baritone in the latest ballad by the writers of "Love Me and the World is Mine."

9005 **Sonoma** (Friedman) **Edison Venetian Trio**
A new violin, flute and harp selection, also known as "My Mexican Rose." The harp cadenza is one of the attractive features.

9006 **I'm Tying the Leaves so They Won't Come Down** (Stolz) **Byron G. Harlan**
A pathetic waltz song telling a story of a child's simplicity.

9007 **Work, for the Night is Coming** (Mason) **Edison Mixed Quartette**
A sacred selection familiar to everybody and sung by a quartette of mixed voices.

9008 **Flanagan and His Money** (Original) **Steve Porter**
The latest Flanagan Vaudeville Specialty. He tells what he knows about money and of how much he has—that is, before he "fell out o' luck."

9009 **Joyce's 71st Regiment March** (Boyer) **Edison Military Band**
Last of the old-timers, now to many and an old friend to many others.

9010 **Dearest, Sweetest, Best** (Peabody) **Harry Anthony**
"I'm the world to me".) A pretty sentimental ballad, sweet and melodious.

9011 **He'ry Little Bit Added to What You've Got Makes Just A Little Bit More** (Collins Byrd.) **Collins and Harlan**
"Always try to be a Carnegie"—comic dust containing some good advice, not forgetting a few laughs.

9012 **He Got To Church On Sunday** (Goetz) **Billy Murray**
Comic song, as sung by Eddie Foy in the musical comedy "The Orchid."

9013 **Heather Bells** (Losey) **Albert Benzler**
An attractive bells solo, in mazurka tempo, introducing a new chimes effect.

9014 **She Was A Grand Old Lady** (Henry) **Harvey Hindermyer**
A new march song by a new tenor.

9015 **Street Piano Medley** (Original) **August Molinari**
A descriptive selection featuring a street piano, or "Hurdy Gurdy," playing "My Irish Rosie," "Arrah Wanna" and "Spend 'Em Dere."

9016 **Harrigan** (Cohan) **Edward Meeker**
"H-A-double R-I-G-A-N spells Harrigan"—comic Irish dialect song, from Geo. M. Cohan's latest musical play, "Fifty Miles from Boston."

9017 **Miss Dixie** (Hager) **Edison Concert Band**
"A reminiscence of corn brake and sugar cane," says the composer.

9018 **So Long, So Long** (Clark) **Arthur Collins**
"No more sunshine, nothing but rain"—coon song hit, from the comedy "The Boys of Company B."

9019 **In the Good Old Steamboat Days.** (Hill) **Murry K. Hill**
A comic song sung by the composer, a popular vaudeville artist, and a new addition to our catalogue.

9020 **My Word! What A Lot Of It** (Reed) **Will F. Denny**
A comic song telling of Chauncey's experience with "the boys" and "matters matrimonial."

9021 **The Merry Lark** (Bendix) **Edison Symphony Orchestra**
("A Joyous Flight") by the composer of "The Broken-Hearted Sparrow," from the same suite, "A Love Episode in Birdland."

9022 **Red Wing** (Miller) **Frederick H. Potter and Chorus**
Descriptive song of "An Indian Tale" with Red Wing, an Indian maiden, as the heroine. The Edison Male Quartette figures in the chorus.

9023 **Burying the Hatchet** (Original) **Ada Jones and Len Spencer**
The latest coon vaudeville sketch, in which Henry's better half (Miss Jones) promises to be good and sings the coon song, "Henry" (White).

9024 **The Sailor's Carouse** (Parry) **Edison Male Quartette**

9025 **School Days Medley** (Original) **Edison Military Band**
An unaccompanied male quartette, well known and universally liked.
A new waltz medley comprising the following hits: "School Days" (No. 8663), "When You Know You're Not Forgotten by the Girl You Can't Forget" (No. 8644) and "You'll Have to Wait 'Till My Ship Comes In." (No. 8650).

Edison Gold Moulded Records are made only in Standard Size. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

CONCERNING SHOP-WORN MACHINES.

In the editorial columns of the *Music Trade Review*, for May 4th, there appeared a statement as to the disposal of shop-worn or used machines which, so far as the National Phonograph Company is concerned, was entirely misleading.

"Talking machine dealers," ran the editorial, "if they desire to dispose of shop-worn machines, must inform the factory in writing of their intention, together with the serial number of the machine in question; then a special license is issued permitting the sale at a reduced price, provided the necessary facts are established to the satisfaction of the talking machine manufacturers."

This may apply to talking machines of some kinds but emphatically does not to those manufactured by the National Phonograph Company. We have never done so, and we see no reason to suppose that we shall adopt a policy of this description. In consequence of this notice a number of dealers have written to us for further information, asking for permission to sell such shop-worn or used machines as they have, at the reduced figure.

Paragraph number 5 of our Dealer's agreement, specifically forbids the disposal of shop-worn Edison Phonographs at reduced prices, intimating that such methods will be considered as price cutting and consequently not allowable. The trade may rest assured that they will be duly advised of any coming change in this policy on the part of the National Phonograph Company through the columns of the EDISON PHONOGRAPH MONTHLY.

DISTRIBUTION OF PHONOGRAMS AND SUPPLEMENTS.

As we find that some Jobbers and Dealers are not quite certain as to the date of distributing Phonograms, Supplements, Bulletins, etc., we publish the following further interpretation of the notice issued last month, so that there may be no further confusion in the matter.

1. Phonograms, Supplements and Bulletins may be distributed to Dealers at any time between the 20th and 27th of each month.

2. Dealers and Jobbers must not distribute them at retail before the 27th.

3. Jobbers and Dealers may distribute Supplements of their own printing or advertise in advance of the 27th, provided they distinctly state that the Records will not be on sale before the 27th.

Under no circumstances must Supplements of our printing be distributed before the 27th.

The principal reason why we cannot permit our Supplements and Phonograms to be distributed at retail before the 27th is because we cannot guarantee that they will reach all Jobbers at the same time. At present Records and printed matter reach Jobbers at different times. If they were all to distribute the printed matter at any time after its receipt, the Dealers of one Jobber would, in most instances, get and circulate printed matter considerably in advance of the Dealers of another Jobber, whose shipments were delayed, or made at the same time. This would lead to many complications that we desire to avoid.

Permitting Jobbers and Dealers to circulate Supplements of their own printing, puts them all on the same plane and does not make us a party to their competition. At the same time, we believe it to be unwise for dealers to distribute printed matter in advance of the receipt of new Records.

OUR ATTITUDE RESPECTING PREMIUM SCHEMES.

In order that Jobbers or Dealers should have no possible excuse for being misinformed as to the precise meaning of our agreement with them, and the conditions of sale relating to Edison Goods, our legal department prepared for the February issue of the EDISON PHONOGRAPH MONTHLY, a clearly worded article entitled "Doubtful Points Legally Interpreted."

In order to emphasize this even more strongly, W. E. Gilmore, President of the National Phonograph Company, drew attention to this article, in the April number, and warned all Jobbers and Dealers that no goods manufactured by the National Phonograph Company must be coupled with any premium or advertising schemes.

Notwithstanding this, it has come to our notice that certain Dealers have been taking up similar schemes against which they have been doubly warned, in section 5 of the first article, which was also reprinted in the April issue.

These Dealers have taken up the premium scheme after consulting with the Jobbers' travelling men. From this it would appear that the Jobbers had not brought our warning to their salesmen's notice, or else had not fully understood it themselves. As we can under no condition deviate from the course we have laid down after most mature consideration, we must reiterate our instructions, and shall be glad if Jobbers, who have not done so, will bring them to the attention of their salesmen and through them to any Dealers who may not have studied the matter closely. Failure to comply with this warning may lead to the suspension of offending Jobbers or Dealers from the advantages and privileges of our Jobbers' & Dealers' Agreements.

AMONG THE JOBBERS.

Grinnell Bros., Edison Jobbers, at Detroit, are to have a new building at 243-247 Woodward avenue, which will be ready for occupancy about December 1. The new structure is to cost $150,000 and will be six stories high, on a plot of ground 60 x 100 feet. The columns and footings, however, will be designed heavy enough to carry several additional stories, which will be built at the same time as the main structure, provided occupants for the same can be found before the completion of the building. The building will be of reinforced concrete and steel and of fireproof construction throughout. The firm of Grinnell Bros. is composed of Ira L. and Clayton A. Grinnell. They came to Detroit from Ann Arbor in 1882 and opened up a store opposite their present location. They have since opened branches in Adrian, Bay City, Escanaba, Flint, Hancock, Petoskey, Pontiac, Port Huron, Saginaw, Sault Ste. Marie and Traverse City.

P. E. Conroy, President of the Conroy Piano Co., Edison Jobbers, at St. Louis, in speaking of business, said in an interview: "I have been in the Phonograph business twelve years, and the trade that we have ha l the first quarter of this year beats all records by a very large margin. Our trade throughout Kansas, Oklahoma and Texas, as well as other tributary States, has showed a phenomenal increase, and it is constantly growing, and the demand is for the best line of goods we carry." He added, "I consider this a remarkable showing in view of the fact that we are exclusively Edison Dealers." Mr. Conroy will sail for a three months' tour of Europe in July, joining his wife and son, who are now in Berlin.

J. W. Jenkins Sons Music Company, Edison Jobbers at Kansas City, Mo., have purchased the stock and fixtures of the J. Frank Walker Music Company, at 611 Main street, Joplin, Mo., and will in the future conduct a branch at that location. The building will be remodeled on the inside, a passenger elevator will be installed, and the third floor will be used as a work room and stock room. The Joplin branch will have four men on the road covering the territory south and east of that city. It includes part of Western Kansas, the southern part of Missouri and most of Arkansas. The force at the salesrooms will number about fifteen men. The manager of the new branch is J. O. Adams.

It has been announced that H. A. Weymann & Sons, Edison Jobbers at Philadelphia, will move from their present location at 925 Market street to 1018 Chestnut street, where they have secured an entire building.

The J. F. Schmelzyer Sons Arms Co., Edison Jobbers at Kansas City, observed the fiftieth anniversary of the founding of their business on April 20th. They started in business in Leavenworth, Kas., in 1857.

Koehler & Hinrichs, Edison Jobbers of St. Paul, Minn., have found their business increasing to such an extent that they have been compelled to enlarge their stock rooms. It is their intention to carry 100,000 Edison Records in stock.

Visiting Edison Jobbers at our New York office during May were: Thomas Hext, Hext Music Co., Denver; R. Wurlitzer, Jr., R. Wurlitzer Co., Cincinnati; W. H. Beck, Eastern Talking Machine Co., Boston; James Fintze, Ball-Fintze Co., Newark, Ohio; C. N. Post and J. F. Bowers, Lyon & Healy, Chicago; W. E. Henry, Powers & Henry, Pittsburg.

MR. BERGMANN AT ORANGE.

Among the visitors to the Edison Laboratory during May was Seligman Bergmann, who has had a business connection with Mr. Edison or his interests for many years. In 1878, with a factory at Avenue B and 17th street, New York City, Mr. Bergmann manufactured a quantity of the old style tin-foil Phonographs, modelled after the original Phonograph invented by Mr. Edison while at Menlo Park. The original Phonograph made in the Edison Laboratory at that place now occupies a place in the Kensington Museum at London. The numerous "original" Phonographs which come to life from time to time in this country are part of the lot made by Mr. Bergmann and patterned after the original. Shortly after these Phonographs were put on the market, Mr. Bergmann began the manufacture of electric light and telephone supplies, both of which inventions were then occupying a large part of Mr. Edison's time. Even after Mr. Edison disposed of his interests in these inventions, Mr. Bergmann continued the manufacture of these supplies in New York City. Some years ago he disposed of his business there and went to Germany, where he continued the manufacture of similar goods. In addition to manufacturing these lines, Mr. Bergmann is at present interested in the marketing of the Edison Storage Battery in Germany. He is now making a combined business and pleasure trip to this country and expects to return shortly. While visiting the Edison Laboratory and factory at Orange, he was greatly interested in the improvements and changes that have been made since his last visit.

PERSONAL.

William E. Gilmore, President of the National Phonograph Co., accompanied by Mrs. Gilmore, who sailed for Europe on the Baltic on May 8th, had the unpleasant experience of being delayed twenty-four hours off Sandy Hook by the boat grounding on the bar. A large party of personal friends and company officials were at the pier when they left New York. As stated last month, they expect to return early in July, accompanied by J. R. Schermerhorn, Assistant General Manager, and family. Mr. Schermerhorn has been in charge of the London office for nearly two years past.

J. W. Aylesworth, one of the chief experimenters of the National Phonograph Co., sailed for England on the Baltic on May 8th on a business trip.

Oliver K. Kauffman, proprietor of the Reading Phonograph Co., Reading, Pa., was one of those killed in the wreck of the Shriners excursion train in California last month. Mr. Kauffman was well known in the talking machine trade. He was thirty-three years old and married.

JOKE ON THE JOKER.

Jokes, like chickens, sometimes come home to roost. Confirmation of this fact will be furnished by L. E. McGreal, of McGreal Bros., Edison Jobbers at Milwaukee. The PHONOGRAPH MONTHLY for May contained a paragraph to the effect that Mr. McGreal was married on April 2nd to Miss Helen Gannon, daughter of Mayor Gannon of Dixon, Ill. This paragraph was copied from a music trade publication and the editor of the PHONOGRAPH MONTHLY, not being fully informed concerning Mr. McGreal's family affairs, reprinted it as an item of news. The PHONOGRAPH MONTHLY had scarcely appeared when the editor learned to his chagrin that Mr. McGreal's marriage to Miss Gannon had occurred some four years ago, and that Mr. McGreal, instead of being a newly made Benedick, was the father of two happy and healthy children. A letter of apology to Mr. McGreal brought back the information that he had himself given the information to a Milwaukee reporter as a joke, and with little thought that it would be given such national publicity. Mr. McGreal admits that the joke is now on him and he relieves the editor of the PHONOGRAPH MONTHLY of all responsibility.

[Don't let up because summer is coming. Edison goods have no dull season.

SALES DEPARTMENT CHANGES.

A. C. Ireton, Assistant Sales Manager, with headquarters at 31 Union Square, New York, was on May 12th relieved of the work that he has been doing for some time past in connection with the correspondence of the department, and made general superintendent of the traveling salesmen, retaining his title of Assistant Sales Manager. It is the company's intention to increase the number of salesmen, covering the country more completely than ever before. Frank E. Madison, heretofore in charge of the Agreement Department, will be Chief Correspondence Clerk. E. E. Davidson, heretofore in the general correspondence office, will have charge of the Agreement Department.

FACTORY EXTENSIONS.

By the recent transfer of the title to two lots, one 25 x 122 and the other 30 x 133, the Edison interests at Orange have become the owners of the entire block now occupied by the Edison factories. This block is bounded by Valley road, Lakeside avenue, Alden street and Watchung avenue. It has for years been owned and occupied by the Edison companies with the exception of the two lots referred to. These would have been bought long ago but for a difference of opinion as to their value. The dwellings standing on them will now be moved away, and a five-story reinforced building will be erected in their stead in the near future.

PUBLISHERS OF MUSIC IN AUGUST LIST.

The publishers of the compositions made for our August list of Records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers.

9602	Minuet and Gavotte from Pugliesi—Carl Stasny, New York.
9603	He Never Even Said Good Bye—Jerome H. Remick & Co., New York.
9604	My Dear—M. Witmark & Sons, New York.
9605	Stewart—Minstrel Studio, New York.
9606	I'm Tying the Leaves So They Won't Come Down—Hoff & Hager, New York.
9609	Independence Regiment March—J. W. Pepper, Philadelphia.
9610	Dearest, Sweetest, Best—Joseph W. Stern & Co., New York.
9611	Every Little Bit Added to What You've Got Makes Just A Little Bit More—Hoff & Hager, New York.
9612	He Goes to Church On Sunday—Maurice Shapiro, New York.
9613	Heather Bells—Vanderhoof Music Pub. Co., Williamsport, Pa.
9614	She Was a Grand Old Lady—Jos. W. Stern & Co., New York.
9616	Harrington—Geo. Maxwell, New York.
9617	Miss Dixie—Hoff & Hager, New York.
9618	So Long, So Long—M. Witmark & Sons, New York.
9620	My Word! What a Lot of It—M. Witmark & Sons, New York.
9621	The Merry Lark—Thos. Rendle, New York.
9622	Hail Columbia—Arr. by Sousa.
9624	The Sailors' Chorus—Oliver Ditson Co., Boston.

ADVANCE LIST NEW FRENCH, GERMAN AND ITALIAN SELECTIONS.

EDISON GOLD MOULDED RECORDS.

The 45 French, 90 German and 11 Italian Records named below will be ready for shipment to Jobbers about July 1st or as soon as the necessary printed matter for distribution to the public can be prepared. Jobbers' orders will then be filled in the order received and without regard to territory. Jobbers should place advance orders at once. These Records, which are of the standard size, and will be sold at retail at 35 cents each, are being put out to meet the demand of the trade for more selections in these languages. Excepting the 35 German selections made over and listed a few months ago, no new Edison Records in French, German and Italian have been made in some years, due to the inability of our factory to meet the demand for domestic Records. With the increase in Record-making facilities it is now our intention to pay more attention to making Records in other languages. This advance list is a beginning in that direction.

These selections represent the best efforts of our record-making experts, than whom there are none better in the world. The French and German masters were made abroad and the Italian masters by our own Recording Department in New York City. Jobbers and Dealers in cities and towns where there is a French, German or Italian population will make no mistake in ordering and carrying a full stock of all of these selections.

45 NEW FRENCH RECORDS.

Most of these French selections have been taken from the best known and most popular operas of the day. They are sung for our Records by some of the best and most talented artists of France. Their efforts were directed by our own recording expects. Consequently, they combine every qualification that enters into the make-up of an up-to-date Edison Record. That they will meet with unqualified approval of the French speaking public of the United States and Canada, we do not doubt.

17023	NE PARLE PAS, "LES DRAGONS DE VILLARS" *Maillart*	M. Gluck de l'Opéra Comique
17002	BENEDICTION DES POIGNARDS, "LES HUGUENOTS" *Meyerbeer*	M. Journet de l'Opera
17001	ROMANCE DE LA FLEUR, "CARMEN" *Bizet*	M. Gluck de l'Opéra Comique
17005	AIR DE MICAELA, "CARMEN" *Bizet*	Mlle. Mary Boyer de l'Opéra Comique
17006	HABANERA, "CARMEN" *Bizet*	Mlle. Mary Boyer de l'Opéra Comique
17031	AIR DES BIJOUX, "FAUST" *Gounod*	Mme. Mathieu de l'Opéra
17030	SALUT O MON DERNIER MATIN, "FAUST" *Gounod*	M. Gluck de l'Opéra Comique
17035	SOIT IMMOBILE, "GUILLAUME TELL" *Rossini*	M. Noté de l'Opéra
17036	ASILE HEREDITAIRE "GUILLAUME TELL" *Rossini*	M. Gluck de l'Opéra Comique
17038	AIR DE JEAN, "HERODIADE" *Massenet*	M. Gluck de l'Opéra Comique
17039	AIR DU PAGE, "LES HUGENOTS" *Meyerbeer*	M. Gluck de l'Opéra Comique
17040	BERCEUSE D'AMOUR *F. Delmet*	Mme. Mathieu de l'Opéra
17042	DEPUIS LE JOUR OU JE ME SUIS DONNE, "LOUISE" *Charpentier*	M. Marsteve de l'Opéra Mlle. Mary Boyer de l'Opéra Comique
17044	LE REVE DE DES GRIEUX, "MANON" *Massenet*	M. Gluck de l'Opéra Comique
17045	SCENE DE LA SEDUCTION, "MANON" *Massenet*	Mlle. Merguillier de l'Opéra Comique

17812	LIESCHEN ET FRITZCHEN (DUO) *Offenbach*	Mme. Ida Vaudère et M. Ragonau de l'Opéra

90 NEW GERMAN RECORDS.

The German Records listed below comprise a variety of selections suited to every taste, from sacred to operatic, from grave to gay, from songs from the great operas to selections whose only claim for recognition is the merriment they provoke. They include solos, duets and quartettes, and songs in every kind of voice.

The artists singing the operatic selections rank among the best opera singers to be found in the German Empire. The masters were made in Germany and molds shipped to this country. They are, therefore, German Records in every sense. Each will be a treat to every lover of German music and humor.

15067	OB DU MICH LIEBST, AUS "NAKIRIS HOCHZEIT" *Paul Lincke* *Mit Orchesterbegleitung*	Max Steidl
15068	BEIM ZAHNARZT *(Humoristische)*	Martin und Paul Bendix
15014	SEI GEPRIESEN, DU LAUSCHIGE NACHT, AUS "DIE LANDSTREICHER" *Lortzing* *Mit Orchesterbegleitung*	Opernsänger Hans Hersten

15581 DER BALZER BEIM SACHENLAUSER AEBBELWEI Vorgetragen von Adam Müller *Humoreske in Frankfurter Mundart*

11 NEW ITALIAN RECORDS.

While the masters of these Italian Records were made in this country, no one who hears them will question for a moment their high class character. Signor Francesco Daddi, who made all of them is an artist of much ability. He was a member of the Manhattan Opera Company last season. He has a fine tenor voice and his enunciation is perfect. The selections are of a popular character, as their titles indicate.

Sung by Francesco Daddi, Tenor.
All accompanied by orchestra.

19083 NON SACCIO EPPICA (Canzonetta Napoletana) *P. E. Ponzo*
19084 CHE BUO PA?—A PACCHIANELLA (Canzone Napoletana) *V. Valente*
19085 SANTA LUCIA (Canzone Popolare)
19086 'A SIMPATICONA (Canzone Popolare)
19087 ROSA, RUSELLA (Canzone Popolare) *V. di Chiera*
19088 SERENATELLA NENA (Canzone Popolare) *E. Di Capua e S. Gambardella*
19089 TORNA A SURRIENTO (Canzone Popolare) *Ernesto de Curtis*
19090 PUSILLACO ADDIRUSO (Canzone Popolare)
19091 MARICHIARE (Canto Napoletana) *Paolo Tosti*
19092 'A, SERENATA D' 'EROSE (Canzone Popolare) *E. di Capua*
19093 CHI SE NE SCORD CHIU (Canzone Napoletana) *Richard Barthélemy*
19094 MARIA, MARI! (Canzone Napoletana) *E. di Capua*
19095 VOCE 'E NOTTE! (Canzone Napoletana) *E. de Curtis*
19096 PESCA D' AMORE (Canzone appassionata) *Richard Barthélemy*

ADVANCE LIST EDISON GRAND OPERA RECORDS SUPPLEMENT No. 7, AUGUST, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before July 27, 1907, all things being favorable, but they must not be placed on sale by Jobbers or leave their places of business, or be reshipped to Dealers before 9 A M. on July 27, 1907. Supplements will be shipped with Records. These may be distributed to Dealers after July 30th, but must not be circulated among the public before July 27. Jobbers are required to place orders for Grand Opera Records on or before June 10th. Dealers should place Grand Opera orders with Jobbers before June 10th to insure prompt and complete shipment when Jobbers stock is received.

B. 81—Ich grolle nicht ("I'll not complain") *Schumann*
By OTTO GORITZ, *Baritone*
Sung in German *Orchestra accompaniment*
The one great romance of Schumann's life was his love for Clara Wieck, the daughter of Friedrich Wieck, Schumann's master of piano playing, to whom the composer became attached as a pupil. Schumann fell desperately in love with Clara Wieck, but her father opposed the match. Schumann was, at that time, without great means, and he had not yet achieved the great fame as a composer, that afterward came to him. For four years the parental objections prevailed, and Schumann was forbidden to see Clara Wieck for his bride. From this period dates the greatest of his songs, including the present one, "Ich grolle nicht." This famous song is one of the set "Poet's Love," the text by Heinrich Heine. The first line, "I'll not complain, tho' break my heart" (Ich grolle nicht, wenn mir das Herz auch bricht), sounds the keynote of this beautiful song. It rises to a passionate climax, but throughout the mood of fine resignation is the controlling one.

B. 82—Bridal ("Drinking Song"). "Cavalleria Rusticana." *Mascagni*
By FLORENCIO CONSTANTINO, *Tenor*
Sung in Italian *Orchestra accompaniment*
Mascagni's one act opera "Cavalleria Rusticana" —"Rustic Chivalry"—is one of the greatest of all operatic successes. It was written in competition for a prize offered by the Italian publisher Sonzogno, and besides winning the prize it earned immediate fame for its composer. Mascagni's setting of the story of Verga's drama, the sublimation of its dramatic incidents had much to do with the success of Mascagni's opera. The "Brindisi"—Drinking Song—is sung by Turiddu just after the villagers stream out of church. Lola, who is with him invites them to drink a cup of wine. Raising his cup he sings this stirring song. He sings in Italian:
"See the wine, so freely flowing,
In our brimming goblets glowing.
Red as ripest ruby blushing,
Bringing friendship, love and joy."
It is one of the most attractive numbers in the entire opera, its melody being marked by a rousing, impulsive spirit.

B. 83—Addio alle morbide (In those soft alleys retreating) "Manon Lescaut." *Puccini*
By SIGNORINA GARAVAGLIA, *Soprano*
Sung in Italian *Orchestra accompaniment*
This excerpt from Puccini's dramatic opera, "Manon Lescaut," occurs in the second act. *Manon* has been torn by her scheming brother from the companionable of her penniless beloved *Chevalier des Grieux*. She is now ensconced in the sumptuous mansion of an old doting admirer, *Geronte*, who has lavished upon her all the luxuries that are purchasable. When the curtain rises, Manon is seen alone in the midst of her luxurious surroundings. She thinks of her lover, but that he rescued her from a life that was worse than death, but short in misery. In return *Manon* outlines that she longs for tidings of the *Chevalier des Grieux*; and then admits that the luxury of her present abode is not an index to her bliss. Her ardent begins: "In those soft alleys retreating, where love's sighs are but a silence, there's a chill that freezes." This episode is lovely in its lyric tunefulness, and the pensive beauty of the concluding portion is very charming.

B. 84—Io son l'amore, ("I Am Love") *Tosti*
By GIUSEPPE CAMPANARI, *Baritone*
Sung in Italian *Orchestra accompaniment*
The composer calls this graceful song a "canzonetta notturna"—a nocturnal song, and this title describes its character and its mood. The sentimental poem underlying this musical text is by Francesco Cimmino. Tosti is one of the most popular of present day song composers, his chosen field of work with music that is melodiously attractive, and in which the melody employed is very graceful, and the rhythm is a swinging one. At the conclusion of the song comes the refrain: "Io son l'amore"—"I am love"—which thrice dramatically uttered. About some portion of this song there is something of the simplicity that resembles the characteristics of a folk song.

B. 100—Cujus Animam ("Lordi vouchsafe Thy loving kindness") "Stabat Mater". *Rossini*
By ANGELO PINTUCCI, *Tenor*
Sung in Latin *Orchestra accompaniment*
"Stabat Mater" (Mother Standing) is the name of "William Tell," the failure of which drove Rossini in a resolve never to compose again. Although Rossini lived almost forty years after the premiere of "William Tell," he, in the main, was true to his resolve, and wrote but little after it. The "Stabat Mater" contains the most notable instance, in which "Stabat Mater" Rossini has scored a setting more theatrical than religious in his mood. Certainly, the work is more brilliant, and the present Cujus Animam is a very fine example of the composer's vivid melody. To the text: "Lord vouchsafe Thy loving kindness," Rossini has set a lyric, sympathetic and tender melody, and one that is completely musical setting that is famous for its melody and its brilliancy.

PUSHING GRAND OPERA RECORDS.

The new list of Edison Grand Opera Records, Supplement No. 7, given in full on page 9, has been made up of noted artists from the works of the most famous composers, and is a very fine one. The new artists are Otto Goritz, a German baritone, who sang in the Metropolitan Opera Company, last winter; Signora Garavaglia, an Italian soprano, who has been engaged by Mr. Hammerstein for next season, and Angelo Pintucci, a tenor, who has recently triumphed in Mexico.

Dealers who make special efforts to push the sale of Grand Opera Records will find the effort worth while. It is incontestable that there is a demand for this high class music among people of cultured tastes. Most of these people, as Dealers should know very well, seem to think that all phonographic music is of the "coon" variety. You, as a Dealer, are quite right to specialize in these popular lines because of the profits to be made; but you should be careful not to think that you cannot just as well combine the two varieties. A customer coming in for Ada Jones' latest, will not accept the beautiful "Flower Song," from Gounod's "Faust," even if sung by Madame Jacoby, by way of substitution; for her, there is nothing "just as good." But it is quite as likely that among your customers, or among the musically cultured of your town, there are those who would buy the Edison Grand Opera

Records if they were persistently brought to their notice. Under no condition can the sale of the two classes of Records conflict in any way. The sale of Grand Opera Records simply means additional profit to you and as such you cannot afford not to do your best to sell them.

We are helping you by advertising them in the national magazines which go into millions of homes. This publicity must bring you many inquiries. If you carry the full line it is your business to make these inquirers into buyers.

The fact that during the past season New York City has supported two Grand Opera houses and the greatest galaxy of stars ever gathered together in one city, has brought the Grand Opera and its favorite songs closely home to the American people. The interest is growing and means a demand for the Records. The metropolitan and provincial press have helped to advertise the various arias, duets, trios and quartettes by giving great prominence to the doings of the Metropolitan and Manhattan Opera Houses. The desire to possess the gems of vocal operatic art at reasonable prices, is one that will continue to grow, and should prove very profitable to you, if only you use special efforts to make it known that you have them for sale.

NO EXHIBIT AT JAMESTOWN.

Unless something unexpected occurs within the next month, there will be no exhibition of Edison Phonographs at the Jamestown Exposition. C. B. Haynes & Co., Edison Jobbers at Richmond, who expected to have an exhibit of Edison goods at the Exposition, was compelled by circumstances to abandon the plan. None will be made by this company direct.

SELLING RECORDS BY TELEPHONE.

The following interesting letter from H. G. Stanton, general manager of E. S. Williams Sons & Co., Edison Jobbers at Toronto, Canada, shows that modern selling methods are flourishing in far-off British Columbia. As the idea may be a new one to many Dealers, we quote it in full:

"While in Victoria recently, I called upon our Edison Dealers there, Fletcher Bros., and upon entering their store was much interested and amused in the rather novel way they were making a sale of Records at the time. The Phonograph was being played a short distance from the telephone and the clerk seemed to be operating it with the same attention that would usually be given when a customer was listening to a Record; but as no customer was in sight, I assumed the playing was one for the clerk's benefit only and was very much surprised to find that the trial was for a customer, who was listening to the music over the 'phone and making her purchase while in the suburb named Esquimalt, six miles away."

NOTABLE ADVERTISING.

The beautiful three color advertisement in the May 4th issue of *Collier's*, which we mailed to all Edison Dealers, is typical of the thoroughness with which we are conducting our advertising campaign. The Dealer who refers to it will notice that two cuts appear on the second and third pages of the cover we sent. The magazines and newspapers are some of those in which we have advertised Edison Phonographs and Records; and a glance at the two will convince you of two things at least. First that these magazines and newspapers are such as to include all classes of possible purchasers, from the richest classes to the poorest, and are known in every State of the Union.

Secondly, that you are deriving very direct benefit from this universal publicity. Naturally, the cost of all this is very great but we are satisfied that we are on a right course and there is to be no let up in our activities. On June 4th we shall have a colored page in the *Saturday Evening Post*, well known as one of the costliest and best advertising media. Every Dealer must be benefited by this carefully planned, systematic advertising and if he will only supplement it in his own town by distributing the literature we send him, as much as with his head or his hands, he will have every reason to be satisfied with the sales.

The sale of an Edison Phonograph differs from the sale of the usual commodity because the Edison Dealer has the opportunities for double profits—one from the sale of the Phonograph and the other from the sales of new Records. A Dealer who sells a stove or range to his customer does not get the opportunity to sell him the coal wherewith to feed it. That profit must go to the coal dealer. Similarly the man who sells you a horse is not the one who sells you oats and hay. The profits on what the animal eats go to another dealer. But with the Edison Dealer it is different—he sells the Phonograph and the Records. How many Records one Dealer can sell to the owner of a Phonograph depends very much upon his own ability as a salesman. We know of Dealers who sit and wait for people to come and buy, and we know of others who make people buy. The one looks despairingly at his stock and wonders when he will sell it. The other sends off telegrams to his Jobber to "rush that order through." No two blades of grass, grains of sand or Dealers are alike, but our advertising would help all Dealers without regard to their location or size of store.

COMMENTS ON EDISON GOLD MOULDED RECORDS FOR AUGUST.

The August list of Edison Gold Moulded Records is admirably adapted for the great vacation month, because there is something of everything and everything is good. A new baritone singer makes his bow in Reinald Werrenrath, whose splendid voice will make him a great favorite. Other new artists in the August list are Harvey Hindermeyr, a tenor with a strong vibrant voice; Murry K. Hill, a well known and popular vaudeville artist, and August Molinari, whose talents are of a physical character, for he furnishes the motive power for a street piano. There are good comic songs and sketches to laugh at and the instrumental selections are splendid, including as they do the Edison Venetian Trio in "Sonoma," dances from Pagliacci by the Edison Concert Band, and others that will be welcomed. The Edison Male Quartette has another Record that will enhance its already great popularity.

No. 9602, Minuet and Gavotte from "Pagliacci", is a fine selection by the Edison Concert Band. To all lovers of really high class, but at the same time tuneful music, this splendidly played Record will especially appeal. The great Italian composer, from whose beautiful but tragic opera these dances are taken, has recently made an extended visit to this country and was much gratified at the interest evinced in his works. Although Ruggiero Leoncavallo has seen much in his fifty years of life, he has produced nothing comparable to "Pagliacci."

No. 9603, "He Never Even Said Goodbye," is sung by Ada Jones whose coon songs are always eagerly looked for. This latest by Albert Gumble (music) and Dave J. Clark (words) is a very amusing Record. It tells of the plaintive regrets of a colored lady whose colored gentleman has departed without bidding her farewell. She says frankly "He was no good to me," but when she reflects that Samuel was sometimes addicted to calling her "pet" and "honey," his falseness makes her sad, "'Cause he never even said goodbye." Sung with orchestra accompaniment.

No. 9604, "My Dear," is a sentimental song by Reinald Werrenrath, who makes his first appearance as one of our soloists in this song, and it is safe to prophesy that he will soon become a prime favorite. He starts off well with his first song, for "My Dear" will be as popular as it's composer's great success, "Love Me and the World is Mine." Ernest R. Ball wrote the music and Dave Reed, Jr., the words. The melody is very tuneful, and Mr. Werrenrath's sympathetic, full, baritone voice is admirably suited to the charming sentiments of the words.

No. 9605, "Sonoma," by the Edison Venetian Trio, is a melodious intermezzo by Leo Friedman, played with the skill that the Venetian Trio is noted for. Originally an intermezzo was a piece of light character introduced between the acts of a tragedy to brighten up an audience thrilled by the deeper emotions. The meaning has changed now, but "Sonoma" is just the kind of graceful bright instrumentation which would have answered the original purpose of the intermezzo. This selection is also known as "My Mexican Rose."

No. 9606, "I'm Tying the Leaves so They Won't Come Down," by Byron G. Harlan, is a descriptive song by J. Fred Helf (music) and E. S. S. Huntington (words) which will be liked especially by those to whom childish joys and trials appeal. A little lad, saddened by the news that Nell his little playmate will die in Autumn "when the leaves begin to fall," is discovered climbing a tree in order that he may stay the fatal day by tying the leaves on. Mr. Harlan sings this Record with the skill that has endeared him to hundreds of thousands of listeners who like songs of childhood. Sung with orchestra accompaniment.

No. 9607, "Work, For the Night is Coming," by the Edison Mixed Quartette, is a selection, familiar the world over to lovers of sacred songs. It is sweetly sung by the admirably blended voices of the Edison Mixed Quartette and will be eagerly welcomed by the many to whom its strains recall memories of the long ago.

No. 9608, "Flanagan and His Money," by Steve Porter, is one of Mr. Porter's Irish specialties in which Flanagan introduces himself as positively so full of money he can't keep still. It is all derived from his father's gold mines, which are not really gold mines but one gold mine. And this gold mine turns out to be a coal mine, and Flanagan senior drives one of the wagons.

No. 9609, "Joyce's 71st Regiment March," by the Edison Military Band, is a bright stirring military composition that makes the feet beat time unconsciously with the fine swing and rymthm of the march. Sure to be welcome among music lovers of all classes. T. B. Boyer is the composer.

No. 9610, "Dearest, Sweetest, Best," by Harry Anthony, is a sentimental love song with orchestral accompaniment. Songs of this sort soon become liked and are very useful to the bashful lover who fears to tell his love. We are quite sure if he puts this Record on the machine and turns the lights conveniently low no right minded young lady would fail to be deeply touched thereby.

Dearest, sweetest, best in all the world to me,
Sunshine of my life thro' love's eternity.
To forsake you, darling, never,
Ever, ever, ever, ever,
You're the dearest, sweetest, best in all the world to me.

Horatio N. Peabody wrote the music, Clarice Manning the words, and the Record is made with orchestra accompaniment.

No. 9611, "Ev'ry Little Bit Added to What You've Got Makes Just a Little Bit More," by Collins and Harlan, is an amusing duet, composed by the Dillon Bros., and is orchestrally accompanied. It has an excellent moral and may be recommended to those who believe in saving money. It's chorus:

When I was a boy my father said to me,
Always try, to me a Carnegie;
Save up ev'ry penny, boy, that you may earn
And you may in turn have money to burn.

No. 9612, "He Goes to Church on Sunday," by Billy Murray, is a new comic song which protests—as well as a comic song can protest—at the hypocrite who goes to church on Sunday in order to deceive others into believing him good. The man who raises the singer's ire in this particular song is a very thoroughpaced villain. So sunk in wickedness is he that he steals to the side of his peacefully sleeping and aged grandmother, and without any reverence for her age extracts her two gold teeth. The singer had other experiences of man's wickedness. The song is taken from the popular English comedy "The Orchid," and is sung with great success in the New York production by Eddie Foy. E. Ray Goetz wrote the music and Vincent Bryan the words. Orchestra accompaniment.

No. 9613, "Heather Bells," by Albert Benzler, is a bells solo in mazurka time played by Mr. Benzler with orchestral accompaniment and like all his work is beautifully clear and pure in articulation. It is a splendid Record with new chimes effect. "Heather Bells" is composed by F. H. Losey.

No. 9614, "She Was a Grand Old Lady," by Harvey Hindermyer, is a song dealing with the affection of a son for his mother. It is one of the songs certain to please the tastes of a very large circle; and this will be no exception to the rule. It deals with the gray haired mother always ready to do everything she could for her child's welfare. This Record is a march ballad with good rhythm and tuneful air. As the singer, who is a new comer, will be appreciated. Sung with orchestra accompaniment. This song is composed by S. R. Henry (music, and William Cahill (words).

No. 9615, "Street Piano Medley," cranked by August Molinari, will prove to those who do not know how well a street piano can sound on a carefully made Record, a very pleasant surprise. There is nothing in the least shrill or unpleasing to the ear. The melody and runs are reproduced, together with the broken Italian talk of the organ-grinder with great fidelity. The first tune is the favorite "My Irish Rosie" which is followed by "Arrah Wanna" and "Speed the Plow." We feel certain that this and other similar succeeding Records will find considerable favor among Edison Phonograph owners.

No. 9616, "Harrigan," by Edward Meeker, is a new song by the "Yankee Doodle" comedian, George M. Cohan, and taken from his latest musical play, "Fifty Miles from Boston," Harrigan cuts loose from any feelings of mock modesty and declares in an amusing manner who, what and why he is. He enumerates his good points as follows:

Who is the man who will spend or even lend?
Harrigan, that's me.
Who is your friend when you find you need a friend?
Harrigan, that's me.

No. 9617, "Miss Dixie," by the Edison Concert Band, as its title plainly indicates, is reminiscent of the sugar cane and corn brake. Southern melodies are no less popular north of the Mason-Dixon Line than below it and this Record should please all. It is composed by Fred W. Hager and is played in the spirited manner of the Edison Concert Band.

No. 9618, "So Long, So Long," by Arthur Collins, is an amusing little song by Sadie Clark, sung with an orchestral accompaniment, and is another account of the departure of a colored gentleman; but in this song he stays to say good bye and explains at length the reason for going. He always tried to be good despite her aggravating ways, and might not have bought his "sleeper on de train" had she not wounded him to the heart in this cruel fashion:

I can't forget that day in court
You said, "Judge, he's a tin horn sport."
Spent twenty days in jail
'Cause you told the judge that tale.

It is taken from the "The Boys of Company B."

No. 9619, "In the Good Old Steamboat Days," by Murry K. Hill, is a comic song telling of the days when the old Mississippi used to carry a different type of river boat from what she bears now. In those days, if the singer is to be believed, existence was far from monotonous. His grand-dad improved the shining hours by playing draw poker on board and became so expert as to hold five kings in one hand.

He started up the fun,
Kept it going with a gun,
Then the coroner held an inquest
In the good old steamboat days.

There are five verses on the Record. The enunciation though rapid is so distinct as to be easily understood. Murry K. Hill, who wrote it and sings it, although a new addition to our artists, is a well known singer on the vaudeville stage. He sings with orchestral accompaniment.

No. 9620, "My Word! What a Lot of It!" by Will F. Denny, is a composition in which Dave Reed, Jr., the well known song writer, in a humorous manner relates the misadventures that happened to Chauncey who was inclined to overdo things. His first taste of champagne resulted disastrously because he took such a lot of it. Then he plunged recklessly into matrimony.

No. 9621, "The Merry Lark," by the Edison Symphony Orchestra, is taken from the suite, "A Love Episode in Birdland," by Theo. Bendix, and is a companion to "The Broken-hearted Sparrow," No. 9589, listed in our July Supplement. This is played with all the delicacy for which the Symphony Orchestra is noted.

No. 9622, "Red Wing," by Frederick H. Potter and Chorus, is a pretty little song, with orchestral accompaniment. Red Wing, a shy little Indian maid, loved a warrior bold who rode away to war. Alas for Red Wing, he "fell bravely in the fray." The Edison Male Quartette figures in the chorus with excellent effect. It is composed by Kerry Mills (music) and Thurland Chattaway (words).

No. 9623, "Burying the Hatchet," by Ada Jones and Len Spencer, is a diverting vaudeville coon specialty in which the favorite artists are so brilliantly successful. Henry has run away from Lucy because of her pernicious habit of throwing the furniture at him in moments of emotion. In this sketch they become reconciled, and as Henry has had the foresight to bring back a chicken with him, complete happiness seems in store. Lucy for

ishes the sketch by singing the chorus of the song entitled "Henry," composed by Thomas V. White (music) and Claude L. Barker (words).

No. 9024, "The Sailors' Chorus," by the Edison Male Quartette, is a well-known and universally liked selection that will be gladly welcomed by all lovers of good part singing. As the title suggests, it is the fine, rollicking, small-of-the-sea kind. The voices blend excellently. It is composed by Joseph Parry, and is sung unaccompanied.

No. 9025, "School Days Medley," by the Edison Military Band, includes the following hits, "School Days" (No. 9552), "When You Know You're Not Forgotten by the Girl You Can't Forget" (No. 9041) and "You'll Have to Wait 'Till My Ship Comes in" (No. 9000). This new waltz medley will give the pleasure that such old friends re-appearing in new form must always do.

AN ORCHESTRA WHICH PLAYS BEFORE A WORLD-WIDE AUDIENCE.

(The following article from Musical America was written after a visit to the Recording Department of the National Phonograph Company at Fifth avenue and Sixteenth street, New York City.)

The thousands of people all over the world who daily derive pleasure from their own talking-machines or those in public places have little idea of the infinite detail necessary in making a record.

A visit to the laboratories of one of the prominent talking-machine companies is of exceeding interest.

Let us follow the making of a "record" from the time the wax cylinder, made at the factory, is received at the laboratory. The cylinder, which has already been smoothed, is placed on a revolving bar beneath a knife whose keen edge traveling along the wax reduces it to the most absolute and glassy perfection.

Step across the hall into the recording room, a room bare of furniture, ending in a wooden partition from the centre of which projects a long, slender tube. Seated directly in front of this are three musicians, masters of their respective instruments, in fact, as the case happens, members of the Metropolitan Opera House Orchestra.

On a platform, raised to about the level of a man's head, sits the harpist, at the base of the platform and close to it, the flutist, to the fore and behind him the violinist. All three are huddled close together, so as to focus the body of tone, yet not too close to interfere with the freedom of motion necessary. The relative positions as to height and distance from the horn, of the various instruments have been carefully measured and tested by experiment. The artists are booked weeks ahead, just as if they were playing at an ordinary concert, only, as we shall see, they have to be exceedingly generous with encores.

The violin is not the ordinary wooden-bellied instrument we are accustomed to seeing, but is a bar of wood with strings, keys and bridge, and an aluminum diaphragm and horn, the invention of a London musician.

Step back of the wooden partition. There on the other side of the aperture is the end of the horn with the attached needle cutting its careful groove in the cylinder, from which fly glistening clouds of the most delicate wax filaments. A tiny electric light illumines the rotary path of the record, which is taken on completion of this stage to another revolving machine where fine camels-hair brushes remove any stray threads of the wax which may have adhered.

The record is then taken into another room and played to the "critic" who passes judgment upon the rendering from a musical point of view and also as regards its reception by the machine. While this is going on, the musicians are making another record of the same selection in the room with the wooden partition. This completed, they join the critic and pass upon the records, deciding, perhaps, that some tone ought to sound stronger, another less harsh, etc, in this way finally making a record that is not only pronounced perfect by the musical critic, but by the record critic as well. The latter examines the finished cylinders with a microscope to see that they are exact in every detail.

The "master record," as it is called, is then ready for shipment to the factory, where the model, or matrix, is made. For this purpose it is enclosed in a tin can.

Arrived at the factory it is slipped on a pivot and surmounted by a stationary magnet in an absolutely air-free jar in which from electric wires are suspended two gold leaves. The sparks produced by this machine in action fly across the jar from one gold leaf to the other and create a beautiful atmosphere. Without the jar revolves another magnet which, by force of attraction, turns the magnet in the jar and consequently the attached cylinder, which soon becomes coated with gold.

This process completed, the matrix, looking like an exquisite gold vase, is subjected to a coating of copper, one-sixteenth of an inch in thickness, after which it is fitted into a brass form and dashed into cold water, which contracts the wax more than the metal, so that the original cylinder drops out, and the impression is firmly registered in the metal. It is from this matrix that the records of the market are made.

While not more than six or eight at the most "master records" are turned out daily at the laboratory, about 120 to 125 thousand are sent out from the factory.

The thought and care which Edison lavishes on the wonderful little invention is demonstrated by the numerous sketches of improvements which he continually sends to factory and laboratories. It is interesting to recall the way in which he arrived at the proper combination for the cylinders on which the records are made. He used to prepare the various mixtures in little butter dishes, having as many as forty going at one time, carefully putting them to the proper consistency, and then testing their adaptability to the cutting machine with his pen-knife.

The soprano who sang in the choir
Let her voice rise higher and higher.
Till it reached such a height
That they clear out of sight.
And they found it best day in the spire.

Published Monthly in the interest of Voice-writing.

The Edison Business Record

Vol. III APRIL, 1907 No. 2

Mr. Edison answering his personal mail with the Business Phonograph.

Thomas A. Edison

The above is a fac-simile of the cover on which appears a new portrait of Mr. Edison each month.

EDISON DEALERS:

Place your name on the mailing list of the Commercial Department for this monthly publication.

Also send the Commercial Department the names of local firms and their office managers for this mailing list. It will benefit YOU.

Address:

Commercial Department
National Phonograph Company,
Orange, - - New Jersey

The Commercial Department of the National Phonograph Co. has recently opened three new branch offices. These are located at Newark, Cleveland and Washington, D. C. The Newark office is located at 321 Union Building and is in charge of N. R. Compton, formerly connected with the New York branch. The Cleveland office is located at 811 Schofield Building and is in charge of J. O. Hanna. The Washington branch is in charge of C. T. Wilber, also connected with E. F. Droop & Sons Co., 925 Pennsylvania avenue, N. W.

A COMPETITION SCHEME FOR DEALERS.

The Dealer with a fair trade has many more opportunities within his grasp to get into close contact with his clients, if he will only use them, than is generally thought to be the case. There is nothing so likely to make the progressive Dealer popular than an interesting series of prize competitions. The cost need be very little while the advertising he receives from the publicity, and the necessarily increased custom he enjoys will more than recompense him for the trouble. The following scheme, if properly carried out, cannot fail to please the majority of Edison Phonograph users.

Let the Dealer offer prizes for the best home-made records, to be judged impartially by a committee of non-competitors. Make it conditional that the blanks and recorders must be purchased at the store of the Dealer offering the awards, and insist that all records are made expressly for this competition by the competitors themselves. This cannot be too strongly insisted upon, as any doubts as to the genuineness of the scheme would only harm the Dealer. Competitors should understand that any failure to comply with advertised conditions render them ineligible.

Dealers have very much better knowledge of their local conditions than we can have and can frame rules accordingly. In a small town there need, perhaps, be no limit to the number of records sent in; but in a larger centre it may be found advisable to limit the number of each entrant to three. In this case the Dealer should suggest that the competitors themselves hold an elimination test and send in the three best they have made. If the scheme is likely to attract a very large number, it may be split up into three divisions, the hearing and judging of each to occupy one evening. These classes would resolve themselves into vocal, instrumental and talking records.

VOCAL RECORDS. This would be a very popular division because most people think they can sing, and nearly all fancy they could make records. If conditions allow, two prizes might be given, one for male and the other for female voices.

INSTRUMENTAL RECORDS. In this class all kinds of instrumental records would be allowed, but it must be borne in mind by the judges that greater skill is required to make a good record of a band or quartette than of a soloist. This branch of the contest will bring out the competitors' best intelligence.

TALKING RECORDS. In this class there should be a great deal of fun. Recitations of prose and verse naturally suggest themselves for the suspects, but the Dealer should broaden the field by offering a prize for the best humorous original monologue and for the best duologue, (like Ada Jones and Len Spencer for example). This will prove extremely diverting if the competitors enter into the spirit of the thing.

ADVERTISING. This need not be a very expensive item. A window display, a few inches in the local paper, and some leaflet distributing should suffice. The regular clients of the Dealer should be circularized as in the ordinary course of business.

THE JUDGING. The judging of records should of course be done in public; this will be the Dealer's greatest advertisement; for it will not be difficult to gather a considerable number of interested people together. If the Dealer possesses a large Phonograph parlor the judging may take place here. But if he finds his store too small, a hall may be taken at a moderate rental for the occasion. Admission may be free with or without ticket, as local conditions indicate. A short concert of the latest Edison Gold Moulded Records should be given and then the judging should begin.

THE JUDGES. These should be chosen from people having no direct interest in the results. Not less than three should be the number, of whom the Dealer may be one. Experts are not necessary, although they need not be debarred on that account. It would be inadvisable to select as judge a man who consistently sounded the praises of machines of other make than the Edison Phonograph.

THE PRIZES. The conditions of the Dealer's agreement will not permit him to offer any Edison goods as prizes. But as the value of the awards is not likely to be the main inducement of the competitor, articles of relatively small value may be offered and will be heartily appreciated.

The Dealer should remember that such a competition as we have described would very materially augment his sale of blank records and recorders. But he must not forget, too, that although the making of home-records would be materially increased it does not follow in any way that the sale of the Gold Moulded Records will fall off. On the contrary he will find increased sales, owing to the greater general interest taken. No amateur records can ever hope to compete successfully with those produced professionally.

If we can aid the Dealer in elaborating this idea, we shall be only too glad to do so; we will also be pleased to learn what success a Dealer has had in following out these suggestions.

WHEN THE PHONOGRAPH WAS YOUNG.

The following memo. addressed to Mr. Edison just eighteen years ago, and preserved accidentally among some old correspondence, will bring very vividly to mind the phenomenal growth of the business of manufacturing Edison Phonographs and Records since May, 1889. At that time Edison Records were being made in Mr. Edison's own laboratory by his own assistants. Mr. Batchelor, writer of the memorandum, was then superintendent of the Edison Phonograph Works, which manufactured Edison Phonographs.

"Memo. to Mr. Edison:—

We have had enormous orders for musical cylinders, some of them dating as far as two months back. Can you not make some arrangements so that we can have our orders filled up there, as in many cases it prevents shipments of goods until we get them? We have now with you orders for one-half dozen for Nebraska, 1 dozen for Washington, 2 dozen for Nashville, Tenn., all dated back to March 28th. Five dozen for North American of April 1st, 1 dozen for Japan, May 8th, one-day for Ohio May 13 and a few yesterday for Dakota. If you can give Wangemann orders to furnish us what we want, it will help us considerably in getting off our shipments more promptly.

CHARLES BATCHELOR.

To this Mr. Edison replied a few days later, as follows:

"We are making about 50 per day and I am rigging up to furnish 300 daily. Please send orders (written) to Laboratory. We will book them, fill the orders by sending them to Phono. Co., and make charges so that we will not be out of pocket. E."

As we have manufactured as many as 110,000 Records in a single day recently, it follows that for every one produced when this memo. was written, 2,200 have since been turned out in the same space of time! And it is just as impossible for us to put a limitation on the future sales of Edison Phonographs and Records as it was for those pioneers in 1889, who thought their orders were enormous.

THE PERSISTENT ADVERTISER.

J. L. Field, of Pittsfield, Ill., is one of the Edison Dealers whose policy is to bring his goods to the notice of past and possible customers in a thoroughly up-to-date manner. He might, as a few Dealers do, wait for customers to come around and ask what he had, but he prefers to play a winning game—and he ADVERTISES. We publish his announcement of last month's Records and are glad to know that we have such resourceful Dealers as he with us.

"Here comes the May Phonogram from Field, the Jeweler, Pittsfield, Ill. Do you get it regularly? Do you enjoy looking it over? Well we hope you do, we send it absolutely free. Why? We want some of your patronage when you get new Records. We carry the entire Catalogue of Edison Records. We carry the complete line of Genuine Edison Phonographs. Every machine and Record is absolutely perfect when it comes from Field, and as our favorite Ada Jones says, "Field knows his business all right, all right." If you don't want any Records or Machine, won't you kindly get your friend to call or order his Phonographs or Record of us? We thank you for your past patronage. We are expecting a share in the future. Can't we have your order now? The May list is great—write at once.—Field, the Edison Distributor, Pittsfield, Ill.

STORE OF GEORGE H. GARRETT, EDISON DEALER, WINTERSET, IOWA.

The above photograph shows the interior of the store of George H. Garrett, of Winterset, Ia., who besides selling pianos and musical merchandise, is a most aggressive Dealer in Edison Phonographs and Records. He took on the Edison line two years ago and in that time has sold over 300 Phonographs. He now carries a stock of 7,000 Records and 25 machines. He has three men canvassing the country adjacent to his town.

"PHONOGRAPHITIS STILL SPREADING."

This startling headline recently drew the attention of the readers of a Roseburg, Oregon, paper to an advertisement inserted by an enterprising Edison Dealer. Although offering other talking machines as temporary reliefs the advertiser went on to say: "the only permanent cure is an Edison, put up in $30, $40 and $50 packages. Our stock of Edison machines is complete, and 5,000 Edison Records will give you 25 or 99 per cent. of any records called for in the Edison catalogue."

As our readers will recollect, we have always urged upon them that advertising is necessary to the growth of trade; but there are still some who may disagree with us. Such dealers will probably say that the Busy Music House wasted money when they inserted the above; but now follows a very direct and indisputable proof to the contrary. Graves & Co., Edison Jobbers, of Portland, Ore., to whom we are indebted for the clipping from which we have quoted, write as follows: "We think our man, one of our best Edison Dealers, has coined a new word. He has procured business on the strength of it as we are shipping him stacks of machines, Records and horns every day."

The Dealer's advertisement and the Jobber's proof of its success, offer a seasonable little object lesson in cause and effect which the non-advertising dealer will note and act upon with profit to himself, his Jobber and to us.

PHONOGRAPHS IN FACTORIES.

A Baltimore manufacturer employing a large number of hands, has used the Edison Phonograph to great advantage as an incentive to better work among his people. For some time he had noticed that as the afternoon waned, his employees became more listless and tired. Himself the owner of a Phonograph, and therefore familiar with its capabilities, it occurred to him that if, after going home tired, the music cheered him, why should it not have a similar effect on his employees. He sent for the "Triumph," and at 3.30 o'clock started it with a swinging march. Tired eyes brightened and instead of looking at the clock every other minute the workers became engrossed in the latest popular airs until 5 o'clock came around to find himself less welcome than usual. Every afternoon the Phonograph was started and there was an appreciable difference not only in the cheerfulness of the listeners, but in the quality and quantity of the work they did.

The theory that men—or women too, for that matter—work better with cheerful music is an old one. The military bands with the regimental marches that played troops into the battle were formed very largely for that very purpose. But in the "piping times of peace" how many employers of labor have adopted this device?

The dealer in manufacturing districts might do worse than try to induce such men to buy Edison Phonographs, presentin- the double argument of brightening the lot of working people and increasing their capacities at the same time. The expense would be trifling, and particularly in the case where large numbers of women and girls are employed in sedentary tasks, the plan should be productive of excellent results. We should be glad to learn of similar cases—if any—where the Edison Phonograph and Records have been so employed.

CUT-OUT FOREIGN RECORDS.

Notice is hereby given that we have no more moulds or masters for the following selections:

12209 Gsord *Air du Tenor*—Le Reine de Saba (Gounod) Bartel
12212 Ulster (arr Lindenhan (German) Hofmann
12266 Dir, O Königin (German) Schumann

When our present stock of these selections is exhausted, they will be put on the cut-out list and omitted from the next edition of the Foreign Record Catalogue.

TALKING MACHINES BEST POLICE.

Phonographs as devices for protecting houses from robbers is a rather novel use of the talking machine, but it has been worked with a considerable degree of success in Paris, and is still used in certain sections where other methods to scare thieves away have failed.

With the reign of terrorism from robbers, that has recently assailed the Parisian capital, householders have tried every method to protect themselves from thieving bands with little avail, but the best solution of the trouble was recently found by an engineer, who places a talking machine at his front door.

The phonograph was so arranged that with the opening of the door it was started and loudly cried "Help! Robbers! Murder!" with the result that the frightened person who was attempting an entrance usually took to his heels.

A new price card, for use in connection with window and store displays of Edison Phonographs, has just been printed and is now ready for the trade. It is printed in red, green and gold on a buff card and is most attractive. It is Form 1089 and succeeds Form 641. Different cards are provided for the Standard, Horn and Triumph machines. They furnish an opportunity to give a new dress to a window display.

The EDISON PHONOGRAPH

TO the Edison Phonograph can be applied the old saying: "A pleasure shared is a pleasure doubled." It is the art of entertainment expressed in tangible form. Three is never a crowd when one of the three is an Edison Phonograph. Love songs, dances, funny songs, ballads, all kinds of music in your own home, with less trouble and greater enjoyment than any other form of entertainment, and especially than any form of musical entertainment. Today is the best day for going to your dealer's to hear an Edison. You cannot possibly know how well the Edison Phonograph reproduces by listening to any other make of talking machine.

NATIONAL PHONOGRAPH COMPANY, Lakeside Ave., Orange, N.J.

[Phonograph advertisement in June Magazines.]

EDISON RECORDS for JUNE

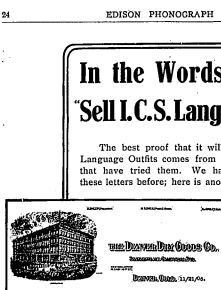
AN unusual number of good hits makes our June list one that every owner of an Edison Phonograph should hear at once. Look over the list below and notice how many things there are that you want to try on your own Edison Phonograph. Then on May 27—don't wait a day longer—go to your dealer's and hear these hits and buy those that you find as good as they promise.

Here is the June list—every kind of music and the best of each kind to suit every taste:

9554 Golden Rod—Intermezzo (McKinley) ..... Edison Concert Band
9555 With You in Eternity (Solman) ..... Irving Gillette
9556 Cavalleria Rusticana—Intermezzo (Mascagni) Vocal Imitation of a Violin, Edith Helena
9557 Pretzel Pete (Durand) Banjo ..... Vess L. Ossman
9558 In Washington (Hoffman) ..... Billy Murray
9559 Reed Bird (The Indian's Bride) (Reed) ..... Collins & Harlan
9560 It's a Long Way Back to Dear Old Mother's Knee (Mohr) ..... W. H. Thompson
9561 The Telescope March (Seltzer) ..... Edison Military Band
9562 School Days (Cobb & Edwards) ..... Byron G. Harlan & Chorus
9563 Sometime We'll Understand (Granahan) ..... Anthony & Harrison
9564 Mrs. Clancy and the Street Musicians (Original) ..... Edison Vaudeville Co.
9565 The Dreamer Waltz (Keith) ..... Edison Symphony Orchestra
9566 Monte Cristo (Snyder) ..... Bob Roberts
9567 In the Wildwood Where the Blue Bells Grew (Taylor) ..... Harlan & Stanley
9568 You'll Have to Get Off and Walk (Reed) ..... Will F. Denny
9569 Petite Tonkinoise (Scotto) ..... Edison Concert Band
9570 Ephraham Johnson (Greene & Werner) ..... Arthur Collins
9571 The Last Rose of Summer is the Sweetest Song of All (Sidney) .. Harry Anthony
9572 Becky & Izzy (Original) ..... Ada Jones & Len Spencer
9573 Dainty Dames (Blake) Bells ..... Albert Benzler
9574 Lulu and Her La, La, La (Von Tilzer) ..... Helen Trix
9575 Flanagan's Married Life (Original) ..... Steve Porter
9576 The Land League Band (J. W. Kelly) ..... J. W. Myers
9577 Poor John Medley (Original) ..... Edison Military Band

KEEP posted on the new Records for the Edison Phonograph as well as the old. There are three books which will be sent free on the 27th of May to anyone who asks for them, who cannot get them at a dealer's or who would rather write than go to a store and ask for them. They are the Phonogram, the Supplemental Catalogue and the Complete Catalogue. They are sent on request. Write today.

Thomas A. Edison



NATIONAL PHONOGRAPH COMPANY, Lakeside Ave., Orange, N.J.

In the Words of Others

"Sell I.C.S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 30 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for you? Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

THE DENVER DRY GOODS CO.
WHOLESALE AND RETAIL
DENVER, COLO. 11/21/06.

International Correspondence Schools,
Scranton, Pa.

Gentlemen:

In reply to your letter of the 17th inst., will say we considered the demonstration of Mr. Kistler very successful and while we have no sold several Language Outfits, we have also sold some to parties to whom we did not demonstrate, and we are expecting December an gifts as you may call them to sell considerable with the parties to whom demonstration was given and who have not as yet made a purchase. We think that the demonstration of the Language Outfits is successful and leads to sales which could not be obtained otherwise.

We have placed several orders with you since the demonstration and would like to have if we could make arrangements to purchase whatever we need in this line through your Denver office as we have had to do several times heretofore, as we can be billed in so by you. This would be very convenient for us.

We will keep you advised from time to time of the results of sales on I. C. S. Language Outfits.

Yours very truly,
THE DENVER DRY GOODS CO.

CONTINUED BUSINESS GROWTH.

So far from there being any marked falling off in the sales of the July Records, there was an increase of some thousands in the number ordered. This may come as a shock to those who always anticipate particularly dull summer months, but it tends to prove that Edison Phonographs and Records are taking a stronger hold on all classes each successive year.

It would be folly to pretend that the summer is ever likely to become a more lucrative season than the winter; there is always the likelihood that there will be a falling off in sales at this time, but the falling off should be less and less every year. Our factory, however, has no dull season, and we have brought matters to such a stage that there can hardly be any demand put upon us that we cannot easily meet. But the old saying "First come—first served" is as much applicable to Phonographs and Phonograph Dealers as to anything else; and the Dealer who delays ordering until his customers, back from their vacations, are clamoring for Edison goods, must either keep them waiting for good things to the stores of rivals who, with greater foresight, have ordered during the summer time.

As an inter-continental concern we have opportunities for feeling the business pulse of the entire world and we are convinced that the demand for Edison goods is increasing and gradually but rapidly every day. We do not base our opinion upon mere hints, but on actual orders, as another part of the MONTHLY will show, for even while the Australians and Italians are taking Edison Phonographs and Records and we are within the mark, we may say that Australian business in 1906 increased 100 per cent over that of 1905, while in a single instance one of the healthiness of our trade conditions, matters look for a domestic demand this coming Autumn that will break all existing records, notwithstanding the fact that we enlarged our factory, still keep enlarging and shall have to do it again.

THE ADVANCE LIST OF SEPTEMBER RECORDS APPEARS ON PAGE 2.

NEW EDISON GOLD MOULDED RECORDS ADVANCE LIST FOR SEPTEMBER, 1907

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before August 27th, all things being favorable, but they must not be placed on sale by Jobbers or leave their place of business, or be reshipped to Dealers before 8 A. M. on August 27th. Supplements, Phonographs and Bulletins will be shipped with Records. These may be distributed to Dealers after August 26th, but must not be circulated among the public before August 27. Jobbers are required to place orders for September Records on or before July 20th. Dealers should place September orders with Jobbers before July 16th to insure prompt shipment when Jobbers' stock is received.

9026 Comin' Thro' the Rye—Humoresque (Bellstedt) — **Edison Concert Band**
A comic selection built along the same lines as "Everybody Works But Father" (No. 8266).

9027 Jack and Jill (Cohen) — **Ada Jones**
The new waltz song hit from Geo. M. Cohan's "Fifty Miles From Boston."

9028 When the Bluebirds Nest Again, Sweet Nellie Grey (Heif) — **Manuel Romain**
A new song by another new tenor to our Catalogue. You've often admired his singing with Dockstader's Minstrels.

9029 Hungarian Dance—No. 2 (Brahms) — **Edison Hungarian Orchestra**
Played in true Hungarian style—cymbal and all.

9030 Theodore (Bryan) — **Edward M. Favor**
The grand comic song craze—of course, it's all about "Teddy."

9031 Maggy's the Time (Ross & Fischer) — **Collins and Harlan**
The new coon song by the writers of "If the Man In the Moon Were a Coon," sung as a coon duet, with some clever character talk added.

9032 When Someone Really Cares (Cahill) — **Irving Gillette**
"You Think the World a Paradise"—a new sentimental ballad likely to live longer than most popular songs of the day.

9033 To Your Health (Gesundheit) Waltz (Heif) — **Edison Military Band**
An entertaining waltz made up of familiar German melodies, with a bit of humor thrown in.

9034 I'd Rather Two-Step than Waltz, Bill (Burt) — **Billy Murray**
A comic march song with a swing melody and telling of "Annabelle's" fondness for the two-step.

9035 An Amateur Minstrel Rehearsal (Original) — **Edison Vaudeville Co.**

9036 Just Because I Loved You So (Harris) — **Harry Anthony**
Chas. K. Harris' latest heart story love ballad.

9037 Chopin's Nocturne (Chopin) — **Hans Kronold**
A beautiful 'cello solo with piano accompaniment, for which the requests have been numerous.

9038 I Think I Ought'n Ought To Any More (Bryan) — **Edward Meeker**
A comic song picturing the troubles of an autoist with his machine, the speed mania and all living things generally.

9039 Tell Mother I'll Be There (Gilbert) — **Edison Mixed Quartette**
Sacred selection with solo by Jones P. Harrison, accompanied by the organ, and chorus by quartette and mixed voices.

9040 Your Lips, Your Eyes, Your Golden Hair (Sieger) — **Reinald Werrenrath**
A love ballad of the quality superior. Like others of its kind it will always be ever new.

9041 The Magpie and the Parrot (Bendix) — **Edison Symphony Orchestra**
Final number from the suite "A Love Episode in Birdland."

9042 Brother Noah Gave Our Checks for Rats (Loughrige) — **Arthur Collins**
A new coon song by the writer of "Preacher and the Bear." Deacon Jones gives his idea of baseball.

9043 Hermes and Minnie (Original) — **Ada Jones and Len Spencer**
A Dutch character sketch, with funny dialogue, during which Miss Jones, as an "Minnie," sings Jerome & Schwartz's new Dutch song, "Herman."

9044 A Little Suit of Blue (Chattaway) — **Byron G. Harlan**
Military march ballad in which a brass band is introduced.

9045 Red Wing Medley (Original) — **Albert Benzler**
The latest Xylophone medley: "Red Wing" (9022), "You'll Not Be For-gotten, Lady Lou" (9025), "She Was a Grand Old Lady" (9014) and "He'ry Little Bit Added to What You've Got, etc. (9011).

9046 Everlasting Spoony Sam (Fischer) — **Bob Roberts**
A coon song about Fascinating Sam, who's "got enough lady friends to start a club," and who "keeps books to figure out his dates."

9047 Finnegan at the Barber's (Original) — **Steve Porter**
The latest addition to the popular Finnegan Series is full of laughs from start to finish. Same form—Irish Vaudeville Specialty.

9048 The Blue Jay and the Thrush (Fulton) — **Harlan and Belmont**
Another whistling and singing duet, melodious and with realistic imitation of birds.

9049 The 69th Regiment March (Lange) — **Edison Military Band**
Military marches are always bright and snappy. This one is no exception.

Edison Gold Moulded Records are made only in Standard Size. Both Standard and Concert Records may be ordered from this list. Order by number, not title. If Concert Records are wanted, give the number and letter C.

SOMETHING ABOUT OUR CONCRETE BUILDINGS.

As we have fifteen concrete buildings completed, a sixteenth in course of construction, and others in contemplation,—making the largest talking machine factory in the world and one of the largest pieces of concrete construction in the country—we feel that a few words about them and the mixture of which they are made will prove of interest generally.

The use of concrete in ancient times dates back from a period too remote to trace its beginning. The Chaldeans, Egyptians, Assyrians, Greeks and Romans all knew of it and used it in their public works, but it was not until the year 1824 that it became revived in England and was brought thence some years later to this country. The modern Portland concrete cement derives its name from its similarity to the limestone quarried by convicts from one of England's great penal settlements at Portland in Dorsetshire. The industry in the United States was begun some thirty years ago at Copley, Pennsylvania, and from an annual output of a few thousand barrels, has risen to over forty million barrels.

Reinforced concrete is so called on account of the small steel or iron bars that are used in conjunction with it to take up certain stresses. Steel is equally strong in tension and compression; concrete is only one-tenth as strong in tension as in compression and it is so arranged that the steel takes up the tension and the concrete the compression. In the ordinary calculations, from 12,000 to 16,000 lbs. per square inch of section is allowed for the steel in tension and 600 lbs. per square inch of surface for the concrete in compression, although the ultimate strength of both is about four or five times as great.

Each of the buildings, when completed, is practically a monolith—built of one stone—the spans or distances between supports ranging in the various buildings from 15 to 50 feet. As each successive story is built it is framed into a mould and the liquid or semi-liquid concrete poured in. The utmost care is taken in every process, the concrete being thoroughly puddled to prevent the formation of air chambers. Steel bars are embedded in the mass, making it able to bear with absolute safety the most enormous strain that could be placed upon it.

All the concrete is not of the same strength, being varied for special needs. Thus the concrete for the footings is a mixture of one part Portland Cement, three parts sand and five parts broken stone; that for the girders, beams, floor slabs and curtain walls, is mixed in the proportions of one part Portland cement, two parts sand and four parts broken stone. For the columns the mixture is slightly richer in cement. Each column is reinforced by four one inch steel bars set vertically to take up any stresses that may be due to eccentric loading. Most of the Edison buildings are five stories in height and one of them when completed will contain over five acres of floor space.

Concrete construction has many advantages over other forms, but none will be more readily apparent to the non-expert than its virtue of being absolutely fireproof. There have been cases in other concrete factories where certain inflammable stock has caught fire on one floor while the girls employed on the one above it, so far from being in danger, leaned out of the windows and cheered the firemen and were able to resume their work without panic or damage. No less for sky scraping offices than for factories does this construction commend itself and the sixteen story Ingalls Building at Cincinnati may be regarded as a good specimen of reinforced concrete skyscrapers. Another unique advantage is that concrete buildings do not commence to depreciate as those of other materials must. Age, stress of weather, etc., tend to make good concrete into a substance even more durable than stone itself. The materials are readily obtainable in almost all localities and concrete buildings are adapted to all uses. The construction of such requires careful, patient, and painstaking labor rather than any high amount of engineering skill.

A great advantage when this form of construction is compared with others, is the fact that it can almost wholly be done by common, or unskilled labor, which means a considerable reduction in the payrolls. Contrary to the belief of some, the concrete only becomes mature enough to bear its full load almost as soon as it is put up. A month is a conservative estimate, and the rapidity with which large buildings may be erected and put into use, can have no better example than in our own case.

Although practically a new form of building so far as general use is concerned, it has already proven itself, by the many concrete erections which passed through the San Francisco disaster unharmed.

Concrete has been subjected to the strictest tests and has been found capable of bearing a live load of 5,000 lbs. per square foot on a span of 14 feet. Those accidents occasionally heard of are in every instance due to construction by engineers unfamiliar with reinforced concrete, and reflect in no way on the use of the material in skilled hands.

H. I. Moyer, the engineer who is putting up all our new buildings, has had a great deal of experience with concrete, used for many purposes in many parts of the country, and is convinced that it will prove eventually to be the most widely used method for construction.

The cement used in all our buildings is known as Edison Portland Cement and is manufactured by means of Mr. Edison's patent processes. By this process the cement is in a finer state of division than other and is capable of more perfect incorporation.

AMONG THE JOBBERS.

H. J. McGreal, of the firm of McGreal Bros, Edison Jobbers, Milwaukee, on May 14th, sold out his interest and good will in the business to his brother Lawrence S. McGreal. The latter will continue to use the old name of McGreal Bros. for a time, but will eventually adopt his own as the name by which the business will be known. Few men know the business more thoroughly than Lawrence McGreal, who has been intimately identified for a decade with the Phonograph industry. Previous to being our Western salesman for four years, he was manager of the talking machine department of the Conroy Co., of St. Louis. It was after severing his connection with the National Phonograph that he started in business in Milwaukee. Mr. McGreal has recently opened a wholesale and retail branch at Cincinnati, O.

Although the Kipp-Link Phonograph Co. have been only one year in business as Edison Jobbers at their North Illinois street quarters, Indianapolis, Ind., they find the space insufficient for their needs, and will move to much more spacious premises on Washington street some time this month. The new location is in the best business section of the city and the 7,600 square feet of floor space should offer exceptional advantages in displaying Edison Goods. The Kipp-Link Co., although selling Edison Phonographs at retail, devote most of their energies to pushing the wholesale branch.

The Douglas Phonograph Co., Edison Jobbers, whose headquarters are in New York, have leased a large building at New and Halsey streets, Newark, N. J., to which they will remove their branch house, now situated at 29 New street, early this month. The premises are to be thoroughly redecorated and suited to the growing needs of the firm, at an outlay of some $6,000. The fine business the company has done in Newark and the excellent prospects ahead are the causes for removing.

AUSTRALIAN JOBBERS AND EDISON GOODS.

The following extracts from a letter addressed to our Foreign Department by T. E. Williams, of Adelaide, shows very plainly that he is filled with the right kind of enthusiasm:

Under no consideration will I violate your agreement. Business can be done on good straight lines. There is no need to stoop to any other method. I do not pretend to be any better than anyone else, but what I do say is this, when I have to violate your agreement to secure business I am going to get right straight out. Your goods speak for themselves, no salesmen are required, just let the people know them, Machines and Records, and they will do the rest, that is my experience. * * * My business at present is purely Edison, and I have no intention of its being otherwise. Edison is good enough for me. With the protection we have your goods are gold bond, and make no mistake the time will not be far distant when I will be one of the largest Edison Jobbers in Australia.

PERSONAL.

F. K. Dolbeer, head of the Credit Department of the National Phonograph Co., has recently returned from a business trip to Chicago, Milwaukee, Des Moines, Fort Dodge and other Western cities. He attended the twelfth annual meeting of the National Association of Credit Men, which was held in Chicago on June 12, 13 and 14, as the delegate from New York, an honor which has been his on more than one such occasion. It was his intention to return to Chicago for the Convention of the National Piano Dealers' Association which was held there from June 19th to 22d to deliver an address (published elsewhere in our columns) on the press of business prevented, and his paper was read by a delegate.

Before he left for Iowa, however, he gave a very pleasant informal dinner at a private room in the Chicago Athletic Association on June 17th, to the Central Jobbers' Association. The following gentlemen were invited: Edward Dolbeer, of Niehaus & Dolbeer, Dayton, O.; E. P. Ashton, American Phonograph Co., Detroit, Mich.; John A. Stromberg, Grinnell Bros., Detroit, Mich.; Rudolph Wurlitzer, Jr., Rudolph Wurlitzer Co., Cincinnati, O.; Perry B. Whitsit, Perry B. Whitsit Co., Columbus, O.; W. C. and M. V. DeForest, W. C. DeForest & Son, Sharon, Pa.; O. E. Houck, O. K. Houck Piano Co., Memphis, Tenn.; C. V. Henkel, Douglas Phonograph Co., New York; Victor H. Rapke, New York City; Lawrence H. Lacker, Minnesota Phonograph Co., Minneapolis; H. H. Blish, Harger & Blish, Dubuque, Iowa; Lawrence McGreal, Milwaukee, Wis.; C. E. Goodwin, Lyon & Healy, Chicago, Ill.; E. H. Uhl, Rudolph Wurlitzer Co., Chicago; John A. Petterly, Dayton, Ohio; Burton J. Pierce, J. W. Jenkins' Sons' Music Co., Kansas City, Mo.; A. E. Conroy, Conroy Piano Co., St. Louis, Mo.; A. T. Miles, French & Bassett, Toledo, Ohio; W. E. Kipp and E. A. Link, Kipp-Link Phonograph Co., Indianapolis; L. C. Wiswell, Lyon & Healy, Chicago; Clement Beecroft, Tea Tray Co., Newark, N. J.; W. A. Lawrence, Standard Metal Co., Newark, N. J.; James I. Lyons, Chicago; G. M. Nisbett, Babson Bros., Chicago; A. J. Grendman, Herzog Art Furniture Co., Saginaw, Mich.; A. V. Chandler, National Phonograph Co., Chicago.

H. K. Miller, who represented us on the Pacific Coast, has resigned on account of illhealth and is resting on the St. Lawrence River until September.

205 NEW CUBAN RECORDS.

The 205 Cuban selections presented herewith will be included in the next edition of our catalogue of foreign selections, to be issued in the fall. Orders for them will be filled as fast as received at our factory.

In order that we might have a better representation in our catalogues of the music so much beloved by the Cuban people, we sent a corps of experts from the Edison Laboratory to Havana, for the special purpose of making this series of Cuban Records. We were fortunate in securing the services of some of the most talented musical organizations and artists in Cuba to make them. The result of their efforts has been the production of what we confidently believe to be the most natural and most artistic series of Records ever made for a talking machine. We feel sure that they will meet with the cordial approval of all music loving people of this and other countries.

BANDA MUNICIPAL DE LA HABANA

19032 Almeñes, Polka, *C. Salomes.*
19037 Borrás, Danzón, *P. Cebalios.*

por Señor Antonio Hidalgo.

19059 Un Caso de Apendicitis.
19599 Un Meeting de Baso.

PUBLISHERS OF MUSIC IN SEPTEMBER LIST.

The publishers of the compositions made for our September list of Records, so far as we can obtain them, are given below. Where the numbers are omitted they are either not published or we are unable to give the names of the publishers:

9626 Cookin' Rice" (Rice-cream-ice)—Fillmore Music House, Cincinnati, O.
9627 Jack and Jill—S. A. Mills, 48 W. 29th street, New York.
9628 When the Bluebirds Nest Again, Sweet Nellie Gray—Hall & Hager Co., 48 W. 28th street, New York.
9629 Hungarian Dance, No. 5—Carl Fischer, 6 Fourth Avenue, New York.
9630 Theodore-Shapiro, 1416 Broadway, New York.
9631 Many's the Time—E. B. Harms Co., 126 W. 44th street, New York.
9632 When Someone Really Cares—Jos. W. Stern & Co., 45 W. 28th street, New York.
9633 I'm Your Honey Honestly Wife—Hall & Hager Co., 48 W. 28th street, New York.
9634 I'd Rather Twenty Times White, Billo—Jerome H. Remick & Co., 45 W. 28th street, New York.
9636 Just Because I Loved You So—Charles K. Harris, 31 W. 28th street, New York.
9638 Think I Couldn't Do It—Joe Morse—Shapiro, 1416 Broadway, New York.
9640 Your Eyes, Your Eyes, Your Golden Hair—Hall & Hager Co., 48 W. 28th street, New York.
9641 The Parrot and the Parrot—Theodore Bendix, New York.
9642 Dutter Nuck Gave Out Checks for Eats—Joseph Morris, Philadelphia.
9644 A Little Sale of Bloomers—F. B. Hayland Music Pub. Co., 125 W. 39th street, New York.
9646 Bowin' Across Dover—Harry Von Tilzer Music Pub. Co., 37 W. 28th street, New York.
9649 The 79th Regiment March—Vanderclout Music Pub. Co., Williamsport, Pa.

NEW TYPE OF EDISON PHONOGRAPH.

Some time during the current month we shall mail to all Edison Dealers our new machine catalogue, Form No. 1135, on the 22d and 23d pages of which will be found a description of the Edison Alva Phonograph. Listed at $80, it is subject to the same discount as the Edison Balmoral Phonograph. The Alva is designed and constructed to meet the demand for an electric machine that can be operated by alternating current now so generally used in most cities for store and household purposes.

The trade has never given to electrically operated Phonographs the attention they deserve. It is probable that the demand for this type of machine will never be very large, but it is certain that if Dealers pointed out their advantages to prospective customers many sales might be made. Although the winding of a machine by hand is not laborious, the advantages of the electric-driven Phonograph is obvious and should commend itself to a certain class of customers. The connection of the alternating current with the battery is a matter of extreme simplicity and no knowledge of electricity is necessary in its use.

In appearance the Alva is similar to the Triumph, its cabinet and general mechanism (except the motor) being the same. It is regularly fitted with an alternating current motor for use on a circuit of 104 to 115 volts, 60 cycles, 7,200 alternations.

Other voltages and frequencies will be furnished on special orders only.

The finish of the metal parts is black and gilt enamel, with nickel-plated and polished mandrel. Has improved motor suspension, which causes it to run noiselessly. Provision is made for adjusting speed of the mandrel; also for automatically taking up any stretch in the belts. Has the new-style cabinet and cover of antique oak, with handsome edge mouldings, all highly polished. Cabinet has a hinged frame to which the entire Phonograph mechanism is firmly fastened, and which may be turned back, permitting convenient inspection of the motor. Cover fastens securely to cabinet by means of strong pivot latches.

Equipment—Model C. Reproducer, improved Edison Recorder, 12-inch horn, supplies shaving knife, 200 tinfoil cab cabinet and oak cover, cane-chair chip brush, an attaching plug to fit an Edison lamp socket.

Size—Height, 24¾ inches. Base, 18¼ x 12½ inches Weight, net, 42 lbs.; gross, 52 lbs. Packed in one case.

Catalogue No. 1002, ... Code, Alva
Plays the Standard Blue Record.

Special Alva Equipments—*Specially* Decorated, $8.00. Nickel-plated, $25.00. Gold-plated, $30.00. Mahogany Cabinets, $10.00; all in addition to list price.

PRINTED MATTER.

A new machine catalogue, Form No. 1135, succeeding Form No. 1010, will be mailed to the entire trade some time this month. It is bound in a new cover, which will be used on our machine catalogue for about a year. A number of important changes have been made in the descriptions of Gem, Standard, Home, Triumph and Balmoral machines. The description of the Model C reproducer has been materially changed. New matter has been written for the Model D reproducer. The Model D Repeating attachment for the Concert, Opera and Oratoria machine is omitted. The matter referring to Edison Gold Moulded Records and Edison Grand Opera Records has been rewritten and added to.

We have just prepared three separate supplements of our new French, German and Italian Records which will be sent out early this month. These should facilitate the sale of the Records and Dealers who will distribute them to the French, German or Italian Residents of their town, will find that they are eagerly welcomed. And not alone to customers of foreign nationalities, but to all who love good music these supplements should be mailed. Phonograph users are growing broader in their musical tastes every day.

COMMENTS ON EDISON RECORDS FOR SEPTEMBER.

The most marked feature of the September list of Edison Gold Moulded Records is the predominance of really good humorous selections. There is humor of all kinds—instrumental and vocal—and the introduction of the Edison Vaudeville Co. in an amateur minstrel rehearsal, with Byron G. Harlan, Steve Porter and Billy Murray in star parts, must prove more than usually popular. A new tenor in Manuel Romain, the well-known minstrel, proves a valuable addition to Edison talent. Hans Kronold makes a beautiful Record of one of Chopin's most melodious nocturnes, and there are two fine waltzes by the Edison Military Band. It is always our aim to make the Edison Phonograph and Records bring pleasure to listeners of all tastes and we feel that we accomplish this in all of our new lists. But particularly this month would we call attention to the high quality of the comic element.

No. 9628, "Comin' Thro' the Rye," (Humoresque), by the Edison Concert Band, composed by Herman Bellstedt, who also wrote the "Evermoody Works but Father" (Humoresque) No. 9260, is full of humorous instrumental effects. There is a piccolo solo alternating with trombone solos, followed by a variation for the solo cornet. Then comes a very ingenious imitation of the Scotch bagpipes, which leads up to a graceful variation for the leading clarionet with a comic interruption by the trombones. It concludes with a fine finale, the air by the cornet and trombones being accompanied by an effective variation in the wood instruments.

No. 9627, "Jack and Jill," by Ada Jones, is a new song, sung in Ada Jones' most sprightly manner, that will be very popular. It is written by George M. Cohan. It is in waltz time and is orchestrally accompanied. It is all about the singer's approaching marriage to Joe and the happiness they will enjoy. Joe seems to have secured a remarkably affectionate partner, for she admits—

I'm crazy over him,
He's crazy over me;
Joe and I are going to try
To settle down in one big pair.
We'll have a little cottage behind the hill,
There we'll have nothing but time to kill.
And we'll raise a little Jack and Jill
To get a pail of water.

No. 9628, "When the Blue Birds Nest Again, Sweet Nellie Gray," by Manuel Romain, is a descriptive song of the kind that is always liked. It is sung by a new tenor who has not before made a Record for us. He is widely known as a member of Dockstader's minstrels. We predict that he will become a great favorite on account of his clear, rich voice, which is heard to great advantage in his first selection. The song, with orchestra accompaniment, is sentiment as old as the hills, is sung to his sweetheart whom he is leaving until "the bluebirds nest again."

No. 9629, "Hungarian Dance, No. 2," by Edison Hungarian Orchestra, written by the celebrated composer Brahms, is a companion to our Record No. 8500, "Hungarian Dance, No. 1," and is full of that strange, wild, fascinating music so characteristic of beautiful Hungary, and so different from any other nation's melodies. A very pleasing effect is obtained by the introduction of the Hungarian cymbals.

No. 9630, "Theodore," is sung by Edward M. Favor. The amusing words and bright, catchy tune of this new comic song by Vincent Bryan will bring it into immediate popularity. Although our strenuous President is the subject, it is by no means a political song and should be as much liked by Democrats as Republicans. Mr. Favor, fresh from his triumphs in "Fascinating Flora" at the Casino Theatre, New York, sings it in his customary clear, vigorous manner. He is orchestrally accompanied. The chorus:

Theodore, the peaceful Theodore
Of all the rulers great and small,
Theodore, the peaceful Theodore is he-a-war,
He's in demand in Yokohama, Hurray for Theodore.

No. 9631, "Many's the Time," by Collins and Harlan, is one of those amusing coon duets which these two artists render inimitably. Mr. Henry Brown has been separated from his beloved for some time and when he returns he finds that love, if not exactly blind, is at least shortsighted, for she does not remember him at first. It all ends up happily, however, and they decide to get married. The words and music are by Rose and Fischer. Orchestral accompaniment.

No. 9632, "When Someone Really Cares," by Irving Gillette, is a sentimental song, the words of which are by Mabel Davis and the music by William Cahill. It is sympathetically sung, with an orchestral accompaniment. The music and words are suitable to the theme and it should have a warm reception among lovers of sentimental ditties.

No. 9633, "To Your Health (Gesundheit) Waltz," by the Edison Military Band, was written by J. Fred Helf, and it is made in the best manner of the Edison Military Band. It will form a pleasing addition to the dance Records. It has a fine swing and will be equally popular whether played as an instrumental selection merely or used for the purpose of waltzing.

No. 9634, "I'd Rather Two-Step Than Waltz, Bill," is Billy Murray's monthly contribution. This Record, the words and music of which are by Benjamin Hapgood Burt, tells the story of a little lady by the name of Annabelle, who lived in New Rochelle and went to all the parties and dances for the sole purpose of two-stepping. After steady fellow, Bill, sometimes grew weary of this, but it was no good. Annabelle simply had to two-step till she was tired; and this is how she put it up to William:

I'd rather two-step than waltz, Bill,
I'd rather two-step than eat;
Waltzing is fine, Bill, but not for mine, Bill;
Two-stepping's with the two-step a minute.
For there's a certain thrill, Bill, in a two-step, Bill;
And though I may have my doubts,
Make me your wife, and we'll two-step through life,
For I'd rather two-step than waltz.

No. 9635, "An Amateur Minstrel Rehearsal," by the Edison Vaudeville Company, is a new departure and one of a very amusing

character. It will be followed by others of a similar nature. The cast is made up of these old Edison favorites, who sing and joke in a highly diverting style:

Mr. Birch Wood, *Stage Manager*.....Steve Porter
Mr. Wambold Merriman, *Tenor*.....Byron G. Harlan
Mr. Backus Block, *End Man*.....Billy Murray

No. 9636, "Just Because I Loved You So," by Harry Anthony, is a new sentimental ballad, sung with orchestral accompaniment, written and composed by Charles K. Harris and is likely to be widely popular. The here is one of those lovesick swains who in preference to asking the lady if there is really "someone else," goes away and sinks with his ship.

No. 9637, "Chopin's Nocturne, No. 2," by Hans Kronold, is the second of Chopin's eighteen nocturnes and is sometimes known as the nocturne in E flat major. It is one of the most beautiful works of the composer, who was styled by Heine "The Raphael of the Piano," and is sympathetically rendered by Mr. Kronold. It will at once be made a favorite by those who admire the violoncello. Chopin is of course a classic, but for all that he is greatly believed by people to whom most classical music is an abomination, owing to his great charms of melody. There is a piano accompaniment.

No. 9638, "I Think I Ought'st Ought to Any More," by Edward Meeker, is a funny song about an autoist who complains that motoring isn't what it was. Pedestrians have lost their sense of humor and object to being run over; and—

If your auto hits a copper,
Some old fool will make you stop her,
So I think I ought'st ought to any more.

No. 9639, "Tell Mother I'll Be There," by the Edison Mixed Quartette, is a sacred solo and chorus of a character by no means new but always popular. It describes the promise given to a beloved mother to meet her in Heaven, and the refrain, "Tell Mother I'll Be There," is sympathetically rendered by the mixed voices, who sing this with true feeling. With the growing use of the Edison Phonograph in religious worship, this Record will be very acceptable.

No. 9640, "Your Lips, Your Eyes, Your Golden Hair," by Reinald Werrenrath, is a charming sentimental song of a high order, in which Mr. Werrenrath is heard to advantage. The words and music are by J. Sylvester Sturges. It is sung to an orchestral accompaniment.

No. 9641, "The Magpie and the Parrot," by the Edison Symphony Orchestra, is the last number of the suite by Theodore Bendix, known as "A Love Episode in Birdland." The two Records already made are numbers 9289 and 9621, "The Broken-hearted Sparrow" and "The Merry Lark." This third Record is charmingly written and the graceful blending of strings and wind makes it one of the most pleasant instrumental selections we have listed for some time.

No. 9642, "Brother Noah Gave Out Checks for Rain," is sung by Arthur Collins. This Record, the music and words of which were written by Arthur Longbrake, is made in an amusing manner by Mr. Collins, and is one of the funniest songs he has sung for a long while. A darkey congregation met in an edifice which let in the rain, and this falling on the head of the Rev'rend Jackson Smith, aggravated him. Deacon Jones came to the rescue with the suggestion that on Emancipation Day a ball game should be played to "raise de dough to shingle up de leak."

Dat Eve stole first and Adam second,
St. Peter umpired de game,
Rebecca went to de well wid a pitcher,
While Ruth in de field was lame;
Cain killed Abel, he hit him wid a rock,
A base hit made on Ahel by Cain,
De Prodigal Son made one home run,
Brother Noah gave out checks for rain.

No. 9643, "Herman and Minnie," is sung by Ada Jones and Len Spencer. These favorite artists may always be depended upon to make a good Record when they take part in a German character sketch, as this latest one is. Minnie starts by singing a verse of the song entitled "Herman," (written by William Jerome, music by Jean Schwartz). Thereupon Herman comes up in his automobile. "Ah, what a nice little runabout," says Minnie. "Yes, it runs about two minutes and then breaks down," returns Herman, who has troubles of his own.

No. 9644, "A Little Suit of Blue," by Byron G. Harlan, is the pathetic type of song rendered by Mr. Harlan with much sympathy and success. It describes the sorrow of a mother whose son, a little drummer boy, marched away to the wars to find a patriot's death. She is waiting over the little suit of blue—all that remains to her of the little lad who has gone. The words and music are by Thurland Chattaway.

No. 9645, "Red Wing Medley," by Albert Benzler, is a xylophone medley which introduces the following old friends: "Red Wing," (No. 9622); "You'll Not Be Forgotten, Lady Lou," (No. 9588); and "Ev'ry Little Bit Added to What You've Got Makes Just a Little Bit More," (No. 9611).

No. 9646, "Ever-loving Spoony Sam," is a funny Record by Bob Roberts. Spoony Sam is a colored gentleman whose one object it is to be a ladies' man; and he is more than willing to make love at all times if his intentions are not taken seriously. Directly he is questioned about bridal tours, settling down and such things as are not in his bachelor liking, he finds he has to catch a train.

Got no time to listen to no wedding bells,
Got no time to listen to no love talk,
Just got time to say "Good-bye,"
Ye ting and kiss, that's me line.

The music is by Fred Fischer and the words by Andy Rice.

No. 9647, "Flanagan at the Barber's," is one of Steve Porter's funniest Records and we follow Flanagan to the barber's, where he is, as usual, misunderstood, and gets off some of his quaintest sayings. Flanagan and the barber both have the gift of repartee, as the following conversation shows: "One time I went into a barber's shop and the barber says to me, 'Do you want a hair cut?' 'I want more than a hair cut,' says I, 'I want them all cut.' 'That'll cost you fifty cents,' says the barber. 'How's that,' says I, 'your sign

says: "First-class hair cut twenty-five cents." 'I know,' says the barber, 'but you haven't got first-class hair.'"

No. 9648, "The Blue Jay and the Thrush," by Harlan and Belmont, is a singing and whistling duet, very pretty and tuneful. Mr. Harlan sings about a bird, and what the bird said is whistled. The effect is uncommon and pleasing. The orchestra accompanies the vocalists. Joe Fulton wrote music and words.

No. 9649, "The 74th Regiment March," by the Edison Military Band, is a fine, swinging military march, played with faultless time by the Edison Military Band, with bugle calls and other martial effects. The splendid precision of the brass in the second movement is particularly noticeable.

ANENT FOREIGN RECORDS.

As our list of Foreign Records is steadily growing, so is the demand for them among users of Edison Phonographs. This is a demand we are carefully fostering by the publication of catalogues and the wide publicity given by our national advertising; and it is as well that Dealers should recognize this at once before they lose trade by failure to carry these Records.

It is not because people are tiring of our domestic Records that we so strongly urge the sale of the Foreign ones, but because Phonograph owners who are increasing their store of Records continually, are waking to the knowledge that with our aid they may have the music of all countries in their homes. Dealers have only to look back a few years to note the increased purchase of Records by individual Phonograph owners. The country is growing wealthier in a manner that has no precedent in history, and it is logically certain that the sale of Edison Phonographs and Records must increase with it. Where a year ago one Record was bought, two are bought to-day and three will be to-morrow.

To keep faith with their customers Dealers should carry our full list of domestic Records, numbering in all some fourteen hundred. If they do not, they will have to disappoint customers who, as a rule, prefer to try elsewhere than wait until the Record they desire is ordered specially for them.

For the same reason they should carry a fair stock of Foreign Records. It will not be possible for many Dealers to carry the fine line of Foreign selections, but every Dealer should determine which of them will sell best in his locality and carry them. To do so need not involve much capital. Such Dealers should also keep in touch with a Jobber who carries the entire line so as to get at short notice any Record not in his own stock. This will be almost as good as carrying the complete catalogue himself.

In the history of successful Edison Dealers it is always the man who carries the full stock that has prospered; for once let such a man get the reputation for not disappointing his clients and he will have no reason to complain of lack of custom.

We have recently made nearly four hundred Cuban and Mexican Records which should prove exceedingly popular. So much interest is being evinced in this country concerning Cuba and things Cuban, that these Records should prove quick sellers. Mexico, becoming each year a more valuable export territory for American products, is widely known as a musical country; and this impression will be deepened on listening to the superb Records we have made. These include operatic selections by famous Mexican singers, pretty dances and instrumental pieces by the famous bands for which Mexico is known. There is no doubt but that if the Dealer will feature these Records he can sell them well with no detriment to his stock of Domestic Records. It should be constantly brought before the notice of customers that we make Records in Bohemian, Chinese, French, German, Hebrew, Hungarian, Italian, Japanese, Polish, Russian, Spanish and Swedish.

NOTHING BUT EDISON GOODS WANTED.

The following letter, addressed to the National Phonograph Co., of Australia, Ltd., is from a firm who have the sole agency in their district for talking machines of a different make:

"Respecting the business since we were installed as dealers in Edison Phonographs and Records, we must say we are more than pleased. We are simply pushing Edisons for all they are worth, and must confess we can't handle ——— goods after using the Edison. This statement is the naked truth.

Of course, the Phonograph business is in its initial stages in this district, but you can rest assured that you have good pushers for business in us.

We anticipate this year's business in Edisons in our store will eclipse anything previous and the writer is wrapped up in music also, which gives a stimulation to business at all months.

We find the PHONOGRAPH MONTHLY very interesting reading matter.

W. MARTIN & CO.,
Burrowa Street, Young, N. S. Wales, Australia.

The effect of good music is not caused by its novelty. On the contrary, it strikes us more the more familiar we are with it.—*Goethe.*

OUR ILLUMINATED ADVERTISEMENTS.

New Yorkers, and visitors to the Metropolis, will by this time have seen our three enormous illuminated advertisements on the roof of the Hotel Bartholdi, on the corner of

Hotel Bartholdi, viewed from Fifth Avenue Hotel.

Broadway and Twenty-third street, and on the roof of the building at the junction of Broadway and Fifth avenue, which is admittedly the most striking spot in the city. Each sign is eighty-five feet long by fifteen feet high. All

Fifth Avenue to the right, Broadway to the left.

people coming up Broadway or Fifth avenue or taking the thronged cross-town route along Twenty-third street cannot fail to see the old Edison Couple and other Edison pictures sitting aloft; and of the hundreds of thousands of transients who pass through New York daily, fully ninety-five per cent. will gaze up at the most costly kind of advertising that exists.

Broadway to the right, 23d St. to the left.

On account of the expense only a few of the great advertising firms use this particular station, which cannot be taken for more than three months. It is controlled by the O. J. Gude Co. We are firmly convinced of the benefit of this publicity, and Dealers will remember that if we preach advertising at them, we also practise what we preach.

BEST AND MOST POPULAR.

I have sold about 200 Edison Phonographs in the last eight months, and expect to sell even more this year. I handle Edison goods only, and find them the most popular machines on the market, and certainly the best. —*Friend Music Co., Friend, Neb.*

Visiting Jobbers at our New York office during June were: P. A. Powers, Powers & Henry, Pittsburg; W. O. Pardee, Pardee-Ellenberger Co., New Haven; H. Wonderlich, J. Samuels & Bro., Providence; Fred Babson and Henry Babson, Babson Bros., Chicago; J. E. Gerlich, Wurlitzer Co., Chicago and Cincinnati; W. V. Youmans, C. B. Haynes & Co., Richmond, Va.; H. E. Marschalk, Musical Echo Co., Philadelphia; Wm. Werner, Easton, Pa.; J. W. Willys, Elmira Arms Co., Elmira, N. Y.; N. D. Griffin, American Phonograph Co., Gloversville, N. Y.

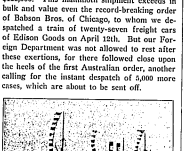
SELLING EDISON GOODS BY THE INSTALLMENT PLAN.

A very large number of Edison Dealers throughout the country have adopted this plan with pronounced success. But there are still a number—usually in the smaller towns—who look with doubtful eyes on it. They will admit that the installment plan has been adopted with marked success in the furniture, piano, and clothing trades, but persist in thinking that Edison Phonographs and Records can only be profitably sold on a cash or credit basis. It is difficult to understand their reasoning, for Edison Dealers have proved that so far from doing them harm, it has increased their business in some instances to hundreds per cent.

The increasing number of mail order houses that are springing up all over the country—which in many cases pay enormous advertising bills—prove that the profits are exceptional. And yet, properly considered, these mail order houses stand to win much less, relatively, than the Dealer. It is allowed by all that the sale of an Edison Phonograph leads inevitably to the sale of the Edison Records. How many, it is difficult to say, and depends largely on the salesman's ability. Thus, the Dealer who sells an Edison Phonograph has a distinct advantage over the mail order house because with the latter there is no likelihood of large Record sales to follow, while with the Dealer there is. The Dealer who sells Edison Phonographs and Records on the installment plan has another decided advantage over his mail order rival or his fellow Dealer who adheres to the old cash way of selling. Briefly the situation is this: The mail order house sells few Records because it comes into no close contact with the customers, and in this case cannot compete with the Dealer. But the installment plan Dealer comes into even closer touch with his customers than the Dealer who sells for cash. Every time the customer comes to pay an installment he may be relied upon to make a Record purchase, becoming a weekly instead of a monthly customer. This statement is not evolved from our inner consciousness, but is drawn from letters and reports of our Dealers who have tried both ways and unhesitatingly endorse the installment plan.

If a customer is making regular weekly visits to your store for the purpose of weekly visits to your store for the purpose of making his payments, he is far less likely to buy Records from the store of a rival. The sale of a Phonograph usually means that the purchaser will buy Records from you, but this does not always follow. But when he comes to you regularly in paying off his machine, he is by no means so likely to buy Records from any but your store.

Risks from bad debts cannot be very large even in the big towns where customers are personally unknown, or else there would not be so many other classes of merchandise offered on the installment plan. In towns where most customers are thoroughly known to the Dealer there should be no risk whatever. Naturally the Dealer is not selling Phonographs for sheer philanthropy, and must make due inquiries as to the standing and character of those wishing to buy. But the risk is very much greater where credit is given in the ordinary course of business. A Phonograph sold on credit to a customer, where there is no thought of the regular installment, is supposed by law to be the property of the purchaser directly it is delivered to him. The Dealer who sells on the installment plan is very much better protected; for in this case the law supposes the Phonograph to be the Dealer's property until the last payment is made, and recovery consequently is easy. Experience proves that Dealers have very seldom to resort to legal measures but it is well for them to understand that they are amply protected in case of fraud.



It is a mistake to suppose that only the poorer and least responsible classes are attracted by installment plans. Very often people of means do not care to put out the $50 or $90 necessary for the purchase of a Triumph or Home, but do not object to putting aside so small a sum as the one dollar weekly. Another point has been noticed with respect to selling by installment; frequently purchasers if they paid cash would take only a Standard, but the easy payments so much appeal to them that they take a Home instead. All this means increased profit to the Dealer, who should never forget that the plan is one which is very tempting to human nature. People are enabled by it to get what they want without feeling the indebtedness which ordinary credit entails.

There are doubtless many Dealers who are doing a good, safe, conservative business, who have thought the matter over and feel they do not care to adopt new methods; we make no attempt to coerce these, but are convinced that their profits would be much larger if they were to adopt selling by the installment plan.

Mail order houses in most instances are able by the volume of their business to undersell the small Dealer. With Edison Goods this is not the case and, the Dealer who advertises and sells by installment has opportunities before him which are endless.

A SHIPFUL OF EDISON PHONOGRAPHS.

One of the largest single shipments of goods of any kind, ever sent from the Port of New York—and incomparably the largest shipment of talking machines ever made in the history of the industry—was that consigned by us to the National Phonograph Co., of Australia, Ltd., on June 1st, by the S. S. Itzehoe, of which we publish a photograph. It was made up of 8,000 cases of Edison Phonographs and Records and was valued at rather more than $125,000. This mammoth shipment exceeds in bulk and value even the record-breaking order of Babson Bros. of Chicago, to whom we despatched a train of twenty-seven freight cars of Edison Goods on April 12th. But our Foreign Department was not allowed to rest after these exertions, for there followed close upon the heels of the first Australian order, another calling for the instant despatch of 5,000 more cases, which are about to be sent off.

S. S. ITZEHOE.

Orders such as these will give our Jobbers and Dealers some idea, not only of the enormous and growing demand for Edison Goods in all parts of the globe, but of the unequalled facilities we have for meeting such staggering demands without any disorganization of our forces, or letting up on our regular domestic orders.

We have never made it a part of our policy to boast loudly about our own doings, but we take no small satisfaction in showing the trade by the above evidences of prosperity, which are hard, cold matters of fact, that we are "delivering the goods."

BUSINESS IN MEXICO.

Walter Stevens, Manager of our Foreign Department, has recently returned from a business trip to Mexico and is enthusiastic about the trade prospects there. The Mexicans are a thoroughly musical nation and the opportunity the Edison Phonograph and Records give them of hearing good music is one that strongly appeals to them. Mr. Stevens finds that the Edison Phonograph is a firmly-established favorite and that the sale of machines and Records increases steadily. To the average live American business man the Mexican lack of hustle is incomprehensible. The Mexican, whether he attends the concerts, theatres, or sits among the cafes of Chapultepec, is late to bed and late up in the morning, and reaches his office when a New Yorker would have done half a day's work. The midday dinner is a lengthy affair which suspends business for two hours, during which time the city is at a standstill. Mr. Stevens finds the climate of Mexico City ideal for business purposes. Lying nearly 8,000 feet above sea-level, it is cool at night and by no means tropical in the day. Undoubtedly the Mexicans will receive many object lessons from the Americans who are taking modern business methods into their midst, and this will have a good effect on the future of what is a very fine and wealthy country. Mr. Stevens found the Mexicans very courteous, and a pleasant people to deal with, and considers from every point of view that our business there is in a highly satisfactory state.

COMMERCIAL DEPARTMENT.

The following letter from the Rudolph Wurlitzer Co., 121 East Fourth St., Cincinnati, O., dated May 31, 1907, shows how successfully the Edison Business Phonograph is being used by business houses.

"We are very pleased to acknowledge to you that after a careful and accurate test of the Edison Commercial System throughout our establishment, we find that it is not only a great convenience in dictating but a very distinctive economy. In all of our several departments where your Phonographs are used we kept a very careful record both prior to the installation of your system and afterwards, and found that formerly it cost us 0.3 cents per folio for letters written by stenography, but that you were able to reduce this cost to 2.1 cents per folio, not considering the saving in time of dictation by your system.

"We have but recently put in several hundred dollars worth of improvements in order to centralize our transcribing department, and expect in this way very shortly to still further reduce the cost per folio on our letters. We strongly recommend your system to every business man.

THE RUDOLPH WURLITZER CO."

FOREIGN RECORDS WITHDRAWN.

The trade is hereby advised that we have withdrawn the following Foreign Records listed in the EDISON PHONOGRAPH MONTHLY for June: French—Nos. 17531, 17532 and 17773. German—No. 15370. No orders sent for these selections will be filled.

ONE PRICE SYSTEM IN A KINDRED LINE; ITS BENEFITS TO THE MANUFACTURER, THE DEALER, AND THE BODY POLITIC.

[An address prepared by P. K. Dalbey, for the annual convention of the National Piano Dealers' Association, held in Chicago, June 30th to 2nd.]

The historian of the future, in casting about for a proper name to apply to the present era, will, no doubt, hesitate between the "Age of the Silk" and the "Age of the Square Deal." Business men everywhere are coming to realize that, after all, the Golden Rule can be as effectively applied to the regulation of commercial affairs, as to the purely personal matters. Business dishonesty and sharp dealing, however legal they may be, incur the same condemnation and the same penalties as personal dishonesty. The commercial advantage may sometimes be secured, but permanent success can only come to the fairest unless it is based on mutual confidence and respect. The written statute is becoming less the boundry line circumscribing and defining the area in which men of business may safely operate. Good faith, fair dealing, honesty of purpose and square business are the cornerstones on the bottom of the fabric of success must now be reared. These statements are, of course, axiomatic, but they can never be too frequently brought home to the men of business fighting the battle of fierce competition in the strenuous life of the present day.

The one-price system inaugurated by the National Phonograph Company in connection with the sale of Edison Phonographs and Edison records is a good example of what may be successfully accomplished as a result of entire confidence between the manufacturer and the dealer. This system, which was established between nine and ten years ago, and has not only met with cordial public approval, but has received the judicial endorsement of many of the Federal Courts located in various sections of this country. The scheme is based primarily on the proposition that a patentee possesses the constitutional right to grant to others a license to manufacture, coupled with the sale of patentable articles. Legally speaking, the sale may be coupled with a license imposing any proper terms as to the use or resale of the patented article. A violation of such terms and conditions constitutes a breach of the implied license and amounts to an infringement of the patent.

The National Phonograph Company, therefore, in effect says to its dealers or jobbers:

"Here is a patented article which we manufacture. We will sell it to you upon the express condition that you will resell it to the public for a fixed price, and that it shall for ever thereafter be used in connection with the patent which we now give you. In terminated, and we will then proceed against you for infringing the patent."

I am glad to say that in only comparatively few instances has it been necessary for us to fall back upon the right reserved to restrain the public interference for the infringement of our patents under this agreement, but, when that has been necessary, the Federal Courts have never refused to take jurisdiction, which they have ever at once, nor to enjoin the delinquent dealer from further infringing acts. With that power, the dealer who complies with the conditions (except in special cases where he may be again restored to good standing) and he is thenceforth cut off from further handling our goods.

It is not, in my opinion, because of the absolute legal necessity for the protective laws of this country afford ourselves, the dealers and, the enormous majority of cases loyal and faithful in their adherence to the company, it is because the dealers find that under this system they become more prosperous, and can conduct their business more safely than under a system of destructive price-cutting.

That the one-price system is desirable, because the business conducted with a more uniform and less liable to fluctuation than under the old system. It enables the manufacturer during any slack periods (for instance during the summer) to count with certainty upon the continuance of the more favorable conditions. The manufacturer therefore, has no fear of stocking up for the anticipated rush season, instead of keeping his employees and his factory busy. Continuous employment means a better class of employees, higher wages, skill in workmen and a superior class of goods.

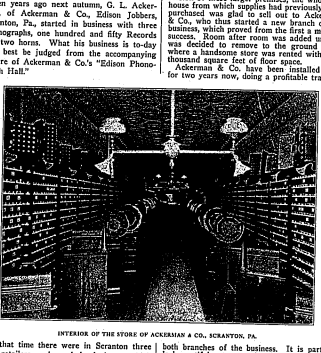
To the small dealer, the one-price system is superior to the old, as he has exactly the same advantage in the market as his more wealthy rival. To the large dealer the system insures stability and safety safety in laying in a stock of appropriate size. Destructive competition is done away with. A fair and reasonable profit in every case is assured, and the only business rivalry is in ability to sell, the attractiveness with which the goods may be displayed, and the ingenuity with which they may be brought to the public attention. Last of all, to the public the one-price system is beneficial in many ways.

First. That the goods bought have been developed to the highest state of perfection, because of the stability of manufacturing conditions.

Second. That the price is a reasonable one, because we have to compete with other goods in the same general line.

Third. That wherever the goods may be bought, the purchaser may be assured as to their quality, and he need have no fear that by spending three or four hours in the search, he might have obtained a better price.

This, then, is the one-price system as practiced by the National Phonograph Company, and which I believe might be universally adopted in all specialized lines of manufacture. In fact, it is not unlikely that such manufacturers not adopting a similar scheme may find themselves in the position told in the old story. A man was explaining to his children that all naughty children went to the bad place. He pictured out in glowing colors the horrors and generally unsatisfactory character of the latter. Her statements were received with the proper seriousness by the assembled youngsters. She then asked: "What kind of children go to the Good Place?" Not one answered but with absolute unanimity. Finally one of the small boys timidly raised his hand. "Well, Johnny," said the teacher, "what kind of children go to the 'Good Place?'" "Dead ones," replied Johnny.



OUR RECORDING EXPERTS IN MEXICO.

G. J. Werner and F. C. Burt, who have recently spent three months in Mexico City, making nearly two hundred new Records for us, have returned after a highly interesting and successful trip. Of the band selections, songs, trios, duets, quartettes and recitations we shall have something to say later. It is sufficient to state in passing that the instrumental music by the Police Band—Mexico's premier band—will be as popular here as in Mexico. This fine organization will shortly be touring in the principal cities in the United States.

Fortunately the severe earthquake which disturbed Mexico City on the night of April 14th, and lasted from 11.31 till 11.36, did no damage to the Recording Department which was situated on the top of the four story steel building, which is our jobbing headquarters. But to show how severe the shock was, the fact may be mentioned that a large part of the contents of the water tanks was spilled and escaped into the building below. Our representatives escaped with no damage and a large fund of anecdotes. Mr. Werner was returning from the American Circus, on a street car, when he found himself sitting on the knees of a lady to whom he had not been introduced. The lady would wait for his apologies but rushed with the rest of the frightened passengers for the door. Mr. Burt was writing at his hotel when the floor began to move, the walls to wriggle and the ceiling to follow suit. He made a leap for the stairs and found that they were behaving curiously. Every occupant of the hotel assembled in the streets, fearing a repetition of the San Francisco disaster; and the only calm individual was an intemperate gentleman who assured his fellow guests that moving stair cases, heaving floors, and trembling walls were phenomena of such usual occurrence with him that he paid no attention to them.

EDISON JOBBERS'—STORIES] OF THEIR SUCCESS—ACKERMAN & CO., SCRANTON, PA.

Ten years ago next autumn, G. L. Ackerman, of Ackerman & Co., Edison Jobbers, Scranton, Pa., started in business with three Phonographs, one hundred and fifty Records and two horns. What his business is to-day may best be judged from the accompanying picture of Ackerman & Co.'s "Edison Phonograph Hall."

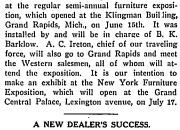
INTERIOR OF THE STORE OF ACKERMAN & CO., SCRANTON, PA.

At that time there were in Scranton three other retailers, and a wholesale house which did quite a large trade and carried a large stock, as rivals to the newly formed firm of Ackerman. But Mr. Ackerman, undeterred by them, adopted the only certain road to success—he advertised consistently. By constant hammering away in the local papers, saying something new every day, people began coming to the two small rooms on the third floor of the Coal Exchange Buildings on Wyoming avenue, and within five months from the start, a larger room on the same floor was taken and the two dark cubby holes given up. Soon an extra room for storing purposes was necessary and two years later a spacious room on the second floor of the same building was rented and Edison Phonograph Hall began to live up to its name in earnest. There was seating room for fifty persons, beside large office accommodation and excellent facilities for display.

Advertising was now carried on more extensively than ever and the business increased so rapidly that within a year of taking possession of these larger premises, the wholesale house from which supplies had previously been purchased was glad to sell out to Ackerman & Co., who thus started a new branch of the business, which proved from the first a marked success. Room after room was added until it was decided to remove to the ground floor, where a handsome store was rented with four thousand square feet of floor space.

Ackerman & Co. have been installed here for two years now, doing a profitable trade in both branches of the business. It is particularly gratifying to us to be able to publish the causes to which Mr. Ackerman ascribes his progress, because they embody the principles that we have always advocated in these columns.

"We attribute," he says, "our success to everlasting hustle, printers' ink, having the best goods in the market—namely Edison's—and the readiness to adopt new ideas of attracting customers. Success is more easily won in the Phonograph business to-day than ever it was and there is a bright future before the man who will push the business intelligently. In proof of this statement it would be difficult to find a better example than Edison Phonograph Hall, which was started on as small a capital as any business on earth was ever floated on, and to-day its value is figured by tens of thousands of dollars."



For the Phonograph Dealer with little capital the small towns offer greater opportunities, relatively, than the larger centres.

EDISON EXHIBIT AT GRAND RAPIDS.

An exhibit of Edison goods is being made at the regular semi-annual furniture exposition, which opened at the Klingman Building, Grand Rapids, Mich., on June 16th. It was installed by and will be in charge of B. K. Barklow. A. C. Ireton, chief of our traveling force, will also go to Grand Rapids and meet the Western salesmen, all of whom will attend the exposition. It is our intention to make an exhibit at the New York Furniture Exposition, which will open at the Grand Central Palace, Lexington avenue, on July 17.

A NEW DEALER'S SUCCESS.

The above photograph shows the interior of the Phonograph store of Theodore Severin & Co., 236 Nicollet avenue, Minneapolis, Minn. Mr. Severin only started in business a few months ago and reports to his Jobbers, Koehler & Hinrichs, of St. Paul, Minn., that he is already doing a splendid trade, which is increasing each week. Mr. Severin carries a full line of Edison Gold Moulded Records—a thing every progressive Dealer should do—and evidently has a store which does him credit.

NEW JERSEY DEALERS VISIT FACTORY.

Fourteen North Jersey Dealers recently organized the Hudson County Talking Machine Dealers' Protective Association, whose aim it is to promote general trade welfare. On June 12 most of the members visited our factory and were shown around it to their very great interest.

A DEALER WHO APPRECIATES.

"Kindly put me down as one who appreciates your efforts in expanding the sale of Edison Records. I must say the new ads. are certainly boomers."—*E. A. Schweiger, Brooklyn, N. Y.*

PHONOGRAPH AS A WITNESS.

The Phonograph as a witness in the law courts was bound to come sooner or later, and it did so the other day in Brussels. A lawyer of that city had been continually annoyed by the noises of hammering, etc., at an iron foundry in his neighborhood. Finding that complaints were unavailing, he brought the matter into court. But before doing so he placed a Phonograph in his library for one whole day. When the case came before the Fourth Chamber he produced the Phonograph and set going the specially prepared cylinder. An uproar and din as from the forge of Vulcan was the result, and the ingenious lawyer won his case "hands down."—*London Chronicle.*

TAYLOR BROS. EXPANDING.

Taylor Bros., of Houston, Tex., Edison Dealers, found their talking machine business growing to such an extent that they were recently compelled to take the entire building at 1007 Capital street, that city, where they have fitted up one of the finest talking machine parlors in that section of the country. Taylor Bros. started in the "talker" business not many years ago with a small side line of Edison goods, but now they handle the complete Edison line, and their business is still on the increase. The interior of their new quarters is handsomely decorated and well arranged, and make ideal talking machine salesrooms.

GREAT CHANCES IN SMALL TOWNS.

"We beg to say that we have received your Suspended List for May, and will co-operate with you in protecting your contracts and machines. Have been in business only eight weeks, but have already sold 11 machines and 300 Records in a town of only 150 people."—*McLeary Bros., Portlandville, N. Y.*

A DEALER WHO HAS PROVED IT.

W. H. Wilkins, Edison Dealer, of Claremont, N. H., although a Dealer of only fifteen months' standing, has used an Edison Phonograph for as many years and gives it a character for durability and sound construction which is very gratifying. "Edison Phonographs," he says, "were put on sale fifteen years ago last September, and I bought one six weeks after that. I travelled with it almost continuously for three years, shipped it thousands of miles, and never paid out but 75 cents for a pair of feed nuts which wore out."

Edison Phonographs are included in the list of articles entitled to the minimum tariff duty under the reciprocal tariff agreement that has just been made between the United States and Germany.

A GALA DAY FOR ORANGE.

On June 14th, the Oranges, by which name Orange with East and West Orange, locally known, celebrated the hundredth year of existence. For a whole week the Oranges were beautifully decorated and the 14th, as Centennial Day, was chosen for the unveiling of a statue and a great procession, and our factory was closed. By the employment of some 5,000 men, mostly from the immediate vicinity, the Edison Industries occupy a very important position in the economy of the town and we decided to send a number of electrically driven floats to swell the pageant.

The floats were typical of the various Edison products, and were led, naturally, by the most important, the Edison Phonograph. Following it were others, representing the Edison Kinetoscope, the Edison Storage Battery, the Edison Primary Battery and Bates Hand Numbering Machine.

The picture we publish of the Phonograph float will convey some idea of the size of our contributions, a size that will be more readily understood when we state that the cabinet of the Phonograph was able to accommodate our Military Band who discoursed lively music along the line of march. It was no new experience for our excellent band to play before unseen audiences, but our announcer Edward Meeker had for once the opportunity of seeing the people to whom he told the titles of the selections.

Our illustration, unfortunately, shows the float after it had contended with tropical rains and an unbending trolley wire, which has left its mark on the horn. For one brief moment the throngs wondered what was going to happen, whether the mighty horn was going to play havoc with the electric current, or whether for the first time in its history the Phonograph was going to get a set-back. Fortunately neither happened and although the guide ropes and minor ornaments were carried away, we kept our place and the band went on playing; not rain or accident could make them cease. Our office buildings are to be seen in the background.

SUSPENDED LIST, JULY 1, 1907.

Supplementary to list of Suspended Dealers dated June 1, 1907, which is still in force and which must be given the same attention by Jobbers and Dealers as if reprinted here.

In the Words of Others
"Sell I.C.S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 30 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for you? Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

THE DENVER DRY GOODS CO.

DENVER, COLO. 11/21/06.

International Correspondence Schools,
Scranton, Pa.

Gentlemen:

In reply to your letter of the 17th inst., will say we established the administration of Mr. Blatland very successful and while the sales of your Outfits have not been large, they have also been above the left. We expect to advertise them from time to time and therefore we think we can very well succeed in selling them. We have not yet had any inquiries. We think the plan of advertising occasionally these Outfits is successful and leads to sales which would not be obtained otherwise.

We have placed several orders with you since the demonstration and would like to know if we could make arrangements to have a representative from your Denver office as we have had several close inquiries which could be filled if we had a man here to talk to us to you. This would be quite an accommodation to us.

We will keep you advised from time to time of the results of sales on I. C. S. Language Outfits.

Yours very truly,
THE DENVER DRY GOODS CO.

Edison Phonograph Monthly

VOL. V. August, 1907 No. 6

Look Ahead!

It is at this time of the year, more than any other, that the Jobber or Dealer must look ahead, and see that the fall rush does not catch him short. Delay in ordering means delay in receiving; and delay in receiving means disappointed customers, and this can only mean loss of trade. In a shipping department so large as ours it is impossible to give the orders of one Jobber any precedence over that of any other, and the first order received is the first order despatched.

The most conservative minded man in the trade cannot but admit that the coming season is going to break the record set up last year. He has only to note the always increasing growth to reflect that the orders he placed with his Jobber last year at this time will not meet the demand which is at hand. We on our part are receiving orders from the longest headed men in the business far in advance of last season. Taking these as typical of what are to come, we feel that despite the great extension of our factories, the increased staff of workers and the high pressure kept up during the summer, we shall yet have to work overtime.

In view of the new loan equipment, special efforts should be made to clean up old stock before September 16th, when this change goes into effect. After this date all Edison Phonographs must be sold with the new equipment at advanced rates. Ample notice has been given, and it should be easy to dispose of what machines may be on hand by the date specified. At the same time, it would be unwise for any Jobber or Dealer to run the risk of disappointing customers by neglecting to order with the old equipment enough for present needs. The trifling difference this may make to them would be many times discounted by such doubtful policy. The new equipment should be eagerly welcomed by the trade, since it will tend to make the Edison Phonograph more popular than ever, by standardizing a loan and consequently saving Dealer and customer the risk of experimenting. The new equipment is an additional reason for anticipating good business.

The E. P. M. New Dress

At the age of four and a half years the EDISON PHONOGRAPH MONTHLY has assumed a new and more becoming dress. The new cover, with its colored stock and two colors of ink, will be changed each month, and it is hoped that its attractive appearance will be appreciated by the trade.

It will be noticed that the Advance List and comments are combined and that the publishers' names are incorporated with them, instead of occupying a separate space, as heretofore. New type is used for the body of the magazine and for the headings, and several new features are in contemplation, which will make it of even wider interest. THE MONTHLY was started for the purpose of gratifying a natural interest felt by Dealers and others in our doings, and, further, of being of value to the trade. We have tried to make it a periodical in which all points of view could be discussed and one in which the experiences of the old-timers would be of service to the fledgling Dealer. From the kind letters we have received from time to time it would seem that we have not entirely failed in our efforts, and we shall not cease in our endeavors to make it an organ for the promotion of still greater good feeling between Jobber, Dealer and ourselves.

The New Phonogram

Writing of this little periodical in THE PHONOGRAPH MONTHLY of August, 1904, we modestly said, "Time is the real test of the merit of a publication of this character, and we hope with the assistance from the trade and the public we shall be able to make the *Phonogram* an interesting little pamphlet, and one which will be looked for each month."

Time and its rapidly growing circulation has proved that there was and is a real demand for the *New Phonogram*. From small beginnings it has now reached a monthly circulation well over half a million copies, and the great number of friendly letters we receive from our subscribers

(*Continued on page 5.*)

The New Edison Gold Moulded Records Advance List for October, 1907

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before September 27th, all things being favorable, but they must not be placed on sale by Jobbers or leave their places of business, or be reshipped to Dealers before 8 A. M. on September 27th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after September 20th, but must not be circulated among the public before September 27th. Jobbers are required to place orders for October Records on or before August 10th. Dealers should place October orders with Jobbers before August 10th to insure prompt shipment when Jobbers' stock is received.

9650 Triumph of Old Glory — **Edison Concert Band**

A lively, airy, patriotic selection with the sub-title "Our President's March." Throughout there are strains of the nation's best loved songs and it ends fittingly with a few bars of "The Star Spangled Banner." Composer, Arthur Pryor; publisher, Carl Fischer, New York.

9651 There's a Girl in the World for Every Boy and a Boy for Every Girl — **Irving Gillette**

This is the comforting title of a tuneful descriptive waltz love song. He and she are sitting under the convenient evergreen tree of sentimental ballads. Suddenly, without any introduction, and regardless of grammar, the maiden asks this disconcerting question: "Who do you love?" He, however, has given the subject some thought, for this doesn't "fease" him in the least and he instantly quotes from a poet and altogether rises to the occasion nobly. Orchestra accompaniment. Music, Ted Snyder; words, Will D. Cobb; publisher, F. A. Mills, New York.

9652 I'm in Love with the Slide Trombone — **Ada Jones**

A very amusing, clever serio-comic vaudeville song. There is some witty dialogue by Miss Jones, and several of the instruments in the orchestra figure prominently. The air of the song is bright and catchy and is going to be very popular. The singer has fallen a victim to the charms of the wielder of the trombone, and announces it thus:

It ain't the man with the violin,	I'm not in love with the big bass drum
And it ain't you, Mr. Flute,	Or the clarinet's plaintive tone
My heart doesn't fret for the busy cornet	Get wise to my sighs and the light in my eyes,
And his tootle, toodle, toot, toot, toot.	I'm in love with the slide trombone.

Orchestra accompaniment. Music, Seymour Furth; words, Arthur J. Lamb; publisher, Sharpiro, New York.

9653 Chapel in the Woods — **Albert Benzler**

In accordance with the many requests for another piano solo, we have had Mr. Benzler make this Record. It is played with his usual brilliancy of execution and will be a welcome addition to the others he has made: No. 8294, "Violets," and No. 9457, "Believe Me If All Those Endearing Young Charms." Composer, Gustave Lange; publishers, S. T. Gordon & Son, New York.

9654 That's Gratitude — **Bob Roberts**

A very laughable coon song concerning a man who was very badly treated by fortune and his friends, to say nothing of his wife. People borrowed money from him and then passed by without seeing him on the street. "That's gratitude," wails the colored gentleman mournfully. Finally a friend came to stay a month and, when he went away, took not only his benefactor's clothes but also his wife. Hence his idea of the meaning of the word gratitude. Orchestra accompaniment. Music, Shepp Camp; words, George Norton; publishers, F. B. Haviland Publishing Co, New York.

9655 My Mother's Bible — **Anthony and Harrison**

This sacred duet for baritone and tenor is sung with true feeling and tender sympathy. It tells of the influence of the "treasured book" on the lives of the children, who were kept to the "narrow path" by its counsel, and by the memories of the loved one whose most sacred possession it was. Orchestra accompaniment. Music, C. D. Tillman; words, M. B. Williams; published in hymn books.

9656 Flanagan at the Vocal Teacher's — **Steve Porter**

The irrepressible and ever welcome Flanagan of the megaphone voice, once went to a teacher's to have it sandpapered. The teacher couldn't have known very much about really good singing because when he had recovered from the shock and pinched himself to see if he was alive, he said a vocal organ like Flanagan's sounded better if heard through a large and heavy pillow. "Would you have it cultivated?" said I. "It will do harm," says he, "if you've tried every other remedy." What do you think of *me* execution?" says I. "D' gorry," says he "I'm in favor of it." Flanagan introduces himself by singing what sounds like wailing of cats in chorus; but he says in something he borrowed from Wagner's Tannhauser and he's going to return it. The Flanagan Records get better and better; none should fail to buy them. Original arrangement and not published.

9657 Velvet of the Rose Waltz — **Edison Symphony Orchestra**

This charming dance measure is played with unusual brilliancy and we prophesy that it will soon be a general favorite. There is a fullness of tone and a melodiousness about it which is brought out to the most striking advantage by this celebrated orchestra. Composer, George D. Barnard; publisher, Carl Fisther, New York.

9658 The Birds in Georgia Sing of Tennessee — **Reed Miller**

A pretty, sentimental ballad that will gain many admirers. Mr. Miller, who sings it, although he has made over several Records for us, has not previously made a new one, and should soon become a favorite by reason of his fine voice. The hero of the song is wandering by the side of a river. He is thinking about "his love in Tennessee" and the letter he has just sent her. Georgian birds seem highly trained and exceedingly sympathetic for,

The birds in Georgia sing of Tennessee,	I shall soon come back to stay, for I think of you each day,
Of your dear home and you, my own Marie;	Where the birds of Georgia sing of Tennessee.

Orchestra accompaniment. Music, Ernest R. Ball; words, Arthur J. Lamb; publishers, M. Witmark & Sons, New York.

9659 Will You Be My Teddy Bear? — **Ada Jones and Billy Murray**

This song was Anna Held's greatest hit in "The Parisian Model," and is one of the biggest successes of recent years. Always up to date, the New York musical stage seized on the prevailing Teddy Bear fad and the result was this bright little song with its pretty refrain. The singers have rendered the selection very well. Orchestra accompaniment. Music, Max Hoffmann; words, Vincent Bryan; publishers, Jerome H. Remick & Co, New York.

9660 There's Always Something Wrong — **Arthur Collins**

This is a somewhat pessimistical lament of a colored philosopher who has a kick coming at his lot in life. Everything goes wrong with him; but in the midst of his trials he finds time for some moral reflections of a pleasing character which are all the more laudable when the sorrows of his childhood are considered:

I was born on the thirteenth of January,	Dey had planned way ahead to name me Mary,
"Mis" and "Fo" an' de family was wild.	Dey got mad 'cause I was n't de kind of a child.

Orchestra accompaniment. Music, Rosamond Johnson; words, Bob Cole; publishers, Jos. W. Stern & Co., New York.

9661 Siamese Patrol — **Edison Military Band**

The other patrols we have listed, Turkish, Yankee and Guardmount, have proved so popular that this latest addition will be eagerly bought. From the moment when the marching band is heard in the dim distance, as it crescendos, and then diminuendos, until it is faintly heard marching out of earshot, it is a perfectly played selection and a triumph of recording. Composer, Paul Lincke; publishers, Jos. W. Stern & Co., New York.

9662 As Long as the World Rolls On — **Reinald Werrenrath**

A high class, sentimental lyric, exactly suited to Mr. Werrenrath's rich and sympathetic voice. A song of this kind does not soon become wearisome, and a wide number of our Record buyers who have been attracted both by the singer's voice and the songs he chooses, will be glad to add this to their collections.

As long as the world rolls on, dear,	There's magic for me, but to live for thee,
As long as the world rolls on.	Just as long as the world rolls on.

Orchestra accompaniment. Music, Ernest R. Ball; words, George Graff, Jr.; publishers, M. Witmark & Sons, New York.

9663 Just Help Yourself — **Collins and Harlan**

In this selection a spoony, but seemingly lazy coon, suggested to his "baby" that when she wants a kiss, she has only to help herself. In the meantime he is reclining comfortably, watching the melon ripen on the vine, predicting that before long the old moon will shine. This makes him reflect that it is growing late and he bursts forth:

Now we are mixing time, this is mixing time;	
I want nothing in this world but you.	

Collins and Harlan always excel themselves in this class of Records. Orchestra accompaniment. Music, Harry Von Tilzer; words, Andrew B. Sterling; publishers, Harry Von Tilzer Music Publishing Company, New York.

9664 Meet Me Sweet Kathleen in Honeysuckle Time — **Manuel Romain**

A pretty, tuneful, love song, excellently sung by Mr. Romain, who makes his second Record for us. The keys of the song makes one of those tantalizing appointments dependent on the blooming of a given flower. Song writers have run the whole gamut of birds and flowers and it is a change to have the honeysuckle in place of the rose, but what are city lovers to do when there are no flower-filled gardens and village church bells sweetly chiming? Orchestra accompaniment. Music, J. Fred. Helf; words, Robert P. Roden; publishers, Helf & Hager, New York.

9665 Medley of Straight Jigs — **John Kimmble**

No finer accordion soloist than Mr. Kimmble is to be found and this Record is a very good exhibition of his talent. In his skillful hands this instrument, usually associated with a more or less inferior type of composition, becomes capable of the most varied effects. Piano accompaniment. An original arrangement and not published.

9666 Take Me Back to New York Town — **Lilian Doreen**

Miss Doreen is a well-known English vaudeville artiste, and principal popularizer of this great waltz song hit. Miss Doreen is a mezzo-soprano of wide range and the song is well suited to her. It is the sigh of the man who loves his New York, to be back there once again and the chorus indicates the rest of the song:

Take me back to New York town, New York town,
That's where I long to be,
With the friends so dear to me;
Coney Island down the Bay,
And the lights of old Broadway
Herald Square—I don't care, anywhere—New York town, take me there.

Orchestra accompaniment. Music, Harry Von Tilzer; words, Andrew B. Sterling; publishers, Harry Von Tilzer Music Publishing Co., New York.

9667 Snow Bird Mazurka — **Joe Belmont**

A brilliantly executed whistling solo by our premier *artiste*, with a suitable orchestral accompaniment. The trills and runs are remarkable for their flawlessness. Composer, F. Wichanks; publisher, Carl Fischer, New York.

9668 In the Land of the Buffalo — **Billy Murray**

A fine, swinging cowboy song by the composers of the exceedingly popular "San Antonio," No. 9547, and sung in Mr. Murray's best style. It is certain to be very much liked. These cowboy songs strike a note of originality that is very refreshing. An old time ranchman is met at the depot by a friend. The ranchman remarks that the lights look very pretty and then suddenly decides to know where the other's girl is. The friend implies that he neither knows nor cares, and then asks anxiously where brother Lew is. The old ranchman replies thus:

I was there two thousand year Pa
In the days of long ago;
But you never knew brother Lew here
In the land of the Buffalo.

Where the Western breezes blow,
Where the goodnight kiss of sunlight
Sets all the plains aglow;

Orchestra accompaniment. Music, Egbert Van Alstyne; words, Harry Williams; publishers, Jerome H. Remick & Co., New York.

9669 Esthetic Galop — **Edison Hungarian Orchestra**

Entering thoroughly into the spirit of this lively selection, the Edison Hungarian Orchestra has accomplished a fine piece of work. So many people like music played in quick tempo that we predict this will be popular everywhere. Composer, Ph. Fahrbach; publisher, Carl Fischer, New York.

9670 No, No, Positively No — **Edward Meeker**

An amusing song, about a colored man who thinks he is a Jonah. Mr. Meeker sings it in a diverting manner. His first adventure is with a fortune teller who promises him he'll find a pot of gold. This looks good to Jonah until he finds he is expected to leave ten bills with the peerer into the future. He evidently thinks ten bills in his pocket better than a pot of gold in the sweet bye and bye, for he answers, "No, no, no, no, positively no." After this he goes to the circus and, finding a lion fighting a tiger, has to offer advice on the settlement of the proceeding.

Say I, let's let them fight no more,
You tells know right from wrong;
Let's have a law to separate them,
You look like pet sitting.

CHORUS.

But I told no, no, no, no, positively no.
It's true I have your best fate, but if I let go it is my cage tonight,
I'm not going to run no risk with you.

Orchestra accompaniment. Music and words, Chris Smith and Harry Brown; publishers, P. J. Howley, New York.

9671 Chimmie and Maggie in Nickel Land — **Ada Jones and Len Spencer**

These favorite artists have made an exceptionally good Record; and the clever way in which the dialogue, song, and incidental interruptions are condensed into one cylinder is a triumph in its way. Maggie, as the lady vocalist of "Nickel Land," persuades Chimmie and his friends to come in and give her new song a boost. She sings the East Side character song called "Jimmie," and in it makes her confession of love for Chimmie, who responds instantly, and they go out to get married. This will make a big hit. Original arrangement and not published. Song "Jimmie" is by Erdman and Chapel; published by C. M. Chapel & Co, Chicago.

9672 Dixie Minstrels — **Edison Minstrels**

Full of good things is this original sketch, including contributions by Byron G. Harlan, Steve Porter, Edward Meeker and Billy Murray, and is certain to be a ready seller. It starts with an opening chorus "Sons of the Arlsocracy," and ends with the quartette singing "My Creole Saidee." The middle is filled with jokes and quips by energetic end men who are concerned over the welfare of Mr. Porter's brother Henry. It is a bright, amusing Record, and sure of a hearty welcome. Original arrangement and not published. Song, "My Creole Saidee," is by Brennan & Wright; published by Thieben-Stierlin Music Co.

9673 I'd Rather Two-Step than Waltz Bill Medley — **Edison Military Band**

This attractively written and played medley introduces the following three popular Records: "I'd Rather Two-Step than Waltz, Bill," (No. 9634); "A Little Suit of Blue," (No. 9643); "He Never Even Said Goodbye," (No. 9603). It is certain to be much liked. Original arrangement and not published.

(Continued from page 1.)

prove that it is eagerly looked for. No literature that we supply to our Dealers does better missionary work than this little publication, and Dealers or Jobbers should recognize this important factor and bring it to the attention not only of customers, but of possible customers. Dealers desiring to obtain a supply of the *New Phonogram* must order of their Jobbers eight weeks in advance. On our side, we cannot undertake to fill Jobbers' orders unless placed with us a similar period in advance. The following schedule will supply information as to cost to those who desire it:

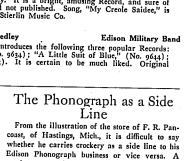
DELIVERED WITH GOODS.

Blank, per 1,000 copies	$2.50
Quarterly quantities pro rata.	
Imprinted, per 500 copies	1.50
Imprinted, 1,000 copies	2.75

No orders filled for less than 500 copies requiring imprint, and all imprinting orders must be for multiples of 500.

Jobbers will be glad to supply Dealers on the above basis.

BY MAIL.



Single copies, per year	$ .20
Five copies to one address, per year	.40
Twenty-five copies to one address, per year	1.00
Fifty copies to one address, per year	2.00

Unless they have open accounts on our books, Dealers ordering *Phonograms* sent by mail are requested to send cash or stamps with their orders. The amounts are too small to handle in any other way.

Phonograms must be sold by the Jobber to his Dealers at the prices quoted above; any reduction of these prices will be considered as a violation of contract. This may appear to some to be an arbitrary ruling, but an instant's reflection will convince them that we are right. The Jobber who gives *Phonograms* away is offering a special inducement to Dealers to trade with him, and may obtain thereby an unfair advantage over the Jobber who charges, in the same way as he would if he cut prices. It is against this that we protest. It is also better for Jobbers to always charge for them.

The Phonograph as a Side Line

From the illustration of the store of F. R. Pancoast, of Hastings, Mich., it is difficult to say whether he carries crockery a side line to his Edison Phonograph business or vice versa. A crockery store is a very suitable place for a

Dealer starting in with the Edison Phonograph, because there is plenty of space as a rule and such a store has to be kept bright and attractive, and this latter quality has much more to do with salesmanship than many imagine. Many of our largest Dealers have started in with the Phonograph as a convenient side line, never dreaming that it was soon to become the chief profit-maker and drive out the less paying and more troublesome lines. The photograph we publish shows what a well lighted store Mr. Pancoast possesses, for it was taken by gaslight at 10 o'clock at night, with a two and a half minute exposure.

B. J. Sweetland, of Carson City, Nev., sends a rather postal card, on which is printed our electrotype, "Entertaining the Boys." This verse accompanies it:

Here's to the girl who is strictly in it;
She entertains the boys every minute;
She's always on hand with an open face,
With her Edison Phonograph Record.

Underneath is written, "J. B. Sweetland sells Edison Phonographs on the easy payment plan."

Dealers who adopt advertising devices such as this will find themselves amply repaid by increased orders.

Copy of letter just mailed to entire trade.

To the Trade

Notice of Change in Horn Equipment and List Prices of Edison Phonographs, to take effect September 16, 1907

NEW YORK, July 23, 1907.

HORN EQUIPMENT

Beginning September 16th, 1907, all Edison Phonographs will be equipped with a horn support and solid metal polygonal shaped horn, somewhat different from any now on the market.

The horns will be finished in black, with gilded decoration, and present a very neat, as well as attractive appearance. They will also produce better and more satisfactory results phonographically.

The sizes of horns for different machines follow:

Gem	19 in. long; 11 in. bell	Home	32 in. long; 2115 in. bell
Standard	30 in. long; 19 in. bell	Triumph, Balmoral, Conqueror, and Alva	33 in. long; 24 in. bell

LIST PRICES

It is a well-known and established fact that for several years the prices of all material, as well as labor, used in the construction of mechanical and musical instruments has constantly increased, and, although we have heretofore considered raising the prices of Phonographs to meet this increase in cost of manufacture, we have withheld doing so up to the present time. Now, however, that we are going to supply, at a further increase in cost, a larger horn and horn support, we are compelled to do so, and, beginning September 16th, 1907, list prices of the different types of Edison Phonographs, including horn and horn support, will be as follows:

Gem	$12.50	Triumph	$55.00
Standard	25.00	Balmoral	70.00
Home	35.00	Conqueror	85.00
Alva	85.00		

Discounts to Jobbers and Dealers will remain the same as at present.

No changes will be made in equipment or prices of Slot Machines of any style.

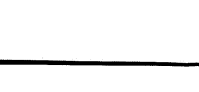
Jobbers and Dealers having a stock of machines on hand September 16th, must equip them with the new horn and horn support and sell them at the increased prices. To enable them to do this, we will supply the horn and horn support separately from machines, at the increase made in price of outfits, these prices being subject to regular machine discounts; i. e., horn and horn support for Gem machine, at $2.50 each list; horn and horn support for Standard, Home, Triumph, Balmoral, Conqueror, or Alva, at $5.00 each list. Dealers should order from their Jobbers, and Jobbers from us.

It is impossible to tell just when we will be able to begin shipping machines with the new equipment, but wherever it is, it must be distinctly understood that such outfits must not be sold to users until on or after September 16th. There will be no objection, however, to a Jobber supplying them to Dealers prior to that time, provided it is absolutely understood and agreed to that they cannot be put on sale until that time. To take care of requirements up to September 16th, we will continue filling orders with the present equipment, unless instructed otherwise.

Within the next two or three weeks, we hope to be in position to supply sample outfits complete, to such Jobbers as may desire them, either for the purpose of getting out proper advertising matter, or to show them what the new horn and crane will be. If you desire samples sent you, please place your order immediately, plainly specifying thereon: "One each 'Gem,' 'Standard,' 'Home,' and 'Triumph' machines equipped with new style horn and horn support;" or, should you not want all of these different styles, specify just which particular types you do want.

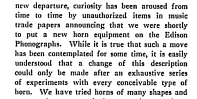
In order to include the foregoing changes, and to embody other minor changes, a new Agreement will also be issued to take effect September 16th, 1907. Jobbers' copies of these Agreements will be forwarded to Jobbers at the earliest possible date, and they should be signed and returned to us not later than September 16th. New Agreements will also be forwarded to Dealers, either direct or through their Jobbers, and they should be signed and returned immediately to either the Jobber or us direct, as the case may require.

To provide against delay in supplying extra horns and supports for machines on hand, we would thank Dealers to notify their Jobbers, and Jobbers to notify us on August 15th, as to the approximate number of each style they will require on September 16th, and would suggest your placing orders for them as soon after August 15th as possible.

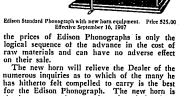


NATIONAL PHONOGRAPH COMPANY,
C. H. WILSON,
General Manager of Sales.

The New Horn Equipment



The letter to the trade concerning the new horn equipment and new list price, can hardly come in the light of a surprise. Although we have before made no official statement as to this new departure, curiosity has been aroused from time to time by unauthorized items in music trade papers announcing that we were shortly to put a new horn equipment on the Edison Phonographs. While it is true that such a move has been contemplated for some time, it is easily understood that a change of this description could only be made after an exhaustive series of experiments with every conceivable type of horn. We have tried horns of many shapes and many substances, and the ones that we have adopted have been found to give the best results under all circumstances.



Edison Gem Phonograph with new horn equipment. Price $12.50 Effective September 16, 1907

Edison Standard Phonograph with new horn equipment. Price $25.00 Effective September 16, 1907

Edison Home Phonograph with new horn equipment. Price $35.00 Effective September 16, 1907

Edison Triumph Phonograph with new horn equipment. Price $55.00 Effective September 16, 1907

The fact that the prices of Edison Phonographs have been slightly raised is owing not only to the additional equipment but to the steady rise in cost in the materials of which the Edison Phonograph is built. During the last three years all parts have cost more to manufacture, in some instances the cost being as much as fifty per cent. in advance. The increased wages paid to help, both skilled and unskilled, has also very materially added to our working cost. The advance, therefore, in the prices of Edison Phonographs is only the logical sequence of the advance in the cost of raw materials and can have no adverse effect on their sale.

The new horn will relieve the Dealer of the numerous inquiries as to which of the many he has hitherto felt compelled to carry is the best for the Edison Phonograph. The new horn is the best answer he can give, since it has been selected only after much thought as the most suitable for the Edison Phonograph.

The letter to the trade is fully explanatory of every phase of the horn and price questions, and it should be carefully read by every Jobber and Dealer.

Through an error, the cuts illustrating the Home and Triumph Phonographs were transposed.

About Our Advertising

That an advertising campaign when thoughtfully conducted is productive of definite results, is a fact generally admitted by intelligent business men. We ourselves have proven it to our entire satisfaction, and it is on this account that we look on our continually growing advertising as a positive help to Jobbers and Dealers. The first and foremost help we give them is the Edison Phonograph and Gold Moulded Record. These stand forth unequalled, and nothing can add to or detract from their merits. But, by the world wide publicity we give them, we awaken interest, foster curiosity, stimulate the desire and finally sell them. As we do not sell direct to the public, it follows that the Dealer gets the benefit of this. We aim at making our advertising national in the broadest sense, so that the man in the small town has the Edison Phonograph brought to his notice as forcibly as the dweller in the big city. Wherever the great magazines go, our advertisements go with them. To people who do not read magazines we appeal through their local papers; and if they do not read these, they can hardly escape the bill board advertising that we are doing or the giant reproductions of the Edison Old Couple to be seen wherever railroads intersect the country. This season will see our advertising even more widely distributed and our literature circulated in larger quantities, keeping up already awakened interest and stimulating fresh trade.

Dealers' Imprints on Posters

We occasionally receive letters from Edison Dealers, asking permission to place their names upon the posters we are putting up in their towns. Many of these Dealers are enthusiastic, progressive men, who sometimes request this concession on the grounds that they are the sole Edison Dealers in their town; sometimes it is because they are the largest Dealers, or again because they alone of the other Dealers expend a good deal of money in advertising independently.

We are obliged in every instance to refuse these requests because it is part of our carefully thought out policy never to give one Dealer an advantage denied to another. If Dealers would look at it from a common sense standpoint, they would see that our attitude is one which benefits the trade at large. We protect all our Dealers equally as soon as they sign our agreement; and they enjoy advantages enjoyed by few in other lines of business. If, however, we were to allow one Dealer to put his imprint on our posters it would be giving him an advantage over his fellows which they would certainly resent. On this account we must preserve an attitude of strict impartiality. All Dealers must profit from our expensive and widely distributed advertising, and how best to take advantage of it will be solved by the progressive Dealer who, with no additional assistance from us, has the good business judgment to win out over his less hustling rival through auxiliary advertising of his own.

Two Dealers

Two Edison Dealers started in business on the same day, each carrying the same amount of stock and each living in towns of equal size. Each one had carefully studied the Phonograph proposition, and each one saw a fortune ahead. One Dealer read through the printed matter sent him with great care, and was much impressed. "The Edison Phonograph is the finest talking machine in the world," he said to his wife, "and as the National Phonograph Co. advertise all over the country, it is known everywhere, and I shall be able to retire from business very soon." Then he sat down and waited for folks to come and help him get rich. He did not take the trouble to inform them that he had added the Phonograph to his old established music store as an attractive side line, nor did he advertise in the local papers. His father had got on well without advertising, and he, himself, had made a living for twenty years without its aid, and he did not believe in it anyway. The National Phonograph Co. did all the advertising he needed. He did, however, spend thirty cents on a rubber stamp, which he impressed on his stationery when the pad wasn't dry. He was not sure this was not extravagance. His window was taken up with a piano, two mandolins and a cornet in a glass case. As they had been there for ten years or so, he saw no reason to turn them out, and accordingly put the Phonographs on a shelf in the back of the store, where anyone with roving propensities and good eyesight might be able to see them on a bright day.

The other Edison Dealer took a supply of the circulars, booklets and other attractive literature his Jobber had sent him, and started off to tell everyone he knew, all about the Edison Phonographs and Gold Moulded Records. He came home feeling pretty tired, but not before he had arranged a concert on the following evening. Electrotypes that he had obtained from his Jobber of "Fun on the Farm," round which he wrote some bright advertising, were inserted in the two local papers, and the concert was a big success. His only grievance was that it left him no Phonographs to amuse himself and family with until the Jobber could fill his second order. Then he called on the neighboring farmers, taking a machine to demonstrate, as well as the brightly written pamphlets, for he was wise enough to know—he read the MONTHLY and learned by other Dealer's experiences—that the man who won't read a line will never refuse to listen. He made a big success of his Edison Phonograph business, because he supplemented the vast national advertising that he got for nothing by some direct local advertising of his own and all his energies.

The first Dealer makes a living, but he isn't scheduled for retirement at the present rate until some time next century. Now and then he buys some new Records but he hasn't much time to study his business because when he isn't grumbling he is writing to the trade papers (and to us) on the difficulty of selling Phonographs in small towns.

In selling Edison Phonographs there are certain talking points which must never be lost sight of. It is the method of using them that can often be altered to advantage.

Following Up Inquiries

As is our custom, when inquiries are made to us by interested readers of our magazine advertisements, we recently referred a Californian prospect to whom seemed his most convenient Dealer, who happened in this instance to be J. L. Hartez, of Monterey, Cal. The more than usually good letter he sent to the prospect is of interest because it may give points to some of his fellow Dealers who lack his persuasive pen. Here it is:

> Dear Sir:—Your inquiry to the National Phonograph Co. has been referred to me, as I carry the largest line of Edisons goods in this vicinity. There are several advantages in buying your talking machine and records from me, as I can supply the entire catalogue. You can see, therefore, exactly just what you want. You have no express charges to pay; you can see and hear the different styles, something you cannot do if you order from the catalogue. We sell machines on easy payment, if you wish, and we allow you a fair price for your machine in part or full exchange if you wish to trade from me. The fact that the National Phonograph Co. has referred your inquiry to me should, in itself, be enough to convince you that I carry the most complete line of Edison goods in this section of the country. I sell all kinds and makes of talking machines, but I handle only the Edison Phonograph, as I think the purest and best machine in the market. I shall be delighted to have you call at my store and hear this Twentieth Century Marvel. And I think you will be more than pleased when I say that the Edison is the best machine on the market.
>
> If you will kindly drop me a line to suggest anything herewith enclosed, advising when you will call on me, I will make it a point to meet you personally and to explain to you the different styles of Edison phonographs, and play you the latest records.
>
> Hoping you will call, and thanking you for the interest shown in the Edison Phonograph.

In reply to this, the prospect thanked the Dealer for his letter and arranged to call, but could make no appointment owing to uncertainty of movement. Mr. Hartez thereupon mailed this:

> Dear Sir:—Your favor of the 17th inst. received and duly noted. In reply I wish to state that in case I should not be at my store when you call, one of my clerks will show you the different sizes of the Edison Phonographs, and explain them thoroughly to you. I trust I will have the pleasure of meeting you personally.

What we desire to call attention to in these communications is that they are neither of them "Form Letters." Form letters are exceedingly useful things when well written and printed, and may be relied upon to bring in business, but special letters in answer to intelligent inquiries, when written courteously, are far more valuable. It is unlikely that a Dealer in a large way of business will ever have time to send special letters in quantities, but whenever he can do so, as in the case of Mr. Hartez, he should not neglect the opportunity. The points in the above

letter are well taken, and the inquirer could not feel offended at being told he could buy on time if he wanted so and he might have been glad to avail himself of the installment plan. Very wisely a stamped envelope was sent. This nearly always draws a reply that might not otherwise have come, for happily the men who remove the stamp and use it for other purposes are few. The note of courtesy in the two letters we print is readily apparent and gives the idea that whether the prospect became a purchaser or not it would make no difference to Mr. Harper's manner or that of his assistants.

In the event that the inquiry was dictated by mere curiosity, and not a desire to buy, as is often the case, he could not fail to be impressed by his townsman's way of doing business and would certainly buy from him, if at a later date he thought seriously of purchasing an Edison Phonograph. Honesty in business is allowed to be the best policy and courtesy is a good second.

Among the Jobbers

The Nebraska Cycle Co., Edison Jobbers of Omaha, Neb., have been making some changes at their headquarters. A room has been secured just north of their present store into which their sewing machine department has been moved. This gives them a very much larger floor space for the exhibition of Edison Phonographs and the storing of Edison Records. These alterations will greatly benefit them and a brisk fall business is anticipated.

The Siegel-Cooper Co., of New York City, one of the largest department stores in the country, has recently built two sound-proof rooms for the demonstration of Edison Phonographs. This move has been occasioned by a rapidly increasing demand for Edison goods.

The Texas Phonograph Co., of Houston, Tex., Edison Jobbers, have recently opened a new retail branch at 612 Main street, which is to be operated under the name of the Texas Piano and Phonograph Co. In addition to their large Capitol avenue store, the Texas Phonograph Co. utilizes the entire second floor of the Mitchell building for wholesale purposes.

C. B. Haynes & Co., Edison Jobbers, of Richmond, Va., who by buying out Magruder & Co., of that city, in the latter part of last year, became the only Edison Jobber there, have just moved into their new quarters at 603 E. Main street. The ground floor, devoted to retail trade exclusively, is fitted up with two sound-proof testing booths. The second floor is given over to the wholesale stock of Edison Records, accommodation being made for 75,000. The third floor is used for storing machines, and also for the receiving and shipping departments. C. B. Haynes & Co. have one of the best fitted stores in the South, and are rapidly extending their business.

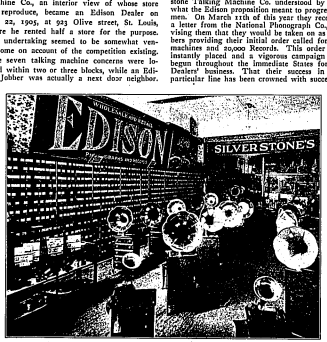
On account of the great increase in their Phonograph business, the Phillips & Crew Co., of Atlanta, Ga., Edison Jobbers, have moved their retail sales department from the second floor front, to the first floor, where several sound-proof booths have been built for the accommodation of the machines. They will be fitted up with electric lights and fans, so that every comfort is afforded the customer while he listens to the selections and makes his choice.

H. A. Weymann & Son, of Philadelphia, Edison Jobbers, are about to vacate the premises at 923 Market street occupied by them for the past ten years and remove to a larger and finer location at 1010 Chestnut street. The firm was founded in 1864 and has a long and honorable connection with the musical instrument business in the United States.

Such is the sociableness of music it conforms itself to all companies, both in mirth and mourning; complying to improve that passion with which it finds its auditors most affected.—*Fuller.*

Personal

William E. Gilmore, President of the National Phonograph Co, who sailed for Europe accompanied by Mrs. Gilmore on May 8th, returned by the Celtic on July 19th. Mr. Gilmore visited our branches in London, Paris, Brussels and Berlin. A large number of personal friends and officials of the company waited at the White Star pier to welcome him home again. As when outward bound he was delayed by the vessel running around off the Hook, so on his return a dense fog delayed the Celtic for some hours.



J. R. Schermerhorn, the Assistant General Manager of the National Phonograph Co., who has for the last two years had charge of the London office, returned with Mr. Gilmore and will resume his duties at Orange, N. J. He will be succeeded by Thomas Graf, of the Edison Gesellschaft, M. B. H., Berlin. Mr. Graf has been elected Managing Director of the National Phonograph Co., Ltd. He will hereafter make his headquarters in London, but will have a general supervision over the Berlin and Paris offices as well.

Edison Jobbers—Stories of their Success

THE SILVERSTONE TALKING MACHINE CO., ST. LOUIS, MO.

Marks Silverstone, of the Silverstone Talking Machine Co., an interior view of whose store we reproduce, became an Edison Dealer on July 22, 1905, at 923 Olive street, St. Louis, where he rented half a store for the purpose. The undertaking seemed to be somewhat venturesome on account of the competition existing. Some seven talking machine concerns were located within two or three blocks, while as Edison Jobber was actually a next door neighbor. holiday season approaching, it was felt that they would run short of goods if solely dependent on the local Jobbers for supplies. Anticipating an unprecedented demand for Edison goods they determined to purchase the entire stock of a local Jobber and this was accomplished on November 1, 1906.

After this purchase the determination to become Edison Jobbers grew daily; for the Silverstone Talking Machine Co. understood by now what the Edison proposition meant to progressive men. On March 12th of this year they received a letter from the National Phonograph Co., advising them that they would be taken on as Jobbers providing their initial order called for 500 machines and 20,000 Records. This order was instantly placed and a vigorous campaign was begun throughout the immediate States for the Dealers' business. That their success in this particular line has been crowned with success is

INTERIOR OF THE SILVERSTONE TALKING MACHINE CO.'S STORE.

But Mr. Silverstone had such faith in his goods and so firm a belief in future developments of the trade that he was in no way deterred by this rivalry and started in to build up his business step by step until the need for larger quarters was soon felt.

The premises at present occupied at 1010 Olive street were secured. They possessed three thousand square feet of floor space, and there were plenty of people ready to tell Mr. Silverstone that the new store was much too large. Instead of this it was quickly seen that the business was too large for the store, for it grew by leaps and bounds. In the fall of 1906, with the evidenced by the fact that within two months they were compelled to double their Records bins. They early recognized that to become a successful Jobber it is imperatively necessary to carry a good stock of Records. Mr. Silverstone was impressed with this knowledge when a customer one day, after being unable to obtain three Records, left the store in disgust, exclaiming: "You carry no stock of Records." It was an unusual thing to be out of Records, but this incident made Mr. Silverstone determine never to let it happen again.

Marks Silverstone in his younger days served an apprenticeship of five years at watchmaking.

This mechanical training has enabled him to become a mechanical expert on talking machines and has added materially to his business. He makes a point, too, of keeping his promises in securing special Records, and treats the one-Record customer as courteously as the larger purchaser.

The Silverstone Talking Machine Co. is considered one of the most progressive in St. Louis and is quoted as an object lesson to the small Dealer. Mr. Silverstone says to such a Dealer: "Stick to the Edison and you'll not get stuck." This is good advice.

It Need Not be New to Win

"We have been selling Edison Phonographs and Records for almost four years and we thought it might be of interest to your readers to know that the Edison is the machine of machines. Some little while ago we heard that the Industrial Home for Girls, a State institution, was going to buy a talking machine of some kind. We called them up on the 'phone and they told us we could enter the contest if we wanted to, and might come up on the following afternoon. As we did not have at that moment a new Triumph in stock, I took up one of mine that had been in use for three years. On arriving there the next day we found two types of one make of rival machine, and one of another, the latter being equipped with four horns of different size. The superintendent of the school, together with one of the directors, acted as judges. They only allowed us to play about six records each, and told us that the board of directors would meet on the following day and decide. After this meeting we were called up and told to order them a Triumph machine. We also sold a 42-inch horn and a nice lot of Records."—*Pepper & Powell, Salem, West Virginia.*

The Small Dealer

We have recently had a good deal to say about some of our record-breaking orders as, for example, Babson Bros., of Chicago, and the huge shipment made to our Australian branch. We have written of these with justifiable pride, certain that the trade likes to know of our growing prosperity, which is their prosperity too. But the success of the small Dealer, whose orders in comparison with Babson Bros. and others seem insignificant, is of quite as much importance to us relatively. Just as they depend upon us to protect their end, so we depend upon them to use their best endeavors for us. The Romans used to look upon acorns not merely as acorns but as prospective oak trees; and to us, every Dealer, however small he may be, is prospectively a very much larger Dealer or even Jobber. Thus it is we are glad to get such letters as the following:

"As a new Edison Dealer I thought a few words as to my business would be of interest to you.

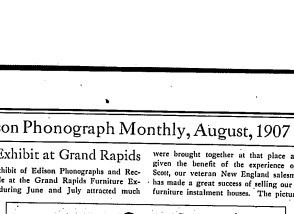
In July, 1906, I received my first shipment of three machines and 150 Records, and from the start I had regular visits from the most select people in the city to hear the new records, all of which were greatly enjoyed. From this stock beginning with small sales until the Xmas time, when we secured several nice sales, in the best homes.

In January, February and March we sold 35 machines and nearly 1,000 Records, and today our stock always consists of at least ten machines and labeled boxes holding over 700 Records.

In this city there are five other dealers, handling the various other makes of talking machines, all of whose sales combined would not equal ours.

I consider this our most important line and will open regular parlors on our second floor, and hope to be able to triple the above in the fall season."—*R. A. Kirkpatrick, Fredericksburg, Pa.*

Printed Matter



Copies of the Numerical and Alphabetical Catalogue of Records, Form No. 1120, have just been mailed to the entire trade. This includes in one cover the catalogues which have heretofore appeared separately. It supersedes Numerical Catalogue, No. 1020, and Alphabetical Catalogue, No. 1025. It contains all Domestic and Foreign Records listed to and including July, 1907, and will be current for six months. The Domestic, Grand Opera and Foreign lists are first given in Numerical order, followed by the Domestic list in alphabetical form. This combined form will be a permanent feature, for we believe the catalogue will be more useful in one cover than in two. This catalogue is intended for trade use only, will only be supplied in limited quantities, and will not be furnished for distribution to the public. Jobbers will please bear in mind that copies have been mailed to all Dealers and that it will not be necessary to supply them with other copies except upon request.

Copies of a new edition of the Machine Catalogue, Form No. 1235, were mailed to the entire trade during July. Although this catalogue is bound in a new cover, it is only intended for use until the new equipment becomes effective on September 16th. At that time an entirely new catalogue will be printed, covering all the changes in equipment and prices, although it will probably be bound in the new style cover. The trade is asked to order the present edition in such a manner as will leave few copies on hand when the new equipment goes into effect.

* The salesman who has only one method of attack is a very poor general, whose defeats will outnumber his victories a hundred to one.

Our Exhibit at Grand Rapids

The exhibit of Edison Phonographs and Records made at the Grand Rapids Furniture Exposition during June and July attracted much attention among furniture men doing business on the instalment plan. The exhibit was in charge of B. R. Barklow and he had the assistance part of the time of A. C. Ireton, Assistant Manager of Sales. During Mr. Ireton's presence in Grand Rapids, the Western salesmen were brought together at that place and were given the benefit of the experience of J. W. Scott, our veteran New England salesman, who has made a great success of selling our goods to furniture instalment houses. The picture shown herewith shows the Western salesmen and Mr. Scott, when they were "looking pleasant." While in Grand Rapids, our representatives made their headquarters at the office of the Grand Rapids Furniture Supply Co., the Manager of which, W. P. Innis, spared no pains to entertain them.

WESTERN SALESMEN AT GRAND RAPIDS.
Standing, from left to right—H. A. Turner, Geo. A. Reuter, M. G. Kreusch, J. W. Scott.
Sitting, from left to right, A. V. Chandler, A. H. Kiesler, F. J. Fritchey, W. P. Hope.

The One-Price System in Other Lines

"I am heartily in favor of your plan of doing business in restricting the sale of your goods, as it is the only hope and means left for the beginner and small dealer to compete and exist with the large department stores and mail order houses. There is a movement on foot now among the jewelry trade all over the country to compel some of the principal manufacturers and jobbers of leading branches of watches and jewelry to adopt a similar plan and I only hope they may be successful in their efforts."

Thus writes J. C. Schirmer, an Edison Dealer at Dayton, Ohio, who is also a jeweler. He has recognized that our adoption of this one price system has alone made it possible for the small Dealer to exist. What chance would such a one have if his larger neighbor could cut prices arbitrarily as in other manufactured articles? As was mentioned last month, in Mr. Dolbeer's paper, the National Phonograph Co. instituted this system so that the entire trade should be safeguarded, and it is on this account that our relations with our Jobbers and Dealers continue to be of the most cordial nature. That other trades are wakening to the advantages of a one price system, not only among the jewelers, but among certain branches of the music trades, is a strong endorsement of our policy.

"I fully believe in your policy of requiring a good stock kept on hand and then protecting the retailer in his profits. I have often thought that if other businesses were run on the same principles it would be a great improvement over our present systems."—*E. T. H., Stephen, Minn.*

The salesman with a good article—an Edison Phonograph, for instance—can't help knowing he is doing a man a favor by introducing such a thing to his notice; but it is not often good policy to let the prospect into your secret.

The Edison Phonograph at the North Pole

Walter Wellman, the special correspondent of the Chicago *Record-Herald*, the explorer who hopes to reach the Pole by airship, has taken an Edison Home Phonograph to beguile the dreary hours in the frozen North. It was presented by the National Phonograph Company, together with a hundred Records and a number of blanks, and is now being used in the expedition's headquarters at Dane's Island, on the northwest coast of desolate Spitsbergen, which lies in the Arctic seas, six hundred miles from the North Pole. In his latest despatch from this inhospitable region, Mr. Wellman, after speaking of bear hunting and preparations for the ascent, writes: "Tonight, June 10, we had an Edison Phonograph concert after supper."

Our president, W. E. Gilmore, presented the Phonograph through Major Henry E. Hersey, of the Rough Riders and the United States Weather Bureau, who has promised to let us know at the conclusion of the expedition how much it has been appreciated. The Major, who accompanies the explorer as the representative of the National Geographic Society, is no stranger to ballooning. Last fall he sailed with Lieut. Lahm, in the International Balloon Race, which started from Paris and was won by the American airship largely through his meteorological knowledge.

The Wellman airship is of enormous size and of the dirigible kind. A steel car is suspended from it, having a promenade deck fifty feet in length, and there is also space to carry fifteen dogs in case the vessel has to be abandoned and the return made by sledges. Mr. Wellman believes it can remain in the air for more than three weeks and hopes to reach the Pole and return to his headquarters in ten days.

We wish the Wellman expedition every success and hope that it will gain the coveted distinction for America. We trust that it will escape the tragic fate of poor Andree, and his companions, who started from the same place just ten years ago, in the "Eagle" balloon, and have not since been heard of.

Our Bill Board Advertising Appreciated

"Your 'bill board advertising was given the first showing here yesterday afternoon and we followed it immediately this morning with an 'ad' in the local papers and are sure we shall be greatly benefited. We want to express our appreciation of the assistance rendered by the National Phonograph Co., and think that a man who cannot sell Edison Phonographs with the amount of advertising that you people are doing to help, cannot sell much of anything."—*J. G. Caldwell, Manager Talking Machine Dept., Standard Music Co., Chattanooga, Tenn.*

Visiting Jobbers

Visiting Jobbers at our New York office during July were the following: Fred and Henry Babson, of Babson Bros., Chicago; W. D. Andrews, Syracuse, N. Y.; P. E. Conroy, of Conroy Piano Co., St. Louis, Mo.; G. R. Youmans, Waycross, Ga.; W. E. Henry, of Powers & Henry, Pittsburg, Penna.; J. W. Willys, of Elmira Arms Co., Elmira, N. Y.; C. H. Rundel, of Southern California Music Co., Los Angeles, Cal.; J. W. Barnhill, of Penn Phonograph Co., Philadelphia; J. MacFarquahar, of S. Kann Sons & Co., Washington, D. C.; C. B. Haynes, of C. B. Haynes & Co., Richmond, Va.; E. Percy Ashton, of American Phonograph Co., Detroit, Mich.; Mr. Davidson, of Perry B. Whitsit Co., Columbus, Ohio; J. F. Bowers, of Lyons & Healy, Chicago; C. N. Andrews, Buffalo, N. Y.

New Life Into German Homes

"We wish to congratulate you on the new list of 50 German Records just distributed. They are winners and will bring new life into many German homes, as they are certain to please. The quartettes are grand, and the jollity you can't beat 1595. I predict a very large sale on this number."—*Metropolitan Phonograph Co., 1035 Flushing Avenue, Brooklyn, N. Y.*

This letter is the kind we are very glad to receive, for it shows a desire on the part of the Metropolitan Phonograph Co. to make our foreign records go. They are exceptionally fine, and the Germans are selected from those which have attained the greatest success throughout the Fatherland. The German people love good music and if they know the ease with which they may obtain these new Records there is certain to be a large demand for them.

The Ubiquitous Phonograph

It becomes more difficult every day to discover uses to which the Phonograph has not been put, or places where it has not been seen and heard. Recently it was used in Russia to marry a couple who had quarrelled with the priest, and now, in France, it has been put to another sacred use. A priest having no altar boy to make responses during celebrations of the mass, uses a Phonograph into which he has previously spoken the sacramental words. The experiment is said to meet with great success.

Opportunity is said to come knocking at every one's door once in a lifetime. But so many of us are a little hard of hearing that it is safer to call on Opportunity.

BUILDING OF BABSON BROS., CHICAGO.

This illustration gives a very good idea of the large business done by Babson Bros., Edison Jobbers, of Chicago. The express wagons are filled with Edison Phonographs, sold by mail order, and demonstrate clearly that even in a field as a rule overrun with cut price articles the Edison Phonograph, a protected one, is enormously successful. With a business of such proportions it is easily understood why Babson Bros. have to send us such huge orders.

SUSPENDED LIST, AUGUST 1, 1907.

Supplementary to list of Suspended Dealers dated June 1, 1907, which is still in force and which must be given the same attention by Jobbers and Dealers as if reprinted here.

Everybody Dances When the PHONOGRAPH Plays

THE dance music of the Edison Phonograph is irresistible. Its selections are clear, distinct, tuneful and in perfect time. It offers the most fascinating waltzes and spirited two-steps of the world's great composers as well as the popular dance music of the hour. It is a military band or a symphony orchestra at will, affording a delightful and widely varied program without expense or attention. The Phonograph represents the personal work of Mr. Edison, the inventor of the talking machine idea. Hear it at any Edison store; you must compare it with others to fully appreciate its entertaining powers. If you wish information in advance, write for our booklet, giving descriptions and prices.

In the Words of Others
"Sell I.C.S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 30 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for you? Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

THE DENVER DRY GOODS CO.

DENVER, COLO. 11/21/06.

International Correspondence Schools:

Gentlemen:

In reply to your letter of the 17th inst., with 242-'48 Spanish Outfits, we have sold several Language Outfits, but only to the very few with whom the matter of Language Outfits has been taken up. We expect to advertise these Language Outfits during the holidays, and we have no doubt that the results from this advertising will be quite satisfactory. The action you have taken in this matter is most satisfactory to us.

We have placed several orders with you since the demonstration and would like to have you make arrangements to purchase whatever stock it is that we may need from time to time, and to do several times monthly. same can be billed on up to you. This would be quite an accommodation to us.

Kindly send us a copy of your catalogue, and keep us notified from time to time of the publication of your new Language Outfits.

Yours very truly,

THE DENVER DRY GOODS CO.,

Edison Phonograph Monthly

VOL. V. September, 1907 No. 7

Planning Ahead

There is every indication of an exceptionally large business this coming fall. Jobbers' orders are already coming in steadily, showing in nearly every instance a marked increase over those of 1906. These Jobbers show their wisdom by ordering early and largely, and Dealers should follow their lead. There is no longer any excuse for the timid Dealer to wait and see how other Dealers are doing before he places a big order with his Jobber. The Phonograph business is past the experimental stage and is not dependent upon the caprice of the few, but on the demand of the many; and the Dealers who orders late is the one who will lose his customers. We believe that our new horn equipment will be a very strong factor in making this coming season the best from a business standpoint that we have known. Then, too, our facilities for manufacturing Phonographs and Gold-Moulded Records have increased to such an extent that we can despatch all orders promptly and need keep no one waiting.

Dealers not already doing so should make a resolution to carry a full stock of domestic Records this season. Failure to do this often drives a customer to another store; for it is not in human nature to wait if such an easy remedy as a visit to a rival store is at hand. It is not too early now to plan for the fall business. If Dealers have insufficient Record bins or shelves, now is the time to put more in and to see that the interior of the store is made attractive. A well lighted interior, and a store in which Edison Phonographs are well displayed and an abundance of Records are in sight, give confidence to intending buyers and make for the proprietor's prosperity.

Praise for Our Recording Department

"We wish to congratulate your Recording Department on the grand work it is doing. It is marvellous, and such lists are the greatest encouragement to the Jobber and Dealer to use every effort to increase the sale of Edison goods."
—*Spokane Phonograph Company, Spokane, Wash.*

What the New Horn Equipment Means

In another column we print a few typical opinions concerning the new horn equipment which goes into effect on September 16th. A glance at these letters will show that they are distinctly favorable. Most Dealers have been quick to see that so far from being a hardship or an arbitrary ruling on our part, this new step has been taken only after we have looked at the matter in every light and have been convinced that it would be mutually beneficial.

Leaving aside for a moment the fact that the new horn, by reason of the excellent results it produces, is an additional selling point, we would first point out that this new departure is yet another safeguard to the Dealer. Unable to cut prices on Edison goods, certain Dealers who have lived more by the letter than the spirit of our agreement, have made such reductions on the prices of horns as to make it impossible for smaller Dealers in the same locality to compete with them except by adopting the same methods. Thus, entirely without our approval, a species of price cutting has crept in which we have been unable to check. Under the new conditions this will not take place.

It is largely because we have put out no adequate horn with Edison Phonographs that the market has been glutted with horns of all sizes and description, many of them of unpleasing design and unscientific construction. There has consequently been little uniformity, either in appearance or tone. Our new horn now enables the Dealer to say positively that the best horn for the Edison Phonograph is the one that is part of its equipment, and he will not longer have to carry such a large and varied stock of others as has formerly been the case.

The possible effect of the increased prices on the sales was a subject into which we went very deeply. We speedily came to the conclusion, which was concurred in by many Jobbers and Dealers of wide experience, that the increase of prices would, so far from acting as a

(*Continued on page 5*)

The New Edison Gold Moulded Records Advance List for November, 1907

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before October 28th, all things being favorable, but they must not be placed on sale by Jobbers or leave their places of business, or be reshipped to Dealers before 8 A. M. on October 28th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after October 20th, but must not be circulated among the public before October 28th. Jobbers are required to place orders for November Records on or before September 10th. Dealers should place November orders with Jobbers before September 10th to insure prompt shipment when Jobbers' stock is received.

9674 Danny and His Hobby Horse — **Edison Concert Band**

Arthur Pryor, who composed this, will be remembered as the composer of the following attractive Records: "Whistler and His Dog" (No. 9107); "Fun Louisa," (No. 9202); "Baby Parade," (No. 9330); "Mr. Black Man," (No. 8669); "On Jersey Shore," (No. 8760); "Razzazza Mazzazza," (No. 9333) and others; "Danny and His Hobby Horse" is a cleverly written, tuneful caprice, into which is introduced the child's voice as he plays with his toy. An uncommon Record that will find a host of admirers. Music, Arthur Pryor; publisher, Carl Fischer, New York.

9675 When Summer Tells Autumn Good-Bye — **Manuel Romain**

This descriptive, sentimental song, the words of which tell of a pair of lovers who are to be wedded "when summer tells autumn good-bye," is set to fitting and melodious music. Manuel Romain is thoroughly at home in this type of song, and has made a fine Record, which will become increasingly popular. Orchestra accompaniment. Music, J. Fred Helf; words, Arthur Lamb; publishers, Helf & Hager, New York.

9674 Oh, Oh, Miss Lucy Ella — **Collins and Harlan**

A sentimental coon duet, excellently rendered by two artists who are unequalled in this line of work. The melody is bright and the words show the ardent manner in which Miss Lucy Ella is wooed by her honey boy:

"Oh, Oh, Miss Lucy Ella,
I'm black, go, as you are yellow,
But I love you true, dood I do.
Nobody else but you, you, you.

And Oh, Oh, Miss Lucy Ella,
If you'll tell me that I'm your fellow,
Then your honey boy will jump for joy,
Lucy Ella won't you be my beau?

Orchestra accompaniment. Music, Harry Von Tilzer; words, Andrew B. Sterling; publishers, Harry Von Tilzer Music Publishing Co., New York.

9677 Secret Love Gavotte — **Albert Benzler**

A bells solo by this virtuoso will be eagerly sought after. Mr. Benzler plays this charming gavotte in a manner which gives him ample scope for his great skill, and the reproduction is admirable for its tonal clarity. The orchestra accompaniment adds to the enjoyment. Orchestra accompaniment. Composer, Johann Resch. Special arrangement and not published.

9678 He Lost Her in the Subway — **Ada Jones**

This very amusing comic song is sung by Miss Jones with all the vivacity and fun for which she is famous, and will eagerly be purchased by her many admirers. The song tells of the exceedingly unfortunate bridegroom who married his Clara down at the City Hall. It must have been the rush hour in the Subway, for they were separated and the gates closed, leaving him outside, while she was carried off to Fourteenth Street in this way:

"When last he saw his sister, late in the afternoon,
With both her hands she hung onto a strap;
The rails went round a curve, the crowd began to swerve,
She fell and fourteen men fell in her lap.

A push gave her a seat, then stepped upon her feet,
His arm went up, off went his darling's hat;
He saw him with his eyes, he heard his darling sighs,
I have to think what happened after that.

Orchestra accompaniment. Music, S. R. Henry; words, Alfred Bryan; publishers, Jos. W. Stern & Co., New York.

9679 Honey Boy — **Reed Miller and Reinald Werrenrath**

These artists, tenor and baritone respectively, have each made solo Records for us previously,

but have never sung a duet together, and the result, "Honey Boy," will be much appreciated. It is a swinging march tune, sung with much spirit. The air is catchy and uncommon and is widely popular. Orchestra accompaniment. Music, Albert Von Tilzer; words Jack Norworth; publishers, The York Publishing Co., New York.

9680 Who? Me? — **Billy Murray**

Billy Murray always manages to get hold of amusing songs and always sings them in the funniest fashion. This one is no exception. Sam Jones had promised to wed his best girl, but couldn't make good, owing to the lamentable fact that his uncle held his dress clothes "in soak." But Sam borrowed some from a friend, and the parson was about to tie the knot when a perfect lady "butted in" and cried out that she was Sam's real bride, and if he tried bigamy she would "bust his head." Sam had lost his heart to one charmer, but he wasn't anxious to lose his head to another, so he cried out anxiously:

"What You? Me? You? Not me, I'm not the man;
You may have made a big mistake, I'm sure you have I am;
Why we have never met before, so he showed up once more.
What You? Me? You? Not me, I'm not the man.

Orchestra accompaniment. Music, Ted Snyder; words, George Whiting; publisher, F. A. Mills, New York.

9681 I See Thee Again Waltz — **Edison Symphony Orchestra**

This is one of the most attractive waltz Records we have made in a long while. The predominating strings and wind blend so perfectly with the brass that the effect is altogether charming. This Record should be bought by everyone who is looking for a new and beautiful waltz. Composer, Manuel Estrada; publisher, Carl Fischer, New York.

9682 June Moon — **Irving Gillette**

A very pretty, sentimental song, appropriately rendered. The music is likely to be popular, and the introduction of the bells in the accompaniment has a very pleasing effect. Most young people have no objection to the moon taking a rest behind a cloud every now and then, but the young couple in this particular song seem desperately anxious that he should come out and shine brightly, which seems remarkable.

"Now please don't hurry and we'll marry
If you'll shine June Moon."

Orchestra accompaniment. Music, Wm. J. Vanderveer; words, Earl J. Benham; publishers, Jos. W. Stern & Co., New York.

9683 Kiss, Kiss, Kiss — **Ada Jones and Billy Murray**

In Anna Held's phenomenal success, "The Parisian Model," there was, and is, no more popular number than "Kiss, Kiss, Kiss." Not only are the words bright and amusing, but there is a delightful lilt in the tune which means wide popularity for it. It is not too much to say that our artists have entered into the spirit of it and sing it as well as the original singers on the stage. The orchestral accompaniment, in which the bells are prominent, adds to the attractiveness of this Record. Music, Gertrude Hoffman; words, Harry B. Smith; publishers, M. Witmark & Sons, New York.

9684 If I'm Goin' to Die, I'm Goin' to Have Some Fun — **Arthur Collins**

This diverting coon song, rendered with all of Arthur Collins' customary humor, relates the illness and recovery of Jim Jackson. Jim caught a cold and instead of taking hot gin fizzes, as his anxious friends advised, persisted in going out to shoot dice. The night was cold as ice, and three weeks later James looked feebly at his physician, and was told he was going to die. This sad news acted as a tonic to the sick man, for he sat straight up in bed and remarked:

"I'm goin' to get right up and put on my clothes,
I'm goin' to get my razor and shave off my nose;
I'm goin' to drive around in an open carriage,
If I meet my gal there's goin' to be a marriage;
I'll borrow from everybody on my staff,
I'm goin' to eat and drink and drive and laugh.
The doctor says my days are few, an' if I'm goin' to die,
I'm goin' to have some fun.

How he acted on this and recovered is told in the song. Orchestra accompaniment. Music and words, Geo. M. Cohan; publisher, F. A. Mills, New York.

9685 Victorious Eagle March — **Edison Military Band**

This fine, rousing march is brilliantly played by the Military Band. The themes are bright and stirring and the perfect precision with which it is performed will make it widely liked. Composer, George Rosey; publishers, Hinds, Noble & Eldredge, New York.

9686 Why Did They Sell Killarney? — **Frank C. Stanley**

A song that by reason of its associations will be cordially welcomed. The air is reminiscent of the other great Irish song, "Killarney," and the words breathe the spirit of affection

for the green isle of Erin, as the chorus shows:

"Why did they sell Killarney, all for the sake of gold,
The valleys and dells, the shrine and the wells
The lake that no other on earth excels;
Where fairies oft roamed thro' the woodland.

And the boys they would all tip the blarney,
We all know that Ireland is poor, but still.
Why did they sell Killarney?"

Orchestra accompaniment. Music and words, John and Harry Dillon; publishers, M. Witmark & Sons, New York.

9687 At the Village Post Office **Edison Vaudeville Company**

An amusing, original sketch, in which Messrs. Harlan, Porter and Murray, taking the parts of country "rubes" at a village store, cause a great deal of merriment by their good humored repartee, of which this is a specimen:

MURRAY—"Give me a two-cent stamp Mr Postmaster.
HARLAN—Will I put it on the letter for you?
MURRAY—No, I'll lick it myself.
HARLAN—That is on the penny, it'll do more good."

The sketch concludes with a verse, sung by all, descriptive of their visit to New York City, and is partially interrupted toward the end by Angelina, the postoffice cat, trimming a presidency dog who dared to follow his master into the store. This Record must not be missed. Original arrangement and not published.

9688 'Neath the Old Cherry Tree, Sweet Marie **Byron G. Harlan**

A tuneful, sentimental song, well sung by Mr. Harlan, who has made an excellent Record. No follower of sentimental ballads is surprised at meeting "Sweet Marie" again, either under cherry or chestnut tree. In this instance she plighted her troth under the old cherry tree and the hero is sitting alone, hoping that some day she and he will be again, in the shades of evening, under the sheltering branches. Orchestra accompaniment. Music and words, Williams and Van Alstyne; publishers, Jerome H. Remick & Co., New York.

9689 Sweet Spirit Hear My Prayer **Edison Venetian Trio**

This special arrangement for the celebrated instrumental trio should be an widely popular as "Sonnambula" the last Record we made for us, which was a very big seller. No combination of instruments can produce a greater sweetness and delicacy of tone than the flute, harp and violin, and we predict that this Record will make a great success. Music by William Vincent Wallace, but this special arrangement is not published.

9690 I've Had Many a Sweetheart But None Like You **Reed Miller**

Mr. Miller has a very fine song in this, the second Record he had made for us. There is a splendid swing to it, and the fact that it is written in waltz time will do much to popularize it. It is a sentimental song, but with bright, cheerful words, that are well suited to the very catchy music that accompanies them. Mr. Miller is going to be one of our best-liked singers, and his Records should not be missed. Orchestra accompaniment. Music and words, Harry D. Kerr; publishers, Jos. W. Stern & Co., New York.

9691 The King's Business **Edison Mixed Quartette**

A beautiful Record of a well known and very popular sacred song. The voices blend exquisitely and by their evenness of volume make a harmonious whole rarely attained. There can be no question as to the popularity of this selection. It is sung unaccompanied. Music, Flora H. Cassell; words, Dr. E. T. Cassell; published in various hymn books.

9692 Flanagan at the Doctor's **Steve Porter**

Flanagan has a great doctor. One night, while waiting to see the doctor, Flanagan amused himself by reading the testimonials on the desk, and was much impressed by the great skill of his physician. He repeats some of them to the Professor. One said: "I can recommend your cure for rheumatism. You said I would be about after taking two doses. I only took two doses and I am already about—dead." Another ran: "In the short time you have treated me you have certainly done me good—and plenty." "When I began taking your medicine," said a third, "I could see but little. Now I can see my finish." "You told me to take one pill three times a day. I took it but I lost it, and couldn't get it up again." Original arrangement and not published.

9693 Rakoczy March **Edison Hungarian Orchestra**

This celebrated march, which is traditional, has been known among the Tsiganes, or Hungarian Gypsies, for more than two centuries. One of them, Michael Barna by name, is known to have played it in 1705. We have had many requests for it. The quaint character of the music and the instrumental effects incidental to true Hungarian melodies are splendidly brought out by our Hungarian Orchestra. Composer, unknown; arranged by Theo. Moses-Tobani; publisher, Carl Fischer, New York.

9694 Yesterday **Reinald Werrenrath**

Mr. Werrenrath's fine voice rings out grandly in his new sentimental song, which he sings with deep feeling. A song of this type, the words of which are fitted by the writer to his own music, speedily becomes popular, and is always a good seller. Orchestra accompaniment. Music and words, Charles K. Harris; publisher, Charles K. Harris, New York.

9695 A Coon Courtship **Ada Jones and Len Spencer**

A really funny vaudeville sketch by two of the most popular artists before the Phonographic public, in which Miss Jones introduces the coon song, "You've Got to Love Me a Lot." Morse is supposed to be "a midget niggah," who makes love to a two-hundred-pound beauty, who is inclined to doubt his kissing capacity. Susie is a connoisseur at the osculatory game, and her creed is contained in the song she sings:

"If you are going to love me, love me at all.
You've got to love me, love me a lot."

Orchestra accompaniment. Music of coon song, John Lowitz; publisher, The Seminary Music Co.

9696 When the Band Plays "Yankee Doodle" **Edward Meeker**

A cleverly written song about the effect this patriotic air has on the singer. Bill Simmons had to start in dancing wherever the band played, but this victim is only stirred to unusual activity by "Yankee Doodle." He trembles when he sees a band assembling, for no matter on what important errand bound, he's certain to lose control of himself.

"When the band plays "Yankee Doodle" I go shiky all me noodle.
And begin to spread my bundle in a Yankee Doodle way."

Orchestra accompaniment. Music, Joel P. Corlin; words, Felix F. Feist; publisher, Leo Feist, New York.

9697 Many's the Time Medley **Edison Military Band**

A very attractive medley, made up of the favorite songs, "Many's the Time," (No. 9651); "Take Me Back to New York Town," (No. 9666); "Will You Be My Teddy Bear?" (No. 9659). This arrangement is made specially for our Record and is not published.

(Continued from page 1)

deterrent, considerably augment the volume of sales. The horn heretofore supplied with Edison Phonographs has been used but rarely. From inquiries and observations we find that the 36-inch black stem horn at $7.50, the 42-inch at $10.00, or one of the many flower horns, which range in price from $12.00 to $16.00, have replaced them. The cost of a Home Phonograph was therefore the initial $30.00, plus the cost of the horn, which was hardly ever less than $5.00. The price of Triumph and horn would frequently be $37.50 or $60.00. If, in the past, customers have cheerfully paid for the Phonograph and horn without considering the increased cost of horn as a drawback, there can be no question that selling will be easier when the price of the Phonograph and the best obtainable horn will in reality be less than what was paid before the new equipment came in.

Dealers should seize on this point when asked by customers to explain the change. It is one that will readily be accepted by intelligent questioners.

It will be seen that even if the new horn were only as good as the kinds formerly used, there is an advantage in a slightly decreased cost. But the new horn is vastly superior to any before used in connection with the Edison Phonograph, as experiments will prove conclusively. It is impossible to please all people, and there may be some who may cherish the conviction that the old order was better than the new, although, if they reason the matter out, it is difficult to see where they can find fault.

Here is the whole thing in a nutshell: The new horn and Phonograph costs no more than the old. The new horn gives better results. The new horn with the Edison Phonograph makes price cutting impossible. What sensible Dealer can say that these three things will do anything but help him?

Typical Letters

Want of space prevents us from publishing more of the many letters we have received from Jobbers and Dealers, but the following tells the same story as these writers.

We have received information in regard to the change and there is no question in the writer's mind but that they will be very attractive and better sellers than heretofore.—*J. F. Schmelzer & Sons Arms Co., Edison Jobbers, Kansas City, Mo.*

"We are in receipt of your letter in which you enclose list giving the change of styles and prices of the Edison Phonographs. We consider this change to be a very desirable one, and cannot help but feel that it will be very profitable to the trade in general."—*Clayton Music Co., Salt Lake City, Utah.*

"I will certainly say that you have given us Dealers in smaller towns a better chance to meet the catalogue house competition, as they have offered horns too cheaply to allow us to compete with them. I think you are doing the proper thing in putting out the complete outfit and putting the price on them. * * * My July trade was double what I anticipated and I have very good prospects for the fall."—*Will R. Auerbaum, Grant Park, Ill.*

Advance List Edison Grand Opera Records Supplement No. 8, November, 1907.

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before October 28, 1907, all things being favorable, but they must not be placed on sale by Jobbers or leave their places of business, or be reshipped to Dealers before 8 A. M. on October 28, 1907. Supplements will be shipped with Records. These may be distributed to Dealers after October 20th, but must not be circulated among the public before October 28. Jobbers are required to place orders for Grand Opera Records on or before September 10th. Dealers should place Grand Opera orders with Jobbers before September 10th to insure prompt and complete shipment when Jobbers stock is received.

B. 55 Steuermannlied, ("The Helmsman's Song") "Der Fliegende Holländer" Wagner

By HEINRICH KNOTE. TENOR. Sung in German, Orchestra Accompaniment

Partly from the legend of the Flying Dutchman, which had been told him by sailors when, on a voyage to England in 1839, his vessel was driven by storms to take refuge in a Norwegian fjord, and partly from Heine's "Salon" Wagner wrote this celebrated work. The Flying Dutchman was a sailor, who, when attempting to weather the Cape of Good Hope, was repeatedly driven back by the winds. Angered by these vain efforts he cried out, "Though Hell itself prevail, I'll sail on till eternity." For this impious boast he was condemned to steer the seas in his dreaded vessel with black masts and sails blood-red, until he should find a maiden who would be faithful to him even unto death. Many times he had been disappointed; and it was while he was dropping anchor on the Norwegian coast that he hears, sung on a ship nearby, the beautiful Steuermannlied.

B. 56 L'Ultima Rosa d'Estate, ("The Last Rose of Summer") "Martha" Flotow

By BESSIE ABBOTT, SOPRANO, Sung in Italian, Orchestra Accompaniment

But for this beautiful air it is more than likely that "Martha" would have been forgotten long ago, although there are other notable airs in it. The air was known in Ireland so long ago as 1660, but attained special popularity by Moore's words. In the opera it is sung by Lady Harriet Durham, who, with her maid, is masquerading as the hired servant of Lionel, the young farmer, whom she has learned to love. The difference in their rank rendered their love hopeless. Fortunately Lionel is found to be the son of an Earl, and thus the marriage takes place.

B. 57 Quand'ero Paggio ("When I was a Page") "Falstaff" Verdi

By ANTONIO SCOTTI, BARITONE Sung in Italian, Orchestra Accompaniment

Although this opera was written in Verdi's eightieth year, it is the most vivacious and sprightly of all his many splendid works. The libretto follows almost literally the text of Shakespeare's "Merry Wives of Windsor," and it is not too much to say that the composer's music fits the wit and humor of the play to perfection. "Quand'ero Paggio" is sung by Sir John Falstaff, when he is making love to the lively Mistress Alice Ford, who is aware that he is at the same time making love to her friend, Mistress Meg Page. Monstrously fat, the knight describes the April days when he was a page to the Duke of Norfolk, and so slim he could have slipped through a ring.

B. 58 So Anch' Io la Virtù Magica, ("The Magic Virtue I Also Know") "Don Pasquale" Donizetti

By SIGNORINA GARAVAGLIA, SOPRANO Sung in Italian, Orchestra Accompaniment.

One of Donizetti's last compositions, this opera contains the cleverest music that he wrote, and was finished in eight days. Don Pasquale is an elderly man whose nephew, Ernesto, refuses to marry an heiress, preferring instead the young and beautiful widow Norina, who is poor. His uncle then determines to marry, and by means of a plot is made the victim of a mock ceremony. Instead of his bride being a young girl from a convent, it is Norina. Immediately she assumes shrewish airs and becomes wildly extravagant. Her victim, so far from being mortally angry when he finds out, is so delighted at getting rid of her that he permits Ernesto to marry her, and gives him a fortune. The very charming cavatina Norina sings is suggested by a romance she is reading of a beautiful lady and the bold knight Richard.

B. 59 Alto La! ("Halt, There!") "Carmen" Bizet

By FLORENCIO CONSTANTINO, TENOR Sung in Italian, Orchestra Accompaniment

While Don José, a brigadier of the Spanish Army, was waiting in the public square for Michaela, his betrothed, the gay and fickle Carmen, with her fellow workers, came out of the cigarette factory. Alone of all the admiring soldiers and wayfarers, she singled José out and threw him a flower. At first the thoughts of Michaela enabled him to resist the beauty of the cigarette girl; but later, when he had to arrest her for stabbing a fellow workgirl, he fell madly in love with her and connived at her escape. For this he suffered two months' imprisonment, while Carmen escaped to the mountains and joined the gypsies. "Alto La!" a gay military air, characteristic of him, is the song he is heard singing in the distance as he makes his way to Carmen directly he is released.

Printed Matter

Copies of the new Domestic Record Catalogue, Form 1230, have just been mailed to the entire trade. In it are comprised all Records listed in this country to and including August. It omits all Records cut-out up to that time. It supersedes Form No. 1070, from which it differs slightly in typographical make up, and will be current for four months.

The new Machine Catalogue, prepared in view of the changes due to new horn equipment which go into effect on September 16, will not be available so soon as we had hoped. This is due to a slight hold up until decision is made on one or two minor points. Jobbers and Dealers will understand that owing to the enormous size of the edition some time must be taken in getting them printed and we shall not be able to supply them to the trade by September 16, as we expected. As soon as they are ready, orders will be filled without delay.

"It Sounds Good to Me," is the title of a new folder printed in two colors which should be used by the trade with great effect. A man is depicted laughing heartily at the entertainment afforded by his Phonograph. On the obverse side, under the caption "It Sounds Good to Everybody," there are some excellent selling arguments. It is Form 1230.

Another very ingenious, interest-compelling folder is Form No. 1200, which is in the shape of a circus tent and is printed in colors. On the first page the entrance to the circus tent is shown with the showman urging the crowd to go inside and see the "greatest show of the age." The fourth page depicts the other side of the exterior of the tent and a number of small boys are seen, some trying to creep under the canvas and others pursued by an excited policeman. The inside of the tent, shown on pages 2 and 3, are devoted to reading matter on the greatest of all entertainments—the Edison Phonograph. This folder is a very clever one, provocative of much amusement. It is intended for use at country fairs and similar places, which are in full swing during the late Summer and early Autumn. Dealers can make good use of these two folders and should obtain them from their Jobbers without delay.

In the new Accessories Catalogue, Form 1229, which we are now distributing, an error appears on page 20. Eight motor frame springs and four motor frame screws are required for the new style Home Phonograph. The list price of these parts is $1.00. For old types of the Home Machine, six frame springs and three frame screws will answer. These latter parts are listed at 75c.

Thomas Graf

Calling at the offices of the National Phonograph Company, Ltd., recently, we had the pleasure of meeting Mr. Thomas Graf, the new managing director. As the result of half-an-hour's most interesting conversation, we were impressed with the certainty that Mr. Graf's appointment will prove a very satisfactory one from all points of view.

Mr. Graf has had a wide and unique experience of the Phonograph industry dating back some ten years, when he first commenced in the business in America. Subsequently he has been identified with the trade in various important capacities, and we would especially refer to his splendid work for the Edison Company on the Continent, in building up and consolidating their business.

We do not think the National Company could have chosen a gentleman more fitted to successfully perform the duties of the important appointment of managing director. Mr. Graf will bring to bear experience gathered from an intimate acquaintance with the business methods at the world's great trade centres; he has also valuable practical knowledge of Edison specialties, obtained from a close connection with the company's factories both in America and on the Continent; and, in addition, he is the happy possessor of a courteous and considerate manner which will bring him many friends in this country. We prophesy that Mr. Graf will quickly become a very popular personality in the British phono trade.

We may add that he will act as general European manager of the Continental offices.—*The Phono Trader and Recorder, London.*

Edison Phonograph Monthly

Published for the Man Who Sells Edison Phonographs and Records by The National Phonograph Co., Orange, N. J.

All communications to *The Phonograph Monthly* should be addressed to the Advertising Department, Orange, N. J.

VOL. V. September, 1907 No. 7

Grand Opera Records

Although it is not likely that Grand Opera Records will ever sell as readily as the more popular kind, there is nevertheless a growing class of Phonograph owners who will buy them eagerly. These Records have done much to make the Phonograph welcome in the better class of homes and open up avenues of custom to the ambitious Dealer that would not otherwise be within his reach. The better margins of profit on these Records should be a strong incentive to the Dealer to push them with all the energy he possesses. Grand Opera Records should be purchased by all true lovers of music because they express all that is highest in vocal art. Not only is each Record capable of giving delight to those who like good music, but each one is a lesson how to sing, a lesson given as often as is wanted by the great operatic singers who make them. It would be difficult to get two brighter, merrier songs than those sung by Constantino and Scotti in the list to be issued in November. Dealers will find it easier to sell these Records if they make themselves acquainted with the nature of the song and can talk them interestingly to customers.

Carrying Grand Opera Records leads frequently to the sale of a Phonograph to some musically minded person who would not otherwise take any interest in the matter. And Dealers should remember that the class which is at present in the minority is being numerically strengthened every day. To those who appreciate the educational advantage of the Phonograph, the Grand Opera Records should be very welcome.

And all the more welcome because their low price—notwithstanding their artistic excellence—brings them within the reach of a very large class.

The Value of the Window

The value of display, in attracting notice and winning custom, is as old as trade itself. The first form of such display took the form undoubtedly of the seller spreading his goods around him as he sat in an open market or bazaar. This form still survives and is likely to do so for a very long while but it is not the display suitable to delicate wares. The old time merchant who lived in London, at Cheapside, or on old London Bridge when that structure had rows of shops upon it, regarded his shop window in much the same light as any of the others in his house. From the old prints to be seen of this far off time the shop windows seem to be very small and narrow, and utterly unfitted for display purposes. But the London merchant of Elizabethan time was not necessarily ignorant of the value of display on that account. He was wise enough, when he went to bed, to bar and shutter his narrow window and lock securely the great oaken door, for he knew it fared ill with burghers if they fell in with rollicking soldiers or nocturnal prowlers. And a window display would have been considered fair game for a party of gay young blades coming up from the Southwark Bear Garden, which was at one time Shakespeare's only rival.

The merchant had only one thing to do, and that was to put all his hopes of advertising in the great sign that hung outside his house; and some specimens to be seen in museums show that they were well painted. The great painter Hogarth, who flourished in the eighteenth century, painted many notable tavern signs in the days of his poverty; and many impecunious artists paid off long-standing accounts by the exercise of their art in this manner.

Nowadays, however, the well lighted window, unshuttered, and open all through the dark hours to the gaze of the curious, not only prevents burglary, but is the greatest local advertisement the proprietor can have. When a Dealer takes space in his local paper and writes an advertisement unskillfully, that advertisement will not have nearly the beneficial effect of one written in a clever style. Similarly the value of the window can be enormously increased by the manner in which it is treated; for windows, like women, pay for dressing. In making a display of Edison goods it may be urged that they are somewhat unwieldy and do not lend themselves to decorative effects, like millinery goods or the myriad packages that come to the grocer's hand when he wishes to obtain startling effects.

We are certain that with thoughtful attention Edison goods will make very attractive effects if handled properly, and the window space is sufficient and well lighted; and we want to urge all Edison Dealers to make the most of their window displays. It is not enough to have the goods if the passers by don't know of it. They must find your window attractively dressed; so attractively dressed that they pause to look in and without knowing it get impressed with what they see. Windows should be frequently re-dressed, and the ingenuity of the owner and assistants should be brought to bear on them. The Dealer who neglects his window is throwing away the best free advertisement it is possible to obtain; and the Dealer who spends a lot of thought and skill upon his window obtains never failing, good results. In a subsequent issue we shall have some hints on the subject of window dressing that may be helpful to those Dealers who have been content with the usual mediocre display but believe that they might do better.

Among the Jobbers

S. B. Davega, Edison Jobber, of 32 East 14th Street, New York, in order to gain better facilities for his rapidly growing business, has just leased spacious and well lighted premises at 126 University Place. This will be connected with the 14th Street establishment, and will be used exclusively for wholesale purposes. Mr. Davega has been fortunate in securing such a central location, which is in the heart of the talking machine district.

W. D. Andrews, Edison Jobber, of Syracuse, and Buffalo, N. Y., and President of the Eastern Talking Machine Jobbers' Association, has recently purchased the entire jobbing stock of Edison Phonographs carried by R. L. Loud, of Buffalo. Mr. Andrews has a very attractive stock of machines and Records at his Seneca Street warerooms in Buffalo.

The Rudolph Wurlitzer Co., of Cincinnati, O., Edison Jobbers, like so many others of our Jobbers, have found that the space which a year or so ago was thought sufficient for their needs for some time to come, has proved too small for their rapidly growing business. They have secured 15,000 feet of floor space in the big building at 126 East Fourth Street, where the wholesale end of the business will have the space it has needed for some time past. One floor will be given over to Records and another to talking machines.

The Conroy Piano Co., of St. Louis, Mo., Edison Jobbers, state that their jobbing trade on Edison Phonographs, has been far beyond their most sanguine expectations, while the retail trade in July by its volume was a very pleasant surprise.

In redecorating their quarters on Fourth avenue, Louisville, Ky., the Montenegro-Richm Music Company, Edison Jobbers, adopted an entirely unique series of designs. The walls have been stenciled with figures showing the various parts of a piano from soundingboard to keys. The colors are pink, green, silver and gold, and all fixtures are of solid mahogany.

Foreign Records Cut Out

The trade is hereby advised that after the present stock of Records Nos. 12865 and 17943, British and French respectively, has been exhausted no more will be supplied.

Begging by Phonograph

A Berlin (Germany) deaf and dumb beggar finding business slow, has thrown away his stock in trade of pathetic appeals hung around his neck and purchased a Phonograph. On a specially prepared cylinder he has had the story of his afflictions and the great size and helplessness of his family recorded. The lady of the house is no longer able to wave him away for no sooner does she put her head out of the door than he starts the machine and more in curiosity than pity the busy housewife listens to this unique spneal. So far the business has done excellently, but it is likely that when others start in and the first man loses his vogue, he will have a vituperative cylinder prepared, especially addressed to hard hearted economists.

It is not easy to become a good salesman; if it were, there would not be so much money in it. The first and greatest qualification in salesmanship is unbounded enthusiasm. Without it a salesman could not even sell harp strings in Heaven.

To Add New Equipment to Present Machines

Jobbers and Dealers are especially urged to look for and carefully read the direction sheet enclosed with this issue of the EDISON PHONOGRAPH MONTHLY, giving instructions for adding the new equipment to such of the present types of machines as they have in stock. The new parts consist of a horn, a crane and pieces for attaching the crane to the cabinet. The latter pieces include a metal holder, with screws; a crane base to hold the crane and keep the machine from tipping over, and a brace to keep the upright rod of the crane in a rigid position. Since some Dealers may fail to get this printed direction, we append the following instructions for attaching the crane holder.

Slide the reproducer arm to the right as far as it will go and fasten it down to the end gate latch with a rubber band or string. Turn the cabinet over on its back, leaving its cover on and catches locked. Place the crane base inside of the metal holder and hold both parts against the bottom of the cabinet, keeping the center of the holder the right distance from the left hand edge of the cabinet base. See that the holder is held so that the base stands at right angles, or perfectly square with cabinet, and mark location of screw holes on base of cabinet. Remove the holder and crane base and with a No. 40 twist drill or the same sized brad awl, drill the four holes into base of cabinet one-half inch deep at the places previously marked. Screw on the crane holder. The front edge of crane holder on all cabinets should be ⅜ of an inch back of the edge of cabinet base.

The brace is not fastened to the cabinet, but is pushed over the top edge of the cabinet by lifting up the lid. It should then be placed in such a position that the upright rod of the crane will stand perpendicular.

The distances from the inside of cabinet base to center of holder should vary in each machine as follows: Standard, 2¾ inches; Home, 2⅞ inches; Triumph, Alva and Concert, 2⅞ inches; Balmoral and Conqueror, 12⅝ inches.

GEM MACHINE CAUTION.

The hole in the body of the Gem Phonograph, for holding the horn crane, has been increased from 3-16 to ¼ inch on all new machines. To equip machines made previously to this change, it will be necessary for Dealers to order special horn cranes with the end made 3-16 inch.

The salesman who cannot answer intelligent queries about the Phonograph he is trying to sell, is apt to create a certain prejudice in the mind of the possible purchaser. Such a customer often goes elsewhere, which is just what the salesman should do.

Those Foreign Records

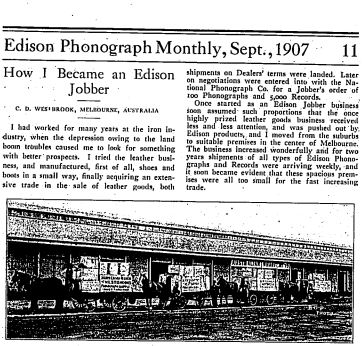
For some years now, enterprising Dealers have found that one of the best ways to sell Records is by giving Phonograph concerts at which the new monthly lists are played over. In many towns this reunion is looked upon as one of the pleasantest evenings of the month, and sales of Records are easily traced to it. Dealers who adopt this plan should never fail to play one or or two of our Foreign Records with the usual monthly list. People who hear them played are loud in their praises, and it would undoubtedly tend to popularize them if a few were played whenever an opportunity occurred. In a country like this, where so many races are blended, there should be a big market for foreign selections if they were pushed. These Foreign Records are all exceptionally good, being, indeed, the best-recorded and most popular in the countries from which they come. There is a great deal of variety among them. Some of the German and French and grand opera, and some in the lighter vein of the cafe chantant. They are made by artists well known in their respective countries and deserve recognition as such, not only by French, German or Swedes, as the case may be, but by all Edison Phonograph owners who appreciate good vocal Records.

What the Dealers Say

"I want to congratulate you for those 90 German Records, as they are very fine and good."—*Christian Erb, Edison Dealer, 323 Coleen St., Rochester, N. Y.*

"After having tried the 45 new French Records, I have found that they are the very best than can be made. The reproduction of all the whole 45 Records is perfect and a great feature in them is the fine orchestra accompaniment. I am sure that we can sell a large quantity of them, and we will push the sale with all our might in order to induce you to issue more new ones."—*Joseph Beaudry, 263 rue St. Jean, Quebec, Canada.*

"I am selling more Phonographs every month."—*Geo. A. Hyde, Edison Dealer, East Smithfield, Pa.*



Phonographs on Canoes

Charles Craig, of the Indiana Phonograph Co., Edison Jobbers, Indianapolis, Ind., has noticed a marked increase in his retail trade this Summer. One of the reasons is said to be the fad for equipping canoes with Phonographs. Most of the canoes to be seen on the river about Broad Ripple have music at the prow, and the effect at night is very pleasing.

How I Became an Edison Jobber

C. D. WESTBROOK, MELBOURNE, AUSTRALIA

I had worked for many years at the iron industry, when the depression owing to the land boom troubles caused me to look for something with better prospects. I tried the leather business, and manufactured, first of all, shoes and boots in a small way, finally acquiring an extensive trade in the sale of leather goods, both wholesale and retail. It was during this time that Dr. McCarthy, of Footscray, Melbourne, drew my attention to an Edison Phonograph, which he had brought back from the United States on one of his world tours. I became so much interested in it and its possibilities that I wrote to the Dealer from whom the Doctor had purchased his machine and received full particulars as to terms. After studying these I at once placed what seemed to me then to be a large order. It called for 2 Gems, 1 Standard, 1 Home Phonographs and 140 wax records. In due time they were delivered to Melbourne, and this "huge shipment" became a center of attraction, for at that time Edison goods were poorly represented in Melbourne. The goods were soon disposed of and several further small shipments on Dealers' terms were landed. Later on negotiations were entered into with the National Phonograph Co. for a Jobber's order of 100 Phonographs and 5,000 Records.

EDISON GOODS FOR C. D. WESTBROOK

Once started as an Edison Jobber business soon assumed such proportions that the once highly prized leather goods business received less and less attention, and was pushed out by Edison products, and I moved from the suburbs to suitable premises in the center of Melbourne. The business increased wonderfully and for two years shipments of all types of Edison Phonographs and Records were arriving weekly, and it soon became evident that these spacious premises were all too small for the fast increasing trade.

While at this address I had opened two retail stores—one in the city, and the other in Ballarat, the garden city of Australia. With these two stores to look after and my fast increasing Dealers' business to attend to, new and commodious premises were taken and moved into during April, 1906. At times we carry over 1,000 Phonographs and 50,000 Records in stock, which shows to what an extent my Edison Phonograph business has grown in the four years that have elapsed since my first order was sent.

The Australian public buys well and knows good things when it sees them; cheap and nasty goods find no market, and hence it is that Edison goods are foremost all the time. In all places the Edison Phonograph and Records can be found—drawing-room, assemblies and camps —a delight and entertainment to all who hear them.

Australian Appreciation

The following letter, written at Queensland, Australia, and addressed to Mr. Edison, is typical of the many he receives from appreciative Phonograph owners, and shows what an incalculable blessing the Phonograph can be to the lonely:

"From this side of the earth, I dare say I am among thousands of Australians who have to thank you for many pleasant evenings. I have just bought one of your singing machines. I live alone and far away from other human beings, but now I have no more lonely evenings and its splendid. Sir, this wonderful invention of yours will do more toward making happy homes than anything I know of. I pray that you may live and enjoy the best of health for the next forty years."

Music is a discipline, and a mistress of order and good manners. She makes the people milder and gentler, more moral and more reasonable. —*Luther.*

Dealers and Dodos

Thousands of years ago, there was a bird called the Dodo, who was originally furnished with wings like any other bird. But as he lived on an island where food was plentiful and he had only to walk about to pick up all that was necessary, he was not compelled to take the trouble to fly. There is no doubt but that he might have got better food and a greater variety of it by expending a little energy, but he preferred not to take the trouble. After a few centuries of this inactivity the Dodo's wings became smaller and finally dwindled into useless appendages, and the Dodo could not have flown if he had tried. Competition came along in the shape of other birds who could walk and fly, and the Dodo finding there was nothing else to do, was forced to become extinct.

There are a number of Dodo-like Dealers, who won't put forth their mental faculties and they are as surely doomed to extinction as were those lazy birds of long ago.

The Dealer who wishes to increase his business with the Edison Phonographs and Records cannot do so unless he takes active steps to that end. The day has passed when a man can merely open a store and expect to make a fat living. True, such a man may be able to get along in a very small fashion. But that's not the modern American business spirit. The modern Dealer must be prepared to recognize and respect just competition in bright, aggressive rivals, and can only rise superior to it by beating them at their own game. First of all he must understand that competition is good for him since it makes him think and act quickly, and if he doesn't, the other man will.

If you happen to be the only Dealer in a small town, and another one sets up in opposition, you may feel a trifle aggrieved at first. When you see your rival's advertisement in the Yawtown Journal, setting forth in glowing terms the self-same goods that you have carried for some years—Edison Phonographs and Records—you may feel a trace of uneasiness that you never advertised. The reason you did not was the same reason that the Dodo might have given to any inquiring bird who asked why he never flew. Dodo and Dealer would reply that "they didn't have to." If these advertisements stir up this uneasy feeling it's a good thing for you. If they do not, beware of getting into the Dodo class.

Your first symptom of dissatisfaction shows that you have recognized that greatest stimulant to business-getting—Competition. That's all very well, you say, but the new man is going to cut into my profits! That may be true, too, but they need not be the same profits that they were before you had a rival.

The Edison Dealer should never make the mistake of looking at his territory from the standpoint of a grocer, butcher, or blacksmith. The grocery business has very distinct limitations, but the business in Edison Phonographs and Records has not. The grocer's is a cut-rate proposition, compelling him to carry many lines on which little profit can be made. You are protected from cut rates and there is nothing belonging to the Edison Phonograph outfit or Records but allows the Dealer a large margin of profit. The grocer can tell pretty accurately the average consumption of an average family so far as his store is concerned, but what Edison Dealer can foretell the extent of his possibilities?

We frequently receive letters telling us that the writer started in with, perhaps, a Standard Phonograph; then, becoming more ambitious, purchased a Home Phonograph and finally was not contented with anything short of the Triumph. These letters prove that the Dealer has the opportunity to make three successive sales to one customer. By the terms of your agreement you are not permitted to take machines in part exchange, so there is no lessening of the profit in these transactions in any manner.

When you have realized the enormous scope for your business you should not feel discouraged by competition.

It is yours to create the Phonographic appetite. The sale of one machine is the best argument you have for increasing your sale of Records.

Mr. Edison's Face His Own Property

Vice-Chancellor Stevens, of the New Jersey Courts, recently handed down a decision enjoining the Edison Polyform and Manufacturing Company from publishing on its products a picture of Mr. Edison, accompanied by a certificate purporting to be signed by him recommending the use of the compound—a neuralgic pain killer.

In stating the circumstances leading up to the present litigation, the Vice-Chancellor stated that Mr. Edison, as an inventor of electrical instruments and processes, enjoys a world-wide reputation. Early in his career Mr. Edison compounded a medicinal preparation intended to relieve neuralgic pains by external application. This was first made for the personal use of Mr. Edison and his assistants, without any idea of commercial exploitation.

In 1879 a Mr. Lewis and a Mr. Jacobs visited Mr. Edison's laboratory in Menlo Park to examine his inventions. Mr. Edison happened to mention the fact that he had been a sufferer from facial neuralgia and that he had made a preparation which he had called polyform that he had found to be a good pain killer. Lewis and Jacobs were so impressed with its merits that they asked him to sell it, and Mr. Edison finally agreed to dispose of his rights for $5,000.

The arrangement was that Mr. Edison should apply for a patent and execute an assignment. The patent apparently was not issued, but a written assignment of Mr. Edison's right to it and to the preparation was made September 2, 1879. The same year a company called the Menlo Park Manufacturing Company, in which Mr. Edison had no interest, was organized to manufacture and sell the preparation. The company failed after several years and was succeeded by a Maine corporation, called the Edison Polyform Company. This company ran out with little success and was succeeded by a New York company which did nothing. Finally the present defendant corporation was organized by several men living in Chicago, where it is now manufacturing the compound. This contains all but one of the drugs, morphine, mentioned in Mr. Edison's formula. On each bottle is a label containing on one side directions for use and on the other a picture of Mr. Edison and the following words: "Edison's Polyform. I certify that this preparation is compounded according to the formula devised and used by myself. Thomas A. Edison."

Mr. Edison testified that he had never authorized the use of his picture and that he had never made or authorized the certificate purporting to be signed by him. On the contrary, he objected to any use whatever of either his name or picture.

Postal Card Publicity

A. C. Clavel, Edison Dealer, of "Ye Old Curiosity Shop," Waukulla, Fla., sends us three postal cards which should arouse a great deal of interest and lend to business. On one is the figure of a man with a violin, and on the card is written "Don't fiddle around—Come to us and get an Edison Phonograph. It brings all the music of the world into your home."

The second card shows a conductor leading his band. "We lead you to the best entertainment, the Edison Phonograph. It plays your kind of music no matter what it is, when, and as you like it." The third of the series shows a man running for the train which is just pulling out of the station. "Don't get left—you won't if you buy an Edison Phonograph. The most wonderful invention of the age. Come and hear it at, yours for pleasure, A. C. Clavel." These cards appear to be hand written and will certainly not share the waste-paper-basket fate of the majority of postals.

Meeting of the Eastern Talking Machine Jobbers' Association

The annual meeting of the above Association, which took place at the Hotel Astor, New York, July 22d and 23d, was one of the most successful ever held. The nominating committee appointed at the last meeting, submitted the following for directors as provided by the by-laws, from which four members were to be elected: W. D. Andrews, J. Newcomb Blackman, Louis B. Buehn, A. H. Jaeot and E. F. Taft. At the banquet a number of interesting speeches were made. The speakers were Albert S. Marten, President of the Tea Tray Co.; Vice-President Blackman, and C. H. Wilson, Sales Manager of the National Phonograph Company. All agreed that such associations were of great benefit to the trade at large, by bringing jobber and manufacturer into close touch where in friendly fashion trade problems could be solved harmoniously. During the proceedings of the first day, the matter of issuing sample Records two months ahead was gone into. Many of the Jobbers complained that the Dealers would not place orders for October Records in July. When it was pointed out that the National Phonograph Company claimed it was necessary to submit samples two months in advance in order to manufacture the Records and make prompt shipments, no further action was taken.

The Polylingual Phonograph

It has been left to a Dutch shopkeeper to invent a use for the Phonograph which is both new and useful. In Holland so many tourists come who cannot speak a word of Dutch, which differs very much from German and approximates to the Flemish, that custom is often lost on that account. This particular shopkeeper spoke both German and English well, and according to the *London Daily Chronicle* used his knowledge and the capabilities of a Phonograph in this manner.

Near Amsterdam a traveler—who does not know a word of Dutch—perceiving the announcement "English spoken," entered a shop. "English, Sir?" asked a youth behind the counter. Then he picked up a cylinder, placed it in a Phonograph, and the instrument duly sang out—but in German: "Sir, (or Madam,) the proprietor, who speaks German, will be telephoned for, and will return to the establishment in less than five minutes. Will you please be seated?" The tourist, who knows German, seated himself. In came the principal, who speaks excellent English. The stranger asked why the Phonograph did not talk English. The explanation was, "It's my stupid assistant! I have a cylinder on which is recorded the message in English; he used the wrong one. There is no excuse for him; my English cylinder is tinted red at the ends, and the German one blue. Lucky for me, Sir, that you know German, else I might have lost an esteemed patron."

Know Your Goods

One day I was talking with a gentleman who is a member of a music firm. During the conversation he said: "The trouble with the talking-machine business is that the people do not realize the marvelous strides that have been made in improving them. Most people have heard the old-style machine, which was uneven in tone and very indistinct, and so hardly a single person will bother to listen to an up-to-date one."

That evening I got to thinking about what he had said. The next morning I went to him with a proposition. I was to take a machine and about a dozen records by way of an outfit. A commission was to be paid me on every machine I sold.

I started to work, my idea being "hearing is believing." I went first to my friends, and made appointments to bring my machine to their homes some evening. Of course I assured them that they would be under no obligations to buy. Out of ten persons upon whom I called I sold to seven.

My plan worked better than I had anticipated. I then interested another young man, and soon had him doing the same kind of work. I paid him a regular salary. Later I had four young fellows working for me, and was doing a land-office business.

I did not stop there, but turned my thoughts to the country. Farmers living away from a city have very few amusements. I knew a talking-machine would just please them. So I hired a man to drive out into the country and stop at the farmhouses. We did even better than we did in the cities, selling on the average to eight out of every ten upon whom he called. I was working for a firm in the daytime, and did all this work in the evening. Soon I was putting quite a good deal of money in the bank. There is a good field open to bright young men who have a little "hustle" in them, and who make themselves familiar with the improvements in the goods which they handle.—*H. B. in "The Circle," August number.*

A Model Phonograph Store

Believing that there are many Dealers who would be glad to know how to display Phonographs to the best advantage and how to arrange Records in the most useful and attractive manner, A. V. Chandler, our city representative in Chicago, is fitting up a model Phonograph store on the sixth floor of 304 Wabash Avenue. It is separated from the commercial department by sound-proof partitions and a complete line of Edison Phonographs will be carried, with Records arranged on modern shelving, with the latest type of tray and Rapke labels. The idea is to show the Dealer how to make the most of his store space and by attractive interior do more business.

The Phonograph's Popularity

A curious case was tried by a magistrate in Rochester, N. Y., last month, which showed very plainly that the Phonograph has endeared itself to many of the good citizens of that city. Two men, Robert Burke and John Krell, were charged with annoying a certain Johanna Warren by what she was pleased to term, "The unceasing racket of a Phonograph." When she had made her complaint, most of the people in the court arose as one man to testify in favor of the joint owners of the Phonograph. It was stated that one-half the residents of the block on which the defendants lived came, unsolicited, to give testimony that so far from being an objectionable noise, it was eagerly looked for, and was a source of considerable pleasure to neighbors near enough to hear it. The magistrate dismissed the case instantly and the young men went home triumphantly, and that night the strains of Record No. 9324 floated out on the summer breeze.

Some "Don'ts" for the Dealers

The following list of "don'ts" was compiled by one of the most successful talking machine men in Canada for the benefit of his staff, and is passed on to our readers with a recommendation to read and remember when a machine is playing:

Don't slam a door.

Don't walk with your heels striking the floor hard.

Don't walk between the machine and the persons listening to it, unless unavoidable.

Don't start another machine until the first stops.

Don't talk or laugh; if you do you may as well stop the record. Your customer came to hear the record, not you.

Don't get mad when they tell you they know more about the goods than you, they do—not, but don't get mad.

Don't let your customer wait, play some records for him.

Don't stop a machine until you raise the sapphire from the record.

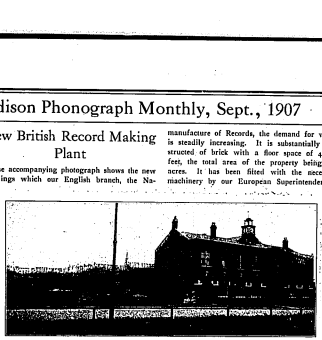
Don't allow a machine to run down while playing.

Don't allow customers to enter the record department.

Don't play a two-verse song record through, when we're busy; stop it after the first verse. Certain records cannot be treated like this, but many can. Use your own judgment.

Don't think you haven't time, make it.

Don't put your hands on a horn or on a mahogany cabinet.



Don't let your customer, if you can prevent him.

Don't hesitate to ask what you don't know.

Don't forget the *don'ts.—Canadian Music Trades Journal.*

New British Record Making Plant

The accompanying photograph shows the new buildings which our English branch, the National Phonograph Co., Ltd., has secured at Wilesden, a northern suburb of London, for the manufacture of Records, the demand for which is steadily increasing. It is substantially constructed of brick with a floor space of 45,000 feet, the total area of the property being two acres. It has been fitted with the necessary machinery by our European Superintendent of Works, E. Riehl, and will be one of the best equipped record-making plants in existence.

OUR NEW RECORD MAKING PLANT, LONDON, ENGLAND

SUSPENDED LIST, SEPTEMBER 1, 1907.

Supplementary to list of Suspended Dealers dated June 1, 1907, which is still in force and which must be given the same attention by Jobbers and Dealers as if reprinted here.

An Unfailing Source of Real Entertainment

START an Edison Phonograph going anywhere and it immediately becomes the center of interest. As an entertainer it has no competition—its fund of music, songs, or stories is unlimited. With each new record, whether an air from the latest musical comedy, a waltz or two-step by band or orchestra, a selection from grand opera or a ballad of long ago, the Phonograph becomes a new pleasure. A Phonograph in your home means enjoyment for each member of the family and for all occasions. Hear it at any Edison store.

In the Words of Others
"Sell I.C.S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 20 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for you? Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

The Denver Dry Goods Co.

Denver, Colo. 7/24/07.

International Correspondence Schools,
Scranton, Pa.

Gentlemen:

In reply to your letter of the 17th inst., will say we considered the demonstration of Mr. Hartwell very successful and would be pleased to have you make arrangements to put one of your outfits in this store. We expect to advertise the Language Outfits during December as gifts so you may rest assured we will communicate with the party in charge of the demonstration in this city when we need him. We have no intention of advertising or demonstrating unless we feel it is successful and leads to sales which would not be obtained otherwise.

We have placed several orders with you since the demonstration and would like to know if we could make arrangements to purchase whatever we need in this line through your Denver office as we have had to do several times recently. Let us hear from you in the matter and we would be pleased to have you advise from time to time of the results of sales on I. C. S. Language Outfits.

Yours very truly,
THE DENVER DRY GOODS CO.,

Edison Phonograph Monthly

VOL. V. October, 1907 No. 8

Co-operation and Enthusiasm Essential Factors

In a comparatively few days the new Agreement will be in force and the trade everywhere will be selling machines with new equipments and at the new prices. We will then be squarely face to face with conditions that will mean much for the future of the Edison Phonograph. We have no hesitancy in declaring that, in our opinion, the new conditions are going to bring a greater and constantly growing business; conditions that will more than ever establish the supremacy of Edison goods. Jobbers and Dealers can be of great assistance in hastening the complete fruition of these conditions. Much will depend upon their attitude toward the new equipment. If, because they have a stock of horns on hand, they are going to feel aggrieved and talk down our equipment, the success of the new conditions will be handicapped and, in such cases, progress will be slow. Such Dealers, however, will be standing in their own light and will in the end injure themselves.

If, on the other hand, they will accept, put out and talk the new equipment with enthusiasm, the complete success of our new plans will be almost instantaneous. The demand for horns of all shapes, styles and decorations is largely artificial and due to the efforts of manufacturers to compel the trade to carry large stocks. The public, as a rule, knows little about the horn proposition when it thinks of buying a Phonograph and would not know much more if it was not, upon reaching a Dealer's store, told about the many kinds of horns on the market.

Not more than one purchaser in fifty will give the matter any further thought after being told that an Edison Phonograph can be sold with no other horn than the one furnished with it. Even the fiftieth man will waive his objection upon being told that the horns furnished with Edison Phonographs are the best for reproducing purposes that have ever been made at a similar price. This statement cannot be successfully contradicted, as Dealers themselves may prove by playing the new horn against any of equal cost in their stock. That it is not gaudily decorated will eventually prove a better selling point than otherwise.

Perhaps the feature about the new conditions that should appeal most to the Dealer is the fact that he gets a protected price on every horn that he sells, and this alone, even if there were no other advantages, should cause him to give us his wholehearted support in carrying out the new plans.

This article is not written because we have any fear concerning the situation, but because we earnestly desire to get the complete and enthusiastic co-operation of the entire trade at the earliest possible moment. The success of the Edison business has been built up by the willingness of manufacturer, Jobber and Dealer to work together for their mutual interests, and the continuance of the same spirit will make it an even greater success.

New Plan for Cash Discounts to Dealers

A letter bearing the signature of F. K. Dolbeer, General Manager of Sales, has just been sent to all Jobbers, calling their attention to the practice of some Jobbers of permitting Dealers to discount a current month's purchases if paid in full on or before the 10th of the following month. The letter points out that this is a violation of the new Agreement, Section 3 of which reads as follows:

3. Jobbers' Terms to Dealers are net 30 days from date of invoice or a cash discount of Two Per Cent may be allowed as follows: On purchases made from the first day to and including the fifteenth day of the month if paid in full on or before the twentieth day of the same month; and on purchases made after the fifteenth, to and including the last day of the month, if paid in full on or before the fifth day of the following month.

This feature of the new Agreement is being referred to in this especial manner so that it may be fully understood by Jobbers and Dealers, thereby avoiding misunderstandings between the trade and ourselves.

The New Edison Gold Moulded Records Advance List for December, 1907

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before November 27th, all things being favorable, but they must not be placed on sale by Jobbers or leave their places of business, or be reshipped to Dealers before 8 A. M. on November 27th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after November 20th, but must not be circulated among the public before November 27th. Jobbers are required to place orders for December Records on or before October 10th. Dealers should place December orders with Jobbers before October 10th to insure prompt shipment when Jobbers' stock is received.

9698 Waltz from Romeo and Juliet — **Edison Concert Band**

This famous waltz, one of the most beautiful waltz measures known, is exquisitely played by the Edison Concert Band. It will be eagerly bought by music lovers of all classes. Composer, Charles Gounod; publishers, Boosey & Co., New York.

9699 I'll be Waiting Dearie When You Come Back Home — **Reed Miller**

A very tuneful march song, sung by the sailor lover as he is taking farewell of his lass preparatory to a long voyage. The sentiment of the words is such as to render the song very popular. A few bars of "Rocked In the Cradle of the Deep" are woven into the symphony with pleasing effect. Orchestra accompaniments. Music and words, Jean C. Havez; publishers, Helf & Hager Co., New York.

9700 In Monkey Land — **Collins and Harlan**

A novel and amusing song of the jungle, with bright, clever accompaniment, sung splendidly by Collins and Harlan. It is all about the wooing of a roguish little monkey maid by a very sentimental chimpanzee, who attains to his heart's desires and is accepted as a desirable son-in-law by the monkey maiden's mother:

"Where breezes blow in monkeyland,
Up by a bargee tree,
Those lived a pretty monkey maid
Loved by a chimpanzee."

Orchestra accompaniment. Composer, Theodore Morse; words, Jack Drislane; publishers, F. B. Haviland Publishing Co., New York.

9701 The Merry Widow Waltz — **Edison Symphony Orchestra**

"The Merry Widow," from which this captivating waltz is taken, is said to be the best comic opera written within the last twenty-five years. It has already enraptured Europe and is now attaining great popularity here. It is charmingly rendered by the Edison Symphony Orchestra, and we predict it will be one of the biggest sellers we have listed for a very long while. Composer, Franz Lehar; publishers, Chappell & Co., New York.

9702 Some Day When Dreams Come True — **Irving Gillette**

Not for a long time has Mr. Gillette had such a charming sentimental song as well suited to his sympathetic style of singing, and it will undoubtedly make a big hit. The chorus indicates the general trend of the song:

"Some day when dreams come true,
I'll come to you dear love,
Some day in the future years.
Smiles shining through my tears."

Orchestra accompaniment. Music and words, Phil Staats; publisher, Walter Jacobs, Boston.

9703 Ring Out the Bells for Christmas — **Edison Concert Band**

A truly seasonable and very originally conceived and executed Record, which will have a large sale. Sweet Christmas chimes are introduced into the selection and then the finely blended tenor and baritone voices of Messrs. Miller and Werrenrath are heard singing a Christmas carol. Special arrangement, not published.

9704 Flanagan's Trouble With His Tailor — **Steve Porter**

No matter what Flanagan's troubles seem to be, he is always good-natured about them, and his droll fun rises above everything. Flanagan introduces his mother into this sketch and she seems to be a very industrious old lady. When he brought her a pair of pants that his thoughtless tailor had left with one leg longer than the other, the old lady set to work to even things up, and by cutting a bit off one leg and a bit off another, reduced them in time to a necktie. Flanagan has some funny things to say as usual, and starts by a discussion on "pants." "Now, what would a man be without a pair of pants? Why, he'd be arrested!" The sketch concludes with a humorous verse, sung to the Professor, on the origin of pants. Orchestra accompaniment. Original sketch and not published.

9705 Honey Boy Medley — **Albert Benzler**

This medley, brilliantly played on the xylophone by Mr. Benzler, introduces the three very popular Records in the order named: "Honey Boy" (No. 9693), "When Summer Tells Autumn Good-bye" (No. 9675), and "When the Band Plays Yankee Doodle" (No. 9696). Orchestra accompaniment. Special arrangement, not published.

9706 Wouldn't You Like to Have Me for a Sweetheart? — **Ada Jones**

This is one of the most prominent successes in Raymond Hitchcock's musical farce, "A Yankee Tourist," and is one of the brightest and most tuneful ditties of the season. Miss Jones sings it in her inimitable manner and will bring it into wide Phonograph popularity. No one should fail to buy this Record.

"Wouldn't you like to have me for a sweetheart,
Wouldn't you like to be my honey dear?
Wouldn't you like to whisper me your secrets
Above as well as say girl you know.
Wouldn't you like to have me for a sweetheart,
Wouldn't you like to be my honey dear?
Wouldn't you like to whisper me your secrets
Wouldn't you like the consolation of a little girl like me?"

Orchestra accompaniment. Music, Alfred G. Robyn; words, Wallace Irwin; publishers, M. Witmark & Sons, New York.

9707 Three Rubes Seeing New York — **Edison Vaudeville Company**

A diverting street scene of three rubes viewing New York from a "rubberneck" coach and their amusing comments on what they see and hear. Lifelike effects are introduced from the Grace Church chimes to a fire alarm, and the rubes are finally left to walk home from Grant's Tomb owing to the failure of their automobile. One of the best things our Vaudeville Company has done. Original and unpublished.

9708 I Get Dippy when I Do that Two Step Dance — **Arthur Collins**

Arthur Collins sings in a typically amusing style about a town that has been struck by the two-step wave and its effect on the citizen who sings the song:

"Round the floor you gaily glide,
With a hippy, dippy glide;
When they bang that big bass drum,
It's a cinch they're going some
It may be against your will,
But you really can't keep still.
For you've got no chance, it makes you prance.
To do that two-step dance."

Orchestra accompaniment. Music, Bert and Lou Fitzgibbon; words, Edgar Selden; publisher, Shapiro, New York.

9709 Pretty Black Eyed Susan — **Edison Military Band**

This instrumental selection, which is a song and dance, is full of the most pleasing orchestral effects. It will commend itself to all lovers of similar Records. It is an exceptionally fine piece of recording. Composer, Frank R. Seltzer; publishers, Cornille-Seltzer Co., Philadelphia, Pa.

9710 Won't You Waltz "Home Sweet Home" with Me for Old Times' Sake? — **Byron G. Harlan**

A very attractive, tuneful sentimental song, exactly suited to Mr. Harlan's style of singing. It deals with the reconciliation of two lovers who had quarrelled and met again in a ball room. The last dance was the waltz "Home, Sweet Home," and the chorus of the song is the young man's plea for a better understanding:

Won't you waltz "Home Sweet Home" with me, for old times sake. Like you always used to be ?
To see numbers arms around you dear makes my heart ache. Won't you waltz "Home Sweet Home" with me for old times sake."
Won't you be the same to me.

Orchestra accompaniment. Music and words, Herbert Ingraham; publisher, Shapiro, New York.

9711 Rescue the Perishing — **Anthony and Harrison**

This sacred duet, most sympathetically rendered, is too well known to need any comment. It is a perfect Record, sure of a warm welcome by all lovers of sacred song. Orchestra accompaniment. Music, William H. Doane; words, Fanny Crosby.

9712 Marianina — **James Brockman**

A funny Italian dialect song, something on the style of the popular "My Mariucia Take-a Steamboat," (No. 9430) sung by a new addition to our talent, whose clear, expressive voice will win him many friends. Poor Antone's Marianina has given up the cooking of spaghetti and gone away with a minstrel troupe. She no longer sings the songs of sunny Italy, but, as the chorus shows, has taken on another hue:

"Say Mariuccia why you treat-a me so severa?
Why you no-a love me like-a me wild-a goo-a da start?
Oh! Arriola will get da blue
Don't sing Mariuccia beat da wearing of da green-a,
Leave alone da corn-beef and da cabach,
And stick to interesting
My Mariuccia please-a come back home."

Orchestra accompaniment. Music and words by James Brockman; publishers, Helf & Hager Co., New York.

9713 Florida Rag — **Vess L. Ossman**

A very brilliantly executed banjo solo, showing with almost startling effect the capabilities of the instrument in the hands of a master. Orchestra accompaniment. Composer, Geo. L. Lowry; publishers, Jos. W. Stern & Co., New York.

9714 Make a Lot of Noise — **Billy Murray**

A typical Geo. M. Cohan song, which is very popular, sung in Billy Murray's liveliest vein. The first line of the song lets us into the secret that "the town is on the blink," and if the singer is elected Mayor he promises to make it the liveliest spot on earth:

"Vote for me and I'll prosolize ye — What you need is a man of speed,
That we'll all be as free as we ought to be. — I'm the ruler for you me lads."

Orchestra accompaniment. Words and music, Geo. M. Cohan; publisher, F. A. Mills, New York.

9715 Old Dog Sport — **Len Spencer and Gilbert Girard**

This descriptive recitation by Len Spencer, with farmyard and canine effects by Gilbert Girard, excellently recorded, is full of real, kindly sentiment. The old dog is taken out by his master to be shot because his days of usefulness are past and there is a brindle pup ready to step into his position. The farmer, as he walks along, thinks of what the dog has been, how he rescued one of the children from the "critch" when he was younger, "nailed a sneak thief by the throat," and he finally gives the faithful old dog a new lease of life.

9716 Two Blue Eyes — **Reinald Werrenrath**

An attractive, sentimental march song, likely to be very much appreciated. It is finely sung by Mr. Werrenrath and the words and music will find ready favor. Orchestra accompaniment. Music, Theodore Morse; words, Edward Madden; publishers, F. B. Haviland Publishing Co., New York.

9717 Love's Confession — **Edison Symphony Orchestra**

One of the most graceful and beautiful selections by this celebrated orchestra that we have listed for a long time. It is not in the least inclined to the dullness that many think go with this class of music. We are certain that this will be a universal favorite and a consistent seller. Beautifully recorded. Composer, M. Klemmer; publishers, Oliver Ditson Co., Boston.

9718 When the Sheep Are in the Fold, Jennie'Dear — **Manuel Romain**

A sentimental farewell song, of a type always popular, concerning the parting of two lovers whose love for one another holds them through the trying period of an indefinite absence:

"When the sheep are in the fold, Jennie dear, — Let love's star burn bright and true, I will ever think of you
And the sweet roses in shining mist and clear. — When the sheep are in the fold, Jennie dear."

Orchestra accompaniment. Music, S. Fred Helf; words, C. M. Denison; publishers, Helf & Hager Co., New York.

9719 So, What's the Use? — **Bob Roberts**

Another favorite number from "The Yankee Tourist," amusingly rendered by Rob Roberts. It is the outpouring of a pessimistical soul, who has found most things in life vain. The words are clever and mirth-provoking, as this specimen shows:

"Oh! what's the use of leather straps a few spot, — And those who are rich they were dead,
If next day be burnous teal — So what's the use?"
All single folks, 'tis said, will always wish they were wed.

Orchestra accompaniment. Music and words, Edward Montagu; publishers, Francis, Day & Hunter, New York.

9720 Bronco Bob and His Little Cheyenne — **Ada Jones and Len Spencer**

A highly original, diverting Western sketch, which is crowded with human interest and will certainly be a big seller. The scene opens with the whinny of a horse. Cheyenne (Ada Jones) rides into the camp, her mare blown, to marry Broncho Bob (Len Spencer), who carries her off to the parson on his own horse to the accompaniment of the cowboys' band, which plays "Cheyenne," a verse of which is appropriately sung by Miss Jones at the earnest request of her lover. This Record is out of the common and is going to make a big hit. Original arrangement.

9721 Old Faithful March — **Edison Military Band**

A fine, rousing march, well up to our standard, replete with stirring motives and sure of a warm welcome. Composer, Abe Holzmann; publisher, Leo Feist, New York.

Differentiation in Cash and Instalment Sales

The following letter, mailed to all Jobbers and Dealers under date of September 9th, disposed of a much discussed question:

With further reference to the matter of the proposed allowance of a 5% discount for cash on Edison machines sold at retail, we wish to state that this proposition has received our most careful consideration, and we are of the opinion that for the best interests of all our Jobbers and Dealers, a discount for cash, or otherwise, should not be permitted on retail sales of Edison Phonographs, or parts, Records or Blanks.

The success of this company, and the consequent success of the business of our Jobbers and Dealers as a whole, has been due to the establishment and maintenance of the one-price system, and it is our opinion that any deviation from, or variation of the one-price system, would, in the end, prove prejudicial to the interests, not only of this company, but equally so to the business of our Jobbers and Dealers.

We have, therefore, decided without any equivocation whatever, that under no circumstances will we permit the allowance of a discount on retail sales of goods manufactured or sold by this company.

Yours very truly,
W. E. Gilmore,
President.

When the committee of the Eastern Jobbers' Association waited upon W. E. Gilmore, President of the National Phonograph Company, and laid before him their views on the above proposed change, he received them gladly and listened with all seriousness to what such a representative body of men had to say. By some, his attitude was taken to mean that he looked with favor on the scheme, and it was widely anticipated that the National Phonograph Co. would agree to the proposed changes.

While there was at no time little likelihood of the differentiation idea being taken seriously, it was only fair to the trade at large that the matter should be looked at from all sides. To this end Mr. Gilmore wrote to all Edison Jobbers on the subject and asked them to also get the views of some of their representative Dealers. The replies of both Jobbers and Dealers were in the main a remonstrance against the proposed change and an urgent plea for the rigid continuance of the one-price system. The National Phonograph Co. is perfectly willing to admit that it depends no less on the amicable understanding between itself and the Jobbers and Dealers, than the Dealers and Jobbers do on the protection the Company has always afforded them. And this protection, which has alone enabled the smaller Dealers to live, despite the large stores, is nothing else than the one price system. The National Phonograph Co. inaugurated this about ten years ago, and has seen nothing but prosperity and the most pleasant relations between itself, Dealers and Jobbers follow as a direct result.

The proposal, therefore, to place cash and instalment sales upon a different footing was in our opinion calculated to destroy in a moment what has been lauded not only by the National Phonograph Co., but by its Jobbers and Dealers as a perfect protective system. It did even more than that. It was the thin end of a wedge, the creation of a precedent which could only have an unsteadying effect on the trade. It was the abandonment of the strongest position. In certain commercial crises such a sudden change of policy might be justified. In the event of unlooked for trade depression there might be some justification for it. But at a time when reports from all parts of the country indicate a prosperity greater than ever before enjoyed by the trade, it would be highly injudicial to run the risk of dispelling the feeling of security which it now enjoys under the one price system.

Talking Machine Jobbers' National Association

The Eastern Talking Machine Jobbers' Association and the Central States Association met in session at Buffalo on September 9th and merged themselves into the National Association of Talking Machine Jobbers, which was organized on Wednesday, September 11th, with the following officers: President, J. P. Bowers, Chicago; Vice-President, W. D. Andrews, Syracuse; Secretary, Perry B. Whitsit, Columbus, O.; Treasurer, L. S. Boehe, of Philadelphia; Executive Committee, C. V. Henkel, New York; W. E. Henry, Pittsburg; C. W. Hickok, Toledo; Edward H. Uhl, Chicago, and L. E. McGreal, Milwaukee. An attempt to form local associations in a number of places will be made this fall and winter. The importance of this new association cannot be overestimated since the industry they represent is one which is exceedingly important at the present time and promises in future to grow to still greater prosperity.

Dealers should read the New Agreement carefully, sign and forward it to their Jobbers without delay. The agreement system of selling Edison goods is designed to benefit Dealers as much as ourselves, and they should cooperate heartily.

The New Agreement

Copies of the new Dealers' Agreement are being mailed as rapidly as possible to all Dealers now handling Edison goods and who have signed the old Agreement. Each copy mailed to a Dealer is being accompanied by a letter, which explains in detail all of the differences between the old Agreement and the new. The changes are only those that experience has shown are necessary to remedy such abuses as have crept in since the present Agreement was put into effect. All Dealers may rest assured that every change has been made to benefit the entire trade and not because of any desire on our part to be arbitrary.

Dealers are urged to carefully read the explanatory letter and give the most careful consideration to every feature of the new Agreement. We want every one to understand fully the new conditions before he signs the Agreement. We would strongly urge every Dealer to sign and execute the copy of the Agreement sent to him and forward it at once to his Jobber, thereby keeping him in a position to purchase goods of our manufacture and continue in good standing as an Edison Dealer.

Following is a copy of the explanatory letter:

Dear Sir:

ORANGE, N. J., Sept. 16, 1907.

We forward herewith the new Dealers' Agreement which takes effect October 1st, 1907, and request that you sign same and forward direct to your Jobber without unnecessary delay.

The Agreement, in effect, is the same as the one at present in force, except that we have made minor changes and additions, as follows:

1. The list prices of all, except coin-slot machines, have been increased on account of the change in equipment with which you are already familiar. The sale of Standard (rough) Blanks will be discontinued, and this article is therefore omitted from the Price List. The discounts for machines remain the same. The list price of Edison Standard Records remains the same, but the price to Dealers has been reduced to 20 cents, each, net. As to this change a separate letter has been issued by the Sales Department.

2. In the Conditions of Sale the following changes have been made:

Section 1: While this is a new section in the Conditions of Sale, it embodies a feature of the old Agreement, and therefore requires no explanation.

Section 2: This is a new section and its purpose is to prevent all commission schemes, and particularly to prevent Dealers as well as Jobbers from furnishing goods of our manufacture to parties (not authorized Dealers) in adjacent towns to sell on commission. We have found that in this way Dealers were, in a certain sense, doing a jobbing business, and that the agent acting for the Dealer invariably violated the Conditions of Sale and thus created a hardship on authorized Dealers in that vicinity. This section, however, is not designed to prevent Dealers opening direct branches by signing an Agreement for the branch and complying with all the requirements of a Dealer at such branch store.

Section 3: This section embodies the features of section one of the old Agreement, and requires no explanation.

Section 4: This is a new section, but it defines a practice which has been heretofore established by us. That is, all Edison Phonograph outfits must be sold complete as shipped by us, and no rebates or allowances are permitted for any articles not desired by the purchaser. This section applies particularly to the new outfits, and where, for instance, a different horn or crane is sold to a purchaser, such sale must be an independent one, and no allowance whatever can be made for the corresponding parts of the regular outfit. The change in the outfit and the object of this section is to prevent a large number of price-cutting complaints such as have been brought to our attention during the past year, due to the trade making up outfits with all sorts of horns, horn-supports and other accessories, and having two prices for such extra articles.

Section 5: This section embodies corresponding features of sections one and two of the old Agreement, and requires no explanation.

Section 6: This section embodies the features of section four of the old Agreement, with the addition, however, that this section now specifically prohibits the acceptance of premium machines in part payment for Edison goods.

Sections 7 and 8: These sections embody the features of sections five and six of the old Agreement, and require no explanation.

Section 9: This section is similar to section three of the old Agreement, requiring the keeping of a record of machine numbers, and is modified so as to include the trade-mark as well as the serial number in the restriction against removal of identification marks.

Section 10: This is a new section, but the condition is not a new one, as it merely embodies in the Agreement the notice which has heretofore appeared on all record cartons.

Section 11: This is a new section, but it defines a practice heretofore established with reference to advance records, and therefore requires no explanation.

Section 12: This is a new section, and attention is directed to this section particularly as it covers a condition which has heretofore given the trade and ourselves considerable annoyance; that is, the replacement of defective parts, or parts broken in transit.

Section 13: This is a new section, and attention to this section is also particularly directed. It is designed to secure the use of only genuine "Edison" repair and supply parts on Edison machines. We have experienced considerable difficulty in the past through the repair of machines and the replacement of broken parts by non-standard and inferior parts. We have found from past experience that where non-standard or inferior parts are used in making repairs (and this applies particularly to sapphires, feed-nuts, main-springs, belts, etc.), the operation of the machine is impaired and causes, among other things, poor regulation and excessive vibration, with the result that the machine is condemned as a whole. Furthermore, in all cases where non-standard or inferior parts are employed, faulty reproduction of the record is the result, and the user invariably condemns the record, and in many cases accuses the Dealer of selling worn-out records. Another object of this requirement is to prevent indirect price cutting.

Section 14: This is a new section, but it defines a practice heretofore established regarding misleading advertising. Hereafter all advertisements, and particularly those advertising an outfit consisting of an Edison machine and accessories of other manufacture, must state the make of goods where such goods are similar to goods manufactured and sold by us, so that the public will not be misled as to what goods are included. This applies particularly to records, and will prevent the class of price-cutting complaints, which, on investigation, show that the Conditions of Sale are not violated, but merely that the advertisement misled the public and the trade.

Sections 15, 16 and 17: These sections embody the features of sections seven, eight and ten, respectively in the old Agreement, and require no explanation.

In the Agreement part a number of slight changes have been made so as to state definitely such matters as were heretofore implied; namely, that the Agreement creates no agency, and that same may be terminated upon any violation thereof, and the same is not transferable without our consent.

In the Dealers' Agreement we have made one important change which must be observed by Jobbers and Dealers. At the foot of the Dealers' Agreement will be found two statements which Jobbers must complete.

(a) In the case of a new Dealer, the Jobber must state when the initial order was shipped complete and the quantity of goods purchased.

(b) In the case of an old Dealer the Jobber must state one Jobber through whom the Dealer signed, the date of the previous Agreement, the address from which the Dealer previously signed, and the date of first order. This information should be taken from the Agreement exhibited by the old Dealer.

(c) All Dealers' Agreements must be countersigned by the Jobber.

NATIONAL PHONOGRAPH CO.
F. K. DOLBEER,
General Manager of Sales.

Allowance for Horn Crating

The letter printed below, although mailed only to Jobbers, refers to a matter of equal importance to Dealers. The allowance mentioned does not affect Dealers except to show them that Jobbers cannot ask them to pay any extra charge for packing horns when shipped singly.

TO ALL JOBBERS.

August 23, 1907.

Requests have been made that we crate our new style horns singly, instead of nesting them, to save Jobbers the expense of doing so in making reshipment to their Dealers.

There are several reasons why this is prohibitive as well as unnecessary.

First—It will be absolutely impossible for us to crate singly the number of horns we will be compelled to ship.

Second—Transportation charges (which are allowed by us) would be at least 50% more; that is, the difference on horns packed singly is one and one-half first class, whereas when nested it is only first class.

Third—Most Dealers order more than one machine at a time, and in such cases it would be unnecessary to ship the horns to them packed singly; in fact, the transportation charges, which, in this case, they, the Dealers, have to pay, would be less if they were nested.

Fourth—A large number of machines are sold by Jobbers at retail, and in such cases they are usually wrapped in paper and not packed in any manner.

For these reasons we will not be able to pack horns singly.

Taking into consideration, however, that the Jobber will necessarily be put to some expense in recrating a certain percentage of horns singly, we have decided to reimburse them for such expense in the following manner:

On every invoice covering machines we will allow a credit of 25 cents on each machine, which, we believe, will more than offset the additional expense Jobbers will be put to on such horns as they are compelled to pack singly. In making this allowance it is with the distinct understanding that for all such machines shipped to Jobbers we will pack or nest the horns in such quantities as we consider best, that is, they will be nested in quantities, at our option, of five or multiples thereof, dependent upon the quantity of machines ordered. If you have any orders with us stipulating that horns are to be packed singly, we will cancel such instructions and ship horns as above specified.

Where extra horns are ordered they will be nested as stipulated above, but no credit on account of recrating expense, as above mentioned, will be allowed on them.

C. H. WILSON,
General Manager of Sales.

P. S. The horn support and rubber connection will be packed in the case with machines.

Edison Gold Moulded Records

Advance List of French, German, Norwegian, Polish and Scandinavian Records

The French, German, Norwegian, Polish and Scandinavian Records named below will be ready for shipment from Orange between November 1st and 10th. Samples of any of them will be shipped October 1st to such Jobbers as place orders for them. None will be shipped without orders. Jobbers' stock orders received by October 20th will be shipped as fast as possible after November 1st. Care will be taken to make shipment at one time to all Jobbers in the same city. Separate supplements of each list will be shipped with Records to all Jobbers who request a supply. State quantity required of each kind.

These advance lists comprise the second lot in the series of Foreign Records being issued to bring our catalogue up-to-date. All of the masters were made in the countries named, by the best artists obtainable. They are high-class Records in every particular and those found to be the best sellers in their respective countries.

Making Room for New Records

Whenever we issue a cut-out list some of our friends take exception to it on the ground that we have cut out some very fine songs or instrumental selections. In the cut-out list of Foreign Records on page so there are some splendid Records, but they have not been selling as largely as we hoped, and we are eliminating them to make way for our new French, German, Polish, Italian and Scandinavian Records. These new foreign ones are necessarily more up to date and likely to be more universally popular. If we retained all the Records we make, the printing of catalogues and incidental lists, which is already a matter of some complexity, would be a difficult and extensive task. It would be, too, a distinct hardship to progressive Dealers, who want to carry as large a stock as possible, if we allowed the list to grow to unwieldy proportions, either in domestic or foreign selections.

A much wider interest is being taken by the public in foreign selections. Dealers who have seen the possibilities that lie in pushing such Records, have been delighted with the results; and it is largely on this account that we have determined to list only such songs or instrumental selections as will increase the desire of the general public to hear all that is best of the foreign records. The opinions we have received on the merits of these German and French records, some of which have been printed in THE MONTHLY, go to show that they will be much better sellers than those which they replace.

An Annoying Delay

The following letter is self explanatory:

TO THE TRADE.

September 10, 1907.

Having experienced trouble in obtaining proper raw material for the new style horn cranes, we find it will be impossible to supply the entire trade with the machines containing the new style horn equipment in time to be put on sale September 16th, as originally intended. For this reason we will extend the date given in our letter of July 23rd, from September 16th to October 1st, and up to that time you will be permitted to sell Edison Phonographs with the old equipment and at the same list prices as heretofore. After October 1st all Edison Phonographs must be equipped and sold with the new equipment and at the new list prices. Should you require any machines with the old equipment to fill orders to September 30th, we can supply them immediately upon receipt of order, but would request that you indicate on such orders, "Ship with old equipment" to avoid any possibility of delay or error in filling.

We also find it will be impossible for us to get out the new Agreements in time to take effect before October 1st. They will therefore bear October 1st dating, and will take effect on that date.

F. K. DOLBEER,
General Manager of Sales.

When we settled upon September 16th as the date when the new equipment would go into effect, there were two reasons which actuated us. First, we considered that we had given ample time for all Jobbers and Dealers to get rid of the old style stock and start in with the new without suffering any inconvenience. Secondly, we thought by that date we should be ready to fill our orders.

By an unforseen and unforseen inability to obtain certain manufacturing necessities, we have been obliged to postpone the change until October 1st. It is a disappointment to us and we are sure that it will so be felt by progressive Dealers and Jobbers, who were welcoming the new equipment as an increased attraction. But to those Dealers and Jobbers who were not so much inclined to be pleased at the innovation, this delay gave them the opportunity they longed for. They have had two extra weeks in which to clean up the old stock and get off with the old lines before taking on the new.

There is no question whatever in the minds of those who have seen the new equipment, but that it will prove very popular. The Phonograph presents a much more attractive appearance with the new horn, and the tone is greatly improved thereby. Add to these improvements the certainty that the coming season will be record breaking from a sales point of view and then, if you have not done so already, order largely and well.

Important Changes

Following is a copy of an unusually interesting announcement mailed to the entire trade under date of September 10th:

TO THE TRADE:

Orange, N. J., Sept. 10, 1907.

On and after this date Mr. C. H. Wilson, formerly General Manager of Sales, will assume the position of Assistant General Manager, with offices located at our factory, Orange, N. J., and Mr. F. K. Dolbeer will assume the position of General Manager of Sales, with offices at our new office building, No. 10 Fifth Avenue, New York City. Until further advised Mr. Dolbeer will also continue as Manager of Credit Department.

Hereafter please address all orders, remittances, telegrams and general correspondence to National Phonograph Co., Orange, N. J., instead of to our New York office, as heretofore.

W. E. GILMORE,
President.

The announcement was interesting because of the prominent part that both Mr. Wilson and Mr. Dolbeer have taken in the affairs of this company and because of their extended acquaintance in the trade. Mr. Wilson became Manager of Sales in 1898, succeeding C. E. Stevens, and has since filled the position with signal success. Mr. Dolbeer became Credit Manager when the Credit Department was organized in 1899, and has been the only manager that the department has had. His direction of its affairs has been an important factor in the success of the company.

The attention of the trade is particularly directed to the request that all orders, remittances, telegrams and general correspondence be addressed to Orange, N. J., instead of the New York office, as heretofore. With the promotion of Mr. Wilson and Mr. Dolbeer and the removal of the New York office, from 31 Union Square to our new building at 10 Fifth avenue (illustrated and described on another page) it was decided to move the Sales and Correspondence Departments to Orange. Therefore, the change in the destination of orders, correspondence, etc. The Sales and Correspondence Departments are located on the first floor of the new office building, with A. C. Ireton, Assistant Manager of Sales, in charge.

New Edison Jobber

Arthur H. Smith, doing business at Smith's Phonograph Co., at 828 West Main street, Oklahoma City, Okla., became an Edison Jobber during the past month.

Sign Now, Mr. Dealer—Don't Put It Off

Just as soon as you have read over the New Agreement, sign it without delay and mail it to your Jobber. He will forward it to us. This will keep you in a position to purchase goods of our manufacture and continue in good standing as a Dealer.

Do It Now, Mr. Dealer—Don't Delay

Printed Matter

With this issue of THE PHONOGRAPH MONTHLY we are mailing a copy of the new Phonograph Catalogue, Form 1235, which gives correct illustrations and detailed descriptions of each of the various types of Edison Phonographs with the new equipment. We began on September 16th making shipments of these catalogues to Jobbers on the Pacific Coast, and expect to reach the Eastern Jobbers by October 1st. We have allotted a fair quantity to each Jobber. This quantity, however, is only sufficient to enable Jobbers to supply Dealers with a few copies for store use. It will not be possible for Jobbers or Dealers to use them for circularizing purposes. A Jobber doing so and thereby failing to furnish his Dealers with a limited number will be regarded as doing something to the detriment of our interests. We are urging Jobbers to see that their Dealers get some copies as soon as their supply is received and we think that Dealers generally may rely upon their doing so. It may, however, be some days after the 1st of the month before Jobbers can do this. Delays may occur in the catalogues reaching them and Dealers are urged to be reasonable in their expectations.

Except for the illustrations and descriptions of the several Edison Phonographs with the new equipments, the new Phonograph Catalogue has not been materially changed. The introductory matter has been rewritten, the descriptions have been written in a different style, and certain changes have been made in the descriptions of several accessories to bring them down to date.

The new style Edison Ideal Phonograph appears in this catalogue for the first time.

The trade is advised that Form No. 1060, a folder with the caption "Four Irresistible Entertainers," is now out of print and can no longer be supplied by the Advertising Department.

The various changes in prices, discounts, equipments, etc., will make it necessary to reprint a number of forms such as discount sheets, price cards, electrotype catalogues, etc. This will be done as rapidly as possible, and the trade advised when they are ready. A new Foreign Record Catalogue will also be printed in the near future, and the Record Order Sheet covering the foreign selections will also have attention.

A new form of printed matter has been shipped to Jobbers with their orders for October Records. It is a show-card printed in two colors and is intended to announce the arrival of the new Records. It is headed "October Hits," and is illustrated with a sketch of two vaudeville singers. These cards cannot be mailed. They can only be had through Jobbers, who are expected to enclose one with each shipment of new Records to Dealers. Unless Dealers order new Records they do not need these cards. If the use of this form can be confined to these lines it will be continued; otherwise not. Jobbers asking for a larger quantity than we have allotted them must state the number of Dealers buying new Records of them each month.

Edison Phonograph Monthly

VOL. V. October, 1907 No. 8

General Prosperity

It might be urged by some that it is no function of a trade paper devoted to the interest of the Edison Phonograph to congratulate its readers on the prosperity of the country at large. This would be a wrong view of the case entirely; for whereas the newspapers are first to trumpet forth stories of trouble that make the business man tremble, the trade journals are the best indications as to the real prosperity of a country.

All Dealers in Edison goods should congratulate themselves that this general prosperity shows every sign of steady increase, for it means the particular prosperity of the class of goods in which they are interested. And every thing points to this coming season easily breaking the record of last. It must inevitably be so. No other industry can compare with it in steady and rapid growth. The Phonograph saw the cycle craze come in, mount to dizzy heights and then fall to vanishing point. It has seen the birth of the automobile industry; but vast and astonishing as this has been, its general prosperity does not compare relatively with that of the Phonograph, which has never looked back, and whose each successive year has beaten the last.

If every Edison Dealer could see our factories and be shown how the enormous plant has grown from a few lumber erections to the tremendous city of concrete it now is, they would be more impressed by the spectacle than any amount of mere description makes possible. We never like to state definitely how many Records or Machines are turned out daily, because the liberal estimate of yesterday is conservative in the light of the morrow. But we can assert without fear of contradiction that the output, gauged not on our enthusiastic hopes, but on the matter of fact orders of Jobbers, are ahead of anything we could have predicted a year ago. And the Jobbers in their turn do not order on mere speculation, but are actuated by the Dealers, who are growing up around them in village, town and city this steady demand for Edison goods.

Instalment Sales Make Increased Record Sales

C. W. Clokey, the first Edison Dealer to introduce talking machines into Wichita, Kas., has been doing a very big Edison business during the summer months. In fact he was compelled to telegraph for extra machines to be sent on to him by express. In common with many other progressive Dealers he now sells on the instalment plan and says he would rather sell in this manner than by cash payment, owing to the increased Record sales to be made on that account. His customers almost invariably ask as they come in each week to pay their instalments, "Have you anything new?" On hearing new Records they seldom go away without ordering a few.

Wedding Marches by Phonograph

So busy has the Recorder of Deeds, Kansas City, Mo., been kept by loving couples intent on being made one, that there is a suggestion to use the Phonograph to play the wedding march as the blushing pair are ready to leave the office. This will probably lead to its use in other similar cities and Dealers might make sales in offices where marriage ceremonies are frequent.

Dealers should read the New Agreement carefully, sign and forward it to their Jobbers without delay.

New Trade Prices on Records

The following is a copy of a letter mailed to all Edison Dealers in the United States under date of September 18th:

TO RETAIL DEALERS.

ORANGE, N. J., September 18, 1907.

We beg to notify you that on and after October 1st, 1907, the net price of Edison Gold Moulded Records to Dealers will be twenty (20) cents each, the list price to remain as heretofore at thirty-five (35) cents each, or four dollars and twenty cents ($4.20) per dozen.

There will be no change whatever in the price of Grand Opera or Concert Records.

We would respectfully advise that your Jobber will rebate you one (1) cent per Record on all Records (except Grand Opera and Concert) shipped and billed from September 1st to September 30th, inclusive.

This change in price is to be made effective not only to insure Dealers a better margin of profit, but to cover any possible loss by breakage in transit, and from this date your Jobber will absolutely refuse to entertain or make good any claims for breakage in transit.

We still purpose replacing any and all Edison Records that may be received in a defective condition through manufacturing causes.

NATIONAL PHONOGRAPH CO.,
F. K. DOLBEER,
General Manager of Sales.

This reduction in the price of Edison Records to Dealers is but another of the many moves made by the National Phonograph Co. to advance the interests of those assisting it in marketing Edison goods. The reduction was made practically unsolicited, for the present margin of profit to Dealers was regarded as liberal and few had any idea of asking for a better one. We have heard from time to time complaints about Records broken in transit and we have been urged to take some steps to compensate the Dealers for such losses. But there has not been enough of such breakage to cause much dissatisfaction. The breakage has not by any means equaled the five per cent. reduction represented by the new price. Therefore the greatest part of the reduction is an unquestioned move to give Dealers a greater margin of profit.

It would be a false pretense, however, to claim that we have made this reduction from philanthropic motives. To class it as selfish would come nearer to the truth. The principal reason for it is to increase the volume of our Record sales. Probably to a greater extent than any other company in this country selling goods on similar lines, does the National Phonograph Co. have the good-will and co-operation of its Jobbers and Dealers. Our policies have been designed to secure such selling conditions as will enable our goods to be marketed everywhere at a uniform price, and to work with the trade in maintaining conditions that have been widely proclaimed as one of the best systems in the business world of to-day. To voluntarily reduce our own profits for the purpose of increasing those of our Jobbers and Dealers cannot fail to add to our strength with the trade, and we shall fail in our expectations if Edison Records are not sold to a greater extent than ever before.

The New Horns

Every new style Edison horn will bear a blue and gold label like the illustration herewith, differing only in the name of the machine. Gem, Standard, Horn and Triumph Phonographs will bear labels with names to correspond with the machines, while the Balmoral, Conqueror, Alva and Ideal will bear labels marked "Ideal." Each horn will be accompanied by a support

LABEL FOR NEW STYLE EDISON HORNS

that cannot be used with any other horn than the one it is intended for. It is important that the entire trade shall see that the right type of horn is sent out with each machine. To do otherwise will be considered a violation of contract. On October 1st the trade must add the new equipment to all old style machines on hand and thereafter sell machines in no other way. The new equipment is being put out for the benefit of all interests, and Jobbers and Dealers cannot co-operate more effectively than by doing all in their power to quickly establish the new conditions and then strive for their successful continuance.

SIGN AT ONCE.

Dealers are urged to read the New Agreement carefully, sign and forward it to their Jobbers without delay.

Bogus Parts

The letter printed below is fairly representative of many we receive concerning imitation parts for Edison Phonographs. It shows the extent to which Jobbers are permitting themselves to be imposed upon by manufacturers of such parts. We cannot believe that they buy them and in turn sell them to their Dealers knowing of their inferior character.

Decatur, Ill., Sept. 10, 1907.
National Phonograph Co., Orange, N. J.
Gentlemen:—Enclosed you will find ten (10) Edison Home feed nuts, which are imperfect. There is not a straight cut nut in the bunch. The cut seems to be deeper on one side than the other. If one of these nuts are used, one must twist the feed-nut spring to make the threads line up with the threads on the shaft. If you don't twist the spring the nut bears on one side only, thereby wearing both nut and shaft faster than under ordinary conditions. I bought these nuts from ——. Please send by return mail to good nuts to replace these.
SCHALL TALKING MACHINE CO.

The above letter was referred to Mr. Weber, our factory Superintendent, who at once detected the poor character of the feed nuts in question and replied as follows to the Schall Company:

Orange, N. J., Sept. 12, 1907.
Schall Talking Machine Company, Decatur, Ill.
Gentlemen:—I am in receipt of your favor of the 10th instant, also the 10 feed nuts for Home machine which were enclosed. In reply would say that these feed nuts are the worst bunch work of any imitation parts of Edison machines that have come to our notice for a long time, and of course, if they are put on any Edison Phonographs, they will ruin the threads of every cylinder shaft. I must say that these were not furnished by us, with the exception of the one which is o. k. in every respect, which we have no doubt, was not tested on a machine, and for any redress you will have to communicate with the —— ——, from whom you purchased the nuts.

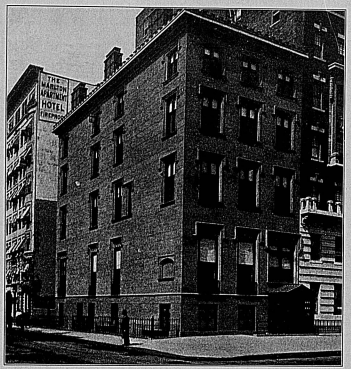
We are sending you herewith 10 feed nuts, for which kindly send us formal order.

NATIONAL PHONOGRAPH CO.,
PERSA WENES,
General Superintendent.

We print this correspondence for the purpose of calling the attention of the trade in a somewhat different manner to this most despicable character of substitution. It is despicable in the first place for manufacturers to turn out parts of such an inferior character, for they must know that to use them cannot fail to damage, if not absolutely ruin the Phonographs upon which they are used. It is a shortsighted business policy that induces Jobbers to buy these parts, for their sale cannot fail to re-act upon them as soon as Dealers buying them find out how they have been imposed upon. In the case above referred to, it is quite certain that the Jobber who sold these parts to the Schall Company has lost them for customers, and has lost the profits on a considerable quantity of talking machine goods, as an offset to the few cents profit made from the sale of ten imitation feed nuts. It is the intention of the National Phonograph Co., as soon as possible, to handle this subject in a manner to prevent the sale of bogus parts and insure the sale of its own, but, until it can do so in an adequate manner, it must ask the co-operation of Jobbers in buying such parts from us direct and of Dealers in refusing to buy parts from Jobbers until they have been assured of their genuineness.

A Warning

"We have received complaint throughout our territory in Indiana," wrote a Western Jobbing firm under date of September 18th, "that the Jobbers there are offering Dealers the initial purchase, with the privilege of returning whatever goods they cannot sell, after several months. This is entirely against your contract, as you will admit. Please advise us, whether you will permit it, and whether you will have the same stopped."



As the letter states, the practice referred to is a glaring violation of agreement and one that will not be permitted any longer than it takes to get the necessary evidence against the offender. If any Jobbers are following this plan they are warned that they must at once stop it.

Richard Carle Uses Edison Phonograph in "The Hurdy Gurdy Girl"

"We sold an Edison Standard Phonograph to Richard Carle for use in the first act of his show 'The Hurdy Gurdy Girl,' which has been playing in Boston all Summer. The machine has been in use the whole time and they find it a perfect success. The oddest part of the sale was that in timing the machine to be used in the first act, there happened to be a record of 'The Dream of the Rarebit Fiend,' which was just exactly what was wanted, and the comedian of the show has used it to dance by ever since it was installed."—*The Eastern Talking Machine, Boston, Mass.*

Our New Fifth Avenue Office

The New York office force of the National Phonograph Co. moved, on September 16th, from 31 Union Square to the new building, 10 Fifth Avenue, corner of Eighth Street, purchased more than a year ago in order that we might have a permanent headquarters, conveniently situated, and fitted up as we desired. The building is one of the old four-story, brown-stone mansions, in which, until the northward march of business drove the aristocratic New York higher up the same avenue, lived the wealthiest and best families. No. 10 was the town house of C. H. McCormick, the American Ambassador to France, and has been the scene of many brilliant functions.

It has been magnificently decorated for our use and there are few offices that can compare with it in this respect. The greatest credit is due to William Pelzer, of our Legal Department, under whose direction the alterations have been carried out and to whose good taste is due the excellent effects obtained.

The entrance, formerly at the top of a flight of stone steps, is now on the ground floor, where the general waiting room is situated. An ornate portico protects the entrance door.

The second floor is chiefly taken up by three large and lofty apartments, opening one into the other, which can be closed at will by huge sliding doors of polished mahogany. The first of the three is the office of F. K. Dolbeer, General Manager of Sales, who is also retaining for the present his former position of Manager of the

Credit Department. The middle room is occupied by Walter Stevens, General Manager of the Foreign Department, and William Pelzer, of the Legal Department. The rear room will be the town office of W. E. Gilmore, President of the National Phonograph Co. These three apartments are panelled with finely polished mahogany and the walls are covered with dark green figured French tapestry. The floors are of hard wood and covered with beautiful Oriental rugs. The mouldings of the ceiling are noticeable, while the mantels in all three rooms, but especially the front, are superb specimens. A Board Room is in the rear. What was formerly the entrance hall of the mansion is now used as a small reception room.

The third floor is devoted principally to the clerical staffs of the Credit and Agreement Departments. The New York office of the Manager of the Advertising Department, whose headquarters are in Orange, N. J., is also located on this floor.

The fourth floor is occupied by the staffs of the Commercial Department and the Edison Manufacturing Co. There are offices for the two District Managers of the former, and for the Sales Managers of the Edison Battery and the Edison Kinetoscope, in connection with the latter.

The fifth floor is occupied by the Bates Manufacturing Co., and such parts as are not used by it will be devoted to needs that may arise later on. An electric elevator has been installed and suitable quarters found for the engineer in charge of the building. In a word, none of the conveniences found in modern office buildings are lacking.

Our out-of-town friends may reach the new location by taking the Eighth Street cars from Broadway, or the subway, or by taking the Sixth Avenue elevated cars to Eighth Street and walking east one block. We hope that Jobbers and Dealers generally will more than ever find an opportunity to call at our New York office.

The Point of View

"My dear," murmured the sick man to his wife, "I am nearing the golden streets. I hear strains of sweetest music, unearthly in its beauty, I——"

"John," said the wife, "what you hear is a Phonograph in the next flat."

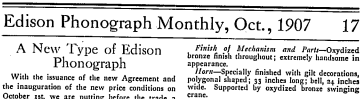
"So it is. Darn those people anyhow. No consideration for their neighbors. Go and tell 'em to stop that infernal racket at once."—*Exchange.*

Advertising Picture Postals

William C. Yeatts, Edison Dealer, of Bendersville, Pa., sends some clever specimens of picture postals which have brought him excellent results. "I find," he writes, "that this is about the best way for me to advertise the Edison Phonograph and Records. I have been doing so for about a year and it is bringing me in good results."

One card depicts a man, evidently home rather late, creeping upstairs, shoes in hand, for fear of waking some one up. "I hope I shall not disturb you" the card reads, "but listen! When you have made up your mind to buy a talking machine drop in and buy an Edison." Another shows a giraffe and under the caption "Within Reach," is written, "The Edison Phonograph is within reach of all if you only knew it. Call and hear it play, sing and talk. We give a free concert on Wednesday evening at 8:30 P. M. Come and hear it." The third card shows a man driving an automobile, and has this upon it. "You auto come to W. C. Yeatts' store and hear the Edison Phonograph—the best machine on the market."

Unusual cards like these rivet attention, fix the Dealer's name in the mind and lead most surely to business. Mr. Yeatts has been trying the plan for a year and has found that it pays. Probably if he had tried it only a week or so he would have traced no very definite results, for all advertising to be worth anything must be persisted in. The small Dealer may be benefitted even by an occasional advertisement in his local paper or by good bill board publicity, but he will be very much more helped if he determines to make an effort to advertise consistently and watch the results carefully.



John Wanamaker, who was perhaps the first to start modern department advertising along the lines it is now conducted in, whose advertising has always been a model for other merchants, has very decided views about advertising.

"If there is one thing on earth that a 'quitter' should leave alone, he says, "it is advertising. To make a success of advertising one must be prepared to stick like a barnacle on a boat's bottom. The advertiser cannot hope to reap results commensurate with his expenditure early in the game. Advertising doesn't jerk; it pulls. It begins very gently at first, but the pull is steadv. It increases day by day and year by year until it exerts an irresistible power."

Although Mr. Wanamaker was probably thinking of the great national advertisers who, like ourselves, spend enormous appropriations, the principle of sticking to the game is as much applicable to the small Dealer, with his few lines in the local paper, as to the biggest Jobbers.

A New Type of Edison Phonograph

With the issuance of the new Agreement and the inauguration of the new price conditions on October 1st, we are putting before the trade a more expensive type of Edison Phonograph to meet the long continued demand of Jobbers and

Dealers for a type of machine that will fill the requirements of any home, no matter how handsomely furnished. The new machine will be known as the Edison Ideal Phonograph, and its retail price will be $125.

The half-tone illustration of the machine shown herewith does not do it justice because of the inability to show the colors of the cabinet and the finish of the machine. The metal parts are finished in oxydized bronze. The cabinet is of mahogany, made of a special design and highly polished. The machine also includes many other attractive features. This new type of Phonograph has been included in the new Machine Catalogue now being shipped to Jobbers and the latter are being urged to order at least one machine so that Dealers may have an opportunity of inspecting it. It will be sold subject to the same discounts as all Edison Phonographs, except the Gem and the Bijou. A detailed description of the new machine is as follows:

Cabinet—Mahogany, new design with heavy molding and cover to match, both with special piano finish. Cabinet has a hinged frame to which the entire Phonograph mechanism is firmly fastened, and which may be turned back, permitting convenient inspection of the motor.

Finish of Mechanism and Parts—Oxydized bronze finish throughout; extremely handsome in appearance.

Horn—Specially finished with gilt decorations, polygonal shaped; 33 inches long; bell, 24 inches wide. Supported by oxydized bronze swinging crane.

Standard—Oxydized bronze, highly polished, runs on centers supported by swinging arm or end-gate, insuring steady and uniform reproduction. Will play Edison Standard Records and Edison Grand Opera Records.

Motor—Powerful triple springs, with improved motor suspension. Runs noiselessly, regulates perfectly, and can be wound while running. Has removable steel bushings, belt tightener and other useful devices.

Reproducer—Model C, with highly polished, button-shaped sapphire, which does not scratch or wear the Record; will last indefinitely and does not require changing.

Recorder—An Improved Edison Recorder, for home Record making.

Shaving Device—Has device for shaving wax blanks.

Size of Machine—Height, 14¾ inches. Base, 18½ x 12¾ inches. Weight, net, 53 lbs.; gross, 100 lbs. Packed in one case. Horn packed in crate, gross weight, 24 lbs.

Phonographic Advice

This is the title of a little pamphlet sent out by Marks Silverstone, Edison Jobber of St. Louis, Mo., containing useful advice on the management of Phonographs. So many times the Phonograph is subjected to unjust charges due only to the carelessness of the owner who perhaps has allowed oil to get on the belt or some equally trivial thing due to lack of knowledge, that the little booklet will be very useful.

To Add New Equipment to Present Machines

We reprint below the information published in the September PHONOGRAPH MONTHLY, giving instructions for adding the new equipment to such of the present types of machines as Dealers have in stock. The new parts consist of a horn, a crane and pieces for attaching the crane to the cabinet. The latter pieces include a metal holder, with screws; a crane hose to hold the crane and keep the machine from tipping over, and a brace to keep the upright rod of the crane in a rigid position. Following are the instructions for attaching the crane holder:

Slide the reproducer arm to the right as far as it will go and fasten it down to the end gate latch with a rubber band or string. Turn the cabinet over on its back, leaving its cover on and catches locked. Place the crane base inside of the metal holder and hold both parts against the bottom of the cabinet, keeping the center of the holder the right distance from the left hand edge of the cabinet base. See that the holder is held so that the base stands at right angles, or perfectly square with cabinet, and mark location of screw holes on base of cabinet. Remove the holder and crane base and with a No. 40 twist drill or the same sized brad awl, drill the four holes into base of cabinet one-half inch deep at the places previously marked. Screw on the crane holder. The front edge of crane holder on all cabinets should be ⅜ of an inch back of the edge of cabinet base.

The brace is not fastened to the cabinet, but is pushed over the top edge of the cabinet by lifting up the lid. It should then be placed in such a position that the upright rod of the crane will stand perpendicular.

The distances from the inside of cabinet base to center of holder should vary in each machine as follows: Standard, 3¼ inches; Home, 7⅛ inches; Triumph, Alva and Concert, 7¼ inches; Balmoral and Conqueror, 12½ inches.

GEM MACHINE CAUTION.

The hole in the body of the Gem Phonograph, for holding the horn crane, has been increased from 3-16 to ¼ inch on all new machines. To equip machines made previously to this change, it will be necessary for Dealers to order special horn cranes with the end made 3-16 inch.

His Wife—Why is it you never start up the phonograph any more, John?

Her Husband—There is no harmony in two talking-machines running simultaneously, my dear.—*Music Trades.*

Correction

We sometimes wonder if the trade reads the PHONOGRAPH MONTHLY as it appears from month to month, but when an error creeps into its columns we have abundant evidence that it is widely read. In an article in the September issue this statement was made:

"By the terms of your agreement you are not permitted to take machines in part exchange, so there is no lessening of the profit in these transactions in any manner."

Every Jobber and Dealer knew that this was contrary to Section 4 of the Dealers' Agreement, and no inconsiderable number promptly "jumped" on us. Section 4 covered the matter as follows, and the same sentence has been included in the new Agreement:

"This does not prohibit the acceptance of a talking machine at full list price, if good as new, (or less cost of necessary repairs to make good as new) in exchange for an Edison Phonograph sold at full retail list price; but does prohibit the acceptance of Records or Blanks of any kind, at any price, in exchange for Edison Phonographs, Records or Blanks."

No More Rough Blanks

With the adoption of the new Agreement we have decided not to sell rough Blanks, and after October 1st we will furnish shaved Blanks only.

Up to the Top Notch

"Yes, Sir! I have purchased an Edison, Home style, and it is the biggest bargain I have ever had for anything near the price paid for it. I have also secured a good selection of your excellent records, and along with the Phonograph, I must say I have what can well be called an amusement producer that is up to the top notch."—*Walter C. Smith, Lynchburg, Va.*

Phonograph at Gospel Meeting

To help the Sunday services of the Gospel wagon attachment of the Market Street Mission at Morristown, N. J., Supt. Ironsides used a Phonograph yesterday, and sacred music pealed from a large horn. It worked to perfection. Local soloists who generally do all the necessary singing simply looked on. Hereafter the Gospel wagon will carry the Phonograph on all mission work.—*New York World, Sept. 16th.*

Music is one of the fairest and most glorious gifts of God, to which Satan is a bitter enemy; for it removes from the heart the weight of sorrow and the fascination of evil thoughts.—*Luther.*

Among the Jobbers

Considerable alteration has taken place during the past few weeks in the appearance of the store occupied by Louis Buehn & Bro., Edison Jobbers, at 45 N. Ninth street, Philadelphia. New booths have been erected and the interior largely remodelled. This has been necessitated by the growth of their business. For the same reason a third floor has been added, which will be devoted entirely to wholesale stock.

"I have never seen Dealers more enthusiastic in regard to the present conditions and the prospect of a fine fall trade," says Mr. Towell, of the Eclipse Musical Co., Cleveland, O., who has just returned from a business trip. Mr. Towell declares that business is 50 per cent better than it was a year ago at this time.

The Eastern Talking Machine Co., of Boston, Mass., Edison Jobbers, has been utilizing the quieter months to carry out alterations necessary to steadily increasing business. An electric passenger elevator is being installed and the need of additional room has resulted in the opening of a new salesroom.

Mr. Ketterer, Manager of the talking machine department of the Conroy Piano Co., Edison Jobbers, St. Louis, Mo., declares that their fall business has already opened with such a rush that they confidently anticipate that this year's business will by a large margin exceed that of previous ones. They are adding more record bins and have determined to carry the largest stock of Edison Phonographs and Gold Moulded Records in the history of the firm. The new bins have a capacity of nearly 50,000 Records.

The Boston Cycle and Sundry Co., Edison Jobbers of Boston, Mass., anticipate a splendid fall business. Manager Andrews said recently, "I think this is going to be a record breaker for the talking machine business. I find Jobbers throughout the country feel the same way."

R. S. Williams & Sons Co., Edison Jobbers, of Toronto and Winnepeg, had a fine display of Edison goods at the recent Canadian National Exhibition, and much interest was aroused thereby.

Harger & Blish, Edison Jobbers, of Dubuque, Ia., have recently decided to lease the central store in the new Security Building. Extensive alterations are to be made and it is anticipated that when finished it will be one of the finest in the State. On the fourth floor a large room will be fitted up as a recital hall and will be equipped to seat some two hundred and fifty people.

L. E. McGreal, Edison Jobber at Milwaukee, did an unusual bit of advertising last month. He printed a list of his Dealers in Wisconsin and the Northwest, with a caption stating that the public could buy as cheaply from them as from him, and he distributed 100,000 throughout his territory.

About Our Advertising

We might be criticised for not making more of a fuss in each issue of THE PHONOGRAPH MONTHLY about the advertising being done for the furtherance of our business, and we could hardly deny the impeachment. The real reason why we do not say more about it, is because the demands upon the columns of THE PHONOGRAPH MONTHLY every month seem to crowd out reference to it. The work of getting our catalogues and other printed matter in editions that run into millions goes on quite the same as if we said more about it. There is no let up in bill-posting, railroad bulletins, special electric signs, etc. The magazine advertisement shown on page 24 of this issue, appeared in the publications named below in the latter part of September and October:

American, Argosy, Associated Sunday Magazines, Century, Collier's Weekly, Cosmopolitan, Everybody's, McClure's, Metropolitan, Munsey's, National, Pacific, Puck, Red Book, Review of Reviews, Saturday Evening Post, World To-day, Youth's Companion.

In October we will begin our annual newspaper campaign, using from one to three of the best newspapers in every jobbing city.

Newspaper advertising has been a feature for the past two years and it will be larger and better than ever this fall and winter. More will be said about advertising next month.

Additional Boiler Equipment

During the past month the erection of an additional boiler house was begun at our Orange factory. It is being built of reinforced concrete, like all the other buildings now in process of erection. It will be 25x60 feet in size and about 40 feet high. It will be at once equipped with three Climax boilers of 750 horse power each.

Record No. 12896 Cut Out

The trade is advised that we have no more moulds of French-Canadian Record No. 12896 "Ayez pitié d'elle," by F. Hartmann, and as soon as our present stock of this selection is exhausted no further orders will be filled. It will be omitted from the next Foreign Record Catalogue in addition to the list printed on another page.

Cut Out List

Edison Gold Moulded Records
Foreign Selections

The Trade is hereby advised that when our stock of the following Foreign Selections is exhausted no further orders will be filled. These selections will be omitted from the next edition of our Foreign Catalogue.

12950	Has Anyone Been Asking for Me? (*British*)	*Mackay*

Collections of Rare Records

There is no doubt but that as home recording becomes more understood and carefully studied, collections of records will be made just as to-day collections of rare autographs arouse much interest and obtain enormous prices when put at auction. The prices of records should be infinitely higher for, after all, what value has a scrawling signature when compared with the living voice? What would not Americans give to hear Poe recite some of the poems which have placed him among the immortals, or what value would be placed upon a Record of Longfellow or Emerson?

Some years ago when the Edison Phonograph was making a great stir in the British metropolis, Robert Browning, the poet, was asked to make a record. His memory was prodigious and on being pressed to recite his celebrated poem, "How we brought the good news to Ghent," started off boldly, but, owing perhaps to the novelty of the occasion, utterly forgot the third line. His attempts to recall it and his interjections were faithfully recorded. He apologized to his hostess, but she said she would value it all the more on account of its uniqueness. Browning is dead and gone, and there are Browning Clubs all over the country, but what value could be placed upon the record he made? In London there is a private collection—one of the most interesting and valuable in the world—which contains a number of records made by Lord Tennyson, the late poet laureate. One of the finest of his was "The Charge of the Light Brigade." The same collection has an address in the eloquent language and vibrant voice of the great statesman Gladstone. There are records made by the great African explorer Stanley. The Prince Louis Napoleon, only son of the Emperor of the French and the Empress Eugenie—the unfortunate prince killed during the Zulu War,—made a record in his native tongue. Florence Nightingale made one in 1890 for the exhibition held in London for the benefit of the surviving heroes of Balaclava (the charge of the Light Brigade) and contained the following words from that pioneer of army nursing: "God bless my gallant comrades of Balaclava and bring them safe to shore—Florence Nightingale."

It is easier to make records now than it was when Florence Nightingale said this, and cheaper too. Record collecting is certainly the most interesting collection possible and would gain many devotees if sufficiently known. Dealers should never lose an opportunity for talking home records to customers. The fact that they cannot approach the professional record has nothing to do with it. The little affectations of voice, strange inflections, etc., which would never be found in the professional record would add to the value of the home record, for it would add to the naturalness and lifelike effect produced.

Love, Religion and Humor

Each line of this poem is the name of an exceptionally fine Record. The first letter of each line, reading downward, spells "Edison Record."

LOVE.

Eileen Alanna. (9264)
Dreaming love of you. (9219)
In the Valley of Kenmare. (8811)
Somebody's waiting for you. (9476)

RELIGION.

Crowned Christian Soldiers. (8465)
Nearer My God to Thee. (8170-7507-8022)
Ring the Bells of Heaven. (8854)
Eternity—Eternity. (9424)

HUMOR.

Talking Machines and Posterity

It is a regrettable fact that people, as a rule, are apt to regard the talking machine chiefly as a source of entertainment and amusement—as a mechanical means of reproducing vocal and instrumental music—but never as an instrument whose real value to the world is, paradoxically, at once a matter of certainty and of conjecture.

It has winged victorious flights through all the phases of instrumental and vocal music, from the compositions of the postasters to the works of the great masters, whose brains shaped out the most classic and stupendous of the grand operas. It has become a force in the educational world, in business life, in religious circles. In every walk it has achieved signal success—and the end is not yet.

Its value to history can be appreciated at a glance. For example, there have arrived in this country Records of the voice of Emperor William of Germany, which will be preserved in the Congressional Library and at Harvard University. This marks the beginning of a collection, which, it is said, will be made of the voices of famous people of the present and of the future to be kept as historical witnesses for coming generations.

The magnitude of the scope of this plan cannot be fully estimated at first thought. Think of the lifelike tones of our own Presidene Roosevelt a hundred or two hundred years hence proclaiming his favorite sayings before an audience to whom history's pages have made him a familiar object! Instead of being compelled to accept another man's view of him, or puzzling bewilderingly through a dozen varying impressions, one may judge for oneself in a manner that cannot fail. It is wonderful—incomprehensible—a miracle, in truth!

If we would get even a slight concepsion of the feeling of posterity, let us consider for a moment what thoughts would overcome us if we to-day could hear the even tones of the great patriot Washington or the kindly Lincoln, whom we love and reverence solely from what we have heard and read of them. If patriotism beats quicker in the heart of the American when the name or the portrait of Lincoln comes before him, how much vaster would it become if the voice of the Great Martyr should speak its measured accents to the living ear?

The patriotism of the future, fed on the speech of our present day heroes, will make the nation greater and broader and richer than any thought can now measure.

So herein lie the human aspects of the talking machine—its value not only to individuals, but to nations, besides which its entertainment of the passing moment is as an atom of time to all eternity. For what is the present to the future—what are a few of us to-day to the hundreds of millions of to-morrow?—*Musical Courier.*

SUSPENDED LIST, OCTOBER 1, 1907.

Supplementary to list of Suspended Dealers dated June 1, 1907, which is still in force and which must be given the same attention by Jobbers and Dealers as if reprinted here.

Hear The Edison Phonograph

HAVE you a Phonograph? How long has it been since you have critically listened to one? Do you know how good The Edison Phonograph is today, how pure the tone, how satisfying the reproduction? If you have one, you know. If you have not one, you ought to know—it's easy to know. Somewhere near you there is an Edison Store. Go there and hear. Learn how inexpensive it is for a complete outfit, including records—and how favorable the terms. Then think of the pleasure you can give yourself, your family and your friends with the world's best music, its most catchy songs and the monologues and dialogues of its funniest comedians. And after doing all this you'll buy one—you simply can't help it.

In the Words of Others
"Sell I.C.S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 80 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for you? Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

Edison Phonograph Monthly

VOL. V. November, 1907 No. 9

New Equipments a Great Success

Many thousands of Edison Phonographs with the new horn equipment have been shipped from Orange to Jobbers, have been passed along by the latter to Dealers, and by the latter have been sold to satisfied patrons, and the success of the new outfit seems an assured fact. Putting the new conditions into effect, however, has been complicated by such a heavy increase in orders that it has not been possible to supply the trade with sufficient machines to know just how great a success the new outfit really is.

From a trade standpoint its approval has been enthusiastic and complete. Considering the almost radical change in equipment and price, the adverse opinions have been so few as not to be worth consideration. Even these critics refer to minor features of the change, and not to the main issue. Just as soon as manufacturing delays can be overcome we are sure that all friction will pass away and that the sale of Edison Phonographs will be greater than ever before.

Jobbers and Dealers can greatly facilitate the working out of the new conditions by talking of them and advertising them along the lines of the following phrase from a trade circular issued by Harger & Blish, of Dubuque, Ia.:

"The new horns with which 'all Edison machines are now regularly equipped are made up from special designs approved by Mr. Edison and are so constructed as to prevent all horn vibration and blasting—thereby producing the purest tone quality possible. These horns are finished in black with gilded decoration. Not only have they added tone-full to the appearance of the machine, but a hundred-fold to one's enjoyment by this greatly magnified sound and sweetness."

It is talk of this kind that does much to assist in smoothing out the lines and make the trade enthusiastic in pushing Edison goods.

We are in splendid shape for filling Record orders and are thankful that the trade can find little fault on this score. The Record business was not affected by the new horn equipment, and although orders have been heavy, we have had no trouble in filling them promptly and completely. The factory output of Records for the past two months has been the greatest in the history of the business, but it has been difficult to accumulate a stock to take care of the exchange proposition referred to below, which is always followed by a large volume of business in spite of the liberal terms upon which the exchange is made. In spite of the present great Edison business, the outlook for the future never looked brighter.

The Exchange Proposition

The Exchange Proposition, treated in detail in another column, is one of the many features of the business of the National Phonograph Company which makes it strong with its Jobbers and Dealers. It provides the yearly opportunity of the trade of returning to us all surplus, cut out and defective Edison Records at no other expense than packing them and paying freight charges on them. It is true that Jobbers and Dealers are required to order two new Records for every one returned, but ample time is given in which to do it so that the larger order works no hardship to any one. When we state that the last exchange proposition that we had brought back one and one-half million Records, some idea will be gained of the stocks carried by the trade and of the loss to this company that the exchange causes. It is really a loss of the Jobber's price on each Record, for practically all of the new orders given in exchange would come to us anyway. The plan is really nothing else but a gift of so much money to our trade, and we doubt if a parallel to it can be found outside of the talking machine industry. It is a liberality, however, that pays handsomely in the cordial relations that exist between the trade and ourselves.

Foreign Selection Cut-Out

The trade is advised that as soon as our stock of Record No. 18541, El Rey que Rabia—Romanza (Mexican) *Guyzueta*, is exhausted, it will be omitted from catalogues.

The New Edison Gold Moulded Records
Advance List for January, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before December 23d, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on December 23d. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8. A. M. on December 24th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after December 20th, but must not be circulated among the public before December 24th. Jobbers are required to place orders for January Records on or before November 10th. Dealers should place January orders with Jobbers before November 10th to insure prompt shipment when Jobbers' stock is received.

9722 In the Clock Store — **Edison Concert Band**

A descriptive selection, in which are introduced the ticking and striking of various clocks from the ordinary morning alarm to the imposing musical clock, chiming "Blue Bells of Scotland." A cuckoo clock is likewise heard. Our Recording Department deserves great credit for the unique way in which the numerous effects are produced. Composer, Charles J. Orth; publisher, Carl Fischer, New York.

9723 Down in the Old Cherry Orchard — **Frederic Rose**

A fascinating new rural ballad with a waltz refrain, sung by an artist who has not previously made a Record for us. Mr. Rose possesses a most entertaining tenor voice, which he displays in an unusual manner in the higher notes, of which there are many. We predict that he will make a host of friends through this most excellent initial effort. An exceptionally pretty orchestra accompaniment adds no little interest. Music, S. R. Henry; words, Alfred Bryan; publishers, Jos. W. Stern & Co., New York.

9724 Smile, Smile, Smile — **Ada Jones and Billy Murray**

It is seldom, indeed, that we are able to list a more tuneful selection, recorded in such excellent style, than in this offering by a duet team who have become widely popular. The song is one of the big hits from "The Rogers Bros. in Panama", the new presentation of these popular artists. The air is catchy and similar in character to the numerous songs which have made the Rogers Bros. famous. The words are quite in keeping with the pretty melody as the chorus which follows will attest:

I could learn to love you, dearie
When I see you smile,
There's a lock so loathful in your eyes
That could woo me you're native wile

Cuddle up beside me, dearie,
Hold my hands a while;
For I could learn to love you
When you smile, smile, smile.

Toward the end of the Record, a dance is introduced during which Mr. Murray enjoys a little joke at the expense of Miss Jones. Orchestra accompaniment. Music, Max Hoffman; words, Edward Madden; publishers, The Rogers Publishing Co., New York.

9725 She's Such a Love — **Albert Benzler**

An old time song and dance played as a bells solo, in strict time, and in that graceful manner which characterizes all of Mr. Benzler's work. The air is rather simple, but melodious, and sufficiently varied to sustain interest throughout the Record. Orchestra accompaniment. Composer, E. N. Catlin; publishers, Thompson & Odell, Boston, Mass.

9726 Dreaming — **Irving Gillette**

One of the most popular sentimental songs of the season, recorded in slow, dreamy time, to carry out the composer's idea as expressed in the refrain:

Dreaming, dreaming, of you sweetheart I am dreaming.
Dreaming of days when you loved me best,
Dreaming of hours that have gone to rest.

Dreaming, dreaming,
Love's own message I'm bringing
Yours have not changed, the old love still remains; dreaming.

Mr. Gillette's success with similar Records of this character prompts us to predict a most unusual sale for this one. The orchestra accompaniment is greatly enhanced by the addition

of bells, which are given prominence at intervals in the rendition. Music, J. Anton Dailey; words, L. W. Heiser; publishers, Jerome H. Remick & Co., New York.

9727 Who Do You Love? — **Collins and Harlan**

A coon song from the "Shoo Fly Regiment." Mr. Collins, as the sentimental coon, points out to his "honey" (Mr. Harlan) that the birds and bees and even the bull-frogs are "a-billin" and "a-cooin" and pleads with her to be his "lady love." She apparently does not readily reciprocate his affection, for when he asks, "Who do you love?" she replies in a most aggravating manner, "Well, I don't know." The song progresses in a happy vein, however, and it is to be assumed that the darkey is at last successful in his suit. The music is equal in every way to the past efforts of the same well known composers. Orchestra accompaniment. Music, J. Rosamond Johnson; words, Bob Cole; publishers, Jos. W. Stern & Co., New York.

9728 When It's Moonlight, Mary Darling, 'Neath the Old Grape Arbor Shade — **Manuel Romain**

The latest sentimental ballad by a popular writer, with the scene laid in "dear old Dixie." An absent lover sings of the maid he has left behind, and asks her to wait for him, "'Neath the old grape arbor shade." The many admirers of Mr. Romain's pleasing voice and clear articulation will welcome the Record as an excellent addition to their collections. Orchestra accompaniment. Music, J. Fred Helf; words, Bartley C. Costello; publishers, Helf & Hager Co., New York.

9729 Don't Get Married Any More, Ma! — **Ada Jones**

Vesta Victoria's songs are always interesting and humorous, and this one selected from her latest hits is no exception. As an imitator of this famous English vaudeville artist, Miss Jones has long ago established an enviable reputation. The words of the song describe Ma's matrimonial ventures, (no less than eight in all) and her daughter begs for a "permanent papa." Certain to rival the familiar "Waiting at the Church" in popularity. Music, Henry E. Pether; words, Fred W. Leigh; publishers, Francis Day & Hunter, New York.

9730 Mariutch — **James Bruckman**

Italian dialect songs appear to be quite the thing of late, but this one with the sub-title of "Make-a de hootch-a ma-kootch" is far more humorous than its predecessors. Mariutch has again strayed from her happy home and her once thoroughly miserable "Tony," who describes in rather uncertain English her doings at Coney Island, where she dances the "hootch-a-ma-kootch". Mr. Bruckman excels in Records of this kind, as has been proven by the success of his "Mariasinia" listed last month. Orchestra accompaniment. Music, Harry Von Tilzer; words, Andrew B. Sterling; publishers, Harry Von Tilzer Publishing Co., New York.

9731 O, Moment That I Bless — **Mr. and Mrs. Waterous**

This attractive selection of the semi-operatic class introduces two new artists to our catalogue. Mr. Waterous has a rich baritone voice, and Mrs. Waterous sings in a soprano voice, which shows to particular advantage in the duets. The song is arranged for alternate solo parts, with a charming duet finale that will win applause wherever played. Music, Chas. Dennee; words, Paul West; publisher, Arthur P. Schmidt, New York.

9732 Every Ship Will Find a Harbor — **Byron G. Harlan**

A stirring song, written in march time, is Mr. Harlan's solo contribution for this month. The story tells a pretty tale of a girl who hesitates to accept her lover, fearing that they will be "as a ship on a stormy sea." He re-assures her in the following attractive words of the chorus:

Every ship will find a harbor
Every kite a tail
Don't be sighing' don't be crying.
All is for the best.

I just want to see you smiling,
I'll do anything for you.
Every ship will Fi-d a harbor
And our ship will find one too.

Additional interest will be manifested in this selection, due to the fact that it is published by one of our oldest Philadelphia jobbers. Orchestra accompaniment. Music, Johann C. Schmid; words, Charles E. Baer; publishers, H. A. Weymann & Son, Philadelphia, Pa.

9733 Punch and Judy — **Edison Military Band**

A lively intermezzo by the writer of "Peter Piper" and numerous other instrumental compositions. It is one of those rollicking selections, which start the feet to unconsciously keeping time. Composer, S. R. Henry; publishers, Jos. W. Stern & Co., New York.

9734 When the Hammer on the Anvil Rings — **Ada Jones**

A new version of the "knocking" practise, telling in the first verse of the meeting of two women, who, as usual pass fluttering comments on the gowns and hats worn by each other, but when they part, "Bang! Bang! Goes the hammer on the anvil, you can hear it twenty blocks." The second verse is an admission by a member of the "sewing circle" that although their original intention was to sew for the Zulus, their object is not accomplished through their fondness for "knocking." Bits of the Anvil Chorus from Il Trovatore are introduced in a clever manner. Music and words, Jean C. Havez; publishers, Helf & Hager Co., New York.

9735 Some Blessed Day — **Edison Mixed Quartette**

A favorite hymn recorded in a polished manner by our Mixed Quartette. Our Record is arranged for incidental soprano solos and a soprano and tenor duet, with parts which in turn bring each voice into prominence. Orchestra accompaniment. Music, George B. Nevin; words, Rev. C. W. Ray; published in hymn books.

9736 Just Because He Couldn't Sing "Love Me and the World is Mine" — **Arthur Collins**

From the earliest days of song writing, coons have been refused by the objects of their affection for one reason or another, but to flatly turn down poor "Jim" simply because he couldn't warble as beautifully as his successful rival, seems like a real hardship to him. She not only broke his heart but,

She handed back 'im diamond ring,
And a wher de juicy fling,
He lost his future wife to be

And a chance of raising a family
Just because he could not sing
Love Me and the World Is Mine.

Mr. Collins sings the last line in falsetto, and pauses long enough to remark, "How can a gal expect a fellow to sing a song like that with two teeth out of the front of his face." Orchestra accompaniment. Music and words, Bert Fitzgibbon.

9737 The Rosary — **Hans Kronold**

Mr. Kronold's expressive playing of this fine selection for the violoncello will win for him many added laurels. "The Rosary" is universally known as a standard number—one of the kind that never grows old—and lovers of the better class of music will not overlook this Record. Piano accompaniment. Composer, Ethelbert Nevin.

9738 What Will Your Answer Be? — **Reed Miller**

As may be inferred from the title, this song is of a sentimental nature, and the question, "If I should whisper, Dear, I love you," is asked of the "girl" followed by this chorus:

What will your answer be, love?
What will your answer be?
It means the world to me.
Oh, I'm waiting patiently.

Don't send me away, love
Listen to my plea,
Only tell me stay, love
What will your answer be?

The music is superior to most popular ballads of the present day, and Mr. Miller's sympathetic style of singing it leaves nothing to be desired. Orchestra accompaniment. Music and words, E. V. Capero; publishers, Helf & Hager Co., New York.

9739 Wedding Bells — **Ada Jones and Len Spencer**

A Down East character sketch suggestive of No. 9748, "The Golden Wedding" in that the characters and subjects are similar. The dialogue, however, is quite different and original. The old couple review their courting days, and make amusing references to John's bashfulness in "popping the question." A clever short song concludes the Record. Orchestra accompaniment. Original arrangement.

9740 Dat Friend of Mine — **Bob Roberts**

A coon on the street asks Jim for the loan of some "tin" explaining that "I'm your one bes' friend." Jim apparently does not agree with him, and gives his reasons in these words:

I'm de one bes' friend of mine.
Rain or shine
I'm right along you are
Simply fine.

He's far to, and she's far to,
You're far thoo, not far me.
To I an' me is always pertic to be
Dat friend of mine.

The song is unique, and every word is clearly heard on the Record. Orchestra accompaniment. Music, Egbert Van Alstyne; words, Harry Williams; publishers, Jerome H. Remick & Co., New York.

9741 Suwanee River with Orchestra Variations — **Edison Symphony Orchestra**

An artistic variation of the grand old tune by Stephen Foster. It is given complete with added embellishments by a number of instruments. The soft tones of the violin, the shrill notes of the piccolo, the harmonious cornet duet, the deep bassoon, and the fluent rendering by two clarinets, all combine to produce a Record most novel and entertaining. Special arrangement and not published.

9742 Dixie Dan — **Billy Murray**

Dixie Dan, so called because he was born "Way down South" sings in a most amusing way of his early days, and of Trixie Ann, "a gal with corkscrew hair." He is a traveling minstrel man, and after all his ambling, rambling and gambling, longs to go back to "the land of cotton." This coon song is scoring a big hit in "The Gay White Way" and Mr. Murray is just the one to greatly widen its popularity through the Phonograph. Orchestra accompaniment. Music, Seymour Furth; words, Will D. Cobb; publisher, Shapiro, New York.

9743 Rock Me to Sleep, Mother — **Edison Male Quartette**

Most effective, indeed, is our Record of this exquisite old song. The words are simple in their meaning, and the air is in proper keeping. The quartette is at its best in these familiar numbers, which after all, are the ones of which we never tire. Unaccompanied. Music, Ernest Leslp.

9744 Thim Were the Happy Days — **Steve Porter**

Instead of the usual Flanagan Record, Mr. Porter this month, displays his versatility by assuming the characters of Danny McGuire and Katie Hogan, in an amusing Irish dialect sketch, which concludes with a humorous song, accompanied by the orchestra, and a clog dance to the music of an accordian. Original and not published.

745 In Monkey Land Medley — **Edison Military Band**

Comprising three December hits in the order named: "In Monkey Land," (No. 9700); "Won't You Waltz Home Sweet Home With Me For Old Times Sake," (No. 9710); and "Two Blue Eyes," (No. 9716). The change from two-step to waltz time between the first two is ingeniously made. An incidental solo on the French horn is introduced in the second selection. Original arrangement, and not published.

Advance List of Hebrew Selections and South American National Hymns

The Records named below will be ready for shipment from Orange between December 1st and 10th. Samples of any or all of them will be shipped November 1st to such Jobbers as place orders for them. None will be shipped without orders. Jobbers' stock orders received by November 20th will be shipped as fast as possible after December 1st. Care will be taken to make shipment at one time to all Jobbers in the same city. Separate supplements of each list will be shipped with Records to all Jobbers who request a supply. State quantity required of each kind.

These advance lists comprise the third lot in the series of Foreign Records being issued to bring our catalogue up-to-date. All of the masters were made by the best artists obtainable. They are high-class Records in every particular.

12 New Hebrew Selections.

SONGS BY SOLOMON SMULEWITZ, TENOR. ORCHESTRA ACCOMPANIMENT.

19121 Tanst Heider Tanst, *J. Brody*, Comic Song.
19122 Weiher, Weiher, *Louis Friedsell*, Comic Song.
19123 In dem is shildig nur mein sun, *Perlmutter & Wohl*, Comic Song.
19124 Schaben Halten, *S. Smulewitz*, Comic Song.
19125 Das Yidische Herz, *Perlmutter & Wohl*.
19126 Sol Meins Ibergehn, *S. Smulewitz*, Comic Song.

SONGS BY KALMAN JUVELIER, TENOR. ORCHESTRA ACCOMPANIMENT.

19127 Das Yidali in Cheider, *Magulezo*, Sentimental Song.
19128 Der Tahter, *Perlmutter & Wohl*, Sentimental Song from the opera "Der Yud in Sabiesky's Zeiten."
19129 Dem Reisen Kolch, *Magulezo*, Comic Song.
19130 Ben Hador, *Perlmutter & Wohl*, Sentimental Song from opera "Ben Hador."
19131 Der Stumm Davids, *Wohlfishal*, Historic Song from opera "Bontonni."
19132 Das Zifferblatt, *Kapelman*, Sentimental Song.

South American National Hymns.

BY THE EDISON MILITARY BAND.

19077 Himno Nacional Costa-Rica.
19078 Himno Nacional Brasileiro.
19079 Himno Nacional Argentino.
19080 Himno Nacional Venezolano.
19081 Himno Nacional Republica de Colombia.
19082 Himno Nacional Ecuador.

The Stuff that Sells Phonographs

The Edison Phonograph is an advertising success. Advertising is the life-blood of its business—not only the advertising of the manufacturer, but also the advertising of the Dealer.

We have set the pace with the largest appropriation ever expended in advertising Phonographs and Records. We have made the Edison Phonograph a household word. We have created a desire for Phonographs in the heart of every home. We have produced Phonographs which are perfect mechanically, and Records of marvelous clearness and purity. We have sold these Phonographs and Records to you at a price which leaves you a liberal margin of profit. Now it's up to you. If you wish to get your share of sales out of your community, it is up to you to hitch your wagon to a star—to hitch your store to the general Edison publicity.

Advertising is the only way to do it. Advertising should be the spirit of your store—on the shelves, on the counter, on the floor, in the windows, in the mails, in the street cars and in the newspapers. There are a dozen ways in which a retail store selling Edison Phonographs can advertise them, and every one of them is good. Some of them are better than others, but they are all good and should be used.

We propose to add to our other lines of service a tip-top, third-speed, high-gear advertising department. We are the big shaft connected with the engine. Your store is the pulley connected with the retail sales. Just throw your belt over on our fast pulley and keep your store moving at the same speed as the main advertising.

Read this department every month and then apply it. Every suggestion here is worth money. We spend our money not only to advertise to the public, but also to advertise to you, to tell you how to advertise. The least you can do is to spend some of your money to use some of this advertising and thereby increase your sales. Of course, we are interested in advising you to do this. Such sales will help us, but they must also help you. For every dollar we make you make several. We supply the gun and the powder, but you must do the aiming and pull the trigger.

First, inside the store:

Keep your Edison Phonographs where people can see them. Sight is the father of desire. Let them be heard constantly, for a Phonograph is something to be heard rather than to be seen. Whenever there is a crowd of people in the store start a Phonograph going. Most people would rather hear a funny song on a Phonograph than a piano solo by Paderewski. This may be unfortunate. It may show the bad taste of the public, but it is true. After all, you are not there to improve the taste of the public, but to sell goods. If more people want Phonographs than want pianos, why not sell the Phonographs? Phonographs sell quicker and oftener, and pay better per sale, while starting a long demand for Records, on each of which there is more profit than on a sheet of music.

To sell Phonographs keep them constantly in sight near the front of the store; display the new Records prominently each month; paste up about the store or hang up in frames (which is better) the lists of the Records for the month, and, finally, coach your salesmen in Edison Phonograph talk. Your salesmen know the people who come to your store. They know the sort of people to whom to sell Phonographs. Let them suggest the Phonograph to them.

Count that day lost upon which you do not make at least one Phonograph sale.

Use the United States mails. Uncle Sam is the best distributer of advertising matter that we know. We supply you with a great deal of printed matter. Do not depend on distributing this from the store. Mail it. You send bills, statements and other matter to a long list of people every month. Enclose the Edison printed matter. Send out the lists of new Records and all the other printed matter we send you.

If you want to get the value of advertising matter, you must use it. It has not accomplished its purpose when we send it to you. It is not good until it is seen by your customers.

Make a list of all the people in your town who have Phonographs that use cylinder Records. Send them all the printed matter about Records.

Make a list of everyone in your town who has no Phonograph of any kind. Send them matter about the Edison Phonograph and keep on sending it. Do not be discouraged if they do not buy the first time, or the second time, or the third time. If it takes you twelve months to get a good customer by this method, it is worth keeping at because you are cultivating a large number of customers at the same time, and because you are also advertising your store and, therefore, your other goods, every time you advertise Edison Phonographs.

The newspapers are the natural and logical advertising medium in your town. We consider the newspaper a very important part of the national Edison advertising. About half the money we spend goes into newspapers.

You can supplement this by using the newspapers in your town. Even if you are located in a town where we are using space regularly, you will get greater benefit from it by advertising your store also.

Separate Prices on Horns and Cranes

The new Edison horn and crane have become so popular that we have been besieged with requests to sell them separately and apart from machines. Although we had determined not to do so, we have now decided to change our original plans and will hereafter sell either horns or cranes at the prices named below. The trade must bear in mind, however, that these separate prices are as fully restricted as if the horns and cranes were sold with machines.

Prices on complete equipments remain as already quoted:

	Net to Dealers.	List.
Gem Crane, complete	.25	.35
Gem Horn	1.50	2.15
Standard Crane, complete	.90	1.50
Standard Horn	2.10	3.50
Home Crane, complete	.90	1.50
Home Horn	2.40	3.90
Triumph Crane, complete	1.15	1.90
Triumph Horn	2.70	4.25

No. 2 Building Being Replaced

When the Edison Phonograph Works were first established at Orange, two one-story brick building, 50 feet wide and about 250 feet long were erected. They were known as No. 1 and No. 2. In them were built the earlier types of Edison Phonographs and they have always played an important part in the manufacture of Edison goods. No. 2 is now being torn down to make way for a five-story concrete building that will be the same width as the old brick building and nearly a hundred feet longer. The new building will be connected with the present five-story concrete building on Lakeside avenue. No. 2 will be replaced in instalments. One-half of the building has been torn down and the new construction is going on in its place. It is hoped to complete the first half of the new concrete building by January 1st. Work will then cease for the winter. In the spring the other half of No. 2 will be vacated and torn down and the five-story building will be completed.

Printed Matter

Supplements of the French, German, Norwegian, Polish and Scandinavian Records listed in the PHONOGRAPH MONTHLY for October, are being mailed to Dealers with this issue. Every Dealer having a possible market for any of these Records should order some of them from his Jobber, and getting a supply of supplements with the Records, should mail the latter to possible customers. We have had many calls for Records in these languages and it is now up to the Dealers to supply the demand of the public. The numbers of the new forms are: French, No. 2192; German, No. 2193; Norwegian, No. 2194; Polish, No. 2196; Scandinavian, No. 2197.

A window card in two colors has been printed for holiday displays and a quantity is being shipped to Jobbers with December Records. It is Form No. 1216. Jobbers are requested to send copies to Dealers with their next orders for Edison goods of any kind. It is not necessary to hold it till December Records go out.

We frequently hear complaints from purchasers that direction sheets do not accompany their machines, with the result that they are compelled to ask us to mail a copy from here. Sheets are placed in each machine before shipment is made from the factory, and Dealers should exercise care to see that one is included in each outfit sold. We realize that in a few instances, the direction sheets are mislaid, in which case we will be glad to mail a few copies to Dealers upon request.

About Signing Up

In order to expedite the signing of the new agreement we would urge Dealers to—

Get two additional copies from their Jobbers and sign all three in the presence of a witness, after carefully reading the Agreement and the accompanying letter of explanation. Then forward all three copies to their Jobbers. Jobbers are urged to see that Dealers get two copies beside the one mailed from Orange; to have them sign and return all three; return one to the Dealer, mail one to us when complete, and hold the third.

Dealers who do not sign the new agreement in a reasonable time will be considered as refusing to do so and will not be permitted to buy Edison goods at Dealers' discounts.

Dealers who have not executed the new agreement should do so without further delay.

Change in Record Selling Date

TO THE TRADE.

Orange, N. J., October 25th, 1907.

Commencing with the December Records, which under our present system would be placed on sale November 27th, would state that we have decided to permit our Jobbers to ship the monthly Records to Dealers at 2 P. M. on the 24th of each month, the Records to be placed on sale AT RETAIL simultaneously at eight o'clock on the morning OF THE 25TH.

In cases where the 24th of the month falls on Sunday, shipments may be made to Dealers at 2 P. M. on the 23rd, thereby enabling the Dealers throughout the country to place them on sale at 8 A. M. on the 25th inst. Where the 25th of the month falls on a Sunday or a holiday, shipments may be made at 2 P. M. on the 23rd and the Records placed on sale at 8 A. M. on the 24th of each month.

Any Jobber or Dealer who makes shipments of Records or places them on sale in advance of the hours specified herein, VIOLATES THE TERMS OF HIS AGREEMENT and will be dealt with accordingly.

NATIONAL PHONOGRAPH COMPANY,
F. K. DOLBEER, *General Manager of Sales.*

The changes embodied in the above notice have been decided upon in deference to the wishes of Jobbers and Dealers, repeatedly expressed during the past year. The notice acts as an amendment to those sections of the new Agreements covering the time for shipping and putting new Records on sale. The changes have been sought by the trade for a two-fold reason. The advance in date has been desired in order that Dealers might have a better opportunity to realize on the sale of new Records than afforded by the later date and thereby be in a better position to pay their bills and earn the cash on the 5th of the next month. The shipping hour has been advanced to 2 o'clock on the previous day to give Dealers an opportunity to sell at the same time and on the same footing as their Jobbers. This has not been possible under the present plan, which in many instances has been a hardship to the Dealer.

Order blanks and other forms of printed matter in connection with both December and January Records had been printed before the above action was decided upon and the trade will understand that the new dates for shipping and selling supersede those shown on such forms.

In deciding to permit Dealers, as well as Jobbers, to have the new Records in their possession on the day before they can be sold, we are showing our implicit faith in the 12,500 Dealers selling Edison Phonographs and Records. We believe that every Dealer will appreciate the extent to which this course will benefit him, and that he will no more permit a new Record to be played, sold or leave his possession until the established selling hour, than he would violate his pledged word. To not live up to the new conditions will be considered by us as the rankest ingratitude. We shall exercise unusual vigilance in seeing that Records are not sold ahead of time, and each and every Dealer detected in doing so, will be suspended without warning. We sincerely hope that we shall not be called upon to apply such drastic measures.

Selling Cuban Records

As an evidence of what Dealers might accomplish through a little effort in selling the foreign Records, listed from time to time, we quote as follows, from a letter written by the Denver Dry Goods Co., Denver, Colo.:

"We have had the new Cuban Records on sale for several weeks and are already doing a nice business in them, receiving re-orders from the different Dealers who purchased an initial line. The instrumental pieces especially seem to be taking very well and we expect the line as a whole will be quite a success."

If you are not carrying these Records in stock, wouldn't it pay you to at least investigate the instrumental selections referred to above?

To continue in good standing every Edison Dealer must sign the new agreement. Sign it now and have it over with.

An Advertising Suggestion

This article, from the *Music Trade Review* for October 12th, suggests a plan by which every Dealer may improve his local advertising:

"There is a talking machine dealer in Illinois who looks over several newspapers daily, and whenever he sees an advertisement that he thinks is taking and progressive he cuts it out and pastes it in a scrap book. It makes no difference what line of goods it may treat of, if he sees how it can be adapted to the talking machine trade. Then when he comes to write up his own ads., he has a wealth of suggestions and experience to lean on, that never fails him in his dullest hour of need."

Reading over the advertisements in newspapers and magazines is an education in itself, for although it is unfair to use the exact copy, ideas are suggested which will prove invaluable to the Dealer in the preparation of his ads.

[Below is printed a copy of a letter just mailed to Dealers, giving full information for returning surplus, cut-out and defective Records. A letter of similar purport has also been mailed to all Jobbers.]

Dealers' Exchange Proposition

ORANGE, N. J., October 28th, 1907.

Beginning Nov. 4th, and until Nov. 9th, inclusive, authorized EDISON Dealers may return direct to the National Phonograph Co., Exchange Dept., Orange, N. J., for exchange through a Jobber, surplus, cut-out and defective EDISON Standard (not Grand Opera or Concert) Records, under the following conditions:

1st. All Records must be returned to the National Phonograph Company, Exchange Department, Orange, N. J.

2nd. Transportation charges MUST BE PREPAID through to Orange. If only prepaid to a certain point or forwarded with charges collect, the shipment will be refused.

3rd. Records must be carefully packed in cases, barrels or boxes, and each package must be plainly marked on the outside with name and address of shipper, and the quantity of surplus, cut-out or defective Records contained therein. Where there is more than one package in a shipment, they must be numbered consecutively from number 1 up, and on each individual package must also be marked the total number of packages in the complete shipment. The enclosed forms properly filled in must be pasted on each package.

4th. Inside of each case must be placed a packing slip (using form enclosed), containing shipper's name and address, number of Records contained therein, and whether they are surplus, cut-out or defective.

5th. Immediately shipment is made, enclosed form letter must be sent us, addressed to "National Phonograph Co., Exchange Dept., Orange, N. J.," advising the total number of each kind (surplus, cut-out and defective) Records returned, stipulating the number of cases in the complete shipment. A prepaid Bill of Lading must also be enclosed with this letter.

You must also fill in on triplicate Exchange Certificate, furnished herewith, the name and address of the Jobber through whom you want this exchange transaction handled.

6th. As soon as possible after your returned Records are received, they will be carefully counted and inspected and on the Exchange Certificate we will fill in the quantity of Records for which you are entitled to credit on the exchange basis, and return one of these certificates to you, send one to the Jobber whose name you have written thereon, and retain one for our own files. Credit will be allowed through *one Jobber only*, and cannot be transferred.

7th. Upon receipt of Exchange Certificate, properly filled in and endorsed by us, you must immediately forward it to the Jobber whose name you have indicated thereon, and with it enclose an order for at least double the quantity of Records specified in the certificate.

8th. The Jobber in whose favor your Exchange Certificate is made out, will allow you credit for the number of Records specified therein, when he makes shipment of your order.

9th. Only genuine EDISON Standard (not Grand Opera or Concert) Records can be returned, and they MUST be in EDISON cartons. Broken, cracked, worn out or other make Records will NOT be accepted under any condition.

10th. GRAND OPERA or CONCERT Records are not included in this proposition.

11th. This proposition does not include Records taken in exchange from Consumers, Slot Machine Operators or Exhibitors, and any Records of this nature, or second-hand Records, returned to us, will be *absolutely* refused.

12th. No Records can be returned through JOBBERS; they must ALL be shipped to the National Phonograph Company, Orange, N. J.

13th. No deduction for Records returned can be made from any invoice or statement rendered prior to or during this exchange, nor until CREDIT has been allowed by the Jobber.

14th. All Records returned will be given a careful examination by our inspectors, and should any be discovered that are not subject to credit under conditions outlined, or should there be any shortage in count, OUR DECISION AS TO THE QUANTITY TO BE CREDITED MUST BE FINAL.

15th. Any Records shipped after November 9th WILL NOT BE ACCEPTED, BUT RETURNED AT YOUR EXPENSE.

16th. In cases where a Dealer has signed AGREEMENT and purchased Records through us only, this Exchange Proposition will be handled by us direct along the same lines and under the same Terms, Conditions, Stipulations, etc., as where they are handled through Jobbers; that is, Records must be returned to us direct, and on the Exchange Certificate our name must be filled in instead of the Jobber's. All other instructions remain the same.

IMPORTANT.—If all the Terms, Conditions and Stipulations contained in this proposition are not fully agreed to and carried out by the Dealer, we reserve the right to reject any and all Records he may return and to hold them subject to his order, or return them to him at our option.

NATIONAL PHONOGRAPH COMPANY.
F. K. DOLBEER,
General Manager of Sales.

VOL. V. November, 1907 No. 9

Why Shipments are Delayed

Justice to our Jobbers demands that an explanation should be made to Dealers as to why, in many instances, Jobbers have been unable to more promptly fill Dealers' orders for machines with the new equipments. The principal reason for the delay has been the somewhat unexpected volume of business at Orange, which for a time at least has made it impossible to give the trade the service it should have. The notice sent out in July, fixing September 16th as the date when the new equipment would become effective, was followed by an immediate falling off in the orders for machines with small horns, just as we intended it should. It brought, however, an increased number of orders for the new style machines, all for immediate shipment, so as to reach Jobbers as early in September as possible.

Finding it impossible to fill orders in quantity sufficient or fast enough to reach Jobbers before the specified date, another notice advised the trade that the time would be extended to October 1st, by which date we hoped to be in a position to fill all orders complete and promptly. Unfortunately our hopes have not been realized. During August we ran the factory at the usual full capacity and were able to get a considerable number of machines ahead, and this surplus stock has enabled us to make fairly satisfactory shipments of machines without horns. The principal delay has consequently been due to the inability of the horn manufacturers to make any material increase in the schedule agreed upon in July. They are making a greater quantity each week than the schedule calls for, but, while the aggregate is large, it is not sufficient to keep pace with the very heavy shipments of machines.

We have been from seven to ten days behind on horn shipments to Jobbers, and the latter have for this reason been behind in filling the orders of Dealers. Unless the business doubles that of the same time last year we will not be long in catching up and improving on the existing condition of affairs, for it does not seem possible that the present influx of orders can continue indefinitely. We feel confident that within another month the trade will have no reason to complain of delay in the shipment of either machines or horns. Until then we must ask the indulgence of Jobbers and Dealers.

Record Carrying Systems

One of the most encouraging signs concerning the advancement of the sale of Edison goods is the rapidity with which Dealers everywhere are putting in systems for carrying their stock of Records. Firms making a specialty of furnishing these Record systems to the trade, say that the demand is little short of phenomenal. Almost without exception the Dealers want the system for the entire list of Edison Records, showing further that, in addition to showing their desire to carry their stock in the most up-to-date manner, they realize the importance and profitableness of putting themselves in a position to supply any domestic Record their trade may ask for. These two points are most essential to a successful Record business. The Dealer who carries the entire list never loses a sale; consequently, he makes the highest possible profit out of the business. When he uses the most approved methods for carrying his stock, he is able to make sales in the least time. By being able to instantly put his hands on any Record desired, he makes the sale at the smallest loss of his own time and a corresponding satisfaction to his customer in getting what he wants with the least delay. With price-protected goods like Edison Phonographs and Records, the only advantage one Dealer has over another is service, and service in any business will score more points than any other single factor. Hundreds of otherwise aggressive Dealers are losing money on the Edison line every day, because they hesitate about investing the comparatively small additional capital necessary to make their Record stock include every selection in the domestic catalogue. They are also losing time and money by not putting in an adequate system for carrying their Record stock. Dealers not now carrying the full list in a systematic manner should give this feature their careful consideration.

Cheap Machines as Inducements

The trade is cautioned not to enter into schemes involving the giving away, or a sale at nominal prices of cylinder talking machines as inducements to the sale of Records. No schemes of this kind are permissible if Edison goods are involved, directly or indirectly; and in this connection attention is called to Sections 8 and 9 of the Jobbers' Agreement and Sections 5 and 6 of the Dealers' Agreement, and particularly to the following quotations from those sections, respectively:

"*Selling or offering for sale other goods or merchandise at less than current prices, or the presentation of such goods or merchandise, or the presentation of coupons, or the use of credit cards,* trading stamps or the like, or the giving of premiums of any kind *to induce the sale of* Edison Phonographs or Parts, *Edison Records* or Blanks, is considered equivalent to selling or offering same for sale at less than current list prices, and will not be allowed."

"Talking machines of a type commonly disposed of as premiums, or given away for advertising purposes, or used in connection with advertising schemes, *or as inducements of any nature, or which are not sold at a uniform price, or which are sold or otherwise disposed of with the condition that other goods must be purchased,* cannot be accepted as whole or part payment for Edison Phonographs or Parts, Edison Records or Edison Blanks."

All Jobbers or Dealers now operating such a scheme, or who are contemplating entering into such a scheme, are advised to immediately communicate with this company.

Active Foreign Records

For the benefit of Jobbers and Dealers who desire to re-arrange their Foreign Record racks and who have been confused by reason of the many changes we have made in the Foreign lists since the Numerical Catalogue was issued July 1st, we print a plan by which a numerical list of Foreign selections may be obtained with but little trouble.

Take the Numerical Catalogue, Form 1220, as a basis and

ADD

45 new French Records, 90 new German and 14 new Italian, first listed in the Edison Phonograph Monthly for June and later in Supplements 1141, 1142, and 1143 respectively.

205 new Cuban Records, first listed in the Edison Phonograph Monthly for July and later in Supplement 1137.

42 new French Records, 9 new German, 8 new Norwegian, 34 new Polish and 18 new Scandinavian, first listed in the Edison Phonograph Monthly for October, and now shown in Supplements 1192, 1193, 1194, 1196 and 1197 respectively.

6 South American National Hymns and 12 new Hebrew Records listed in this issue.

After these additions have been made,

OMIT

12320 (French) 12255 and 12266 (German) as notified in the Edison Phonograph Monthly for June.

12370 (German) 17531, 17532 and 17773 (French) as notified in the Edison Phonograph Monthly for July.

12863 (British) and 17235 (French) as notified in the Edison Phonograph Monthly for September.

298 miscellaneous Foreign and 12896 (French-Canadian) as notified in the Edison Phonograph Monthly for October.

277 Mexican selections, as per cut-out list in this issue.

Corrections

An error in the, parts Catalogue Form 920, has just come to light. On page 30, the belt for Triumph machine (No. 2813), has been listed at 25c, and as a repair part. This extension should be carried to the supply column, since different discounts are quoted on repair and supply parts. Dealers will kindly make this correction in their copies of the catalogue.

In the list of French selections shown in the PHONOGRAPH MONTHLY for October, the artist who made No. 17343, Pensée d'Automne, is given as N. Boyer de l'Opéra Comique. In reality the selection is sung by M. Gluck. Unfortunately this error was not brought to our attention until after the special supplement, Form 1198, was printed. Dealers who carry Foreign Records should make a note of this correction, and bear it in mind while making sales of this particular selection.

The supplement of 158 made-over selections, Form 1166, mailed last month, contains two errors. Under vocal solos, "Good Bye, Eliza Jane," is given as No. 8575. Its correct number is 8515. "When Kate and I Were Comin' Thro' the Rye," under the same classification, is listed as No. 8102, which should read No. 8201.

20 THE SATURDAY EVENING POST October 26, 1907

The Joys *of the* Phonograph

EDISON has produced in the Phonograph the greatest amuser of modern times. There are so many ways in which the Edison Phonograph can be added to the entertainment of every family that it is almost impossible to describe them in a single advertisement.

First, remember that to get the full enjoyment out of it you must be sure that it is the Phonograph and not some talking machine. There is only one Phonograph, and that was invented by Mr. Edison and is made under his supervision. Naturally the best form of a sound-producing machine is the one in which the inventor takes a personal interest—not an adaptation of his idea by others. The Edison Phonograph is the only Phonograph—the most perfect instrument for reproducing music, the human voice and other sounds, that his ever been invented.

As a scientific toy it educates growing children.

As a reproducer of music it brings into the home every form of music, some of which would cost a great deal of money bought in any other way.

As a reproducer of language it is used to teach every foreign language, far better in many respects than a human teacher could do it.

But its best use all over this great continent is as an entertainer, amusing in every home crowds of people, young and old, every evening, with its marvelous reproduction of songs, dialogues, instrumental music and every other form of entertainment produced by sound.

To get all the fun you can out of such an instrument you must get the Edison Phonograph, and in order to know how much better it is than other talking machines, you must compare them. Go to your nearest dealer and hear your favorite

THE SATURDAY EVENING POST 21

The Edison Records *for* November

are better than ever

HERE is the list of new Records for November which will be on sale in every Edison store in the country October 26th.

These Records represent the best judgment of our large staff of editors as to the most amusing, the most entertaining, the most classical, the most inspiring and the most interesting music and spoken dialogue the world has produced in the past thirty days.

Every new Record renews the Edison Phonograph. It is what you hear in the Phonograph that makes it interesting, not the Phonograph itself. So keep your Phonograph always fresh by supplying it with the newest Records. Hear the November Records at your nearest store, and then order them there.

Any one who sends his name and address today will have mailed to him Two Pamphlets, giving a complete description of each Record, the Stories and Songs Thereon, and the names of our various Licensees in the United States and Canada, where copies of the Edison Records now in existence for the sake of filling gaps in your Edison Record Library.

NATIONAL PHONOGRAPH COMPANY
11 Lakeside Avenue, Orange, N. J.

Our Magazine Advertising

Every Dealer who is selling the Edison Phonograph should know just as much about the advertising which the manufacturer is doing as possible. This advertising is selling the goods for him. When you go into the business of selling the Edison Phonograph there is an implied contract between you and the National Phonograph Company that the latter shall do a certain amount of advertising to help make a market for the goods.

The selling of an article of luxury—that is, entertainment—requires advertising. People must buy food, and clothing, and shelter, but after the necessities of life are satisfied, they turn to entertainment, and there is a wide choice. Therefore, the manufacturers of the Edison Phonograph spend a great deal of money in teaching the people that there is more entertainment in the Edison Phonograph than they can buy in any other form for the same amount of money.

We are going to spend in 1907-08 between two hundred and fifty and three hundred thousand dollars to reach people who have not yet bought Edison Phonographs how much fun they can get out of them. A very large proportion of this money will go into the magazines which reach everywhere. We are using a list of thirty-one magazines having an aggregate circulation of 11,528,378. In round numbers this is over fifty million readers, two-thirds of the population of the United States. It is safe to say that every man, woman and child who comes into a store has heard of the Edison Phonograph. Stop and figure to just what proportion of the people who come into your store you sell Edison Phonographs, and you will realize how much of this advertising you are not availing yourself of. In other words, there are a great many people who come to the store who might be interested in Edison Phonographs and who have heard about them, but who do not buy because you do not do your part. This advertising is intended for you. It is got up in the most attractive form possible and put in the sort of magazines that go into every home. If you should go through your town and visit the home of every person who has money enough to buy an Edison Phonograph, you would probably find on the center table a copy of some one of the magazines in the accompanying list.

The connection between this advertising and your store is manifest. You can make just as much money selling Edison Phonographs as you can selling anything. There are a lot of prospective customers whom you know and on whom you could work. It is up to you to turn the full benefit of this advertising on your store and get just as much money out of it as possible.

The amount of space we are using in the magazines is large. In a great many publications we use two pages and in others one page. We use large spaces in large sized publications like Collier's, Associated Sunday Magazines and Youth's Companion, and we have used this fall a two-page ad in the Saturday Evening Post, the largest single advertisement of any one article published in any publication except a newspaper.

Look over the magazines yourself, each month, and see what we say both about Phonographs and Records. Notice that we are pushing Records just as hard as we are the Phonographs. It is now up to you to get next.

With this issue we are mailing a slip referring to a special two-page advertisement in colors in the *Saturday Evening Post* for October 26th and suggesting that you place a copy in your show window. This advertisement costs $4,200. We are also mailing the cover page of the *Associated Sunday Magazine* for October 27th, showing our advertisement in colors on the back page. This represents the expenditure of another $2,200. These are the most expensive forms of modern advertising and they further illustrate what we are doing to make business for Dealers in Edison goods.

Andem Indicted for Forgery

Our readers have been informed from time to time of the many attacks which have been made on this Company by James L. Andem, formerly or Cincinnati, Ohio, on behalf of the New York Phonograph Company and other licensees of the defunct North American Phonograph Company. So far, these suits have been futile, and we confidently expect that they will never in the slightest degree interfere with our business or in our relations with Jobbers and Dealers. We are sure that our friends will be interested in hearing that Andem, last month, was indicted by the Federal Grand Jury at Trenton, New Jersey, for forgery in connection with one of these suits. The charge is a most serious one. Andem is at present awaiting trial, having furnished two thousand dollars bail. We understand that the case will be tried shortly, before Judge Lanning, of the United States Circuit Court.

A New Edison Official

E. H. Phillips was on October 14th appointed Manager of Salesmen of this company. Mr. Phillips has for the past twenty years been connected with H. L. Judd & Co., of New York City, and leaves that company to enter the employ of the National Phonograph Company. He had charge of the Philadelphia office of Judd & Co. during its continuance. Before and since that time he represented the company on the road. He has had, therefore, a wide experience in salesmanship and is eminently fitted for his new position. His headquarters will be at the Orange factory.

The "S" Sound

For a long time Edison's Phonograph refused to say "specia"—it dropped the "s" and said "pecia." To produce that single sound he needed something delicate enough to receive impressions not more than a millionth part of an inch in depth, and yet rigid enough to carry the needle up and down, exactly reproducing the vibrations which had made the impressions. The scientists told him there was no such substance in existence.

"Then we must produce it," insisted Edison. They declared it could not be done, because the qualities which he demanded were inconsistent and exclusive of each other. He declared it could be done, because it must be done, and he did it—but Edison worked eighteen hours a day for seven months to secure that single sound. That is the story of success since the world began. Difficulties yield to enthusiasm.—*New York Commercial.*

[*Copy of Letter Mailed to Jobbers Oct. 10th.*]

To All Jobbers

Our attention has been called to the fact that Jobbers have been writing and telegraphing direct to the Horn Manufacturers regarding shipments of horns, which had been delayed in transit.

We would respectfully advise that although shipments are made direct from the horn manufacturers, they are made under our instructions, and all communications on the subject, or in any way relating to such shipments, should be addressed to the National Phonograph Company, Orange, N. J.

Kindly give this your attention.

NATIONAL PHONOGRAPH Co.,
F. K. DOLBEER,
General Manager of Sales.

New Jobbers

New Edison Jobbers during October were the Eller's Piano House, Boise, Idaho, and the Koerber-Brenner Co., 1006 Ohio street, St. Louis, Mo. Both houses are widely and favorably known in the music trade and have exceptional facilities for handling Edison goods as Jobbers.

Report on Railroad Signs

Dealers throughout the country will do us a great favor if they will write us whenever they find any of our railroad advertising signs down, out of repair or in poor condition generally. Address such letters to the Advertising Department, Orange, N. J.

A Magnificent Heritage

"I want to say that I am very much pleased with the Phonograph and get a great deal of pleasure out of it. The invention is certainly a magnificent heritage to leave to posterity, enough for any one man to do in a life time; and the fullest measure of happiness ought to be the portion of Thomas A. Edison during the remainder of his days. By his efforts and genius, mankind in general has had placed within its reach, poetry, song and melody even to society and rhythmic instruction. Science and civilization will ever make more rapid progress for his having lived."
—*Samuel J. Day, Burden, Kan.*

Some dealers are fond of crossing the bridge before they come to it, and imagining that the sale of Phonographs and Records has reached the top notch, and that a slump is at hand. If these faint-hearted ones were only to make a house-to-house canvass of their immediate neighborhood they would find enough Phonographless homes to keep them busy. It is true that the sales of Edison Phonographs and Records is increasing very rapidly, but the population is not standing still.

What Dealers Say

"It is with pleasure that I tell you that from the selling Edison Phonographs and Records as a side line, I now consider it one of the most important and best paying lines of goods that I handle. In the future I expect to pay more attention to the sale of same than in the past. I have found from experience that the selling of Phonographs on the installment plan a great inducement for the sale of Phonographs to some people. Many people prefer to pay a small amount each week or each month for something that will give them pleasure, than to pay the full amount in cash for an Edison Phonograph outfit."—*E. H. Donaldson, Mena, Ark.*

It has been just a year since we received our initial order of Edison Phonographs, and I have received the October Records, filling for the first time our shelves with the entire catalogue. One man took 76 records the first day we opened with the whole catalogue, while others have taken from 12 to 18, while before we considered a sale of six 20 good. We have sold twenty-six machines, including two Triumphs with repeaters, while the Home divides honors with the Standard; of Gems, we have sold but two. We have a small town of about four hundred and I believe are carrying the largest stock of any town its size in the State. Would like to say how the Edison is knocking the other machines in this section, but haven't the room.—*W. L. Sheibley, Reedley, Cal.*

Some days ago an agent for the ——— ——— ——— was here and he made the remark that his company made the only talking machine, so we challenged him for a contest. He proposed leaving it with the crowd as to which was best. The verdict was unanimously in favor of the Edison. His machine was the $20 type, we playing the first Standard machine we sold, that being our proposition in the challenge. Just after the contest we sold a Standard machine and twelve Records to a man who would have bought a machine had he not heard the two machines together. We are pushing Edison goods for all they are worth. We have recently rented the nicest store in Monterey for our business. Without the Edison line we would not have made such a move.—*W. W. Wilhoite & Bro., Monterey, Tenn.*

I am glad to be in a position to place the Edison Phonograph in the homes of people in this locality, as I consider it the greatest invention of modern times, and a wonderful factor for good in the home. I can assure you that I shall adhere strictly to the terms laid down in my contract and shall endeavor at all times to merit your confidence.—*Mrs. A. S. Roberge, Milbank, S. D.*

We are so delighted with the Edison goods that we are making arrangements to put in the entire line of Records, and make the Edison the main feature of our business.—*Art and Novelty Store, Calax, Va.*

I have always strongly believed that the Edison Phonograph had no equal, and now I am convinced. Some time ago the Graverly block in our village was destroyed, and among other things destroyed was an Edison Home and about 250 Records owned by Frank Gould. One afternoon Mr. Gould dug out of the ruins the remains of his Phonograph and brought it to my store. The cabinet was simply a charred mass, but what was my surprise to find that the motor of the machine began running when I commenced to wind it. The main spring was broken, but would hold to wind a little. I put on a new belt, some oil, and a reproducer off from one of my machines, and the thing actually played part of a Record. If the spring had not been broken I have no doubt it would have played the whole Record. I think this will be a big ad. for me. You can print an account of this if you like. Hurrah for the Edison—*E. W. Kautenhaer, Groton, N. Y.*

For more than five years I have handled Edison Phonographs, but have never written you of the praise I have given your machines and records. When I first handled talking machines I had various kinds and thought them all right, but after hearing the Edison once it did not take me but three weeks to change my stock into Edison, which I now handle exclusively. I carry 1,000 Records and 3 or 40 machines. I like your way of business and always intend to co-operate with you in sustaining the principles, as I see no reason why Dealers should cut the price, for the people in this section would rather pay a much larger price than you ask, than buy the other makes. I also think you are taking a wise step in including a larger horn, as some Dealers were handling horns of other makes with a great many were of a cheaper manufacture, and therefore ruined the tone of the machine.—*E. W. Shull, Cook, Neb.*

It gives me great pleasure to write you concerning the Edison line of Phonographs and Records. It is the best selling line of goods we handle. When I purchased the first bill, which consisted of three machines and one hundred and fifty Records, I did so without any confidence whatever in the line, but now am glad to say that we are arranging our store to carry the complete line of Records and Phonographs. We have sold over $1,000 worth of Edison goods in ten weeks on an original investment of $50. Expect to sell no less than 50 machines during the months of October, November and December.—*Nashville Furniture Company, Nashville, Tenn.*

I like the business of selling Phonographs fine in connection with my other musical instruments. I shall live up to my agreements to the letter to the best of my ability and wish you every success for making such a fine music maker.—*David H. Francis, Boyne City, Mich.*

I think the new horn outfit is all right, as it does not give a Jobber having a retail business any advantage over a retail Dealer in how outfits.—*T. Mortimer, Cullom, Ill.*

Mexican Records Cut Out

On account of the limited demand for them, and because of a desire on our part to decrease the number of foreign Records to a point where it will be possible for United States Dealers to carry them without inconvenience, we have decided to omit the following Mexican selections from the next edition of our Foreign Record Catalogue. We will, however, continue to list them in Catalogues printed for use in Mexico.

18501	Amor	*Ovando*	18586	Amorosa	*Tipica Lerdo*
18502	Dices que No	*Ovando*	18585	Guillermo Tell—2º Alegro	*Tipica Lerdo*

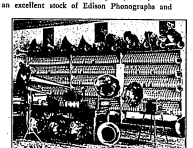
The music business affords me great pleasure for what time I devote to it. The Phonograph is an introduction to a higher state of civilization and a teacher and trainer of the musical instincts of mankind—*James Mead, Patriot, Ind.*

Two Dealers' Stores



This is my fourth year in the music business and the second as an active Edison Dealer. I carry my Record stock in labeled stock cartons. Each carton has room for three Records, all one selection. I now have 1,200 cartons. I purchase the monthly Records each month, and keep a mailing list of all Edison Phonograph owners, and send them a list as soon as the new Records are in. I now have over 100 people on my list.

HARDY'S MUSIC HOUSE, LUDINGTON, MICH.

I am well pleased with the product of the National Phonograph Company and anticipate a good business this fall and winter.—*D. Hardy, Ludington, Mich.*

The store of Cook Bros., Gaylord, Mich., shows an excellent stock of Edison Phonographs and Records, kept in a most attractive and compact manner. A feature is the Fritchy system of shelving.

COOK BROS., GAYLORD, MICH.

For the Special Attention of Edison Dealers

In getting out a new Dealers Agreement the National Phonograph Company was actuated by a desire to serve your interests as well as its own. The agreement contains nothing that is not designed to maintain and improve the welfare of both. Its conditions are simply intended to protect the prices on Edison Phonographs, Records, Blanks, etc., and to guard against infringements of the Edison patents. No one in the business doubts the wisdom of this policy. We know that you fully believe in it.

We now want your further co-operation by signing this new Agreement without delay. It is necessary to do so even though you may have recently signed the old one. We want your prompt assent to the new conditions.

If your Jobber has not provided you with a triplicate set of the new Agreement ask him to send them at once. Sign all three in the presence of a witness and return them to the Jobber. He will do the rest.

A reasonable time will be given Dealers to re-sign and those who do not will be considered as out of business. Their names will be removed from our files and mailing lists.

NATIONAL PHONOGRPH CO.
ORANGE, N. J.

Edison Records Made Over

TO maintain the standard of quality of Edison Gold Moulded Records it becomes necessary from time to time to make new masters of selections already in the Edison catalogues. This is because the first moulds either have become defective; or for other causes, cannot longer be used. Heretofore, when such selections were made over they have been continued in our catalogues without notice, a plan that has deprived the public from knowing how much better they have been made over new conditions. All selections made over every respect as good as the new monthly list. If the public were aware of their high class character, they would buy them quite as eagerly as they do the new selections put out each month. All of the selections named below have been made over in the most up-to-date manner of our Recording Department. That they have been made over at all shows that they are popular selections—ones that have met with the approval of the public and therefore, entitled to the greatest consideration at the hands of such Phonograph owners as do not have them in their collection of Records.

158 MADE-OVER SELECTIONS

Unless otherwise indicated, they have been made by the same talent as were the original first masters.

Scientists Visit Mr. Edison

Members of the American Electro-Chemical Society, to the number of about two hundred, visited the Edison Works on Friday afternoon, October 18th, as the guests of Mr. and Mrs. Edison. Two special cars attached to a train on the Lackawanna Railroad, conveyed the party from Hoboken to the Orange station, where they were met by automobiles and carriages for the trip to the Works.

C. F. Burgess, of the University of Wisconsin, headed the party, who were presented to Mr. and Mrs. Edison in the library of the laboratory, by William J. Hammer, formerly associated with Mr. Edison. A tour of inspection was then made, and proved of great interest to the many notable scientists in the party.

A Complaint in Titles

William Harrison, Edison Jobber at Utica, N. Y., recently forwarded the following unique complaint because of our delay in filling his order for printed matter:

"I have got to hustle to hold my contract, and I don't want to be 'The man behind,' or the Dealers will 'gimme de leavin's!' Competition in this country is so active, that they won't 'Save it for me.' 'Everybody gives me good advice' and I want you people to give me your 'Sympathy.' I will try to 'Keep on the sunny side' while 'cravelling' and don't for a minute think 'I surrender all,' or that I will let these fellows 'Sing me to sleep,' although if I were to get cut out, 'I wonder if you'll miss me?' 'Sometime we'll understand,' 'Adieu.'"

These occasional optimistical letters we receive prove that, after all, there's a bright side to every story.

A Kentucky Dealer's Advertisement

A. Scott Haynes, a Dealer at Owensboro, Ky., published the following advertisement in a local paper recently:

THE EDISON.

She sits in deep silence the whole day through,
Her fingers are red from the scrubbing dew
That flowed as she toiled from the early gray dawn—
Rejoiced is her soul that the day is gone.
There is nothing in daylight to cheer her poor mind,
To all of Life's pleasures she almost is blind.
For trouble and sorrow and harrowing care
Had claimed her a victim of Melancholy's snare.
But Haynes's Phonograph came into the set spell
Of music's enchantment, how simple to tell!
But her heart was now lightened, for cares had all fled
And soon fell asleep on her little low bed.
"How sweet are the strains of lois tonight!"
Her eyes were then closed in slumber so tight,
And never once opened till daylight's bright dawn.
But when she awoke her troubles had gone.
Her darling child laid by the machine
Said lois was a record on an Edison machine.

* * * * * * *

Mr. Haynes is the agent, obliging and kind,
His goods are the latest, please keep this in mind.
Two hundred and seven east Second's his place,
Abreast with the times he always keeps pace.

He was born in Kentucky, the grandest old state,
That ever was created, I here must relate.

Thirty years in our city, a record that's clean
As the best of Kentucky's good children, I mean.
You give him a call you'll never regret,
And resolve for your money the best it can get.

The article is preceded by a half-tone of a view taken in Mr. Haynes' store, in all producing a most commendable advertisement.

Dealers' Advertising

Grinnell Bros., Edison Jobbers at Detroit, Mich., are publishing a series of advertisements in their local newspapers, exploiting the new equipment in a manner most commendable. The enthusiasm displayed in the copy, the clever way in which the new list prices are announced, and their free trial offer, combine to produce ads which as business producers are hard to equal.

Ricker & Son, of Emporia, Kans., devote a half page in the *Emporia Gazette* to the exploiting of Phonographs and Records, and pay particular attention to the musical education acquired through the purchase of one of our instruments.

Group pictures of some of the Magazines in which Edison Phonographs are being advertised

The Edison Phonograph

TO the Edison Phonograph can be applied the old saying: "A pleasure shared is a pleasure doubled." It is the art of entertainment expressed in tangible form. There is never a crowd when one of the three is an Edison Phonograph. Let songs, dances, funny songs, ballads, all kinds of music in your own home, with less trouble and greater enjoyment than any other form of entertainment, and especially than any other form of musical entertainment. Today is the best day for going to your own dealer's to hear an Edison. You cannot possibly know how well the Edison Phonograph reproduces by listening to any other make of talking machine. THREE BOOKS FREE—Ready at your dealer's now — The Phonogram and Supplemental Catalogue, giving the new Edison Records for May; also Complete Catalogue of all Edison Records. Any one or all of these books will be sent free on request.

In the Words of Others
"Sell I.C.S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 30 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for you? Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

THE DENVER DRY GOODS CO.

Denver, Colo., 11/27/07.

Gentlemen:

In reply to your letter of the 21st inst., will say we are pleased with the demonstration of Mr. Stallard very successful and will be glad to have it duplicated in our store. We have had a number of inquiries regarding the Spanish Language Outfits during the week, and have no doubt but that we will dispose of quite a few of them. We shall communicate with the parties to whom application was made, and endeavor to make a purchase in the near future. Any assistance or advertising that we can render in connection with this matter we shall be pleased to do, as we feel it is essential to handle to sales which could not be obtained otherwise.

We have placed a record order with the Edison Co. for the week, and would like to know what could be done with regard to arrangements to purchase whatever we need in this line through your Denver office as we have had to do several times recently. Some one from your office will be in Denver in the near future, and we would be glad to talk this matter over with him.

We will keep you advised from time to time of the results of sales with the I. C. S. Language Outfits.

Yours very truly,

THE DENVER DRY GOODS CO.

Edison Phonograph Monthly

VOL. V. December, 1907 No. 10

Trade Conditions

In a general letter to the trade press, dated November 13, President W. E. Gilmore, of the National Phonograph Co., made the statement printed below, setting forth the immaterial effect that the money stringency has had upon the Edison business. Mr. Gilmore also expressed the opinion that the present money trouble will be short-lived. The letter follows:

We have not in the past, nor can I say that we have as yet perceived any perceptible change, so far as our own business is concerned. Our shipments of Phonographs, Records and supplies, therefore, continue in the same relative weekly proportion as they have in the past, and the orders heretofore placed with us have not been decreased to any material extent by cancellation.

Naturally, we have not expected additional orders for Phonographs, in view of the fact that our Jobbers and Dealers have anticipated their requirements some time since, but the new orders that we have been receiving for Phonographs have, if anything, been better than we had anticipated.

So far as Records are concerned, the first orders received for the December supplement exceed in volume any month in the history of the business.

We accumulated during the past summer a very large stock of machines, to take care of the future requirements, and it is well that we did so, for the reason that the recent financial stringency has compelled us to reduce our working forces somewhat, due entirely to the fact that we were unable to obtain the necessary currency to take care of our pay-rolls, and which stringency, we thoroughly believe, will be of short duration.

So far as the future is concerned, we are very optimistic, and statistics indicate that, be the times good or bad, amusement features are about the last thing to be affected. By this I, of course, refer to amusements of all kinds, in which, naturally, the talking machine industry must be considered one of the principal factors, particularly for the reason that the prices bring the apparatus within the reach of everybody.

I would here add that our collections as a whole, up to this date, have been in every way satisfactory, and, if it is the case with us, then we must naturally feel that it must likewise be the case with our Dealers and Jobbers generally.

In conclusion I can only say, further, that the present financial condition will, in our opinion, be but short-lived, and we look forward to an increasing and profitable business.

W. E. GILMORE, President.

Had we not been confronted with the possibility of paying our hands by checks it is probable that no change would have been made in our working force. We would doubtless have gone on, firmly believing that a few weeks at the most would have seen business back to its customary conditions. When it became necessary to call upon several banks and adopt unusual methods to get sufficient currency to meet the pay-roll, a decision was reached to slow up on the production and use up the stock of Phonographs we had accumulated during the summer. During the entire summer we ran our plant to its fullest capacity, instead of cutting down the force as had been done in past years. The present reduction in the working force is, therefore, only equivalent to the summer vacation of past years. As Mr. Gilmore stated, orders and collections are quite satisfactory and very much better than the calamity howlers would think possible. To us it looks as if the timid ones were daily regaining confidence and we believe this feeling is going to rapidly gain ground as the days pass by.

Notice About German Records

Because of defects we have been compelled to discard moulds for German Records No. 15391, "O, Susanna," by H. Grossman, and No. 15102, "Die Kappelle," by the Meistersanger Quartette, and until we can obtain new moulds from abroad we will be unable to supply these selections to the trade, although we have received numerous orders for them. These orders are being cancelled. Just as soon as we get the new moulds the trade will be notified and new orders can be placed for them. These selections are being retained in the new catalogue, for we hope to be able to fill orders for them before the catalogues have been widely circulated.

Dealers: Sign new agreement and send it to your Jobber.

The New Edison Gold Moulded Records Advance List for February, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before January 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on January 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on January 25th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after January 20th, but must not be circulated among the public before January 25th. Jobbers are required to place orders for February Records on or before December 10th. Dealers should place February orders with Jobbers before December 10th to insure prompt shipment when Jobbers' stock is received.

9746 A Summer Evening in the Alps — **Edison Concert Band**

Styled by the composer, "A descriptive and romantic fantasia." The air is characteristic of what one might expect to hear in the Alps. A storm scene is among the realistic effects introduced. The selection is rendered in the usual carful manner which identifies the work of our Concert Band. Composer, H. Kling; publisher, Jean M. Missud, Salem, Mass.

9747 Somebody's Been Around Here Since I've Been Gone — **Billy Murray**

Sam Johnson loved an innocent and simple colored maid, whom he is called upon to leave for a short time. Upon his return she greets him with an educated kiss, entirely strange to him. This leads him to sing the words of the chorus:

Somebody's been around here a-giving you lessons in love
That's not Sambino, a-sure you from above.
That Sapho smack is a sure enough winner,
It's far too good for a new beginner,
Ah, somebody's been around here since I've been gone.

The damsel vainly tries to assure Sam that she has been true in his absence, but he advises her to stick to her new teacher, and he will look for a brand new pupil. The song is one of the big hits in the "Gay White Way." Orchestra accompaniment. Words, Paul West; music, John W. Bratton; publishers, M. Witmark & Sons, New York.

9748 I Love You So — **Miss Hinkle and Mr. Miller**

The now well known soprano and tenor duet which has scored such a decided hit in "The Merry Widow." The music from this opera is unusually charming and the demands for parts of it have been numerous and persistent. Solos by both these artists are given, with the blending of both voices as a finale. Orchestra accompaniment. Words, Adrian Ross; music, Franz Lehar; publishers, Chappell & Co., New York.

9749 The Crack Regiment Patrol — **Edison Symphony Orchestra**

If it is possible to produce a more attractive patrol than the "Simmer" listed in October we have secured it this month. The approach and passing effects are worked out in a most clever manner. The music is military in character, and recorded in strict march tempo. Composer, Theo. Moses-Tobani; publisher, Carl Fischer, New York.

9750 Garibaldi — **James Brockman**

A most melodious Italian dialect song, of a sentimental nature, rendered by the composer. It tells of the "over the sea" wooing of Garibaldi, who makes "a-lot a-money, this country very fine." He writes to Marie in sunny Italy, telling of his love, and she answers:

My Garibaldi, good Italian man,
My Garibaldi, love-a you all I can,
Good-a-bye my Italee,
Fly across the sea
Just-a you and me,
Viva my Garibaldi, good Italian man.

Mr. Brockman's method of singing Italian dialect selections makes comment unnecessary. Orchestra accompaniment. Words and music, James Brockman; publishers, Jerome H. Remick & Co., New York.

9751 Don't Worry — **Miller and Werrenrath**

One of the latest and best march ballads of the "Honey Boy" class, sung by the same artists. In the verse the composer suggests a quarrel or disagreement between two lovers, and the chorus tells how a reconciliation was effected:

Don't worry, smile on, dearie,
And the world will smile with you.
Don't worry, just be happy, for it may not all be true;
Good times are coming, dearie,
See the skies above are clear,
And the sun will shine to-morrow,
Don't worry, dear.

Our Record of the song is quite equal in every way to "Honey Boy," which achieved such remarkable popularity. Orchestra accompaniment. Words and music, Rose & Snyder; publishers, New York.

9752 Under the Matzos Tree — **Ada Jones**

The composer calls this selection "A Ghetto love song." The words are humorous and the melody delightfully tuneful and characteristic. Miss Jones excels in the rendition of such Records as these, where dialect has much to do with the success of the song as a whole. The chorus is here given:

Won't you come and make for me a happy life;
I've got plenty money to support a wife.
It's you I'm fixing to be slight,
Let's skidoo, Begin, Dogin.
Make it quick and say the word, Reiberesky,
Think of all the future that's for you and me,
We'll have a happy, happy jubilee,
Under the matzos tree.

Orchestra accompaniment. Words and music, Fred Fischer; publishers, Fred Fischer Music Publishing Co., New York.

9753 The Girls of America March — **Albert Benzler**

A snappy march composition, peculiarly adapted to the xylophone. It has attained much popularity, and will be one of the consistent sellers in our catalogue. Mr. Benzler enlarges upon the melody toward the end of the Record by introducing well executed variations. Orchestra accompaniment. Composer, Mahlon Dugaine; publishers, Keystone Music Co., Altoona, Pa.

9754 Take Me With You in Your Dreams. — **Harry Anthony**

The beautiful song offered by Mr. Anthony as his solo contribution for the month, is without question one of the very best he has made. Both the words and music fix a high standard in sentimental songs. The delicate and finished orchestra accompaniment is a decided feature of the Record. Words, John Everett Fay; music, James B. Oliver; publishers, M. Witmark & Sons, New York.

9755 Rain-in-the-Face — **Collins and Harlan**

From the words of this selection, it is to be inferred that "Rain-in-the-Face" was a real sporty old Indian, who had the "first original thirst." His antics while in pursuit of fire-water are humorously told. For instance:

He'd drink a barrel of rum, 'till he was numb and Irish whiskey, too.
Until he turned an Indian into an Irish stew.

Three verses and choruses are given in the Record. In the middle of each chorus the singers pause long enough to permit the introduction of a few bars of music by the orchestra. In every instance a different combination of instruments is used. Decidedly unique and certain to be very popular. Orchestra accompaniment. Words and music, Benj. H. Burt; publishers, Jerome H. Remick & Co., New York.

9756 When the Violets Bloom, Violet — **Irving Gillette**

The old, old story told in a varied manner, is the theme upon which this pretty ballad is based. The music is tuneful and well suited to Mr. Gillette's pleasing voice. The chorus will perhaps give a more definite idea of the song than a few descriptive words:

When the violets bloom, Violet,
In the vale, sweetheart, where we first met,
Where with cheeks blushing red, dear, you said,
In the spring we would wed, Violet.

Though the days may seem long don't regret,
Don't forget that my love always yet,
For the never bells will chime,
For our glad wedding time,
When the violets bloom, Violet.

Orchestra accompaniment. Words, Robert F. Roden; music, J. Fred Helf; publishers, Helf & Hager Co., New York.

9757 The Outpost March — **Edison Military Band**

A stirring military march by the composer of many instrumental numbers. While it is true that most marches are somewhat similar in their general make-up, we believe this one to be sufficiently varied to deserve serious consideration in the selection of Records for permanent use and constant repetition. Composer, J. C. Heed; publisher, Carl Fischer, New York.

9758 Will He Answer "Goo-Goo"? — **Stella Tobin**

It is not strange that most of Vesta Victoria's songs find such ready favor with the general public, for they are always unusual and ever amusing. The title of this Record will arouse immediate curiosity, and one would never guess that it is the plaintive plea of a loving and lone widow on the shelf, "who wants somebody to offer an affection as warm as her own." She persuades the "boys" in the audience to join in the chorus and although timid at first, they respond with great vim in the encore. We feel safe in predicting that

Miss Tobin will win many friends through this, her first Record. Orchestra accompaniment. Words, Ballard MacDonald; music, Donovan Meher; publishers, Francis, Day & Hunter, New York.

9759 He Lifted Me — **Anthony and Harrison**

The mere reading of this title will bring pleasure to hosts of owners of Edison Phonographs, owners who have waited so long for its appearance on a Record. The music has been slightly rearranged to permit of incidental solos by both the tenor and baritone voices, but the original air is carefully preserved in its sweet simplicity. Words, Charlotte G. Homer; music, Chas. H. Gabriel.

9760 Romance and Reality — **Edward M. Favor**

The mere reading of this title will bring pleasure to hosts of owners of Edison Phonographs, for Mr. Favor has always been a great favorite and he has not been able for some time to make a Record for us. Mr. Favor's position as a comic opera artist of wide fame keeps him on the road a large part of the time and it is only when he returns to New York that we can get him to sing for the Phonograph. This song is one of the hits in "Fascinating Flora." Mr. Favor soared nightly with it for many weeks at the Casino, New York. Two lively verses and two choruses point out the difference between plays and novels in romance and reality, and how the story of Cinderella works out in modern days. The song is one of those lively, witty ditties with which Mr. Favor has been most successful as a Phonograph singer. Orchestra accompaniment. Music, Baldwin Sloan; words, Louis Harrison. Not published.

9761 American Polka — **John Kimmble**

An accordion solo that will add much to Mr. Kimmble's already widespread popularity as a player of unusual skill on this somewhat peculiar musical instrument. Mr. Kimmble's execution will do much to dissipate the opinion that many have concerning the musical qualities of the accordion. In his hands it becomes most attractive. His previous Records are among the best sellers in the Edison catalogues and his newest contribution will rank fully as high in selling qualities. Piano accompaniment. Composer, John Kimmble. Not published.

9762 I Miss You Like the Roses Miss the Rain — **Reed Miller**

A charming little bit of sentiment, set to a delightful refrain, is this selection by an artist whose songs grow more and more popular as the months pass by. The lover's simile, as given in the title, is quite as pretty as anything published in some time. Mr. Miller's rendition of the song is fully in keeping with its other attractive features. Orchestra accompaniment. Music, Halsey K. Mohr; words, Will A. Mahoney; publisher, P. J. Howley, New York.

9763 The Little Old Log Cabin in the Lane — **Edison Male Quartette**

Many who hear this old time melody will reiterate their belief that few songs of the present day are as attractive as these favorites of several decades ago. Thirty-five or more years have elapsed since this song was whistled and sung everywhere, but it has lost none of the characteristics that made it popular then. Our Record of it will bring back many pleasant recollections to those who knew of it in its earlier days, especially after hearing the splendid manner in which it is rendered by the Edison Male Quartette. Unaccompanied. Music by Hayes. Writer of words and publisher not known.

9764 Imitation of Amateur Night at the Vaudeville — **Steve Porter**

Every one who has ever attended a vaudeville performance on a night when amateurs are permitted to exhibit their talents (or lack of them) will appreciate the cleverness of Mr. Porter's imitations. Mr. Porter also shows his unusual versatility in this Record. His portrayal of Benny Monroe's efforts at German dialect, Keeny & Walker's Irish sidewalk conversational sketch, and Gladys O'Brien's singing of "Love Me and the World Is Mine," are so different that it is difficult to believe that Mr. Porter has no assistance and that he is the only performer. This will be one of the hits of the February list. Original and not published.

9765 The Smiler — **Vess L. Ossman**

A banjo solo played by one of the best performers in the country. Mr. Ossman's work is that of one who has spent years in mastering the technique of the banjo. His selection is a lively march, perfectly suited to the banjo, that is making a decided hit throughout the country. Orchestra accompaniment. Composer, Percy Wenrich; publishers, Arnett Delonais Co., Chicago.

9766 Two Little Baby Shoes — **Byron G. Harlan**

Mr. Harlan has sung and taken part in many good songs and sketches, but in none has he been more successful than in what are professionally known as "baby songs." His sympathetic style of singing is admirably suited to such songs. "Two Little Baby Shoes" tells a pathetic story of a husband and wife who were re-united after a quarrel by the message conveyed

to the husband through a pair of tiny shoes. Orchestra accompaniment. Music, Theodore Morse; words, Edward Madden; publisher, F. B. Haviland, New York.

9767 August and Katrina — **Ada Jones and Len Spencer**

The mere announcement of this selection and the names of the artists making the Record are really enough to cause a wide demand for the Record, so well known are Jones and Spencer as dispensers of fun and music. The title shows that the selection is a German dialect sketch. After a funny dialogue between August and Katrina, Miss Jones sings: "I'd Like to Make a Smash Hit You," and with Mr. Spencer introduces a Dutch wooden shoe dance. This dance is so realistic that if you shut your eyes you can almost see his feet. The sketch is original with Mr. Spencer and is not published. Orchestra accompaniment.

9768 Much Obliged to You — **Arthur Collins**

Louise Dresser's coon song hit in Lew Fields' "The Girl Behind the Counter" and also being widely sung in vaudeville. Sylvester Johnson Lee came up from Tennessee and became a porter in a New York hotel. Do what he would he could not get the tips coming his way. He thinks it mighty strange that no one ever says, "Sylvester, you keep the change." All he got was "much obliged to you." Mr. Collins introduces a by-play into the Record suggestive of Sylvester's experience when asked to hold a bulldog one day. Orchestra accompaniment. Music and words, Benjamin Hapgood Burt; publishers, Jerome H. Remick & Co., New York.

9769 King of Rags — **Edison Military Band**

An entertaining Record of an odd composition, well worked out and appropriately named. One of those Records that will please seekers after the unusual things in band selections. Written in two-step time. The band work could not be better. Composed and published by S. Swisher, Philadelphia.

Carry Foreign Records

For several months past we have been going over our catalogue of foreign Records, that is, Records either made abroad or in other languages, and we are now nearing the end of the task. We have eliminated a large number for which the demand in this country is small; have discarded others because their quality was not up to our present standard, have added many new ones and taken other steps to improve the entire catalogue. During December a new catalogue will be issued embodying all of those changes and additions. The principal reason for doing this work was to get our foreign list in such shape that the trade can carry it to better advantage.

Because of the different demand in various parts of the country we can hardly expect any Dealer to carry the entire list, but we believe that every Jobber should do so. We purpose carrying such a stock of these Records as will make it possible to fill orders from Jobbers almost on the day received. Jobbers should in the same way carry a stock sufficient to fill Dealers' orders with equal promptness. Every Jobber believes that Dealers who carry the full domestic list are the more progressive and in the best position to get the most of the business. For the same reason Jobbers should carry the full foreign list. The same arguments apply in both cases. How can a Jobber fill every order of his Dealers if he does not carry the complete foreign list? If doing so involved the outlay of a large sum of money there might be some excuse for not doing so, but this new catalogue will include about 300 titles. To carry an average of ten of each will cost but $1,350, worth $67.50 or possibly $81 a year, at five or six per cent. interest. The cost would be returned many times in the year by the profits made by having the Records on hand. If the demand is greater a larger stock can be carried with correspondingly greater profit. Detailed information about the new list will shortly be sent to Jobbers, and we hope that those who have been lukewarm in the past will give this matter their most careful attention.

Dealers should carry a full line of such foreign selections as are in demand in their cities. If there is a large German population, put in every German Record and go after the German trade, Do the same if your trade demands Hebrew, French, Danish, Spanish or any other language. If you cannot carry the full list in each case, ask your Jobber to tell you which are the best sellers and put them in stock. Many of the foreign list, especially the instrumental selections, would find a wide sale among Phonograph owners generally if called to their attention and Dealers would carry them.

Dealers who do not sign the New Agreement by January 1st will be removed from our files and mailing list. Sign now.

Return Agreement Under Sealed Cover

The letters printed below are copies of those sent to all Jobbers during November. Since they may have escaped the eyes of some Jobbers we reproduce them in full. They are also of interest to Dealers:

November 9th, 1907.

We are daily receiving packages of Dealers' Agreements from our Jobbers, which have evidently been sent through the mail at second class rates, and on which we are compelled to pay excess postage, as the postal authorities consider them as first class matter owing to the fact that all the Agreements contain writing.

In view of this fact, we would respectfully request that in the future when sending in these Agreements you forward them by express or where sent by mail consider them as first class matter and attach sufficient postage thereto.

Thanking you in advance for your consideration of this matter, we beg to remain,

NATIONAL PHONOGRAPH Co.,
F. K. DOLBEER,
General Manager of Sales.

October 30th, 1907.

On and after November 1st, we will discontinue the practice of supplying Model "C" Reproducers with cup levers on all orders for extra Model "C's" unless you particularly specify that you desire the old style Model "C" Reproducer with cup lever attachment.

Our reason for taking this action is due to the fact that there is very little demand for a speaker with the cup lever attachment, and we will only supply them on special orders.

NATIONAL PHONOGRAPH Co.,
F. K. DOLBEER,
General Manager of Sales.

The New Record Selling Date

For the benefit of new Dealers or any present Dealers who may not understand the situation, we would point out that the Record selling date has been changed from the 25th to the 25th of each month (superseding the dates given in clause 11 of the new agreement) and Jobbers are now permitted to ship them to Dealers after 2 P. M. on the day before. This change became effective on November 25th. Since December 25th is a holiday, Records may be sold at retail on December 24th and shipments may be made to Dealers after 2 P. M. on December 23d.

As was to be expected, the change in the Record selling date and the announcement that new Records could be shipped to Dealers on the day before, have been followed by many expressions of gratification, especially from Dealers. The latter now have the same chance to sell at retail as the Jobbers in the same cities, besides giving them a chance to get the new Records on their shelves in readiness for the demand that always comes as soon as the public know that they are on sale. Advancing the date also gives the trade a better chance to realize on its sales than was not possible under the old date, especially when the month is short like February.

We again want to impress upon Dealers the importance of seeing that the new Records do not leave their possession, and that they are not played or exhibited until 8 A. M. on the selling date. To those who may be tempted to violate this rule we want to say that if they do not keep faith we will suspend them as soon as we are convinced of their guilt, and it will not take long to get the necessary evidence. If Dealers will not do their part in living up to measures adopted for their benefit we don't want them as Edison Dealers.

Developing Export Trade

In the course of a pleasant chat on the export business of the National Phonograph Co., Walter Stevens, the chief of that department, remarked: "It is unnecessary to dwell upon the tremendous extension of the National Phonograph Co.'s foreign trade; that is an old story, but we are proud of it nevertheless. Would we rather bring the artists here or send the experts away to make records depends? We have never had any trouble, because our reproducers have been the best men, and their equipment such that the finest results have been obtained. You know, the corps we sent to Mexico brought back what our committee of skilled inspectors declare are the finest they ever heard—instrumentals, vocals and talks. At the present time we have a corps of Cubans doing work in the laboratory under the capable direction of Walter Miller, who, you know, stands at the head of the list in his line. We are also bringing a number of people from Buenos Aires, S. A., for the same purpose. They are now en route. Of course, we could send our men down there, but at the present time we are so busy in the laboratory that we cannot spare a man, and as we want these Records right away, of course we had to bring the Argentinians—artists, each one—to New York.

"The company, however, are arranging to equip a special corps of recorders, to go into all foreign countries and stay there permanently, shifting from place to place as directed. We find this is the only solution of obtaining foreign Records—lines that are unmistakably of the home flavor—for they mean substantial business present and prospective."—*Talking Machine World.*

To the Trade

Nov. 25, 1907.

Dear Sirs:—It has been called to our attention that some Dealers have been taking advantage of past conditions, and have either been selling Edison Phonographs with the old equipment or have been supplying horns and horn cranes which they may have had in stock, claiming that they were unable to obtain the new equipments from their Jobber.

These conditions may have existed, but, in view of the fact that we are now in a position to supply equipments promptly, such excuses will no longer be accepted, and Jobbers and Dealers alike MUST SELL Edison Phonographs as they are equipped at our *factory* and at the increased list prices. Should our attention be called to any violations, we will immediately take such action as the case may warrant.

Thanking you in advance for your co-operation in this matter, we beg to remain,

Very truly yours,
NATIONAL PHONOGRAPH Co.,
F. K. DOLBEER,
General Manager of Sales.

The above letter, now being mailed to the trade, requires no explanation. It means that Jobbers and Dealers must hereafter sell Edison Phonographs just as they are now equipped at our factory. If they still have on hand any machines with the old equipment they must get the new and bring the machines up-to-date. It also means that they must ship out machines with the new equipment no matter what additional goods may be bought. Other horns cannot be substituted for those furnished with our machines.

Lower Rates on Horns

H. T. Leeming, traffic manager for the National Phonograph Co., has just returned from a trip made to Denver for the purpose of encouraging and assisting Western talking machine men in their efforts to get lower freight rates on amplifying horns. The Western rate on horns is one and one-half times first-class, while in the East they are shipped as just first-class. The local talking machine men have been working for two years for this reduction and have taken the matter up with the Western classification committee of the railroads. The outlook for a cheaper rate in the near future is now thought to be good.

A Phonograph Post Card

The Phonograph is not a new invention, for the Garden of Eden had 'em. The first talking machine was made from the spare rib of *Adam.—Single from a colored post card showing pictures of Eve and a Phonograph.*

Personal

William Pelzer, of the legal staff, was recently elected Vice President of the National Phonograph Company, a position that has not hitherto been filled. Mr. Pelzer has been connected with the National Phonograph Company almost since its organization.

Judge Wallace, recently retired as presiding justice of the United States Circuit Court of Appeals, second circuit, and who has been on the Federal bench for thirty years, has been retained by the National Phonograph Co. On October 30 and 31 he appeared before Judge Hazel, United States Circuit Court, southern district of New York, in the case of the New York Phonograph Co. against the National Phonograph Co. and others in contempt proceedings. Judge Wallace has heard on appeal all the talking machine cases of note for the past six or seven years, and his argument was of the high order expected. He was ably assisted by the company's special counsel, Charles L. Buckingham. The question at issue is the decree signed by Judge Hazel, May 2, 1905. Louis R. Hicks and John C. Tomlinson appeared for the complainants.

C. S. Gardner, who formerly represented this company in Pennsylvania and Ohio and more recently was in business for himself at Reading, Pa., has returned to our selling force, and is now making the acquaintance and booking the orders of Edison Jobbers and Dealers in the Pacific Coast States.

Visiting Jobbers at our New York office during November were: E. F. Taft, Eastern Talking Machine Co., Boston; G. L. Ackerman, Ackerman & Co., Scranton, Pa.; Jay A. Rickard, Schenectady, N. Y.; S. J. Francis and Mr. Harvey, Iver Johnson Sporting Goods Co., Boston; Fred Babson, Babson Bros., Chicago; J. W. Willys, Elmira Arms Co, Elmira, N. Y.; H. E. Marschalk and Louis J. Grison, Musical Echo Co, Philadelphia; W. O. Parcles, Parcles & Ellenberger Co., New Haven, Conn.; C. B. Haynes, Richmond, Va.; Louis Buehn, Philadelphia; M. J. Carroll, Utica Cycle Co., Utica, N. Y.; H. Wonderlich, J. Samuels & Bro., Providence, R. I.; Theodore F. Bensel, Pittsburg.

We have received copies of the first two issues of a little house publication put out by the Douglas Phonograph Co. of New York city. Two of its four pages are devoted to general stories and trade news, written in snappy, read-at-a-glance style, while page 3 is occupied by a Dealers' order blank for advance Records.

Our Newspaper Advertising

The annual newspaper advertising campaign for Edison Phonographs and Edison Records was begun on November 12th and 13th in 241 newspapers published in ninety of the largest cities of the country. The first advertisement was twelve inches deep and three columns wide. It was attractively illustrated, the argument was convincing and was altogether a most striking advertisement. On November 23d and 25th a larger advertisement appeared in the same papers, advertising Phonographs in the main, but also talking about the December Records and giving a complete list of them. This advertisement was fourteen inches deep and three columns wide. Following the same plan, similar advertisements will appear on December 10th, 11th, 23d and 24th. Future months will be treated in the same manner.

We have no hesitancy in claiming that this is the best newspaper campaign ever put out for talking machine advertising. It covers more cities and uses more papers than any similar campaign conducted by ourselves or any other company. The advertisements prepared for the entire series are forcefully written and strongly illustrated. We confidently believe that the campaign will have a marked effect upon the sale of Edison goods in all parts of the country. Its benefits will be greatly increased if Dealers will do some supplementary advertising of their own, so that the public will know where to find our goods when its interest has been aroused. We have been greatly surprised at the amount of advertising done by Jobbers and Dealers in connection with the two advertisements in November. In many cases the combined advertisements have exceeded a half page, making a presentation of the merits of the Edison Phonographs that cannot fail to make a great impression.

The only regret we have in connection with this campaign is that we could not extend it to every city and town in which we have Dealers. To do so in every such place would cost nearly a half million dollars, an amount that is impossible with our present heavy expense for printing and various forms of advertising now being used. The campaign is being confined to Jobbing cities, not only because of a desire to assist the Jobbers doing business there, but because those cities are the largest distributing centers for our goods. Papers printed in these not only circulate in the cities but they radiate in all directions, covering the country of the greatest population and giving us a greater return for the investment than would be possible to get in any other way for the same amount. The effect of such a campaign is, therefore, widespread. It gets into cities and towns not on our list. Dealers in such places can get almost as much benefit from it as those in jobbing cities by doing some local advertising of their own.

A newspaper advertising campaign was also begun in Canada on November 16th. It has been planned on the same general lines as the United States campaign. The same large advertisements are being used in daily newspapers, with smaller copy in a number of weekly publications of general circulation. The advertisements are appearing in about eighty publications, covering cities and towns. We look for a great business throughout the entire Dominion because of this advertising.

Sheets giving names of the publications and a sample advertisement being used in these campaigns have been sent to the trade in both countries, so that all Jobbers and Dealers are already fully informed concerning them.

Danish, Not Scandinavian

The eighteen Records listed in the October PHONOGRAPH MONTHLY as Scandinavian selections should have been called Danish. They are sung in Danish, which is *one* of the Scandinavian languages. The same error was carried through the printed supplement. The trade should carefully note this correction and explain it fully to their patrons, for many will buy Danish Records who would not know what was meant by Scandinavian. We reprint the list for the convenience of Dealers who may not have paid any attention to it when first published:

EIGHTEEN DANISH RECORDS.

15136	Hvorfor jeg elsker dig? *af H. Herper*	Jörgen Lindahl
15137	Danmark skal stee, mens Bøllegrene rulle, *af Lembecke*	Jörgen Lindahl

15152	Serenade af "Der var engang" *af P. E. Lange-Müller*	Peter Cornelius
15153	Vil du? *af Frederik Rung*	Peter Cornelius

Change in the Management of Our Mexican Co.

Rafael Cabanas, who has so successfully conducted the business of our Mexican branch, the Mexican National Phonograph Co., at Mexico City, for a period of two years or more, will, after January 1st, 1908, return to New York, to accept a position in the office of the Foreign Department, at 10 Fifth avenue. L. L. Lewis, who, until recently, has been connected with Lyon & Healy, Chicago, has been appointed Mr. Cabanas' successor. Mr. Lewis, for the past two years, has had charge of the I. C. S. Language Study Department of Lyon & Healy's Chicago store, and has resigned that position to accept the management of our Mexican Company. Mr. Lewis is thoroughly conversant with trade conditions in the Republic of Mexico, having been in business in Monterey, Mexico, for some time prior to his accepting a position with Lyon & Healy. He has a thorough knowledge of the Spanish language, and we are sure he will prove a worthy successor to Mr. Cabanas.

Printed Matter

A new edition of the domestic Record Catalogue, Form No. 1220, is now being shipped in quantity to Jobbers everywhere in the United States, whether an order has been placed or not. A supply should be in the hands of every Jobber by December 10th. The only difference between this and the preceding editions is the addition of the new Records for September, October, November and December. This change is not so great as to make the previous edition obsolete, and we hope that Jobbers and Dealers will use up any of the latter they may have on hand before putting out the new issue. We want to plan our work of shipping printed matter so as to send quantities of new forms to Jobbers without first sending out samples and then waiting for their orders. This can be done if we can feel sure that the trade will not throw away such copies of the previous edition they may have on hand. What might be called an automatic service to the trade will undoubtedly be much more satisfactory than the present plan, but we cannot afford to follow it if it is going to cause even a ten per cent. waste.

Specimen copies of supplements for the new Hebrew Records and South American National Hymns, listed in the November PHONOGRAPH MONTHLY, have just been mailed to all Dealers. Those who put these Records in stock may get supplements in quantity from their Jobbers. The South American National Hymns are worthy of more attention than is usually paid foreign selections. Except for their numbers they are just the same as band Records in the domestic list. They were made by the Edison Military Band at our own recording plant, and should be as saleable as any Record in the domestic catalogue. Dealers carrying the full catalogue will make no mistake in adding these and calling the attention of their patrons to them.

Jobbers have been supplied with quantities of show cards and folders for the holiday season. The show card is Form 1202. It is printed in two colors and shows Santa Claus climbing out of an Edison Record carton and looking down upon an expectant village. The folder is Form 1180. It is called "The Best Thing on the Tree," showing the children's preference for the Phonograph over the usual toys. This, too, is printed in two colors.

The Phonograph Price Cards, Form 1089, have been corrected and brought up to date to correspond with the new list prices. We will be glad to fill Jobbers' orders for a limited quantity of them.

Imitation Parts

Machine and record manufacturers are reported as conferring on some form of united action to circumvent and, so far as possible, put a stop to the use of so-called spurious parts in repairing. This matter has been mentioned in *The World* before, in connection with the action taken by the National Phonograph Co., who have taken steps to prevent what is indubitably an injury to their product. The substitution of glass for sapphire reproducing points, fraudulent feed nuts, inferior springs, etc., it is held, are detrimental to proper reproduction, or to the standard guaranteed when genuine parts are employed. Owners of machines are often surprised with the remarkable change of tone and quality of sound after their property has passed through the hands of the repairer, who thinks no one will be the wiser if other than the parts supplied by the original manufacturer are substituted. Complaints follow, of course, and it is therefore in a spirit of self-defense and of good faith toward the public that the manufacturers are co-operating to stamp out this evil, for such it is. As yet no definite plan has been decided upon, but it is safe to say when repressive measures are adopted the trade at large will be the beneficiaries.—*Talking Machine World.*

Cuban Records Dropped From Catalogue

For the same reason that we reduced the list of Mexican Records to be carried by the trade in the United States, i. e. limited sale, we have decided to cut down the list of Cuban Records, although they were not issued here until July last. We have, therefore, dropped all of the Cuban list *except* the selections named below, and these alone will appear in our forthcoming Foreign Record Catalogue. We shall, however, carry the entire Cuban list in stock and can fill any orders that may be placed by the trade. We will also furnish printed matter of them to Jobbers and Dealers carrying a stock of the entire list.

Prices as Inflexible as Postage Stamps

One of our salesmen was explaining to a Down East merchant the advantage of selling Edison goods as a Dealer and, of course, brought up the fact that they are sold everywhere at the same price, that they are never sold at cut prices. The merchant appeared to know all about this point and told how it had been brought to his attention. He said that a friend of his, living in the same town, had gone to a large city nearby and went from store to store in an effort to purchase an Edison Phonograph at a lower price than shown in our catalogues. He failed and so reported to his townman. "Why," said the merchant, "they were sold like postage stamps."

Advance List of Bohemian, German and Mexican Selections

The Records named below will be ready for shipment from Orange between January 1st and 10th. Samples of any or all of them will be shipped December 1st to such Jobbers as place orders for them. None will be shipped without orders. Jobbers' stock orders received by December 20th will be shipped as fast as possible after January 1st. Care will be taken to make shipment at one time to all Jobbers in the same city. Separate supplements of each list will be shipped with Records to all Jobbers who request a supply. State quantity required of each kind.

9 Bohemian Records

15222	"Tece voda proti vode" národní pisen	Otakar Marák
15227	"Hrajte mi tu nejskocnejší" pisen z opery "Hubicka"	Otakar Marák
15229	"Aj to bude svanda!" arie z opery "V studni"	Václav Kliment
15230	"Aj jdete jen!" arie z opery "V studni"	Václav Kliment
15231	*Arie Kecala z* "Prodane nevesty"	Václav Kliment
15232	Starozlovanská pisen	Václav Kliment
15233	Arie Gremina z opery "Eugenij Onegin"	Václav Kliment
15236	Duetto z opery "V studni"	Marák a Kliment
15235	Duetto z opery "Prodaná nevesta"	Marák a Kliment

8 German Records

15634	Deutsche Frauen blond und braun aus "Wiener Frauen,"	*Lhar* Hans Horsten
	Mit Orchesterbegleitung	
15635	Onkel Fichte mit der Nichte,	*Lincke* Grete Wiedecke und Ludwig Arno
	Duett aus "Eine lustige Doppelehe." Mit Orchesterbegleitung

VOL. V. December, 1907 No. 10

What the New Horn Means to Dealers

The old horn of the Edison Phonograph did the instrument an injustice. Its size, looks and shape were against it. Customers took it because it came with the Phonograph, but were forced to buy a new horn in order to get the Phonograph's best work. This necessitated the carrying of a large stock of horns by Dealers, none of which were exactly suited to the Edison or capable of producing the best results. It also led to price cutting on horns which deprived Dealers who maintained prices of their horn-profits, and besides it made the selling of a complete Phonograph two transactions instead of one.

The new horn has changed all this. It is sold with the Phonograph and as a part of it. The price of both horn and Phonograph is fixed; the Dealer sells both at one time and makes a good profit on both. He need not tie up capital in a stock of horns, bother with the sale of them, or lose a profit on them through price-cutting competition. Best of all, the buyer is more satisfied because the horn he gets is right—just the size and shape which has been found by careful tests and experiments to enhance the musical qualities and wonderful reproducing powers of the Edison. With its new equipment the Edison has strengthened its supremacy among talking machines.

Only Regular Frequencies

We have as yet been unable to obtain a satisfactory alternating current motor to run on other frequencies than the regular, as given in our catalogues, and, until we can secure such a motor, we will be unable to fill orders for Alva Phonographs and Acme coin-slot machines to be operated on special frequencies. When these conditions can be changed we will advise the trade in the usual manner.

A Good Opportunity

The following portion of a letter sent to his selling force by F. K. Dolbeer, General Manager of Sales, on November 12th, will, we believe, be of interest to the trade as well, for it touches upon four important points in selling Edison Phonograph Records:

In connection with the Exchange Proposition, which has just been put into effect, it has been called to our attention that this would be an excellent time for Jobbers to urge the Dealers to place in stock the entire list of Records, thereby very materially increasing the Dealer's business and making it easy for the Dealer to purchase the required quantity, inasmuch as they will only be compelled to pay for one-half of the Records ordered under the exchange deal.

One of our Eastern Jobbers has recently issued a letter referring particularly to the advantage to be gained by the Dealer who carried a complete list of Edison Records, and you, of course, will admit that such a Dealer can very materially increase his sales by carrying a full line of these goods, and this is an opportune moment not only to obtain the complete list but to thereby place him in a position to secure an increased holiday trade.

For sometime past we have received reports from some of our salesmen regarding the change in equipment of our machines, and it occurs to the writer that the only argument the salesman needs to advance in order to offset any complaint made by a Dealer, is to point out to him the additional profit which we are compelling the Dealer to make by our one price policy, and the slight objection to the color of the new horn could be overcome providing the Dealer used good salesmanship in the way of pointing out phonographic results which are obtained from the new horn. It is our desire that you use your best efforts along that line, and we have no doubt but that the results obtained will be mutually satisfactory.

Phonograph Jingles

The Washington *Evening Star* is conducting a jingle competition in its Sunday issues that is attracting considerable attention. It is offering a prize of $2 each for the best jingle on an advertised article. Twenty-four of such articles are represented in each issue, so that, it is possible (although very improbable) for one to win $48 in prizes by sending the twenty-four best jingles. The competition is, of course, an advertising scheme in which twenty-four advertisers take part each week. The Edison Phonograph is one of the twenty-four and scores of jingles have been sent in concerning it. These are of all degrees of merit. We reprint here some of the best. Even if Dealers do not find them useful in their own advertising they will be interested in reading them.

When the world seems "agin" you, and you're feeling mighty glum,
And friends bid you "cheer up, the worst is yet to come,"
Just try a funny number on "The Edison Phonograph,"
I advise you—see a dozen—if you don't have a good laugh.

The telephone is wonderful,
Great, too, is the telegraph,
But, of all, the most delightful
Is the Edison Phonograph.

"Just a song at twilight,
When the lights are low,"
Softly the Edison Phonograph sang
As we sat in the firelight's glow.

Everyone knows Edison, the wizard of the day,
And, of his great inventions, as the critics say,
The Phonograph is the greatest of them all—
It puts the world's great music within the reach of all.

The Edison Phonograph will make the home pleasant.
Nothing could be nicer as a Christmas present.
The evenings will be bright, no matter what the weather,
It will please the old, and bring the young folks together.

Does your wife get melancholy?—Buy a Phonograph.
And some records of good selection, that will make her laugh.
There's no medicine like music; nothing healthier than a hearty laugh.
Get an Edison, quick, and see it, t'will surely be worth while.

If you love to dance the long winter evenings through,
An Edison Phonograph will play in time that is true.
If you feel too sad and do not care to dance,
With some sweet old song it will your woes entrance.
While children are restless and need to be amused,
With a funny dialogue it gets them enthused.

When we are drinking let us quaff
A toast to the Edison Phonograph.
It will amuse a company any,
Old and young, few or many.

Edison's the name of the great Phonograph
That has made millions of people laugh.
It can also take a serious stand
And give you airs from operas grand.

When the day is cold and dreary,
When the day is warm and cheery,
When you want a hearty laugh
Remember the Edison Phonograph.

O lover of music, of string and of voice,
Each age has its seer;
As the wondrous record revolves we rejoice
That Edison's here.

The Edison Phonograph is a wonderful thing,
It can talk, it can play, and charmingly sing.
There are records to suit every taste on the earth,
Some full of pathos, and some full of mirth.
For absolute accuracy, and clearness of tone,
All other makes are entirely outdone.

The "Wizard" has invented many things;
But my favorite invention is the one that sings.
It can also talk and whistle and laugh—
This wonderful Edison Phonograph.

Get an Edison Phonograph
And you'll have a friend indeed.
No more from home will hubby roam,
But spend his time with you.

In this strenuous age results are what count,
No man is content till his revenues mount.
But with the world you may joyously laugh,
If you own an Edison Phonograph.

Song and dance, and per band music, too,
Edison's Phonograph gives to you.
It makes the evening cheerful and gay,
When at home you're compelled to stay.

The Edison Phonograph is heard the world over,
From New York to Paris it keeps folks in clover.
It scatters our troubles with light merry tunes,
And makes us all feel as a happy as June.

When moody or merry or gloomy or glad
If you wish to cry or to laugh;
There's nothing so pleasing and so easily had
As Edison's Phonograph.

The marvels of Edison,
The genius of the earth has run.
For exciting music—making fun—
Great work this Phonograph has done.

What brings the world's best music right into your home?
The Edison Phonograph!
What makes it the most delightful place to care to roam?
The Edison Phonograph!!
What keeps the children happy as they turn life's golden pages,
And the wife in a good humor, though the world may storm and rage?
What is the greatest scientific wonder of the age?
The Edison Phonograph!!!

You can hear all kinds of songs,
You can either weep or laugh,
If you use "gold moulded" records,
And the Edison Phonograph.

Mister Edison knew what he was about
When he got that Phonograph out,
So if you want a jolly laugh
Be sure to buy this Phonograph.

A bashful lover loved for naught,
Till he had a happy thought,
And proposed with merry laugh,
By an Edison Phonograph.

Christmas time is drawing near,
An Edison Phonograph get you,
"Tell me how to please my dear"
And it will cause you no worry or fret.

Here's to the Edison Phonograph,
The best machine of the times;
It tickles you, and then you laugh,
As it reels off its funny lines.

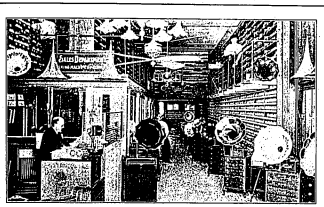
Phonograph Sketches by Prominent Artists

The illustrations now appearing in our magazine advertisements are reproductions from a series of sketches drawn especially for us by a number of leading artists of the country. They are the most expensive illustrations that have ever been made for talking machine advertising and are, in our opinion, the most artistic. The one shown in the June and July magazines was drawn by Charles D. Williams, of New York; that in the August magazines was the work of J. J. Gould, of Philadelphia. Lucius W. Hitchcock, of New York, drew that used in the September publications. Forrest Halsey, of New York, contributed the one appearing in October. James Montgomery Flagg, of New York, drew that in the November issues, and Rose Cecil O'Neill Latham Wilson, of New York, that used in the December copy. Another fine drawing by James Montgomery Flagg will appear in the January magazines. Later Edison advertising will be illustrated by Guernsey Moore, Karl Anderson, Sewell Collins and J. J. Gould.

A New Use

We would like to take up a little of your time in order to explain what to us is a new use of the Phonograph. We had an election in our town November 5th. Local option, or whether we should have saloons, was the issue. Our sympathies were with the temperance people and we set up our biggest Phonograph near the door and played to the street. We had a crowd around the door all day, and by using sacred songs and such Records as would bear on the issue in the least we think we had some effect. Nos. 1559, 7014, 9472, 9031, 9304, 7267, and many others were worked hard all day. We might add that the town went dry.

Just a word about sending back Records on the proposition offered. We decided to send back none. We believe if all Dealers would make an effort to dispose of *all* Records there would be few to send back. We never let a customer off with hearing the new Records alone. When he asks to hear the new ones we run in a few old ones always, taking him of course, if he has heard this one or that one. A clever salesman can in this way sell a bill of Records made up largely of back numbers and treat his customer right at the same time. How are they ever to hear the good ones among the old numbers if they are never played? Next year we may have some to send in but not this year.—*J. B. Leeson School Supply Co., Sparta, Ill.*



Dealers' Advertising

The Dixie Music Co., of Winston-Salem, N. C., advertise themselves as Dealers for "Nonide Shpargonohp." These peculiar looking words at the beginning of their ads aroused considerable curiosity, until it was explained, "You may not be able to read this, but if you read it backwards you will find out that we have the best amusement maker on the market."

I. C. Adams, an Edison Dealer at Calistoga, Cal., sends a series of clever four pussy cat post cards that he is sending to his prospective Phonograph customers. One shows kitty in the horn of a Phonograph and reads thus: "There is no danger of your coming out of the little end of the horn." If you get an Edison Phonograph. Another shows kitty with one eye blindfolded and the advice is this: "If you are like kitty—got but one eye open—and will come to us and listen to an Edison Phonograph, you'll soon have the other eye open." A card with kitty's head sticking out of the top of a shoe reads: "Any old shoe is good enough for a cat to play in, but any old talking machine is not good enough for you. Get an Edison Phonograph and you'll have one that *is* good enough." With kitty in an alert position, the phrase reads: "This kitten is on the lookout for something good in the line of talking machines. If you are, just drop in and hear the latest Edison."

Many Edison Jobbers and Dealers generally are doing so much advertising in the local papers nowadays that it is practically impossible to even refer to them by name. They comprise almost every aggressive firm handling Edison goods. Once in a while these advertisements are out of the ordinary and worthy of special mention. Such were those of F. M. Vreeland, of Gibson City, Ill. On two different occasions recently his advertisements occupied full pages of his local papers and the space was entirely devoted to exploiting Edison goods. This is a good object lesson for those Dealers who still doubt that advertising pays.

I am particularly interested in your page of *Advertising* suggestions in the PHONOGRAPH MONTHLY. I have a novel way that is new to me, but may be an old one to some. I have a morning glory horn fastened through the transom over the front door to my store and seventeen feet of one inch speaking tube connected with the horn, running back into the store and connected to a Home Phonograph. The result when playing a Record is fine and can be heard 300 or 400 feet away. It is the best Edison advertising that I have done, and attracts large crowds.—*H. L. Collier, Lake City, Minn.*

STORE OF THE AMERICAN PHONOGRAPH CO., DETROIT, MICH.

One of the sharpest photographs received by us in some time is the one above, showing the interior of the store of the American Phonograph Co., at Detroit. It was taken with a small camera, by Mr. Fritchey, of our selling force. Aside from its merits as a photograph it shows a large stock of Edison Phonographs and Records carried in a most compact manner. It also shows the row of sound-proof rooms for playing machines and Records for customers.

Jobbers Must Ship Machines With Complete Equipment

Some Jobbers have complained that Dealers have sent them orders for machines without the new equipment, it evidently being the intent of such Dealers to add an equipment of their own and work off some of the horns they have in stock. This is desirable from their standpoint but we cannot permit it to be done because of the impossibility of maintaining prices under such conditions. It would be equivalent to making as many different trade prices on a machine as there are kinds of horns.

The attention of all Dealers is particularly directed to paragraph No. 4 of the Conditions of Sale, in the Dealers' Agreement, reading as follows:

Phonograph Outfit.—The words "Phonograph," "Machine" or "Outfit," as used herein, refer to the complete outfit or equipment as specified in the latest catalogues of the National Phonograph Company, and *each outfit must be sold and shipped complete as listed*; rebates, allowances, credits or substitutions of any kind being strictly prohibited. This does not prohibit the removal of a machine from its cabinet for mounting in a combination machine and record cabinet, but no allowance can be made for the regular cabinet. All extras sold with an outfit must be in accordance with the requirements of section 3.

Jobbers are not permitted to furnish machine *without* the new equipment, and Dealers should bear this in mind when ordering. Separate horns and horn cranes for bringing old machines up-to-date may, however, be purchased from Jobbers at the prices listed in the PHONOGRAPH MONTHLY last month.

A "Follow-Up" Letter

The following copy of a letter which E. C. Erickson, an Edison Dealer at Hornerstown, N. J., writes to prospective purchasers, is one of the best that has come to our attention. It is reproduced that Dealers in general may learn of the interesting argument it is possible to produce with but little effort.

Listen one minute, please. You are considering the purchase of a KINDLY PHONOGRAPH.

Now it is a wise consideration, during the coming winter evenings with the snow as high as the fence, and the thermometer at zero and the cold wind whistling around your house burning a place to crawl in.

I cannot imagine a more pleasant thing than sitting in front of a blazing fire and listening to the Edison's wonderful little invention on your centre table entertaining you with your favorite music. No matter what it may be this little instrument will furnish it for you.

Please give it serious consideration, and I am sure I will receive your order by return mail. I tell you now, and you will learn later, that you never invested the small sum of $25.00 to a better advantage.

Edison—the Wizard Among Inventors

Some fifty years ago there appeared on the trains of the Grand Trunk Railroad a diminutive boy, with serious eyes, a well-developed trend of ideas, and an inexhaustible supply of hustling proclivities; by name "Tommy" Edison, by profession, newsboy, he claimed Milan, Ohio, as his place of birth. The lad appeared to have had little time for the ordinary schooling or pursuits accorded to village boys in general. His mother gave him a rudimentary education, and at the age of twelve he elected to become the arbiter of his own fate and launched forth upon a business career. The story of his efforts is written in the history of the century.

To-day, this boy, passed on from the first flush of maturity to the milestone of threescore years, proclaimed by all the world to be a "Wizard," who has conjured out of nature's forces marvels beyond the wildest dreams of prophets, writes his name "Thomas A. Edison, Electrician."

And there you have the man! Fame's laurel wreaths, with their addenda of lettered degrees and limelight halos, hold no lure for Mr. Edison who stands pre-eminent in this the "Age of Invention." "Electrican" he was when he first began to wrest secrets from nature's storehouse, and now with more than one thousand patents in practical operation, he still prefers to be known as such. Few men of the scientific world have possessed the shrewd business acumen of Edison; he claims that he is not a mathematician, and that deductions in that line are worked out by a system practically his own. Be that as it may, his system when applied to the business end of his inventions has been most fruitful in bringing in fortunes from his numerous patents.

First, last and always Edison is a fighter, his road to success has been by no means flowery and he has contested the upward climb inch by inch. Possibly his bitterest opponents have been the Westinghouse factions, and in Mr. Westinghouse, Edison found a foeman worthy of his steel. The fight between the two great inventors has waged fiercely for fifteen years, with no cry for quarter. The General Electric Company, whose chief products are Edison patents, battled desperately in Wall street to compass the industrial downfall of Westinghouse, and the warfare was a picturesque incident in the financial world.

Mr. Edison says that during the past forty years he has heard so many yarns as to how, when and where he perfected his first invention that he is slightly hazy about the facts himself, but his first practical efforts were telegraph appliances, he having graduated from newsboy to telegrapher.

WHAT HE CALLS A DAY'S WORK

For forty-five years Edison has worked unceasingly, every day and the greater part of every night, but his force of brain and sinew have been expended with no unnecessary waste of tissue and standing on the threshold of old age, his vitality, a veritable well-spring, gives to his rugged looks a brightness of eye and clearness of skin to be envied by a younger generation of men. And this, despite the fact that Mr. Edison's mode of life runs amuck the theories of health savants. His working hours are eighteen per day year in and year out; he claims that many of these hours, which have been productive of his greatest inventions, have been his playtime; he takes very little exercise, and the Edison maxim-ums for the brain to lie dormant is five hours. "Too much sleep makes sluggish minds," he will tell you; so at five-thirty he is not only awake, but actively alert to the day's work, and by eight o'clock is in his laboratory, where he remains until seven in the evening, having taken but a brief respite for a frugal luncheon. After a simple dinner he retires to the library in his home and works until midnight. Once in a while he goes fishing, but only when he wants to think out a particularly knotty problem.

His food theories which he puts into practice are original, but to him have been prolific of good results. His doctrine is that too much food is the root of all fleshly ills, and that to gain the best results, nourishment should be taken in small quantities, as very little is needed to preserve the chemical energies. These are simple rules that have been followed up by the man who will tell you that he has never been tired in his life, and whose greatest joy in living is found in never spending an idle moment.

"The Wizard's" domain is at Llewellyn Park, West Orange, N. J., and extends over many acres of ground. The great factories employ an army of workmen and bustle with the din of productive endeavor. The large laboratory, forbidding in its aspect, is shut in by barred entrance gates, jealously guarded by a watchman, and unless a visitor can prove that he has legitimate business within, access is impossible. At best it usually takes some hours to gain admittance, as the Edison experiments do not admit of interruption. During the tedious wait it is hard to divest one's fancy of magic cauldrons, in the mysterious regions, beyond, presided over by this modern knight of the Black Art. But when the gates swing wide and the vista of gloomy corridors are presented to view, there is no hint of supernatural art; busy men in shirt sleeves, or grimy overalls are discovered moving busily around the big work rooms in prosaic fashion, and it is with something of a shock that Mr. Edison is found to be big and sturdy, with a democratic manner, which he extends to his dealings with his workmen.

The Edison sanctum is a big, bare-looking room, with littered floor and tables; rows of shelves surround the room, filled with queer looking bottles, and on the work benches carpenter tools, bits of wood, metal and odds and ends of unfinished work mingle in confusion. On the table in front of Mr. Edison lay a dismembered Phonograph; in his hand he held a megaphone, and before turning to his visitor he finished giving instructions to one of the workmen.

"I am fighting against time," he said. "I'm going to perfect the Phonograph before my hearing is still further impaired." This in a matter-of-fact way, as if deafness was to be considered as all in the day's work. "The possibilities of the Phonograph are great, but it is a delicate bit of work, which I shall complete, and then I am going to rest."

At this point Mr. Edison was interrupted by one of his assistants, who read what seemed a very complicated report to his chief, in a very loud voice; when he paused to await instructions, Edison, without hesitation or without reference to notes, gave him a long formula, giving the names and specific quantities to be used, just how to combine them, and what results were to be obtained; then, without effort, he resumed his conversation.

"Well, maybe you would not think it rest; my ideas on the subject are somewhat different from the preconceived ones; just loafing around, in an aimless pursuit of relaxation and pleasure, has never appealed to me. For forty-five years my work has been practical; I have labored to turn my knowledge to commercial ends, and I have not been the loser, but now my play-time has come, my days as an inventor are over; I do not expect to take out any more patents; in fact, my business career is at an end; I am off to explore the limitless fields of science. In my years of experiments I have run into many interesting things, which promised great development. Lack of time forbade excursion into these new lines of thought, but now I am going back to pick up the threads. When a man is not pressed by financial needs his possibility for achievement are increased one hundredfold. Discovery and invention are not synonomous; invention is most frequently the result of the simple deduction of scientific laws; on the other hand, discovery is generally the result of accident. Bequerel discovered radium while working out a problem in phosphorescence; chance revealed the Roentgen ray; but while I cite these as interesting, I do not advocate leaving the discovery of scientific phenomena to chance. With certain and observed facts as a starting point, and aiming for a definite object, concentrated mental effort, like that which after nineteen years resulted in the discovery of "Kepler's Laws," is the best conqueror of scientific problems. But hampered by neither facts nor theories, my remaining years are to be given to the simple joy of wandering along new and untried paths; of course, I am hoping to find something that the best of us has not imagined, and I enter on my holiday with hope in the ascendant," and the "Wizard" rose and shook himself as if to give vent to his bubbling enthusiasm.

And thus this great American turns the keel down on his career as inventor, and with boyish buoyancy starts off afresh.

ENTHUSIASM ABOUT PHONOGRAPHS

Mr. Edison declines to figure in the role of a prophet, but voices some interesting views as to the future of present day inventions, and the possibilities of those necessary to insure the comfort of future generations. He is enthusiastic as to the Phonograph and believes that a combination of the kinetoscope and Phonograph will afford a perfect artistic illusion, and make possible the presentation of operatic and dramatic performances without an actor or singer being present.

As to wireless telegraphy, the marvelous development within the past four years makes all things possible for the near future. If, when practically in its infancy, this science compasses a distance of fifteen hundred miles, Edison argues that the next, generation can easily obtain communication almost from pole to pole.

Mr. Edison believes that the depletion of the coal territory is the most serious problem which confronts the next generation. As shown by official statistics, we use five hundred million tons annually; at this rate, and increasing in the same proportion as it has during the past ninety years, our coal supply will be exhausted within the next century, and unless science finds a substitute for coal, our grandchildren will be forced to live without heat or light save that afforded by the sun.

Each year notes improvements in the electrical light, and Mr. Edison thinks that within the next fifty years the cost of production will be decreased and that the light will give the same candle power, without expending a tenth of the energy now required.

The Edison home at Llewellyn Park is a beautiful modern mansion, filled with treasures of art and surrounded by vistas of landscape gardening. As Burt Meyers, in "Success," the Edisons have another fine estate, to which they go for a short sojourn every spring. At the southern home Mr. Edison has a perfectly equipped laboratory, and works even harder there than when he is at West Orange.

In an interview given on the occasion of his sixtieth birthday, he admitted that his bad habit was the smoking of many strong cigars; to the indictments of becoming an author, he pleaded not guilty. "There are three things I cannot understand," he said. "How any man could write a book, make a speech, and make mathematical calculations."—*Human Life for August.*

To keep in good standing, he entitled to Dealers' discounts and remain on our mailing list, Dealers must sign the new Dealers' Agreement. If you have not yet signed, do so at once.

Gentlemen:—I take the pleasure to state that I have been an Edison Dealer since November 1st, 1906. I have sold 47 Phonographs and 6,221 Records. There are three Dealers in this town of about 1,000 inhabitants. I have 130 steady customers on my list and am gaining some more every day. I expect to double this amount this coming year. I have carried complete line of Edison Records and Phonographs since March 1st. Business is commencing good for the last couple of weeks, while the evenings are growing longer, and people seem to be more interested in the Phonograph than ever before. —*Nicholas F. Grisch, Corry, Pa.*

EDISON
PHONOGRAPHS

THIS is an invitation to everyone who reads it to come to our store and hear the new Edison Phonograph, the one with the big horn. This Phonograph is bigger, better and has a finer finish than any of the other models. We will hold an impromptu concert any time you come into the store. Edison Phonographs are sold on the easy-payment plan if you prefer.

James Bronson & Co.
Everything in Hardware
4 Lincoln Sq., Newark, N. J.

☞Electro in above ad is: Single column wide, No. 653. Double column wide, No. 654.

EDISON
PHONOGRAPHS

WE would like to see an Edison Phonograph in every home. We know that you will find in the Edison Phonograph the greatest amount of amusement, either for yourself, for your friends or both. Nothing makes an evening's party "go" so much as an Edison Phonograph. The faithfulness of its reproduction of all kinds of music is marvelous. Come into the store at any time and hear it, and especially ask to see and hear the new model with the big horn.

Wm. N. Knight & Co.
Electrical Supplies
15 Dey St., Boston, Mass.

☞Electro in above ad is: Single column wide, No. 655. Double column wide, No. 656.

Ready-Made Ads

The above ready-made advertisements are the first four of a series that we shall print from time to time for the benefit of Dealers who find it difficult to write and illustrate their own advertisements. We will furnish the cuts in any one or two of these advertisements, either in single or double column, to such Dealers as write *direct* to our Advertising Department for them, providing they will agree to use them in local newspapers and will later send us copies of papers in which they appear. Dealers to whom we have previously furnished stock electros, must show us that they used them before we will send any of the new series. Nor will the further request of Dealers for the new electros be honored until evidence is presented that the first ones were used as agreed. In other words, we are sending out electros for advertising purposes and not merely because Dealers request them, and the least that Dealers can do is to show that they have done their part. Jobbers' request will be honored the same as Dealers but electros will not be supplied to them in quantity for re-distribution to Dealers. Use numbers in ordering electros. Also the blank on opposite page. If you do not care to cut your copy of the PHONOGRAPH MONTHLY, copy the blank in a letter.

EDISON
PHONOGRAPHS

YOU can save money by buying an Edison Phonograph. How much do you suppose you pay for theatres, concerts, and other amusements? Far far less money you can buy an Edison Phonograph and keep supplied with new Records. Come to our store and hear the new model with the big horn. It is a wonderful instrument, beautiful to look at, and will adorn any drawing or music room.

We have Phonographs at all prices, either for cash or on the easy-payment plan. Just come in and hear them.

George W. Hardwick
Musical Instruments
21 Pearl St., Hartford, Conn.

☞Electro in above ad is: Single column wide, No. 657. Double column wide, No. 658.

EDISON
PHONOGRAPHS

WE sell the Edison Phonograph, the most perfect sound-producing machine, Mr. Edison's favorite invention, which contains all his new improvements, and sell it for cash or on the easy-payment plan. We are now showing the new model with the big horn, the greatest triumph in Phonograph making. Don't forget that Mr. Edison is the inventor of the entire Phonographic idea, and that the Edison Phonograph is the original talking machine.

William R. Johnston
Buffalo, N.Y.

☞Electro in above ad is: Single column wide, No. 659. Double column wide, No. 660.

A Dealers Poetical Ad

The advertisement printed below was written by F. D. Gutterson, an Edison Dealer at Charlotte, Mich., and printed in his local newspaper, together with a good display ad. on the same page.

THE SAME OLD STORY.

"I would not have a Phonograph,"
Said Mister Willie Ray,
"My neighbor has one, and it makes
Me sick to hear it play.

"It screeps and shrieks, it scrapes and raups
Until I'm nearly wild.
If my voice sounded like that, dears,
I'll bet I'd have it filed."

"What is your neighbor's Phonograph,"
Said Mr. Charlie Lee,
"I am not sure," was the reply to me
"It's called the 'Busy Bee.'"

They walked along and soon turned down
A shady, quiet street,
When unto there came to them the sound
Of music, grand and sweet.

An orchestra was playing
Behind a hedge of flowers;
And someone sang an old, sweet song
That brought back childhood's hours.

And then there was a male quartette,
And then a comic song;
And then they heard a grand old hymn
From voices rich and strong.

"Oh, isn't it delightful?"
Said Mr. Willie Ray,
"To hear a song when you are sure,
I'll stay right here all day."

Then up spoke Mr. Charlie Lee—
"Excuse me if I laugh;
But what you've heard and like so much
Is my EDISON PHONOGRAPH.

"I bought it down at GUTTERSON'S,
For Father and for Mother.
A thousand wouldn't buy it,
If we couldn't get another."

"I do not blame you, Charlie Lee,
I was wrong and you are right.
I'm going right down to GUTTERSON'S
And take an EDISON home tonight."

MORAL—Get busy; buy an EDISON and enjoy life. GUTTERSON has them, and all the Records.

Have No Records to Return

Regarding the enclosed generous exchange proposition, we beg to say that we have no Records to return. Our present stock of nearly 5,000 Edison Standard Records are worth 35 cents each to us just as they stand. We nevertheless appreciate the privilege extremely and beg to decline.

Thus wrote the George D. Hampton Piano Co., of Newport News, Va. Letters like this and that of the J. B. Leemon Co., of Sparta, Ill., printed in another column, have the ring that we like to hear. We know that scores of other Dealers feel the same way, but do not take the trouble to write. Edison Records are always good stock.

Another Phonograph Disease

Following is part of a half page newspaper advertisement just received from the Assiniboia Music Co., of Moose Jaw, Canada. We think that readers will agree with us that it is a most original production.

A BAD CASE OF "ISOLATION" CURED

A man called to us the other day, "I don't suppose there is much done in the talking machine business nowadays. Remember, at first it was quite a fad, like everything else." He was from "Gooselake," and had evidently just escaped from the pasture by breaking his yoke and wriggling through the rail fence. We said to him, "My dear sir, all the world is not asleep. Let us help you." "You never made a mistake in your life," broke up and listen:

"In 1903 we were persuaded by a glib-tongued traveling man to place an order for what, when we watched up from the 'influence,' we thought would last us until we were old enough to grow whiskerads, and it was only the urging of the same glib-tongued traveling man that from selling the lather a cancellation of half the order. Now, Mr. Gooselake, listen to this: During Christmas week we had to wire 'hurry up orders' to supply the house, and on Christmas Eve we hadn't a machine in the store to give a tune on.

"In 1903, we doubled our order, and still hadn't enough. Then in 1904 we steadily increased our orders with the same results.

"Now, do you see all this array of machines and Records? Looks like we were overloaded, doesn't it? Did you ever see so many machines in your life, all at once?

"We haven't got enough. Can you realize that?

"We have not enough.

"We have ordered more.

"Look at this order for talking machines which are to come along this month:

"50 MACHINES,
"500 RECORDS.

"Go back to Gooselake and tell the folks that the Phonograph,

THE EDISON
PHONOGRAPH

has taken a permanent place in the hearts of ALL the people, especially the little folks.

"The old and young,
"The old and young,
"The rich and poor.
"The more artistic the musical taste, the more the enthusiasm always.
"You want this one, eh? That's the way with everyone—they want one as soon as they HEAR them."

Approves New Record Selling Date

We received your notice that there would be a change in the day of placing Records on sale, making it the 25th instead of the 27th, and that the Jobber could send out goods after 2 P. M. on the 24th. We think this arrangement is a splendid idea, especially that which permits us to send the goods out the day before, as this will put us in a much better position to get goods delivered in Minneapolis on the official shipping day, as well as Duluth, Superior and other points, where there has always been a big fight to get Records, in on time, and it was always difficult to do so on account of not being able to ship until 8 o'clock in the morning and trying to make 8:20 and 8:30 trains. It will also be a great deal more convenient to get these orders ready to ship and we know it is greatly appreciated by the small Dealer.—*Koehler & Hinrichs, St. Paul, Minn.*

Factory of The National Phonograph Company at Willesden, England

[We are indebted to the Plane Trader and Recorder for the following detailed description of our new Record making plant at Willesden, England.]

In fulfillment of the promise in our August issue, we are now in a position to furnish some additional particulars as to the British factory of the National Phonograph Company, Ltd., at Willesden, together with some photographic views of the various departments.

Only recently the sensational announcement was made by the National Company of the reduction in the price of Edison Records, and now comes this further most important move in the direction of the provision of manufacturing facilities for the out-turn of Edison Records in this country.

It is general trade knowledge that all Edison machines are manufactured at the Edison factories in Orange, N. J., U. S. A., and that, until now, the Edison Records have been produced either in America or at the Belgian works of the company.

We feel that it is quite unnecessary for us to dilate upon the high excellence of these Records, for from the very commencement of the industry they have been acknowledged as most perfect examples of artistic recording and manufacturing skill. But we would impress upon our readers that experts, thoroughly conversant with Mr. Edison's processes, have been brought over from the American factories, and that the Willesden works have been fitted with Mr. Edison's latest appliances for the production of Records, so that, taking into consideration the present most efficient state of the British recording department, it is assured that the British Records will be in every respect equal to the American product.

Of late years it has proved increasingly difficult for the National Company to cope with the extraordinary demand for their product, notwithstanding the enormous output from their established works, which we may mention have recently been greatly extended. The directors have, therefore, been compelled to take the step of acquiring a factory in this country in order to deal effectively with the company's tremendous British trade.

Immediately adjoining the L. and N. W. Railway, the factory at Willesden is splendidly situated for the prompt dispatch of goods to all parts of the United Kingdom, with the additional advantage of being only a few miles from London.

At the time of our visit the factory was in the grip of the workmen, but under the direction of Mr. Riehl, the company's works superintendent, rapid progress was being made in installing machinery and other plant, and in adapting the premises to the requirements of Record manufacture.

Our photograph will furnish an idea of the appearance of the works, which, we may mention, are of recent construction, lofty and well ventilated, particularly well off as regards light, and designed with a view to each department being complete in itself, yet providing the necessary intercommunication.

A clock tower is a prominent feature in the handsome frontage, and an iron gateway giving access to the works will be noted towards the centre, on the left of this being a fine suite of offices, equipped with all modern business requisites, and on the right a building in which each floor has been fitted with racks having altogether capacity for storing enormous quantities of Records. This will constitute the shipping department and stock rooms.

Running down the centre of the factory is a wide passage, on either side of which are the main buildings. A unique feature in connection with this passage-way is the fact that it is roofed with glass, so that weather conditions can in no way interfere with the loading and unloading of goods, or their transference from one department to another.

Describing the departments in the order in which we visited them, we will first refer to the enormous building to be devoted to moulding. This is being fitted up with a wonderful plant for the purpose, and will also contain lathes and machines for finishing, lettering, etc., etc.—in fact for turning out the famous Edison Gold-Moulded Record complete.

Adjoining is the engine and electricity room, where a 60-h. p. gas engine is erected, together with a powerful dynamo, of a united capacity of about 1,000 lights, for lighting the works. In another building a gas-making plant has been installed (in duplicate, to provide against emergency), so that the National Company, in addition to producing electricity for power and light, are likewise manufacturing their own gas.

From the gas house, passing through a large triangular yard, the carpenters' shop is reached, which has accommodation for 60 men, with space for stowing empty cases, and for packing operations. We may mention, too, that in this yard the company have thoughtfully provided a canteen, where the workpeople may take their meals.

In the boiler house an enormous steam boiler has been fitted for heating the factory, which, as is known, it is important must be kept at a normal temperature, and in an adjoining room are the huge coppers for boiling and mixing the Record material.

We next visited the engineering shop, which is a most important department in a factory where so many delicate and intricate machines have to be kept in perfect working order. Two giant dynamos are installed here for supplying power to the moulding and machine shops.

Space will not permit our entering into a particular description of the many other departments visited, but we may state that separate stock rooms have been provided for German, French, and other foreign Records, and that a fire and burglar-proof building is in course of erection for the storage of the master moulds. As may be well understood, these moulds are most valuable, and it is necessary, therefore, that every precaution should be taken for their preservation.

We must not omit to make mention, however, of the spacious experimental room, in which a staff of experts will be constantly at work seeking any possible improvements in material and manufacturing processes.

It is expected that the factory will be in full operation early in the present month, and we must congratulate Mr. Riehl on the rapidity with which he is carrying the work through, taking into consideration the attention which has been bestowed in securing perfection in every detail.

Six hundred hands will, we understand, be immediately engaged, and the present plan installation will have a capacity of 50,000 Records per day, an output which, if required, can be quickly doubled, as there is plenty of space available in the factory for the necessary increase of machinery.

Vibrations of the Voice

If the middle C is struck, the note is produced by sound vibrating at the rate of 256 per second. The farther a note is removed on the treble or bass end side of the piano from middle C, the higher it will be, and the farther it is removed on the base or left hand side, the lower. The highness or lowness of a voice—called pitch —is regulated by the number of vibrations per second, the high voice being produced by the greatest number, and the low by the smallest. Whatever is the vibration number of any given note, the octave below it will have exactly half the number of vibrations, and the octave above it double the number. Thus the C below middle C, will give 128 vibrations per second and the octave above middle C will give 512 vibrations. The compass of the ordinary human voice ranges from 80 to 1,024 vibrations per second. There are many exceptions to this as is shown by Professor W. Le Conte Stevens, a member of the American Association, who stated that "the lowest recorded note of which we have is that of a bass named Fischer, who lived during the Sixteenth Century, and who sounded Fo, about 42 vibrations per second." Mr. Stevens himself, without possessing a bass voice, has sounded as low as Ao, 55 1-3 vibrations per second, when his vocal cords were thickened by an attack of catarrh. This, however, is under abnormal conditions. "The highest note hitherto recorded in the books was attained in singing by Luccezia Aljagari, called 'La Bastardella' Al Parma in 1770 she sang for Mozart, several passages of extraordinarily high pitch, one of which included C6, 1048 vibrations per second. She trilled in D5, 1,152 vibrations, and was able to sing as low as G2, 192 vibrations, having thus a range of nearly 4 1-2 octaves. Aljagari's upper limit has been attained by Ellen Beach Law, of Rochester, N. Y. Mr. Stevens has often estimated, by comparison with a tuning-fork, the pitch of a child's squeal, while at play, which has been repeatedly found to be in excess of 2,500 vibrations per second, in one case as high as G6, about 3,072 vibrations. The total range between these extremes is in excess of six octaves."

Dealers and Home Records

The fact that the majority of Edison Phonograph owners know so little about making home Records is due in most cases to failure of Dealers to explain the amusement and advantages to be obtained from such a proceeding. The suggestions made in our June issue, for a competition scheme to encourage home Record making, have been adopted by a number of progressive Dealers, who have thereby awakened a great deal of interest in it and will ultimately derive considerable advantage in consequence. It may happen in some cases that Dealers are unable to adopt a scheme of this kind. Their customers may be insufficient in number or live too far apart; but they need not, on that account, cease from making it a strong selling point. The making of home Records is exclusively a feature of cylinder machines, and this ought not to be lost sight of when making sales.

M. L. Abbey, Edison Dealer, of Hudson, Mich., is convinced that his customers, if they understand the value of home Record making, will find great pleasure in it, and has obtained good results from the form letter we print. Other Dealers who have thought less about this end of the business than of selling Phonographs and Records, might take a few suggestions from this well written letter. Home Record-making never interferes with the sale of Gold Moulded Records, but is simply an additional means of profit.

DEAR SIR—Why not increase the value of your Phonograph and Records? Make a record and being able to make your own Records.

Anyone can make them; it doesn't require any knowledge of music. Your friends all have some little stunt they do extra well. That one who tells a funny story, plays the mouth-organ, sings comic songs, or a dozen other things that would make a fine record.

Did you ever realize that you may not have one of their voices. What would you not give to be able to hear the voice of a departed loved one sing their favorite song or hear the children voice, now silent, for a cute saying.

An Edison Recorder is a wonderful device. It adjusts itself automatically to any sound, and embodies all the latest efficiency features. The recorders used at the Edison Laboratory in making the masters from which the Edison Gold Moulded Records are made. Half the fun of owning a Phonograph is making one's own records.

A Recorder costs you three dollars, and the Edison Shaved Blanks, twenty cents apiece, or two dollars for many times and used over and over for new impressions.

We are contemplating in the near future, a record, in the one you will appreciate its real worth, as the bright sayings and whittlings of everyone present can be made permanent and a reminder in after years of happy times now past.

We are enclosing a booklet on the "Art of Record-Making," and trust it will prove of interest to you. We are making a price contest for the best home-made records, and would like to have you enter with the rest.

We beg to express our thanks to you for the courtesies you have extended us, and respectfully solicit an opportunity to merit your further favors.

To keep in good standing, be entitled to Dealers' discounts and remain on our mailing list, Dealers must sign the new Dealers' Agreement: If you have not yet signed, do so at once.

Important Notice!

On January 1st, 1908, we will remove from our files and mailing lists the names of all Edison Dealers who have not signed the new Agreement and will consider all such as not entitled to Dealers' discounts and as no longer interested in the sale of our goods.

Active Dealers who have delayed re-signing, should sign at once. Not to do so, will cause trouble and annoyance to everyone after January 1st.

Jobbers are urged to ascertain the names of their active Dealers who have not yet signed and induce them to forward new Agreements without delay. Jobbers are asked to send in Agreements as fast as possible.

In the Words of Others

"Sell I.C.S. Language Outfits"

The best proof that it will pay you to sell I. C. S. Language Outfits comes from the statement of dealers that have tried them. We have published several of these letters before; here is another one from the Denver Dry Goods Co. This is piling up evidence that you are losing profits of from 10 to 30 per cent. on your business if you are not handling these Outfits. The phonograph system is fast becoming recognized as the most perfect way in the world to teach foreign languages. As a commercial enterprise, the I.C.S. System has always paid dealers well in the past, and it is growing very rapidly. Wouldn't it be a good idea for you to write us today for full particulars of what we can do for **you**? Let us put our advertising to work for you. It will not only bring you customers for language work, but will increase your regular business. Send us a postal card NOW.

THE DENVER DRY GOODS CO.

Denver, Colo., April 6th.

International Correspondence Schools
Scranton, Pa.

Gentlemen:

In reply to your letter of the 17th inst., will say we conducted the demonstration of Mr. Eastman very successful but while we have we sold several Language Outfits. There also still seems to be a little hesitancy on the part of customers to buy. We know however that as soon as the time has passed, we will communicate with the parties to whom demonstration was given and we have not as yet made a record of, in this way we expect to sell a number of Outfits. We think that in the course of a few months a fair record will be made which could not be obtained otherwise.

We have placed several orders with you since the demonstration and will be glad if we could make arrangements to purchase Outfits as cash in this line through your Denver office as we have had to do several times recently. Same can be billed to us by you. This would be quite an item per month as we have several orders per month for I. C. S. Language Outfits.

Yours very truly,
THE DENVER DRY GOODS CO.

Edison Phonograph Monthly

VOL. VI. January, 1908 No. 1

Business as We See It

The manufacturer of goods sold all over the country is in a position to know just what effect a stringency in the money market or any other adverse circumstance may have upon his business as a whole. Such is our position with reference to the manufacture of Edison Phonographs and Records. It would be idle to say that our business has not been effected by the conditions of affairs during the past two months, and yet we can honestly express our surprise that it has not been greater, considering the noise that has been made about the money market and business matters in general. The volume of our business was less in November and December than it would have been had money been plentiful, but we only regard the falling off as temporary, fully believing that the loss will be more than made up before March 1st.

Our sales and shipments of Phonographs and Records during November and December were much larger than in 1906, but only about seventy-five per cent. of what they should have been. the usual number of Jobbers discounted their statements due November 1st and December 1st. The business that we did in November and December would have been considered as enormous eighteen months ago. Of course, we can only discuss that part of the general business world pertaining to Edison Phonographs and Records, but, speaking for such a portion, we confess to a feeling of surprise that so much fuss was made about trade conditions in November and December. Judging from newspaper reports, one would expect to find the entire business world at a standstill. And yet, here is a manufacturing and selling organization doing a great business, that has been doing within twenty-five per cent. of its normal volume, and that regards the twenty-five per cent. as suspended business and by no means lost.

It is true that we cut down our factory force and decreased the production of Phonographs and Records, but neither of these would have been possible had we not accumulated a surplus stock during the summer that, because of the new equipment, had not yet moved.

Since December 1st orders for Phonographs and Records have shown a steady and decided increase in number and size, and orders to cancel or defer shipment have ceased. These facts show that the trade has been doing business with goods on hand and letting their stocks run down to the lowest ebb. Even now they are only ordering what is needed to carry them through the month, although such orders are large in the aggregate.

We have been putting on hands right through December, and a large number of those laid off a month before are now working as if nothing had happened. Our stock of surplus machines is practically used up, so that we shall be compelled early in January to resume the full schedule of production in order to keep pace with the demands of the trade. In fact, we would not be surprised if the demand made it necessary to produce even more goods than provided by our former schedule.

Business conditions really look good to us. The scare is over. Money is rapidly being released by individuals and banks. Business houses have found that there is not so much to be alarmed about and are planning for the future quite the same as ever. Manufacturing firms are putting back their laid-off employes and are again manufacturing for future sales, with growing confidence that there will be no trouble to sell when the time comes. Banks are making loans. It is easier to get currency and more of it. Many thousands of individuals, who deferred making purchases of articles of comfort or luxury, are finding themselves as well off as ever and quite as likely to remain so, and are again buying. Confidence is everywhere returning almost as fast as it was lost in November. When affairs have finally regained lost ground the entire business world will be better and wiser for our experience.

I like the business of selling Phonographs fine in connection with my other musical instruments. I shall live up to my agreements to the letter, to the best of my ability, and wish you every success for making such a fine music maker.—*David H. Francis, Bayne City, Mich.*

4023

The New Edison Gold Moulded Records Advance List for March, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before February 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on February 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on February 25th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after February 20th, but must not be circulated among the public before February 25th. Jobbers are required to place orders for March Records on or before January 10th. Dealers should place March orders with Jobbers before January 10th to insure prompt shipment when Jobbers' stock is received.

9770 Cavalry Charge — **Edison Military Band**

An exceptionally stirring military "charge" by the composer of the "Prince of Pilsen" music, which proved so popular when this opera held the attention of theatre-goers throughout the country some time ago. This fact in itself is sufficient evidence of the high character of the selection. Bugles and drums, with an imitation of a cavalry charge, are heard at intervals throughout the Record. Composer, G. Lüders; publishers, The John Church Co., New York.

9771 When the Springtime Brings the Roses, Jessie Dear — **Manuel Romain**

This latest sentimental ballad will do much to sustain Mr. Romain's reputation as "America's foremost minstrel tenor." The tuneful introduction to the verse, the melody throughout, and Mr. Romain's peculiar style of delivery, all will recall the many similar successes which have been offered in minstrel productions from time to time. The story is the familiar one of a lover's fear that his sweetheart's affection may not last until "the springtime brings the roses." Orchestra accompaniment. Words, Robert F. Roder; music, J. Fred Helf; publishers, Helf & Hager Co., New York.

9772 Sahara — **Collins and Harlan**

As may be inferred from its title, this song is a love tale of the desert, with Cowboy Texas Dan as the lover and Sahara Jane as the fair maid. Dan swears eternal constancy. The maid declares that he must ride a camel, to which he replies that such riding is better than the Erie, and he'd ride on the latter for her. The long training that Collins & Harlan have had together in singing duets for the Phonograph enable them to give "Sahara" an attractive rendition. Orchestra accompaniment. Music by Egbert Van Alstyne; words, Harry Williams; publishers, Jerome H. Remick & Co., New York. Van Alstyne & Williams wrote "San Antonio" and many other hits.

9773 Her Bright Smile Haunts Me Still — **Edison Venetian Trio**

The Records we have previously listed by our instrumental trio, violin, flute and harp, are hardly to be compared with this delicate and finished arrangement of one of the old songs, which are ever dear to those whose tastes are for music of a decidedly artistic nature. Each of the artists in our trio is a prominent soloist in New York musical organizations, and their work is always of the highest order. As usual, the harp is featured with an incidental solo. Composer, W. T. Wrighton. Original arrangement and not published.

9774 Golden Sails — **Florence Hinkle**

It is some time since we have listed a Record by Miss Hinkle, and this one will serve to renew the popularity she attained in her charming selection, "The Lover and the Bird," issued some months back. The words of "Golden Sails" tell a pretty story of "childhood's happy hour" and of the dreams, in story books, of a fairy prince whose ship "would come some day, it seemed, with beautiful golden sails." Miss Hinkle's ability to accentuate the composer's idea, as expressed in a somewhat unusual way in the words, will surely be appreciated by those who hear this Record. Orchestra accompaniment. Words, Wallace Irwin; music, Alfred G. Robyn; publishers, M. Witmark & Sons, New York.

9775 Upper Ten and Lower Five — **Favor and Meeker**

A true to life rendition of Lawlor & Thornton's famous character duet. It is a dialogue in speech and song between a swell (Edward M. Favor) and a tramp (Edward Meeker), following a "touch" by the tramp for a coin. The Record is unlike anything in our present catalogue. Its unique character and the excellent manner in which it is made by this new duet combination will make it one of the most popular in the March list. Orchestra accompaniment. Words and music, James Thornton. Cannot be had in published form.

9776 "Moolbarri" — **James Brockman**

One could hardly imagine from the foregoing title what the song is about. It's merely the Italian dialect for "Mulberry," and refers to the street of that name in New York. An Italian is asked which neighborhood he prefers, and while he admits that Fifth Avenue, the Bowery, and Broadway all have their attractions, his favorite is "Moolbarri Street-a," for it was there that he first met his "Josephina." The air is quite in keeping with the words, and Mr. Brockman, as the composer of many similar songs, does the selection proper justice. Orchestra accompaniment. The words and music are by Junie McCree, whose character songs and acting have made him widely famous. Publishers, Helf & Hager Co., New York.

9777 The Teddy Bears' Picnic — **Edison Symphony Orchestra**

A characteristic novelty by a favorite composer of instrumental numbers. The music is at times "spooky" in character and suggests a gathering or march of "Teddy Bears." The various instruments are used to advantage in suggesting large bears, small bears, and bears of all kinds. The bassoon is heard prominently at intervals in the rendition. Composer, John W. Bratton; publishers, M. Witmark & Sons, New York.

9778 When You Love Her and She Loves You — **Byron G. Harlan**

A waltz song, of the kind that rapidly attains popularity, telling of a "nice young lady," who says to her "nice young man," "there's one thing I can't see, you go with no other girl but me." The reason is apparently quite clear to the young man, who explains:

When you know that you love her and she loves you,
When you look into her eyes and she looks too,
You cannot help forget,
Any other girl you've met,
When you know you love her and she loves you.

The song is given by Mr. Harlan in his usual pleasing manner. Orchestra accompaniment. Words and music, Kerry Mills; publisher, F. A. Mills, New York.

9779 Sheriff's Sale of a Stranded Circus — **Spencer and Girard**

Geiz Bros. Circus comes to grief in a country town and the animals are put up at auction by the sheriff. They are bid in by Cyrus Pippin, whose voice sounds very much like that of Byron G. Harlan's when taking part in rube sketches. Cyrus bids the animals in at "a dollar and a quarter" each, with the exception of the elephant, which he gets at "a dollar and a half." He then presents them to the town for a "Zoo-a-ma-logical park," amid the plaudits of his assembled townsmen. The sketch is full of local color and witty dialogue. Mr. Girard's imitations of the different animals are lifelike. The circus band is also a feature. Not published.

9780 I'm Afraid to Come Home in the Dark — **Billy Murray**

Jonesy had but recently married, in fact his honeymoon was hardly over before he began to stay out until the break of day. His wife asks the reason why, and Jones explains rather confidentially:

Baby dear, listen here,
I'm afraid to come home in the dark,
For by the papers say "A robbery in the park."

So I sat alone in the Y.M.C.A.,
Singing just like a fish, "there's no place like home";
But I couldn't come home in the dark.

His wife turns the tables on him the next day by coming home in an intoxicated condition and offering the same excuse. Very amusing and cleverly rendered. Orchestra accompaniment. Words, Harry Williams; music, Egbert Van Alstyne; publishers, Jerome H. Remick & Co., New York.

9781 The Marriage of Figaro Overture — **Edison Concert Band**

Mozart wrote "The Marriage of Figaro" in 1784 (he was then twenty-eight years old), and his greatest success began with the presentation of this opera, a success that continued till his death in 1791. This overture is one of the best known parts of the opera. It is much loved by all musicians. Our Record of it will be regarded by many as the best in the list. It is in music of this high class character that our Concert Band appears to best advantage, for its members are more familiar with it than in the music of the present day.

9782 The Heart You Lost in Maryland You'll Find in Tennessee — **Frederic Rose**

Two lovers quarrelled in Maryland and separated. One day there came to him a letter, reading:

The heart you lost in Maryland, you'll find in Tennessee,
For there the birds sing all the day, how dear you are to me.

Although we've been a-part so long, our love the same will be,
For the heart you lost in Maryland, you'll find in Tennessee.

This is Mr. Rose's second contribution to the Edison catalogue and that it will be as cordially received as the first there is not a doubt. He has a pleasing voice, well fitted to sentimental songs of this kind. Orchestra accompaniment. Music, Alfred Solman; words, Arthur J. Lamb; publishers, Joseph W. Stern & Co., New York.

Edison Mixed Quartette

9783 To the Work

This widely known gospel hymn never had a more delightful reproduction than is here given. And a splendid addition to our now extensive catalogue of sacred selections. The work of our mixed quartette is full of expression and artistic feeling. Unaccompanied. Music, W. H. Doane; words, Fanny J. Crosby; published in hymn books.

Arthur Collins

9784 Nothin' Ever Worries Me

The song of a philosophic coon who takes things as they come. Not even the report of the doctor that his mother-in-law would not die caused him any worry, for he declared she might have a relapse. The following chorus sums up his philosophy, and many other people might follow his doctrine to their own benefit:

Nothing ever worries me, nothing ever worries me,
How far away's a rainy day, all things come to them who wait.

So let the foolish people worry and sigh,
I let troubles settle by;
What is to be is bound to be
So nothing ever worries me.

The air is along lines different from many coon songs. Mr. Collins, as usual, makes the most of the song. Orchestra accompaniment. Music, Lou Hirsch; words, John B. Lowitz; publishers, Hoff & Hager Co., New York.

Albert Benzler

9785 "Smile, Smile, Smile," and "Kiss, Kiss, Kiss"

Two very popular selections recorded as a bells solo. The first from "The Rogers Brothers in Panama," and the other from "The Parisian Model." Both are declared to be the biggest hits in their respective operas. Mr. Benzler's work with the bells is quite as wonderful as his performances on the xylophone. Between the two he has gained a most enviable position among Phonograph Artists. Original arrangement and not published.

Harry Anthony

9786 Bygone Days

A most beautiful sentimental selection by the composers of many ballads of the better sort. The words of the song are reminiscent in character, looking back to bygone days. A decidedly pleasing feature is the violin obligato by Eugene Jaudas. By way of a further change, Mr. Anthony is accompanied on the piano by Mr. Benzler. Mr. Anthony always sings with much feeling, and particularly in this selection his work will be greatly admired. Words, David Reed; music, Ernest R. Ball; publishers, W. Witmark & Sons, New York.

Ada Jones and Len Spencer

9787 Muggsy's Dream

Muggsy (Mr. Spencer) is selling his papers on a cold night. He finds a warm corner in which to take a quiet sleep. At this point in the Record, effects to imitate a runaway horse, a dog's bark and a girl's scream are introduced. The girl is crying for some one to save her dog. Muggsy is right "on the job," and after restoring the "mutt" to its owner is invited to ride with her to her home. After experiencing pleasures almost unheard of, he is rudely awakened by a policeman, and feels rather forlorn when he finds out that it was but a dream. During the sketch Miss Jones sings "Won't You Be My Baby Boy." Original arrangement and not published.

Edward Meeker

9788 I Marched Around Again

A comic song of many laughable situations. Four verses and choruses are given on the Record. The first tells of the singer's experiences in his attempt to marry a second time. His first wife walked in just as the ceremony was about to begin, so he "marched around again." Another tells of a bunco-steerer who offered to sell the Flatiron Building to a rube. He was not successful, however, for as the rube explained: "I bought that building once before." Mr. Meeker's clear articulation makes it possible to hear plainly every word on the Record. Orchestra accompaniment. Words and music, Rose & Snyder; publishers, Rose & Snyder Co., New York.

Edison Symphony Orchestra

9789 The Merry Widow Selection

The popularity of "The Merry Widow" music increases as the operetta becomes better known throughout the country. We listed "The Merry Widow" waltz in December (No. 9701), and the soprano and tenor duet, "I Love You So," in February (No. 9748). We now present in this orchestra selection five singing numbers from this great Viennese operetta, namely, "The Girls at Maxim's", "The Cavalier", "Villa", "Maxim's" and "Women." It is seldom that five such tuneful and charming airs are found on one Record. "The Merry Widow" music was composed by Franz Lehar and is published by Chappell & Co., New York, but our arrangement is by Leader Ecke, of our Concert Band, and cannot be had in published form.

Steve Porter

9790 Flanagan's St. Patrick's Day

It is fitting indeed that Mr. Porter should select St. Patrick's Day as his theme for the March

offering. As Flanagan he relates his experiences in a restaurant, where an Englishman at a nearby table orders rare roast beef, tomatoes and several other articles red in color. Flanagan, not to be outdone, orders green turtle soup, green peas, and most anything else green in color. The waiter asks him whether he wanted anything else, to which Flanagan replies: "I just want that guy over there to say something to me." He then goes on to tell of his further experiences during the day, and makes humorous references to the "A. P. A." and Clancy's fight with three "Orangemen." The sketch concludes with a funny verse by Mr. Porter to the tune of "a little green music."

Edison Male Quartette

9791 The Sword of Bunker Hill

A most impressive quartette Record of a familiar old song. The listing of it will undoubtedly recall to many the days at school where it was a prime favorite, being sung almost invariably on patriotic occasions. The story of the veteran's dying gift to his son is too well known to require description. Special arrangement and unaccompanied. Words by Wallace; music by Covert.

Ada Jones

9792 She Forgot to Bring Him Back

A most amusing story of a wife who had a "lovely lady friend" living next door, who frequently borrowed dishes to entertain a friend at tea. Can you blame the poor wife for being broken-hearted when she discovered that her husband was the only company her neighbor ever had? The neighbor borrowed her husband to help search for a burglar alleged to be in her house, and forgot to bring him back. Miss Jones sings the selection in a most entertaining manner, and brings out the amusing situations in her usual clever way. Orchestra accompaniment. Words, William J. McKenna; music, May Irwin; publisher, Rose & Snyder Co., New York.

Edison Military Band

9793 Down the Field March

The fact that the students of Yale College have made this march one of the airs sung and played at all college functions will be sufficient to give it wide vogue. It also stamps it as possessing more than ordinary merit, for out of the hundreds of compositions written for college use, few survive the first trials. "Down the Field" deserves its success. In our Record the bells are featured in one of the principal strains. Composer, Stanleigh P. Friedman; publisher, Charles H. Loomis, New Haven.

About Credits for Returned Records

Dealers who are getting impatient at not receiving their credit for Records returned under the exchange proposition, should bear in mind that Records were returned to us by several thousand other Dealers, and that to unpack, sort and check them over and make out the necessary credit papers is a task of no small magnitude. We are using every effort to complete the work, but it must necessarily be another two or three weeks before we can complete it. We therefore ask the indulgence of the trade for a short time longer. If the credit does not reach you during January, write us about it.

New Foreign Records

The 9 new Bohemian Records, the 8 new German Records, and the 13 new Mexican Records, all listed in November, will be shipped to the trade early in January. Supplements of these selections have just been mailed to the entire trade. There is scarcely a Dealer anywhere, especially in the cities, who cannot find sales for some of these Records if he tries. To those who understand the languages spoken or sung by them, they are as attractive as domestic Records are to an American. Foreigners are now to be found everywhere in this country, and as they are good patrons of instruments like the Phonograph they would buy rapidly if they knew that they can get Records in their own languages. Look over your field, Mr. Dealer, and see how many you can locate. Then go after them.

Copies of E. P. M. Wanted

We want to get a few copies of the EDISON PHONOGRAPH MONTHLY for each of the following dates: November, 1903; July, 1904; August, 1906, and September, 1906. We will pay ten cents each for a limited number of each, issue if sent at once.

Do Your Part

Did you see that handsome full page advertisement in colors that we had in *Collier's Weekly* for December 14th? Does not advertising of this expensive kind show that we have the greatest confidence in the continued success of the Edison Phonograph? If you will make the same effort to sell as we will to advertise there will be no question about the success of your business in Edison goods.

Keep Up Stocks

We do not want to imitate the hosts of advice givers and tell the Phonograph trade that the way to help restore business confidence is to buy more goods than ever, for we cannot overlook the cruel fact that they will have to be paid for, something that many moralists don't seem to take into consideration. At the same time, there is always a danger in times like these that Jobbers and Dealers will let their stocks run down too low and get caught "without the goods," when the demand returns. We are not going to buy a lot of raw material that we don't need just because some one tell us it's the thing to do. Nor do we expect Jobbers to load up just because we want to sell goods. For the same reason Dealers will not buy to relieve Jobbers of their stock. In all cases the bills must be met and if the money is not at hand there will be trouble.

We would be foolish, however, if we did not buy and have on hand enough raw material to enable us to increase our output at short notice. Jobbers would lack business acumen if they did not keep their stocks in shape to meet any ordinary increased demand from Dealers, and the latter, in turn, will lose money if they do not carry such a stock of Phonographs and Records as will permit them to fill any order that comes their way.

That business in Edison goods is going to be as good as ever after January 1st we feel assured, and we are going to manufacture to meet it. We want Jobbers to place such orders as will bring their stock of Phonographs and Records up to a proper standard and we want every Dealer to make sure that his stock is sufficient for ordinary requirements.

If your stocks are low and you don't want to inventory a new lot on January 1st, send orders for shipment after the first of the year. There is no question that you will need more Phonographs and more Records early in January, and by placing orders ahead you will have gained just so much time.

Send Us Papers

Dealers who have had electros from us for advertising purposes must send us copies of the papers in which they were used, before we will fill any requests for other electros. We are glad to furnish electros to Dealers, but we do so for the purpose of having them used for advertising. It should be a small matter to send us evidence that the electros had been used in this way.

The Use of Mr. Edison's Picture and Signature

During the past four months there has been a tendency among some of our Jobbers and Dealers to use pictures of Mr. Edison for advertising purposes in a manner objectionable to Mr. Edison and ourselves, and so as to make it appear as if Mr. Edison was doing the advertising personally. Consequently we have decided not to permit the use of Mr. Edison's photograph by the trade in any way whatever different from the use to which we put it ourselves. That is, the use of the standard bust picture. As to the trade-mark signature, we will permit its use only in a way to call attention of the public to the fact that genuine Edison Phonographs and Records bear this trade-mark signature. We will not permit the use of this signature in advertising in a way to make it appear that the trade-mark is a signature to some statement purporting to come from Mr. Edison or this company. The use heretofore made of the full-size or three-quarter photograph of Mr. Edison does not meet with either the approval of Mr. Edison or this company; and, in order to prevent repetitions of the uses hereinfore made, we are obliged to draw the line and prohibit the use of such pohotographs in any form.

Special Notice About Mailing Phonograms and Supplements

Beginning with the February Records, Dealers may place Phonograms and supplements in the post office or letter boxes after 5 p. m. on the *day before* the new Records go on sale, so as to reach retail customers in the first delivery on the Record selling day. They must not be mailed so as to reach customers on the day before. The object in establishing a uniform time for distributing Phonograms and supplements at retail is to prevent a species of competition that can only cause confusion and trouble.

Volume 6, No. 1

This issue of the EDISON PHONOGRAPH MONTHLY is designated on the cover page and on page 1 as Volume 6, No. 1. Volume 6 would not begin till March 1st if we continued the old plan of numbering. We think it better, however, to have the volume begin with the January issue each year and have, therefore, made the change that begins with this number.

Advance List of Seven Selections by Harry Lauder The Great Scotch Comedian

The Records named below will be ready for shipment from Orange between February 1st and 10th. Samples of them will be shipped January 1st to all Jobbers whether ordered or not. Jobbers' stock orders received by January 20th will be shipped as fast as possible after February 1st. Care will be taken to make shipment at one time to all Jobbers in the same city. Supplements will be shipped with Records to all Jobbers who request a supply. State quantity required.

19173 Rob Roy Mackintosh.
Descriptive of Rob Roy's first visit to London and Paris, and the havoc he caused among the fair sex in his Highland costume. He sings "They adore me with ma trousers on, but they love me in ma kilts." The song has a rollicking air, which Mr. Lauder handles in his best manner.

19174 She's My Daisy.
Sandy is a soldier man and the admiration of all the "Slaveys." Daisy, his bonny Daisy, is his choice of the lot, and he sings of her charms and of his willingness to lose his spurs before he will lose her. Sandy also tells of an interview he had with his General about keeping the colors and the canteen. He says that he and the General are very thick; in fact, he is the thickest of the two. A clever Record.

19175 Tobermory.
This song was suggested to Mr. Lauder while standing on Gourock pier, Scotland, watching an excursion steamer starting for the west coast. Two Glasgow men, partially drunk, were among the passengers, and from the deck of the boat they were waving bottles of whiskey in farewell to friends on shore. Just as the steamer sailed one of the men yelled out, "We'll fairly knock them up at Tobermory."

19176 We Parted on the Shore.
According to Lauder, many cycles of years had passed since he parted with his sweetheart on the shore. She wept more tears than he had ever seen before. She asked if he would think of her and he replied that perhaps he would. But he had often broken promises before. The singer points out the dangers of being hundreds and thousands of miles out at sea, but adds that it is a long ways from anyone to whom you owe money. The manner in which the singer rolls his r's is an effective part of the Record.

19177 The Saftest o' the Family.
The "saftest" is a younger number who goes to school, but doesn't always get there. Some of the reasons that he assigns for his absences furnish the basis for the song. These reasons must be heard to be appreciated. They are laugh-provoking.

19178 I Love a Lassie.
A letter from his wife was handed Mr. Lauder in Scotland one night as he was finishing a turn, the attendant remarking "I suppose you love the lassies." Mr. Lauder replied, "I'm fond o' a', but I only love yin (one)." This incident gave rise to the song. While not without its humor, it is really a charming bit of sentiment, revealing the actor's love for here with the sale of the Record.

19179 Stop Yer Tickling, Jock.
This was the exclamation of the farmer's daughter when "Jock," in the ordinary process of courting, attempted to kiss her. It was also a frequent remark on the day that she and "Jock" spent at the seashore. Mr. Lauder's imitation of the girl's laughter, when "Jock" was offending, is a feature of the Record. One of Mr. Lauder's best-known songs.

Advance List Edison Grand Opera Records Supplement No. 9, March, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before February 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on February 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on February 25th. Supplements will be shipped with Records when ordered. These may be distributed to Dealers after February 20th, but must not be circulated among the public before February 25th. Jobbers are required to place orders for these Grand Opera Records on or before January 10th. Dealers should place Grand Opera Orders with Jobbers before January 10th to insure prompt shipment when Jobber's stock is received.

B. 60 Figli miei, ("Let Us Pause, O My Brothers"), Sansone e Dalila" **Saint-Saens**

By ARTURO FRANCESCHINI, TENOR Sung in Italian, Orchestra Accompaniment

"Samson and Delilah," a biblical opera, suffered neglect when first it left the composer's hands. It was written in 1872. Two years later it was heard in private, at a performance participated in by the famous Madame Viardot. Not until 1877 was "Samson and Delilah" performed on a public stage—and then Germany was the country to give it welcome, for its first production occurred at Weimar. Three years later France awoke to the beauty and importance of this, one of its finest musical products. Finally, in 1892, the Paris Grand Opera House put the opera on its boards. The present excerpt occurs in the first act, the opening scene of which is laid in the city of Gaza, in Palestine. There is an opening chorus, an appeal to God of Israel, and then Samson enters upon the scene and sings the present aria, which is an entreaty to the people to take faith and hope. Musically, it is a very beautiful bit of writing, full of sincerity.

B. 61 Nonconosci il bel suol, ("Dost Thou Know That Sweet Land"), "Mignon" **Thomas**

By SIGNORINA GIUSEPPINA GIACONIA, SOPRANO Sung in Italian, Orchestra Accompaniment

Ambroise Thomas' most tuneful opera, "Mignon," is founded, in its libretto, on Goethe's familiar "Wilhelm Meister." In the opera, Mignon, daughter of nobel parents, is stolen by gypsies; and she suffers her miserable lot until she is rescued by Guglielmo, a young student, who takes compassion on her and buys her from the gypsy chieftain. Guglielmo asks Mignon about her childhood and parents, and she tells him that she can remember little more than the wretched day on which she was stolen from her home. Guglielmo presses her to recall something more definite about her native land, and then Mignon sings this exquisite aria. This song is not alone the most beautiful bit of sentiment in the entire opera of "Mignon," but it is also among the most popular airs created by Ambroise Thomas.

B. 62 Ronda vom Goldenen Kalb, ("Song of the Golden Calf"), "Faust" **Gounod**

By ROBERT BLASS, BASS Sung in German, Orchestra Accompaniment

In the first act of Gounod's opera "Faust," the aged and life-weary Doctor Faust signs a compact with Mephistopheles by which he is to deliver up his soul if the devil will grant him youth and show him life. This compact is signed and sealed, and the youthful Faust is led forth to find the charm of love and living. The second scene of the opera shows the animated square of a town celebrating its fair. Students, soldiers and maidens are making merry when Faust and Mephistopheles mount the scene. The latter comes upon a group, one of which attempts to amuse his comrades by singing the song of a rat that once sat in the Abbot's cellar. Mephistopheles rudely interrupts the singer and asks permission to join the party and to sing his song. He is pressed to do so, and immediately begins this famous round. The music of this number is stirring in its fine swing and in its rhythm. The melody is rousing in the extreme, and the whole number appeals tremendously to the enthusiasm of the listener.

B. 63 Una furtiva lagrima, ("In Her Dark Eye There Stood the Furtive Tear"), "L'Elisir d'Amore" **Donizetti**

By FLORENCIO CONSTANTINO, TENOR Sung in Italian, Orchestra Accompaniment

Donizetti's comic opera, "The Elixir of Love," has, of recent years, again come to occupy a position of vogue with the opera-going public. For some time the work was little more than a name to most opera-goers, but with its revival came the quick recognition that this work contained some beautiful music and among the several attractive numbers embraced by this opera none is more charming than this tenor aria. It is sung by Nemorino, toward the close of the opera, just before he learns that Adina is really devoted to him. Its measures are laden with pleading melodious beauty.

B. 64 Canzone del Torrero, ("Song of the Toreador"), "Carmen" **Bizet**

By GIUSEPPE CAMPANARI, BARITONE Sung in Italian, Orchestra Accompaniment

The curtain of the second act of Bizet's immortal masterpiece, "Carmen," rises upon a scene in the tavern of Lillas Pasta. Gypsies, smugglers and officers are scattered about, and the gypsy girls dance to the accompaniment of tambourine and castanet. Carmen and her comrades, Frasquita and Mercedes, participate in this lively scene. Just as it is about to conclude there passes a torchlight procession which proves to be the escort of the bull-fighter, Escamillo, who had done valorous deeds in the arena at Granada. He is welcomed by the party. He of unbounded enthusiasm and it is fiery in its surge. The tender portions refer to the Toreador's love, the inevitable lady who casts smiles upon him and is charmed by his gory deeds. In this particular case it is Carmen under whose glances Escamillo languishes. The excerpt is the most popular one in "Carmen"—and that is exalted praise indeed.

Records by Harry Lauder

The seven Edison Records by Harry Lauder, the famous Scotch comedian, listed on another page, should receive more than ordinary attention at the hands of Edison Jobbers and Dealers, for they only need to be placed before the public in the proper manner to create large sales. The Records are unique and unlike anything else in our catalogues. They are the kind that "grow on you" with each playing—your appreciation grows each time you hear them. When you have mastered their dialect (and it is not hard to do so) and have pictured in your mind that they are being sung by one of the funniest artists on the stage, you cannot fail to regard them as about as entertaining Records as you have ever heard. Their merit entitles them to the same sale as the monthly list of Edison Records. Every Dealer who buys the latter should buy the Lauder series.

HARRY LAUDER.

These Records will be ready for shipment after February 1st, and as the probable demand is difficult to determine, we hope that Jobbers and Dealers will place orders promptly. Special supplements for retail distribution will be printed and shipped with Records when ordered by Jobbers.

As an imitator of Scotch characters Harry Lauder probably has no equal. His renditions of Scotch songs may be compared to the coster songs of England. His characters are from similar walks of life, but they speak in Scotch dialect instead of English. Fifteen years ago Harry Lauder was a miner in the coal pits of West Scotland, amusing his comrades with his songs and imitations and glad to earn an occasional shilling or two at a village entertainment. Today he is the best-known comedian in the British Isles, is one of the most popular and is the highest salaried man in his class. Last November he was induced, by the offer of an unusual salary even for high-class artists, to play a limited engagement at the New York Theatre. He there duplicated his home success. He drew crowded houses at every performance. He became the lion of the hour, dividing the honors with the most famous singers and actors then appearing in New York. Much of Mr. Lauder's great success depends upon his ludicrous make ups, his mannerisms and his inimitable impersonations. These features are lacking in his Records, and yet the latter are brimful of jovial laugh-impelling humor.

Edison Phonographs appeal to the multitude, to your present customers and to those whose money you cannot get in any other way. When you put an Edison Phonograph in a home that home becomes a steady source of revenue because it is the new Edison Records that make the Phonograph a continuous pleasure.

VOL. VI. January, 1908 No. 1

No Let Up of Any Kind

In spite of the present depression in business generally, the outlook for Edison Phonographs and Edison Records in 1908 never was brighter. Business may be a little slow during January and possibly part of February, but by March 1st we feel sure that the volume of sale will be as great as at any time in the history of the Phonograph. The remainder of the year, we predict, will show as great a gain as ever. As an evidence of our belief that such will be the case, we have made no reduction in the amount we are spending for advertising and have decided to make no change in any of our advertising plans for the coming year. We shall do just as much newspaper advertising, use just as much, or even more, space in magazines and similar periodicals and there will be no less billboard advertising, no fewer railroad bulletins, more electric and other painted signs and larger editions of all kinds of catalogues, supplements, folders, cards and other forms. We are not going to lose any of the impetus that the Edison business has gained, and if we can get the co-operation of Jobbers and Dealers we will not only hold our own but we will all make great gains.

Our January Advertising

The illustration shown in the reproduction of our January magazine advertisement on page 20 is made from a sketch drawn especially for us by James Montgomery Flagg, one of the best known American artists of the present day. The character of the sketch is equal to any of the work that Mr. Flagg is contributing to the best magazines.

Last Call for Unsigned Dealers

This is the last copy of the EDISON PHONOGRAPH MONTHLY that will be mailed to Dealers who have not signed the new Agreement. Just as soon after January 1st as we can check up the Agreements received prior to that time, we shall remove from our lists the names of all unsigned Dealers and will deny such firms the privilege of buying Edison goods at Dealers' discounts. We don't want to drop a single name. We want to see every firm now selling Edison Phonographs continue in the business and make it a greater success than ever. We have the utmost faith in the future of the business and believe the ability of a Dealer to make money out of it depends entirely upon himself. We are going to render greater assistance than ever in aiding Dealers to sell our goods during 1908 and no enterprising firm should drop the line now, or permit his interest to decrease. Even though a Dealer's Agreement does not reach us until after January 1st, it will still be in time for reinstatement. Because business may be a little quiet just now, don't give up the line. Business is coming back very rapidly and it is going to be bigger than ever next year. Stick to it.

Suspended Lists

Separate copies of the list of suspended Dealers will no longer be mailed to Dealers. The list will appear in each issue of the PHONOGRAPH MONTHLY, and Dealers are expected to give it the same attention that they would give to a separate list. Jobbers will continue to get separate copies of the entire list, and also special notices of suspensions in their territory.

Electrotypes Cut From Catalogue

The trade is advised that the following electros shown in our Catalogue, Form 852, are now obsolete and we are not in a position to fill further orders for them.

Nos. 502, 516, 527 and 528, on page 8.
Nos. 531, 532, 533 and 534, on page 9.
Nos. 535 and 536, on page 10.
Nos. 545, 546, 547 and 548, on page 13.
No. 549, on page 14.
Nos. 552, 553, 554 and 555, on page 15.
Nos. 580, 581 and 582, on page 19.
Nos. 615, 616 and 617, on page 24.
No. 637, on page 30.
No. 655, on page 32.

We have also decided not to list smaller electros than a single column size of our various machines, and will not, therefore, be able to fill orders for cuts similar to Nos. 501, 521, 541 and 561.

Our reason for discontinuing the furnishing of electros with flower horns is that they are practically the same as the horn now being furnished with all our machines, and since we are now filling orders for electros illustrating the new equipment, it seems unnecessary for us to carry a stock of such numbers as 525, 526, etc.

Dealers will save us considerable correspondence if they will make note of the above corrections in the Electrotype Catalogues in their possession. We are correcting all of our originals so as to show the new equipment, and expect in the near future to issue an up-to-date Electrotype Catalogue.

Our Advertising "Extra"

What did you think of our newspaper "Extra" mailed out during December? Wasn't it novel? It is seldom that we care to indulge ourselves in so much conceit or egotism, which ever it may be, but we couldn't resist the temptation of laying before the trade some statements about our advertising plans, especially when everybody is talking as if business was going to the demnition bow-wows, and we wanted to do it in a way that was out of the ordinary. You'll admit that it was unusual, won't you? It did sound like a lot of brag, we'll admit, and yet we said nothing that was not well within the limits of the truth. The amount that we are spending to bring trade to your doors was understated, if anything. Did not the "extra," as a whole, make you feel as if you were tied up to a good business proposition, and didn't you declare to yourself that you would do your share in making 1908 the greatest year ever? If it didn't, then we are afraid that you lack that essential part called enthusiasm.

New Horn a Decided Selling Advantage

When you sell an Edison Phonograph you sell a complete machine, ready for use. The horn and supporting crane go with it, as a part of it and are included in the price. The new Edison horn makes a quick appeal. It looks the part—large, prettily shaped and designed in every way to set the Phonograph off to fine advantage.

You need carry no horn stock for the benefit of Edison Phonograph customers. The Edison horn which they get with the Phonograph is exactly what they want—made exclusively for the Edison instrument in a shape and size best calculated to enhance its sweet, clear tones.

The price protection which Edison Dealers have always enjoyed is now as true of horns as of Phonographs. The same prices for complete Ediphone prevails everywhere and every Dealer is assured of a good horn profit as well as a good Phonograph profit. Taking it all in all, the new equipment of the Edison Phonograph is the most important happening in the talking machine world.

Australian Comments

B. G. Holton, manager of the New Century Talking Machine Company, Auckland, N. Z., writes the following:

Just a few lines in praise of the Edison goods. The following unsolicited testimonials have reached us lately, and no doubt may prove useful to you for insertion in your valuable trade medium:

A mail-order client sent for two Records that were out of stock in the Edison, so we forwarded two others of same title in different make, which drew forth this reply: "The *song* is passable, but the *band* is *simply diabolical*, and if that is a good band selection, I shudder to think what the bad ones are like. At any rate, I have decided to purchase none but Edison Records in future." He also wished to subscribe to the new *Phonogram*.

Another client sent his Edison reproducer in from the country for repairs and wanted it returned first possible chance, as he says he will be quite lost without his "Phonograph."

A dealer says: "The last lot Edison Records received were very satisfactory, and what I like about the Edison Records is the scarcity of dead stock. The orchestra accompaniments put all other kinds of Records completely out of business."

Another Dealer says: "I do not think one person has asked to hear the 'disc machine' since the Edison goods have been in the store. We tell them: 'Hens cackle when they lay an egg.' Mr. Dealer, *Edison goods are golden eggs*, and when you have them 'cackle' and let the public know (advertise).

Printed Matter

We regret that the semi-annual edition of the Numerical and Alphabetical Catalogue for the trade, due January 1st, will not be ready for use till February. Orders from Jobbers will not be filled till after it is mailed to the trade, and even then the orders must be limited. This catalogue is for *trade use only*, and as we will mail one copy to every Dealer there is no occasion for Jobbers wanting large quantities.

Supplements of the new Bohemian, German and Mexican Records, forms Nos. 1249, 1251 and 1252, respectively, have just been mailed to the trade. Jobbers will supply these supplements to Dealers stocking the Records.

Quantities of a new colored hanger, Form No. 1260, have been shipped to all Jobbers. It will not be mailed. Dealers may obtain copies from their Jobbers. The hanger shows a charming girl of the Colonial period, and a feature is a bar of music from the old ballad "Love's Old Sweet Song." The hanger is a companion to the Dixie girl hanger issued a short time ago.

Copies of another hanger are being mailed to the entire trade with this issue. It is Form No. 1289. This is of a more striking character, because of its brilliant coloring. It shows a group of cowboys gathered around an Edison Phonograph and being entertained with songs reminding them of their Eastern homes. It is called "Voices from Home."

No Change in Phonogram and Supplement Date

No change has been made in the date when Jobbers may supply Phonograms and supplements to Dealers, because none seems to be necessary. The advanced date for selling new Records at retail still leaves Dealers four days in which to get them ready for mailing, and this time ought to be sufficient for the purpose. Jobbers will please continue to supply them on or after the 20th, as heretofore.

Any talking machine will bring a crowd to your door, but an Edison Phonograph will bring customers. It is one thing to draw a crowd and another thing to sell goods. To listen to an Edison Phonograph is to be impressed by its superiority, its wide range, its perfect reproduction of sounds. Those that come to hear, stay to buy. It isn't alone the advertising that makes the Edison easy to sell. It is also the Phonograph itself which, once heard, is its own best advertisement.

Name of "Ideal" Changed to "Idelia"

Because of the difficulties in some countries of registering dictionary words as names of Phonographs, the name of the new Ideal Phonograph has been changed to "Idelia." This is a coined word. The change will be made effective as fast as catalogues are reprinted and new transfers will be placed on the Idelia horns as soon as possible. The similarity in the old and new names will prevent confusion being caused by the change.

Another Injunction Against a Price Cutter

We print in full below copies of an order and writ of injunction obtained by the National Phonograph Co. against John G. Adams, doing business under the name of the Philadelphia Record Exchange, Philadelphia. The injunction in this case is of more than ordinary interest, because of the fact that not only was it obtained against a party selling Edison Records at a cut price, but Adams was not an authorized Edison Dealer and never had signed our Dealers' agreement. The decision again makes it clear that Edison Records cannot be sold at cut prices, even though an individual has not signed our agreement. The papers:

UNITED STATES CIRCUIT COURT.
Eastern District of Pennsylvania.

New Jersey Patent Co. and National Phonograph Co., Complainants,	IN EQUITY. No. 18. October Session, 1907.
John G. Adams, doing business under the name of the Philadelphia Record Exchange, Defendant.	

Present—McPherson, J.

Complainants having exhibited their bill of complaint in this cause, charging the defendant with infringement of letters patent No. 762,375, to J. W. Aylesworth, for Composition for Making Duplicate Phonograph Records, issued February 16th, 1905, to the complainant, New Jersey Patent Company; and the defendant having admitted that said New Jersey Patent Company is the exclusive owner of said letters patent, and the licensee National Phonograph Company has exclusive license under said letters patent; that said letters patent are good and valid in law, that said defendant, John G. Adams, has infringed each and all of the claims of said letters patent; and that said complainants are entitled to a perpetual injunction, accounting and costs; and said defendant having agreed that a decree and injunction should issue directing and perpetually restraining him from any further infringement by the use or sale of said patented articles, it is by the Court

ORDERED, ADJUDGED AND DECREED as follows, to-wit:

That said letters patent No. 762,375, to J. W. Aylesworth, for Composition for Making Duplicate Phonograph Records, issued February 16th, 1905, are valid in law; that New Jersey Patent Company is and was valid in law, and that said New Jersey Patent Company is the exclusive owner of, and said National Phonograph Company is the exclusive licensee under said letters patent as alleged in their bill of complaint; and that said defendant, John G. Adams, has infringed upon each and all of the claims of said letters patent, and that said complainants are entitled to restrain the said defendant from further infringing the patent and the exclusive rights of said complainants in the premises, in the said bill mentioned, to any and to the extent permitted by law or equity: We, therefore, in consideration thereof and also of the particular matters in the said bill set forth, do strictly command and enjoin you, the said John G. Adams, your servants, workmen and agents, and all acting under or with you, that henceforth you do absolutely desist and refrain from directly or indirectly selling, or using, or causing or procuring or aiding in the selling, in any way or manner, directly or indirectly, articles made according to the invention described and claimed in the claims, or either of them, of said patent No. 762,375, set out in said bill of complaint.

Witness the Honorable Melville W. Fuller, Chief Justice of the Supreme Court of the United States, at Philadelphia, this 20th day of November, A. D. 1907, and in the one hundred and thirty-second year of the Independence of the United States.

GEORGE BRODBECK, JR.,
Deputy Clerk.

That the complainants, New Jersey Patent Company and National Phonograph Company, are entitled to recover from the defendant, John G. Adams, the profits derived by said defendant and the damages sustained by said complainants by reason of the aforesaid infringement of said claims by said defendant, and it is hereby referred to ..... to ascertain and report to this Court the amount of said profits and damages and to report thereon to the Court;

That the said defendant, John G. Adams, his clerks, attorneys, agents, servants and workmen be perpetually enjoined and restrained from any further manufacture, use or sale of articles embodying the invention of said letters patent No. 762,375; and

That the said complainants do recover from said defendant, John G. Adams, the costs of this suit to be taxed.

BY THE COURT.

Attest:
GEORGE BRODBECK, JR.,
Deputy Clerk.

I agree to the entry of the Above decree.
CORNELIUS HAGGERTY, JR.,
Atty. pro John G. Adams.

UNITED STATES CIRCUIT COURT.
Eastern District of Pennsylvania.

New Jersey Patent Co. and National Phonograph Co., Complainants,	IN EQUITY. No. 18. October Session, 1907.
John G. Adams, doing business under the name of the Philadelphia Record Exchange, Defendant.	

WRIT OF INJUNCTION.

United States of America, Eastern District of Pennsylvania.	ss.

The President of the United States, to John G. Adams, Greeting:

Whereas, New Jersey Patent Company and National Phonograph Company lately exhibited their bill of complaint in equity in the Circuit Court of the United States, for the Eastern District of Pennsylvania, bearing date the 20th day of November, A. D. 1907, against you, the said defendant, praying to be relieved touching the matters therein complained of, and especially that you, John G. Adams, and all acting under you may be restrained from further infringing the patent and the exclusive rights of complainants in the premises, in the said bill mentioned, to any and to the extent permitted by law or equity: We, therefore, in consideration thereof and also of the particular matters in the said bill set forth, do strictly command and enjoin you, the said John G. Adams, your servants, workmen and agents, and all acting under or with you, that henceforth you do absolutely desist and refrain from directly or indirectly selling, or using, or causing or procuring or aiding in the selling, in any way or manner, directly or indirectly, articles made according to the invention described and claimed in the claims, or either of them, of said patent No. 762,375, set out in said bill of complaint.

Witness the Honorable Melville W. Fuller, Chief Justice of the Supreme Court of the United States, at Philadelphia, this 20th day of November, A. D. 1907, and in the one hundred and thirty-second year of the Independence of the United States.

GEORGE BRODBECK, JR.,
Deputy Clerk.

Photographs of Edison Artists

Dealers who are asked by Phonograph customers where photographs of Edison artists may be had are probably not aware that the Channell Studio of Photography, 20 Harrison street, East Orange, N. J., making a specialty of supplying cabinet photographs of all artists at thirty-five cents each, with special discounts to the trade, or the same photographs in framed effects may be had for fifty cents each. A supply of these photographs may also be had through Edison Jobbers.

Phonogram Information

The *Phonogram* continues to be a popular piece of literature with the trade, and the fact that its monthly issue remains unchanged at nearly 600,000 copies shows that Jobbers and Dealers regard it as a useful means for disseminating information about new Records, and as a good medium for increasing Record sales. It is practically the only piece of advertising matter for which the National Phonograph Company makes a charge. The price placed upon it, however, does not cover the cost of production.

The forms of the *Phonogram* close ten weeks before date of issue and printing is completed two months in advance of date. Dealers desiring to get a supply to mail to their customers must order them of Jobbers two months in advance, and we cannot agree to fill Jobbers' orders unless placed with us a similar period in advance. Following is a schedule of prices at which *Phonograms* may be obtained by the trade:

DELIVERED WITH GOODS.

Blank, per 1,000 copies	$2.50

Smaller quantities pro rata.

Imprinted with Dealer's name and address, 20 cents additional, without regard to quantity. No orders filled for less than 500 copies required imprinted. Blank imprinting orders must be for multiples of 500.

Jobbers will be glad to supply Dealers on the above basis.

BY MAIL.

Single copies, per year	$ .20
Five copies to one address, per year	.40
Twenty-five copies to one address, per year	1.50
Fifty copies to one address, per year	2.60

Unless they have open accounts on our books, Dealers ordering *Phonograms* sent by mail are requested to send cash or stamps with their orders. The amounts are too small to handle in any other way.

Courtesy Pays

Some time ago we referred a retail inquirer to a Philadelphia Dealer, and he bought a Phonograph and a good supply of Records. The inquirer later wrote as follows:

"I must say a few words, also, for the young man you recommended me to, for his willingness in every way to instruct me in the management of it—for he displayed much patience in order to get me to understand all that was necessary to give satisfaction."

Because of his courtesy and kindness this Dealer has made a friend of his customer that no competition can effect. It probably took a little more time than usual to be courteous, but that it will pay handsomely in future sales we have no doubt.

Kohler & Chase Temple of Music Building

Kohler & Chase are now fully established in their Temple of Music Building on Second avenue, between Union and University streets, Seattle, Wash., and have one of the most up-to-date, convenient and original music emporiums in the entire West. The firm occupies the entire five-story and basement brick building, with the exception of a few offices on the top floor. The building is elegantly furnished throughout, many of the individual piano display parlors above the first floor being carpeted with velvets, an innovation in music room floors in this part of the country. The fixtures are of the latest pattern, and the electrical effects extremely artistic. The first floor is taken up almost entirely with small instruments and sheet music. On the mezzanine floor is the firm's offices and the talking machine department. On the second floor is the piano display stock, where more than 200 pianos of many makes can be seen. On the third floor are the auxopianos, the piano players and parlor organs. More pianos and organs are on display on the fourth floor, and the main stock is in the basement.

The top floor is set apart entirely for art and music, where some of the best-known artists in the city are housed. The firm of Kohler & Chase is one of the most widely known music concerns in the country, the main headquarters being at San Francisco. The local business is under the direct management of Horace Chamberlain. The president of the firm is Quincy A. Chase, who established the business fifty-seven years ago. His son, George Q. Chase, is vice-president, and Thomas F. Winter is secretary. The entrance to the new building is especially attractive, and the firm considers that it has one of the most advantageous locations in the city.

More Phonograph Jingles

Below are given some additional jingles submitted in the Washington Evening Star contest:

A Phonograph for Christmas, we would suggest—
No better gift in which you could invest.
The Edison will entertain with song or jest,
And it's always ready to play upon request.

Edison, the wizard, the wonderful magician,
Has given to the world an automatic musician.
To the Phonograph we owe a great deal of pleasure.
They give us all the new operas in correct time and measure.

You should buy a Phonograph for Christmas Day.
It will furnish music, either sad or gay;
Will sing a song, or hand selection play.
It's the very thing to drive dull care away.

On winter evenings 'tis my delight,
To listen to music that is catchy and bright.
From an Edison Phonograph whose tones are so sweet,
It entrances its listeners. Oh, what a treat!

If you want to get a present for your wife at Christmas time,
Buy an Edison Phonograph and you'll find the music fine.
It will be a joy and pleasure to your friends both old and new,
And your family will bless you and vote you popular, too.

Don't worry over how to entertain your friends—
The Phonograph, a welcome to your guests extends.
It plays, in short, a thousand pieces; tells care away.
An Edison's the thing to make an evening gay.

The Edison Phonograph in the home is a prize,
It entertains the old and young, the foolish and the wise.
If you do not possess one, your lonely home to cheer,
Purchase one for Christmas, to start the glad New Year.

"I cannot sing the old songs,"
Which formerly I knew,
For the reason I must confess—
I cannot sing at all.
An Edison Phonograph I'll buy,
With songs both new and old;
For this fine invention, one can't deny,
Is worth its weight in gold.

The Edison Phonograph gives pleasure untold,
It makes both old and young folks laugh and the old.
No home without it is ever complete,
So at Christmas be sure to give some one a treat.

A wonderful invention is the Edison Phonograph.
In a voice distinctly human it can cry or laugh.
Can sing, recite or play; every note is clear and true.
It is every way surpasses all that the others do.
If you want a Phonograph, and don't know which to buy,
Make mistake, get Edison's; it's above the rest "sky high."

Here's to the Edison Phonograph.
The best the world has ever known.
It makes both old and young folks laugh
To listen to its musical tone.

E is to Edison; to Phonograph it's see,
But put the two together and an E-see thing you've got
To play a tune or sing a song,
Morn or eve, or all day long.

Easy it is to be merry,
Drinking Hires' root beer cheery,
In Edison's Phonograph
Is where you find the joy weary;
O, tired heart, be not dreary,
Now is the time to laugh."

To keep your boys and girls at home at night,
So they won't always be beyond your sight,
Get an Edison Phonograph and hear them shout,
"We'd rather stay home, we don't want to go out."

There are some who like a tenor voice, and some a high soprano;
Some folks prefer the violin, and others the piano;
Some like the music of a band, melodious, loud and strong;
Some like the ancient ballad, and some the rag-time song.
For all these folks of different tastes a Phonograph's the thing
To drink their favorite music from as from a magic spring.

For young and old, girl or boy,
The Edison Phonograph has any toy.
Its music to the home brings cheer;
So buy one for your family dear.

If you're feeling sad and weary from the troubles of the day,
And long for some amusement to drive dull care away,
No matter your fancy craves—music, song, or laugh—
Your every wish is gratified with an Edison Phonograph.

The Edison Phonograph, there's nothing it cannot do.
It can sing, talk, and give good music, too.
Songs that make the tears flow, and stories that make you laugh.
Can all be produced on this wonderful Phonograph.

In selecting gifts to present to your friends,
I beg to call again to call your attention
To a beautiful Edison Phonograph—that marvelous invention.
The Edison Phonograph—that marvelous invention.
Is still best almost anything else you can choose;
It will brighten the home—it's a cure for the "blues."

Classical Music With the Phonograph

The B. E. Nelson Drug Co., Edison Dealers at Granite Falls, Minn., sends the following copy of an announcement made in the *Granite Falls Journal*, of a concert of classical music given by an Edison Phonograph at their store on November 16th. We print the programme as well as the announcement, because it is one of unusual excellence and will serve as a model for other Dealers who may not be so familiar with classical music. Such a programme would not be possible with any other type of musical instrument.

AN HOUR OF CLASSICAL MUSIC

Recognizing the importance of cultivating a taste for classic music, especially in the young, the B. E. Nelson Drug Co., have arranged for a programme to be presented at their store, free of charge, by artists of world-wide reputation, including the wonderful Alma Jacoby, contralto, and the inimitable baritone, Sig. Scotti, which will meet with the approval of the most finished musicians. This concert will be presented next Saturday evening from 8 to 9 o'clock, and you are invited to be present with your family. Do not miss this opportunity to hear virtuosos whom you may never have the good fortune to hear again. They will also give a concert of miscellaneous music in the afternoon from 3 to 4 o'clock to accommodate those who cannot be present at the evening performance. The management have arranged the following:

PROGRAMME
November 16, 1907.
PART I.

1. Overture to "William Tell".....*Rossini*
CONCERT BAND
2. "Danube Waves" Waltz.....*Ivanovici*
STRAVINSKY ORCHESTRA

CHARLES D'ALMAINE
12. Violoncello Solo—"Ave Maria".....*Gounod*
HANS KNOGLE
13. "Heavens Are Telling," from "The Creation".....*Haydn*
CONCERT BAND

Sell Records and Blanks

The constantly increasing sale of Edison Recorders and Blanks shows that more and more Dealers are recognizing the business to be gained by interesting Phonograph owners in making Records at home. Our business in both Recorders and Blanks has grown to large proportions. It will pay every Dealer to give the subject more attention and get some of this extra business. Below we print a letter sent out to Phonograph owners by Charles R. Zacharias, an Edison Dealer at Asbury Park, N. J.

DEAR SIR:—Increase the value of your Phonograph by purchasing a Recorder, and make your own Records.

Anyone can make them; it doesn't require any knowledge of music. Then your friends all have some little stunt they do more well. One tells a funny story, another plays the mouth organ, others sing songs, or other things that would make a fine Record.

You have photographs of their faces, why not have one of their voices?

An Edison Recorder is a wonderful device. It adjusts itself automatically, is simple to operate, and costs you $3.00.

The Edison Shaved Blanks are twenty cents each, and can be used over and over for entertaining.

Half the fun of owning a Phonograph is in making one's Records.

Then your friends gather in for a social evening, then is the time you will appreciate its real worth, as the bright sayings of your friends present can be made permanent and a reminder at other happy times past.

We are enclosing you a booklet of "Hints of Record Making," and trust it will prove of interest to you.

French Records

Again I wish to congratulate you on the nice French Records you have just issued. Like the first lot, these forty-two new Records are beautifully registered and give a perfect life-like reproduction. If I may give you a hint for a future choice of French songs, I will say that there is a larger sale of Mercadier's Records than of any other singer's, and that any quantity of that singer's Records will be sold by scores.—*Joseph Beaudry, Quebec, Can.*

EDISON
PHONOGRAPHS

Auld Lang Syne

And other old songs are rendered just as well by the Edison Phonograph as the modern popular airs. "All music for all people"—that is the motto. You are losing much every day by not becoming the owner of this wonderful entertainer.

GEORGE WHEELER
218-220 Chestnut St.,
Dalton, Tenn.

☞Electro in above ad is: Single column wide, No. 661. Double column wide, No. 662.

EDISON
PHONOGRAPHS

EDISON invented the Phonograph. He made it an entertainer for all. It is manufactured at a price which everyone can afford, and we sell it on the easy-payment plan so that no one need be without it.

Have you heard and seen the new model?

JOHN HARPER
PHONOGRAPHS
88-90 Ormand Street
Chicago, Ill.

☞Electro in above ad is: Single column wide, No. 663. Double column wide, No. 664.

Ready-Made Ads

Another set of three ready-made ads for trade use are presented on this and the next page. They tell their own story. They are designed to assist Dealers in doing newspaper advertising in their own cities and towns, and thereby divert to their stores some of the benefits of the advertising we are doing in a general way. The "copy" is only suggestive. If you can write some that you think is better, or that fits your conditions better, write it by all means. No one has a monopoly of writing "pulling" ads; you may be able to do it better than an expert. It is important, first, to do the advertising, and second, to make an interesting appeal to the public.

Local Dealers have many advantages over out-of-town competition in being able to deliver machines right into a purchaser's home at the same price as paid at a distance. He can also offer his assistance in giving patrons such attention as they may need from time to time.

We are again willing to send any three of the above cuts on the same conditions as last month, namely, application to be made on the blank opposite, or the same form copied in a letter, and copies of newspaper in which they are used to be sent to our Advertising Department at Orange, N. J. Dealers who have had electros in the past must show that they have used them (unless they have already done so) before we will send any of the new series.

EDISON
PHONOGRAPHS

A business man's best relaxation comes in the form of music available with the least effort. You want, in two words, the Edison Phonograph. It gives not only the new popular airs, but also all kinds of music. It can be adjusted perfectly to your taste in entertainment just as it can be adjusted to your pocket-book in purchasing.

JOHN WESBROOK
23 Ogden Street
Denver, Col.

☞Electro in above ad is: Single column wide, No. 665. Double column wide, No. 666.

REQUEST FOR ELECTROS

*Added since December 1st, 1907.

Jobbers and Dealers are asked not to supply any of the above named firms with our apparatus, either at addresses given or any other address.

NOTHING can equal the satisfaction of offering your guests delightful entertainment that takes care of itself, which does not interfere with other forms of amusement, but rather helps them. Such an entertainer is

The Edison Phonograph

It can amuse the guests by rendering music, popular or classic, or aid them with dance music, marches and other things played by the best orchestras and brass bands. It costs less than the hiring of even a small orchestra for a single evening's entertainment.

Hear the new model with the big horn at the nearest Edison store, or write for a booklet describing it. At the same time

Hear the January Records

(out December 24th)—hear the song hits that everybody is talking about—hear the best orchestral and band music splendidly performed—hear the fine instrumental solos by well-known virtuosos—hear the talking records of really funny comedians—and then buy generously of the January records, for in no other way can you obtain for so little money so much delightful entertainment for your family and friends.

Ask your dealer or write us for these three books: THE PHONOGRAM, describing each Record in detail; the SUPPLEMENTAL CATALOGUE, listing the new January Records and the COMPLETE CATALOGUE, listing all Edison Records now in existence

Thomas A. Edison

NATIONAL PHONOGRAPH COMPANY, Lakeside Avenue, Orange, N. J.

Advertisement in January Magazines.

Edison Phonograph Monthly

VOL. VI. February, 1908 No. 2

Plan for a Bigger Year than Ever

January is the rounding-up month. It is the month when inventories are taken, books are balanced, and profits are determined. It is the month when the good business man looks back over the happenings of the past year, and, taking cognizance of the good and bad things of the year, prepares to apply their lesson to his business of the new year. It is the time when plans are formed for the coming months—when decisions are reached to carry larger or smaller stocks, to extend one department or decrease another.

All of this applies quite as well to Edison Dealers as to any other class of business men. We believe that with few exceptions, 1907 demonstrated more strongly than ever that Edison Phonographs and Records comprise a remarkably fine line, either as a complete business in itself or as a department where other goods are sold. The hundreds of glowing reports that we get by mail, personally and through our salesmen, leave no doubt as to the success of the Edison line with Dealers as a whole, and more especially with those who push the business and give it the attention it deserves. Each Dealer, however, knows better than we how successful he was in 1907. He also knows, if he was properly observant, why he did not do even more business in Edison goods, and he should be prepared to benefit by his experience.

If he has lost sales because he did not carry sufficient stock, he should arrange to increase it this year. If the lack of a little additional capital has been a handicap, especially in making instalment sales, efforts should be made to get more capital in 1908. If his business has suffered from lack of advertising, circularizing or other means of getting publicity, then a determination should be made to give it more attention this year. It is surprising what a volume of new business can be secured by the expenditure of a little money for advertising.

If stocks have not been kept in good shape, with machines nicely displayed and Records kept in a convenient place and using a proper system, then attention cannot too soon be given to plans that will remedy such shortcomings. Keep machines clean and looking new, and carry Records in trays, so that they will make a good display on your shelves and so you can put your hand on any desired Record at a moment's notice. To know your stock is to sell it. Haven't you often admired the man who had his work at his fingers' ends and could tell you about everything in his line that you wanted to know. Be such a Dealer. Be able to say that, considering the size of your business and the limitations of your field, no one carries his stock of Edison goods in better shape. The pride you will feel in being able to make this statement will have a marked effect upon the public, and it will prove a valuable asset. If you have been indifferent about your window displays, compel yourself to do differently. This is a kind of advertising that yields handsomely and costs you only the time it takes to keep the window attractive. If you haven't discounted your bills, resolve to do so this year. With a little planning you will find that discounts are "easy money."

You can do your share in making 1908 what we feel sure it will be, the greatest in the history of the Phonograph, and with proper attention you can make it the biggest Edison year for yourself.

Lauder Records Going Big

The Lauder Records, to be shipped to Jobbers early in February, are a tremendous success. The advance orders from Jobbers are especially heavy, and we believe that the after orders will be even larger. Jobbers who have not given them the consideration they merit should lose no time in sending in orders, for not to have a stock of Lauder Records will mean a loss of desirable business. Dealers, also, will need them in stock.

The New Edison Gold Moulded Records Advance List for April, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before March 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on March 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on March 25th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after March 20th, but must not be circulated among the public before March 25th. Jobbers and Dealers may, however, deposit Supplements and Phonograms in Mail Boxes or Post Offices after 7 P. M. on March 24th, for delivery on the following day. Jobbers are required to place orders for April Records on or before February 10th. Dealers should place April orders with Jobbers before February 10th to insure prompt shipment when Jobbers' stock is received.

9794 Marche Turque—Patrol — **Edison Concert Band**

Another exhibition effort on the part of our Recording Department is this Record of a composition by one who has a national fame as a composer of instrumental music. The feature of this selection from a recording standpoint is the heavy cymbal effect that has been secured without any of the discordant sounds usually heard. The composition partakes of a Turkish character and is one of more than ordinary attractiveness. It has been officially adopted by a branch of the Masonic order. Composer, R. Ellenberg; publisher, Carl Fischer, New York.

9795 There Never Was a Girl Like You — **Byron G. Harlan**

A rustic sentimental ballad with simple words and an air that improves with each hearing. Its publishers confidently assert that it will be one of the most popular songs of this spring and summer. It will be widely exploited and the fame of the writers of the words and music will do much to add to its popularity. Mr. Harlan gives the song an excellent rendition for our Record. Orchestra accompaniment. Music, Egbert Van Alstyne; words, Harry Williams; publishers, Jerome H. Remick & Co., New York.

9796 Under Any Old Flag at All — **Billy Murray**

This is a song hit from George M. Cohan's "The Talk of New York," in which it is sung by Victor Moore. It is based upon the fact that "with a good supply of money, everything is milk and honey, under any old flag at all," and the chorus dwells upon the assertion that "when you're rich you're the smoke; when you're broke it's a joke." The air is as novel as the words and Mr. Murray sings it as if he knew all about both ends of the game. Orchestra accompaniment. Music and words, George M. Cohan; publisher, F. A. Mills, New York.

9797 Hornpipe Medley — **Charles D'Almaine**

Medley records by the violin are among the most popular of instrumental selections. Their initial sale is always heavy and they are in such demand afterwards as to always remain in our catalogue. This Record includes the following well known hornpipes: "Jessy Linn," "Lockers," "Acrobat," "Champion," and "Autograph." Orchestra accompaniment. The arrangement is original and not published.

9798 Rambling Rose — **Harry Anthony**

Rose is a flower, but not of the woodlands. She loved to ramble and she loved to tease. Thus runs this charming new sentimental ballad, the chorus being as follows:

My Rambling Rose
Sweeter flow'r ther grows,
When you are near me, dear, my heart is throbbing goes
And though you ramble on,
That your heart is true, I know,
To me, but me, my Rambling Rose.

Orchestra accompaniment. Music, John Heinzman; words, James J. Walker; publishers, Joseph W. Stern & Co., New York.

9799 When You Steal a Kiss—or Two — **Ada Jones and Billy Murray**

One of the good things from "The Girl Behind the Counter," at Lew Fields' Herald Square Theatre. Our Record will be quite as much of a success as was "Smile, Smile, Smile," made for the January list by the same popular artists. The chorus:

Words are not the only thing
When you are making love,
Your eyes are always whispering
"Know, be my little dove."

If'n' you take her hand
At times and look in two
And flye are only ones
When you steal a kiss or two.

Orchestra accompaniment. Music and words, Kenneth S. Clark; publishers, M. Witmark & Sons, New York.

9800 When the World Don't Treat You Right, Come Home — **Bob Roberts**

"But don't come around near me." Jones has decided to go West, and in parting his ladylove gives him some advice, and closes with the above injunction. Mr. Roberts has not in some time had a song so well adapted to his style of singing coon songs. May Irwin wrote the words and music, and has many times delighted large audiences with her renditions of the song. Orchestra accompaniment. Publishers, Rose & Snyder Co., New York.

9801 Spangles—Intermezzo — **Edison Symphony Orchestra**

An intermezzo by the composer of "The Teddy Bears' Picnic" (No. 9777). It affords the same opportunity for instrumental coloring and should be widely popular. Composer, John W. Bratton; publishers, M. Witmark & Sons, New York.

9802 When We Listened to the Chiming of the Old Church Bell — **Manuel Romain**

Few singers for the Edison Phonograph have achieved such a popularity in so short a time as Mr. Romain. And deservedly, too, for he is one of the most entertaining artists on the Edison staff. His success as a singer for the Phonograph is no less pronounced than his success as the leading tenor in Dockstader's Minstrels. This Record is reminiscent of the wedding day in May long, long ago, when the youthful couple listened to the chiming of the old church bell. Mr. Romain's voice never appeared to better advantage. Orchestra accompaniment. Music, J. Fred Helf; words, Robert P. Roden; publishers, Helf & Hager Co., New York.

9803 Way Back — **Collins and Harlan**

A lively rube duet, having for its subject the visit of Uncle Josh to New York, the greeting accorded him, his general dissatisfaction with city ways, and his desire to get quickly back to old Oshkosh, where "he wouldn't swap an acre for the hull durned city, by gosh." The Collins and Harlan, will cause this Record to be "in the money" for April. Orchestra accompaniment. Music, Lester Keith; words, John Kemble; publishers, Jerome H. Remick & Co., New York.

9804 The Romany Lass — **Frank C. Stanley**

Mr. Stanley's many admirers will be delighted with the listing of this Record, because of the opportunity it will afford them of hearing his splendid baritone voice once more. It is some time since he has made a sole Record of this kind. The song is a gypsy love tale—one of those songs perfectly fitted to Mr. Stanley's capabilities. Orchestra accompaniment. Music, Stephen Adams; words, F. E. Weatherly; publishers, Boosy & Co., New York.

9805 Call of the Wild March — **Edison Military Band**

The arrangement of this spirited march is such as to show to advantage the different sections of our military band. The execution is unusually good. Composer, F. H. Losey; publisher, Carl Fischer, New York.

9806 I'm Looking for the Man That Wrote "The Merry Widow Waltz" — **Edward M. Favor**

Charlie took his Lizzie to see "The Merry Widow." The "waltz" was so entrancing that it set her dancing, and she waltzed the shoes off her feet. The various members of the family and sundry other occupants of the flat also caught the fever. Charlie was finally driven to longing for an opportunity to wreak vengeance upon the author of the now famous waltz. Part of the song is set to strains from the "Merry Widow Waltz." Mr. Favor's rendition is very amusing and entertaining. The Record will be close to the top of the April list. Orchestra accompaniment. Music, Seymour Furth; words, Edgar Selden; publisher, Shapiro, New York.

9807 The Vagabonds — **Spencer and Girard**

A capital rendition of the old poem by Trowbridge, sometimes called "Roger and I." The vagabonds are a wandering fiddler and his dog Roger, who live from day to day by the violin playing of the master and the tricks of the dog. Mr. Girard's imitation of the intelligent canine is especially realistic. Original arrangement and not published.

9808 See-Saw — **Ada Jones**

Everybody is familiar with the popularity attained by "School Days." In "See-Saw" the same composer has written its natural sequel and companion piece, and is entitled to feel certain of its equal success. The composition has all of the elements that make songs known from ocean to ocean. Those who buy this Record will find themselves familiar with the song when its popularity arrives. This was the case with "School Days." Orchestra accompaniment. Music, Gus Edwards; words, Ed. Gardenier; publishers, Gus Edwards Music Co., New York.

9809 Sweetheart March — **Albert Benzler**

Mr. Benzler's bi-monthly xylophone selection is one of Arthur Pryor's earliest compositions. Had it been written expressly for the xylophone it could not have been better suited to that instrument. Mr. Benzler has given it an excellent rendition. Orchestra accompaniment. Publisher, J. W. Pepper, Philadelphia.

9810 Flanagan's Mother-in-Law — **Steve Porter**

Flanagan has had the laugh on other members of his family, to say nothing of various other individuals, and it was not to be expected that his mother-in-law would escape. She "gets here" in this Record. Her shape is first made the subject of several funny remarks. Flanagan states that his wife's name is Pearl. He hadn't been married a week before he found there was a flaw in the mother-of-pearl. When the doctor told Flanagan that his mother-in-law was a very sick woman, Flanagan heartlessly replied: "Now, Doc, quit your jokin'. Don't make me laugh, me lips are chapped." The incidental singing has an orchestra accompaniment. Original and not published.

9811 Lord, I'm Coming Home — **Anthony and Harrison**

No new list of Edison Records would be complete without a sacred selection by either Messrs. Anthony and Harrison or the Edison Mixed Quartette. Both combinations are very popular. The initial sales of this selection are large and there is always a heavy and steady after-sale. "Lord, I'm Coming Home" is one of the better grade of sacred songs. Our Record will add much to its popularity as a hymn. Orchestra accompaniment. Music and words, William J. Kirkpatrick. Published in hymn books.

9812 I Got to See de Minstrel Show — **Arthur Collins**

Parson La Gran, a New Canaan preacher, married the daughter of a minstrel man and declared that he would convert her. He warned her that she would have to stay away from shows and learn to pray. Everything went smoothly till the minstrels came to town. Mrs. Le Gran then threw off restraint and announced that she had to see the show. The tuning up of the minstrel brass band and the music incidental to the street parade are given in the Record and add to its realism. Mr. Collins is quite as clever as ever with his coon dialect and by-play. Orchestra accompaniment. Music, Harry Von Tilzer; words, Vincent Bryan; publishers, Harry Von Tilzer Co., New York.

9813 Christ Arose! — **Edison Concert Band**

This is an Easter selection and it has been arranged by Leader Ecke in a manner similar to our Christmas number, "Ring Out the Bells for Christmas." It introduces a quartette of mixed voices, together with bells and chimes. It is fully as attractive as the Christmas selections and its sale should be quite as large. Special arrangement and not published.

9814 The Message of the Eyes — **Allen Waterous**

A sentimental song by the composer of "Love Me and the World Is Mine," introducing a new baritone soloist to our catalogue, although Mr. Waterous has sung in duets with Mrs. Waterous. He possesses a fine voice and will be a welcome addition to the corps of Edison artists. The song itself will appeal to admirers of the better class of ballads. Orchestra accompaniment. Music, Ernest R. Ball; words, Michael Resnick; publishers, M. Witmark & Sons, New York.

9815 Si and Sis, the Musical Spoons — **Ada Jones and Len Spencer**

Si and Sis are typical down East lovers. They engage in a series of "swops," or exchange of compliments, and Si convinces Sis that he is a musical prodigy. He plays on two clarinets at one time, giving an imitation of bagpipes; on a violin with one string, and on two ocarinas at one time. The musical features are played by Messrs. Spencer and Jones. The playing of two clarinets at one time and of two ocarinas in unison being an unusual "stunt." This vaudeville sketch is original and is not published.

9816 Nancy Lee — **Edison Male Quartette**

The revival of this old and popular song of the sea, especially in male quartette form, is a Phonograph event. Its re-appearance will be heartily welcomed. Our Male Quartette gets better all the time. The arrangement is special. Unaccompanied. Music, Stephen Adams; words, F. E. Weatherly.

9817 Rain-in-the-Face Medley — **Edison Military Band**

A merry medley, consisting of the two comic hits, "Rain-in-the-Face" (Record No. 9751), and "I'm Afraid to Come Home in the Dark" (Record No. 9780), and the clever coon song, "Much Obliged to You" (Record No. 9768). Original arrangement and not published.

8 Selections Made Over

In accordance with the notice printed on page we list below eight selections that have been made over by the same or new talent. The April printed matter prepared for retail use will contain these selections. Dealers should replace their stock of the original Records of these numbers with the new ones.

8774 Algonquin March — **Edison Military Band**

8409 In the Valley Where the Blue Birds Sing — **Byron G. Harlan**

7824 Le Carnaval de Venise (Violin) — **Charles D'Almaine**

8799 Maple Leaf Forever — **Reinald Werrenrath**
Formerly by W. H. Thompson

8136 Nearer My God to Thee — **Edison Concert Band**

8717 Noisy Bill — **Edison Military Band**

8236 O That We Two Were Maying — **Mr. and Mrs. Waterous**
Formerly by Miss Morgan and Mr. Stanley

7659 Waltz from Faust (Violin) — **Charles D'Almaine**

Important Cut Out Notice

The moulds of the selections named below are in such poor condition that it has been deemed advisable to cut them from the domestic catalogue. Ordinarily they would be made over but they have been on sale for several years and the present demand does not warrant making new masters.

7438 Mary Was a House Maid — Dudley
7439 Intermezzo from Halle — Edison Military Band
7042 Little Darling Dream of Me — Edison Male Quartette

When our present stock of these selections is exhausted no further orders will be filled. Jobbers and Dealers are especially asked to note these cut out selections, for they cannot be omitted from the domestic catalogue until the April edition appears.

Don't Let Stocks Run Low

The most important duty that Jobbers and Dealers can perform at the present time is to watch their stocks of Edison Phonographs and Records and make sure that they are sufficiently complete to meet even an unusual demand upon them. Stock-taking is now past, books have been balanced for the past year and plans for the future are now in order. The latter will be incomplete without a careful inspection of the stock of goods on hand and placing orders for such new goods as will bring the stock up to date, both in quality and quantity. Don't let any business get away because of your neglect to put in a few more machines or to fill in the vacant places of your Record stock. Also, don't forget, Mr. Jobber, that in many cases you are some distance away from the Orange factory, and that consequently it takes some time for goods to reach you by freight. Unless you want to pay express charges on rush shipments, order well in advance. Place an order for a quantity of machines to be shipped at regular intervals, the time to be named by you. You found that standing orders of this kind worked well in the past; it will be equally satisfactory now. Keep Records ordered well ahead, too.

Throw Away Printed Matter With Old Prices

Jobbers and Dealers are asked to look over their stocks of our printed matter and throw away or destroy all catalogues and other forms showing the old prices of Edison Phonographs. To distribute such printed matter can only cause trouble and confusion, and it is better to destroy it, even though it seems like a considerable loss to do so.

1097 Out of 1219 Were Edison Records

Our Australian office recently received a letter from an owner of an Edison Home Phonograph in Brisbane, Queensland, giving the percentage of Edison Records in his collection as compared to all others. Out of 1219 titles, 1097 were Edison Records. The remainder was divided among five other makes. Since the competition in cylinder records is much greater abroad than it is here, this preponderance of Edison Records is most gratifying.

Our Selling Contracts Sustained by England's Highest Court

On December 18, 1907, the Lord Chief Justice of England, Lord Justice Buckley and Lord Justice Kennedy, sitting in the Supreme Court of Judicature, rendered a decision in the case of National Phonograph Company (Limited) vs. Edison-Bell Consolidated Phonograph Company (Limited) which is a sweeping victory for our selling contracts. Each of the Justices wrote a separate opinion, but they all agreed in holding that one who causes a factor (Factors in England are what we call Jobbers in the United States) to break his contract with the National Phonograph Company may be enjoined from continuing such practices, and may be made to account in damages.

The contract between the English Factors and the National Phonograph Company contains a clause as follows:

"Factors must not sell or supply, or place on commission either directly or indirectly, Edison Phonographs or parts thereof, records, or blanks, to any Dealer who has not signed the agreement required by the National Phonograph Company (Limited), governing and controlling the sale of same, nor to Dealers who are on our suspended list."

The Edison-Bell Company was on the suspended list, and was, therefore, unable to purchase Phonographs and supplies from the Factors, and being desirous of obtaining Edison Phonographs, which are greatly superior to the Edison-Bell machine, for sale to its customers, evolved a scheme to obtain Edison Phonographs by deceit, and, in pursuance of this scheme, sent two men, Hughes and Leach by name, to the Factors of the National Company to buy Edison Phonographs for the Edison-Bell Company. Hughes and Leach represented to the Factors that they were Dealers of the National Phonograph Company, and signed the regular Dealer's contracts with these Factors under fictitious names, which were not on the suspended list. By this means the Edison-Bell Company was able to obtain a number of Phonographs from Factors at trade discounts, and the National Company, on finding out what had been done, brought suit against the Edison-Bell Company for an injunction against its causing and procuring the Factors to break their contracts and praying for an accounting and damages. When the case came up for trial in the Court of the King's Bench, Mr. Justice Joyce, after finding the facts as above stated, decided the suit in favor of the Edison-Bell Company, holding that the National Company was not entitled to the relief asked.

The National Company thereupon took the appeal, resulting in a reversal of the decision of the lower Court, by the Court of final resort, and in the complete final vindication of the selling contracts of the National Phonograph Company.

The views of the Justices are suggested by the following extracts from their opinions. The Lord Chief Justice says, after citing the clause of the contract above quoted:

"It was suggested in argument that this restriction imposed by the plaintiff upon Factors was open to some objection. I am unable to appreciate upon what ground any such objection can be founded."

Lord Justice Buckley says:

"The act which the defendant did was, I think, a violation of a legal right of the plaintiffs, because it interfered with the contractual relations subsisting between the plaintiffs and the Factors, and there was no sufficient justification for such interference."

Lord Justice Kennedy says:

"That Hughes and Leach and the defendant Company which employed them, did what is morally wrong, is patent. They induced the Factors to sell these goods to them by an unjust representation; not indeed in order to defraud either the Factors or plaintiffs in any pecuniary respect, for they paid the price which the plaintiffs had authorized the Factors to accept; but it must be assumed that, if the Factors had known they were selling to persons who were agents of a firm and on plaintiff's suspended list, they would not have sold Hughes or Leach any of the machines which had been obtained from the plaintiff."

The Edison-Bell Company's counsel argued that since the Factors were deceived into breaking a contract with plaintiff, that plaintiff had no right of action against the Factors and that, therefore, it had no right of action against the Edison-Bell company, but Justice Kennedy, in disposing of this contention, said:

"I think that this is too narrow a view. A man certainly disposed to hold that if A, who knows that B, the user of an article, is about later in selling it to C, the Factor, that he should not re-sell it to A, should proceed by an intentional misrepresentation to C as to B's himself, he has committed and done a actionable wrong (provided that B can prove that he has been thereby damaged), although, in the particular circumstances, B may have cause of action against C in respect of the transaction."

This decision will effectually prevent any further interference by outside parties with the contracts between the Factors and the English

National Phonograph Company (Limited). A case involving the same question was before the United States Courts in Edison Phonograph Company and National Phonograph Company vs. Pike, 116 Fed. Rep. 865, in which, as in the case in England against the Edison-Bell Company, an injunction was granted against interference with the carrying out of our selling contracts. It is not strange that this question should be decided the same way in the two countries, for these decisions are not based on statute law, which varies in different countries, but on broad, equitable principles, which are as established and controlling in America as in England.

Meetings of the Selling Force

F. K. Dolbeer, General Manager of Sales, and E. H. Philips, Manager of Salesmen of this company, held two interesting and profitable conferences with the members of the selling force during the past month. The first was held at 304 Wabash Avenue, Chicago, on December 28th, and the second at the Orange factory on January 7th. The Chicago meeting was for the purpose of meeting the Western salesmen. Besides Messrs. Dolbeer and Philips, there were present at the Western meeting the following salesmen: George A. Renner, Will. P. Hope, M. G. Kreusch, Frank L. Frithey, F. M. Kitchen, W. H. Hug, E. A. Neff, A. H. Klaehn, A. V. Chandler, and W. A. Turner. Those comprise all the Edison men covering territory west of Ohio, with the exception of C. S. Gardner, who has the Coast, and John H. Gill, both of whom were unable to be present.

After the conference an informal dinner was given by Mr. Dolbeer at the "Tom Jones" cafe on Jackson boulevard. Among the guests, besides those already mentioned above, were John Hardin, W. C. Patrick and E. C. Barnes, representing various branches of the Edison interests in Chicago, and Daniel Hopkins, of Hopkins Bros., the Edison Jobbers at Des Moines, Ia., who happened to be in Chicago at the time. After the dinner the party attended a performance at the Majestic Theatre.

The conference at Orange was attended by Messrs. Dolbeer and Philips, Assistant General Manager C. H. Wilson, and the following salesmen: L. J. Koehler, J. W. Scott, J. F. Stanton, H. D. Clark, G. A. Hedden, C. D. Warren, F. W. Ewan, B. R. Barklow, W. P. Coughlin and John H. Gill. One or two other department heads were interested listeners. Mr. Gill attended the conference because unable to attend the one in Chicago. R. H. Veale, who covers Florida and Georgia, could not attend. The salesmen present represent the States east of Ohio. Messrs. Ewan and Koehler represent Canada. The entire afternoon was taken up with brief addresses by Mr. Dolbeer and Mr. Philips, hearing reports from the salesmen bearing upon the condition of business and the outlook in their respective districts, and in a general discussion of selling plans for the new year. All of the reports were very satisfactory as to the past and extremely optimistic for the future. J. W. Scott, who has the New England section, was presented by Mr. Dolbeer with the Sales Department prize of $100 in gold for having established the greatest number of new Dealers in 1907. Mr. Scott's "spiel" (this is Mr. Scott's own word) of acceptance was a feature of the occasion. This is the second year in succession that Mr. Scott has won this prize.

Following the conference, the party sat down to a dinner at the Orange Club. In addition to the above named there were present Superintendent Peter Weber, Cashier Harry F. Miller, Assistant Manager of Sales A. C. Ireton, Manager of Foreign Department Walter Stevens, and Advertising Manager L. C. McChesney. The affair was entirely informal. No efforts at speechmaking were attempted.

Both the Eastern and Western salesmen started out on the road after the conferences and the reports they have since sent in show that the holiday vacation and the conferences have given them a new enthusiasm. The salesmen now on the force and the territory covered by each are the following:

B. R. Barklow—New York City and Brooklyn.
A. V. Chandler—Chicago and suburbs.
H. D. Clark—New Jersey.
W. P. Coughlin—Pennsylvania.
F. W. Ewan—Ontario, Can.
F. L. Frithey—Indiana, Michigan.
C. S. Gardner—Arizona, California, Idaho, Oregon, Utah, Washington.
J. H. Gill—Minnesota, North Dakota, South Dakota.
G. A. Hedden—New York State.
W. P. Hope—Wisconsin and Upper Peninsula.
W. H. Hug—Kentucky, Ohio, Tennessee.
F. M. Kitchen—Iowa.
A. H. Klaehn—Kansas, Missouri.
L. J. Koehler—Canada, east of Ontario.
M. G. Kreusch—Illinois.
E. A. Neff—Arkansas, Indian Territory, Oklahoma.
G. A. Renner—Colorado, Montana, Nebraska, Wyoming.
J. W. Scott—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.
J. F. Stanton—Delaware, District of Columbia, Maryland, Virginia, West Virginia.
W. A. Turner—Texas.
R. H. Veale—Florida, Georgia.
C. D. Warren—North Carolina, South Carolina.

New Prices on Horns and Cranes

TO ALL DEALERS: ORANGE, N. J., Jan. 27, 1908.

On and after February 1st, we will discontinue listing or supplying the standard finish new style Edison horns and horn cranes in sets, as heretofore, and will thereafter list and supply them separately, at the following prices:

HORNS.	Dealer. net.	List.
Gem Horn	$1.15	$2.60
Standard Horn	1.65	3.25
Home Horn	1.80	3.50
Triumph Horn	2.00	3.75
Idelia (Mahogany finish)	3.00	6.50

CRANES.	Dealer. net.	List.
Gem Crane	$ .18	$ .25
Standard, Home, Triumph, Balmoral, Conqueror and Alva Cranes	.90	1.25
Idelia (Oxydized finish)	1.80	2.50

MAHOGANY FINISH HORNS.

We will also list and supply mahogany finish horns for different types of machines at the following prices:

	Dealer. net.	List.
Gem Horn	$2.00	$2.60
Standard Horn	4.60	6.00
Home Horn	4.80	6.25
Triumph Horn	5.00	6.50

These horns, except when furnished with machines equipped with mahogany cabinets, will have to be ordered as extras; that is, they are a specially finished horn designed for such machines with mahogany cabinets as are now in the hands of users, equipped with some other style or finish horn.

SPECIAL NOTE.

These changes in prices of horns and horn cranes do not in any way affect the Jobbers, Dealers or List prices of machines with outfits complete. Such prices remain the same as established October 1, 1907.

The list prices on horns and cranes sold separately are restricted and must be maintained.

We will not supply Edison Phonographs of any type except with equipment complete as per catalogue.

NATIONAL PHONOGRAPH CO.,
F. K. DOLBEER,
General Manager of Sales.

The foregoing is a copy of a letter that is being mailed to Dealers with this issue of the PHONOGRAM MONTHLY. When the new equipments were decided upon the retail prices were increased to cover not only the additional cost of the equipment, but also part of the increased manufacturing cost of Phonographs, which was considerably greater than when the old prices were fixed. To uniformly maintain the new prices it was necessary to put higher prices on the new horns and cranes than was warranted by their manufacturing cost and to compel the trade to pay these prices for such new equipments as they required to bring their machines up-to-date. We have believed that the new Edison Horn had unusual tonal qualities, and knowing that it would be wanted by those who bought Phonographs before the change, it has always been our intention to sooner or later reduce the prices of the new horns and cranes to favorably compare with the prices of horns and cranes of other manufacture. Now that there are but few of the former machines in the hands of the trade, it was decided that the time had come for the new prices. With the new prices a Dealer may sell a Standard Horn and Crane at retail at $3.50 and net a profit of 95 cents or he can sell a Standard Horn alone to those having adjustable stands or cranes at $2.25 and net a profit of 60 cents. It ought to be possible for the trade to get considerable new business for Edison Horns and Cranes at the above prices from those who own machines equipped with the former small horn. The margin on Edison Horns and Cranes may not be as large as that sometimes made on horns of other make, but it must be borne in mind that our prices are protected and the profit is guaranteed. Edison Horns and Cranes are subject to the same restrictions as are other Edison goods and must not be sold at cut prices.

Advance List of French and Holland-Dutch Selections

The Records named below will be ready for shipment from Orange between April 1st and 10th. Samples of any or all of them will be shipped March 1st to such Jobbers as place orders for them. None will be shipped without orders. Jobbers' stock orders received by March 20th will be shipped as fast as possible after April 1st. Care will be taken to make shipment at one time to all Jobbers in the same city. Separate supplements of each list will be shipped with Records to all Jobbers who request a supply. State quantity required of each kind.

15 French Records

17157	La Marseillaise	M. Baer
17827	La Muette de Portici, *Auber* (Duo)	M. Gluck et M. Ragneau
17830	Plaisir d'Amour, *Martini*	M. Gilibert
17832	Louise (Air du Père), *Charpentier*	M. Alibert
17839	Le Retour au Pays, *Spitzer*	M. Bérard
17840	Les Mémoires de l'Institutrice	Mme. Caudet
17841	La Fée Verte	M. Bérard
17842	Lakmé (Duncs), *Leo Delibes*	M. Gilibert
17846	Carmen (Duo de Micaëlla et de Don José), *Bizet*	Mme. Ida Vaudere et M. Gluck
17847	La Perichole (Lettre), *Offenbach*	Mme. Ida Vaudere
17848	Monsieur Beaucmpa (Tyrolienne), *Chaillier*	Mme. Rollini
17853	Don Juan (Sérénade), *Mozart*	M. Gilibert
17855	Les adieux de Suzon	M. Mercadier
17857	Xavière (Duo de la Grive), *Th. Dubois*	Mme. Ida Vaudere et M. Ragneau
17859	Le Petite Mariée (Couplet du Podestat), *Lecocq*	M. Ragneau
17860	Musique d'antichambre (Duo), *Bruet et Guyon*	Mme. Rollini et M. Maréchal

15 Holland-Dutch Records

18438	De Beurs, *Kokadoris*	Prof. Kokadoris
18442	Naar den Dam, *Phil. Loots*	Gerard Zalsman
18443	De gefopte Vogelaar, *Cath. van Rennes*	Alida Lutkeman
18444	De ontslagen Boef, *Spoenlof*	J. H. Speenhof
18445	Wat is Liefde, *R. Gans*	Walter van Son
18447	Leve de Militairen, *Paulus*	Dus Paulus
18448	Laterij, *Paulus*	Dus Paulus
18464	Wilhelmina van Nassauwe, *Phil. Loots*	Gerard Zalsman
18465	Het Liedje cun den Smid, *A. Loman*	Alida Lutkeman
18467	Mijne Moedertaal, *Brandts Buyz*	Walter van Son
18468	Dansen op het Huwelijkfeest, *Paulus*	Dus Paulus
18469	Pietsvermaak, *Paulus*	Dus Paulus
18470	Vlaggelied	H. Gros
18471	Wies Neerlandsch Bloed	H. Gros
18472	Wilhelmus van Nassouwe	H. Gros

Biography of Mr. Edison

An official biography of Thomas A. Edison is being written by Frank L. Dyer, his personal counsel, collaborating with Thomas C. Martin, editor of the *Electrical World*. It will appear in Harper's Magazine during part of 1908 and will later be published in book form. Mr. Edison has so often been misrepresented and misquoted in print, especially in the daily newspapers, that an official life or a personally endorsed transcript of what he has accomplished of scientific and commercial value, from his earliest days as a newsboy to his present-day eminence, was deemed necessary in justice to his well-earned fame and position in history. The biography will be treated chronologically and profusely illustrated, with a number of important chapters devoted to the Phonograph and its perfection.

A Defiant Infringer Quickly Disposed of

Judge Reed, of the United States Circuit Court, sitting at Dubuque, Ia., on January 14th, granted a restraining order enjoining Edward H. Martin, of Webster City, Ia., from interfering with the selling system of the National Phonograph Co. and from inciting Edison Jobbers and Dealers to sell him Edison goods in violation of their contracts. This case was one of the most flagrant that has yet been prosecuted by our legal department.

The facts of the case are as follows:

Martin bought several lots of goods during the year 1906 and the early part of 1907 from Jobbers and direct from the National Phonograph Company, and each time he, of course, signed the Dealers' agreement. In April, 1907, the National Phonograph Company was informed that he was not keeping on hand a sufficient number of Phonographs and wrote him a letter inquiring about the matter. Martin replied that he did not keep a line on hand, but got the goods from Fort Dodge (twenty miles away) as needed. To a further letter requiring him to put in the goods or have his name dropped from the list of Dealers, he made no reply, and thereafter on June 12, 1907, his name was dropped from the list of authorized Dealers, and he was notified that this had been done and that he was no longer entitled to Dealers' discounts.

Martin then cast about until he was able to locate some unscrupulous Jobbers and Dealers, whom he procured to sell him goods at Dealers' discounts, in violation of their contracts, which obligated them to sell to no one but authorized Dealers, and he then placed the goods so obtained on sale at cut prices and extensively advertised such sales.

When this condition of affairs was brought to the attention of the National Phonograph Company, a man was immediately sent to Webster City to obtain evidence against Martin. He arrived there on December 4th, and as soon as he had obtained the necessary evidence, the National Phonograph Company filed a bill in equity in the United States Circuit Court against Martin.

This bill and the evidence obtained in the form of affidavits were presented to Judge Reed of that Court, and when he thus learned of the flagrant character of Martin's conduct, he forthwith, on December 23d, granted a restraining order enjoining Martin and his employees from interfering with the selling system of the National Phonograph Company, and from inciting its Jobbers and Dealers to sell goods to him, an unauthorized dealer, in violation of their contracts, and from selling or dealing in any of its patented goods.

At the same time, Judge Reed gave Martin until January 2nd to file answering affidavits and set the case down for preliminary hearing on January 13th. Martin did not file any affidavits, nor did he appear at the time fixed for the hearing.

On January 14th, Frank L. Dyer, General Counsel of the National Phonograph Company, went to Dubuque, Iowa, where the United States Circuit Court was sitting, and argued the case in behalf of the National Phonograph Company. At the conclusion of the argument Judge Reed rendered an oral opinion, continuing the restraining order already granted.

The purchases made by Martin since he was placed on the Suspended List are now being investigated, and this investigation will probably result, within a short time, in the suspension of those from whom he obtained the goods. Of course, should Martin make any further effort to sell these goods, even at the full list price, or should he in any way interfere with our business system, he will in our opinion be in contempt of the injunction, and will be promptly proceeded against for so doing.

New Horn Meets Long Felt Want

The new horn is big, shapely and handsome. It sets the instrument off and gives to the reproduced sounds a clearness and sweetness not possible with other horns. The appeal it makes to the consumer is instantaneous. It looks the money and it gives the results. The horn is sold with the Phonograph as a part of it—one price for both. One set of motions and the whole transaction is completed.

The horn brings the Dealer a good profit. The price is fixed, just as the price of the Phonograph is fixed. No competitor can influence a sale by cutting the price on the horn and as the Edison horn is made for the purpose of insuring the best results from the Phonograph, no stock of horns is necessary.

The new equipment of the Edison puts the Phonograph selling proposition on the right basis. It means easier and quicker sales, full profits every time, no unfair competition and no accessory stock.

Have you ordered a stock of Lauder Records?

46 Edison Records Made Over

Below is printed a list of 46 Edison Records that have been made over by the same or new artists since the list of 158 made-over selections (Form 1166) was issued several months ago. It embraces such selections as have been made over to and including November 15th, 1907.

As the trade already knows, whenever circumstances render it necessary to make new moulds of selections, the work gets the advanced experience of our Recording Department and such new Records benefit in all the other improvements of the art. Such Records are in all respects equal to those of the monthly list. We believe that if the public knew of their existence they would sell quite as readily as the new Records.

It is our intention beginning with April to add certain of these made over selections to the monthly Advance Lists, Order Blanks, Supplements, etc. In the April printed matter we will insert such selections as have been made over in December and thereafter will work three months behind, believing that in this time Dealers, in the regular course of business, will have disposed of their stock of the older selections and be carrying only the new.

Folders including these made-over selections will later be issued for retail distribution.

Unless otherwise indicated they have been made over by the same artists or combinations.

EDISON MILITARY BAND.

8424	American Patrol	
	Formerly by Edison Concert Band

VOL. VI. February, 1908 No. 2

Playing Fair

The changes made last fall in the selling date for new Records and in permitting Jobbers to ship to Dealers on the day before, has worked admirably and appears to be greatly appreciated by the trade everywhere. Advancing the date to the 25th has met with the approval of all Jobbers and Dealers. It has enabled everyone to largely realize on the sales of Records in the same months as bought, the longer months especially affording a liberal time in which to promptly turn over purchases.

Permitting shipments to Dealers after 2 P. M. on the 25th has served to lessen the troubles of Jobbers, has put Dealers on a more even selling basis with Jobbers, and it has almost entirely eliminated the unequal competition between Jobbers and their own Dealers—a competition that has frequently existed between firms in the same city or town.

The most gratifying feature of the new shipping arrangement is the splendid manner in which the entire trade is complying with its requirements. It was with no little apprehension that we made this change. We felt very dubious about the advisability of permitting Dealers to have new Records in their possession for so long a time before the selling hour. All sorts of things were predicted by those not in sympathy with the plan. It was not possible, they said, to put several thousand Dealers on their honor and not be imposed upon.

But the unexpected has happened, or rather the expected has not happened. The plan has been in operation for three months and the violations have been few. Most of these have been due to a misunderstanding. Each complaint has been promptly investigated and treated according to its merits. As a whole, Edison Dealers have shown that they are loyal and are quite as willing to work for the good of the business as we are to have them. Their compliance is an eloquent expression of their feeling toward this company, for we believe that nothing but a desire to "play fair" with us could secure such an unanimous co-operation from them.

Lest some might forget, we are sending Jobbers a supply of notices like the February notice printed below, these to be enclosed with shipments of new Records or mailed with invoices for them:

NOTICE TO EDISON DEALERS.

In accordance with our notice to the trade, dated October 25, 1907, the 28th February Edison Records may be shipped to you on or after P. M. on January 26th. They must not, however, under any circumstances, be sold, exhibited or leave your possession before that day and hour, even though they reach you on the day before. This restriction is of the utmost importance and must not be violated.

NATIONAL PHONOGRAPH CO., ORANGE, N. J.

Must Sign an Agreement with Each Jobber

Dealers who have already signed the new Edison Agreement through one Jobber should send their copy of the Agreement to any other Jobber from whom they may desire to buy Edison goods. This will show that they are entitled to Dealers' discounts. They must, however, sign another copy of the Agreement through the new Jobber before the latter can fill orders. The necessity for the above procedure has not been generally understood by Dealers. If any Dealers have failed to execute a copy of the Agreement for their own use they should sign one and have it accepted by their Jobber. The latter will furnish copies or they will be mailed by our Sales Department upon request.

Pushing Foreign Records

The following letter was sent to all Jobbers under date of December 27th, for the purpose of arousing among Jobbers a greater interest in Foreign Records than has been manifested in the past. It is reprinted here because it is of interest to Dealers as well as Jobbers. It was accompanied by a copy of the new Foreign Record catalogue and a blank calling for certain information.

DEAR SIR: The enclosed advance copy of our new catalogue of Foreign Records is sent to you for two reasons: First, to enable you to re-arrange your stock, so as to bring it up to date. Second, to solicit your co-operation in increasing the sale of Foreign Records.

This new catalogue contains the following selections:

27	Hebrew	99	Italian
88	British	14	Japanese
40	Chinese	34	Norwegian
40	Cuban	8	Norwegian
18	Danish	65	Polish
86	French	6	S. A. and C. A. National
23	French-Canadian	61	Spanish (Hymns
109	German	25	Swedish
12	Greek	1	
12	Hungarian	921	

Your attention is directed to the "Foreword" on page 3.

While the sale of these Records is by no means small, it is not what it would be if given more attention by the entire trade. We are handicapped in advertising to foreign speaking people, because they complain that Jobbers and Dealers do not carry them in stock. They declare that their Jobbers do not carry an adequate stock of Foreign selections, and they lose sales because they cannot get orders filled in time.

* * * * *

One of the most frequently used arguments of a Jobber's salesman is that he is willing and anxious for business; that he is ready to carry the full list of Edison Records," meaning of course, the domestic list.

Now we see a similar argument on you and say, "It will pay you to carry the entire list of Edison Foreign selections." If it pays the Dealer to carry the domestic list so as not to lose sales, will it not pay you many times over to carry the Foreign list so as not to lose Edison Foreign and Foreign? Do you know of any better way to give your Dealers perfect service? With price protected goods like ours, service counts more than any other feature.

* * * * *

With the issuance of the new catalogue, we have reduced the total of our Foreign selections about 30 per cent., making it easier to carry the full list, and we intend adding in the future only such selections as seem to be demanded by the trade. We will also continue in the Foreign Catalogue the plan of cutting out slow-selling selections and keeping the total within reasonable limits.

Will you not give this matter the attention that we believe it deserves?

F. K. DOLBEER,
General Manager of Sales.

Two Jobbers have expressed the opinion that the lack of sequence in the numbers of the Foreign Records has a tendency to keep Jobbers from stocking the entire list. They point out that it is not possible to tell from time to time which series of numbers will be added to, and that therefore it is difficult to arrange shelves or bins in a systematic manner. They have asked that the numbers be changed to run in invoiced order as issued. It is not possible to change the present system of numbering our Records. They are being made in this country, London, Berlin, and Paris, and each place has been assigned certain numbers to be used for any masters they make. For instance, we are using here numbers in 19000 and 20000. London is using numbers in 13000; Berlin in 15000, and Paris in 17000.

In our opinion the following plan will be the best for Jobbers and Dealers to follow, especially where the entire list is carried in stock: Arrange shelves or bins in the numerical order shown in Trade Catalogue No. 1240, leaving room between any of them for additional selections. After the highest number at the end leave space, say, for 200 new titles. As new titles are issued, place them at the end in as near numerical order as possible. Then place an indicator (a colored cord or something similar) at the point in the regular stock, where the new numbers would go in if in the proper order. For instance, if new British selections should be issued as follow 13084 as indicator after this number would show that the later titles were placed at the end of the racks. By using trays for carrying Records in, it would be an easy matter once a year or once in eighteen months to re-arrange the trays to a close numerical order. This plan would not answer for domestic Records, but for the less active Foreign list it should answer every purpose.

A Doubtful "Endorsement"

A department in the *Success Magazine* for January, edited by Edwin Markham, contained a paragraph making what the casual reader would consider as a sweeping commendation of one style of talking machine. It was apparently a comparison between the Phonograph and a disc machine, the former being condemned and the latter approved. It was evident that Mr. Markham did not know one from the other, so we took the matter up with the editors of *Success*. The resulting correspondence elicited the admissions from *Success* that Mr. Markham did not know the difference, but had somewhere heard a high grade disc record and was simply commenting upon the general improvement made in talking machines in the past few years. The *Success* people also stated that Mr. Markham, instead of being especially friendly to disc machines, had just bought an Edison Phonograph for his personal use and was delighted with it.

Mr. Dealer:- If you haven't signed the new Agreement do it at once.

Printed Matter.

A copy of the new Numerical and Alphabetical Catalogue of Records, Form 1230, has just been mailed to all Dealers who signed the new Agreement. This catalogue contains all domestic and foreign selections listed to and including January, 1908, and will be current until July 1st. Jobbers will be supplied with a limited number of additional copies for their own use and also to furnish extra copies to Dealers who need more than the one mailed to them. Both Jobbers and Dealers should understand that this catalogue is for trade distribution only and should not be distributed to the public. The edition printed will make it impossible to supply more than a limited number of extra copies to Jobbers and it will be useless to send in orders for large quantities.

We have just mailed to the trade, a copy of an artistic colored hanger printed in eight colors. The original design for this hanger was made especially for us by Courtney Moore, whose sketches have won for him a national fame. He has drawn many covers and done much other illustrating for the better magazines and other publications. This sketch was made for us before the change in our outfit and will explain why a flower horn was used. Mr. Moore had a machine equipped with one of these horns before him when he did the work.

The copy of the Foreign Record Catalogue, Form 1230, that has just been mailed to the entire trade, includes all selections in foreign languages listed in the United States to and including January, 1908. The "Foreword" enclosed in this catalogue gives some interesting information about these Foreign Records as follows:

"During the last six months our catalogue of Edison Records in foreign languages or made abroad has undergone a complete revision. A large number of Records, for which the demand has been limited or for which the moulds have become defective or damaged, have been dropped entirely. New selections in Bohemian, Cuban, Danish, French, German, Hebrew, Italian, Mexican, Norwegian, Polish and Swedish have been added, and others have been made over by new artists or under new conditions. The entire catalogue is now thoroughly representative of the high standard of the Edison name and we commend it to all interested in foreign Records."

The letter to Jobbers about foreign Records reprinted on another page, gives the number of different selections in each language contained in this catalogue. Dealers should carefully inspect the copy being sent to them and arrange to push the sale of such Records as are in demand in their territory.

Beginning with the April issue the Record slow card, printed in two colors, will be printed on both card and paper, and Jobbers' standing orders will be filled with part of each kind. A number of Jobbers complained that part of their trade ordered only one or two of each new Record monthly and the packages or cases in which shipments were made were not large enough to take in the show cards and as the latter could not be folded they were inconvenient to get to Dealers. With part of the edition printed on paper it will be easy to supply the so-like Dealers.

Jobbers have been supplied with quantities of a new four-page folder in two colors, entitled, "When Three's Not a Crowd," Form 1185, a sample copy of which has just been mailed to the entire trade. We regard this folder as a useful medium for increasing business and hope that the trade will get a quantity for distribution in their territories.

Record Artists as Minstrels

Orange Lodge, No. 135, B. P. O. Elks, gave two minstrel performances at Orange on the nights of January 13th and 14th that were of considerable interest to the Phonograph trade, because among the prominent amusement makers were Arthur Collins, Byron G. Harlan, Steve Porter and Edward Meeker. Albert Benzler, also of the Edison recording staff, led the orchestra.

Record Exchange Proposition.

The matter of handling the Record exchange proposition is practically completed. There still remain a few cases where Dealers neglected to comply with the stipulations sent out, in failing to put their names on or inside of the cases, or omitting some feature necessary to the identification of the cases. There are, too, the usual number of disputed cases still to be adjusted. Wherever orders have been sent us equal to double the number of Records returned, credit has been given on our books. Some of these credits have not yet been entered because a sufficient quantity of Records have not yet been ordered. This exchange proposition has given the trade an opportunity to clean up its Record stocks and Dealers have themselves to blame if they do not start the new year with an up-to-date stock of Edison Records.

Got Square on the Opera

He is a genial, convivial soul—and how he does love music! Why, he loves his wife almost as well as he loves music. But he doesn't love the grand opera magnates—and that's why he got square with them.

"It's this way," explained an intimate friend. "Jim is a season subscriber for two seats at the opera. His wife generally goes, but Jim never. Oh, yes, he used to go. But you see, he's devoted to music and he's so emotional that at a performance he never could restrain himself from whistling and humming in time with the orchestra.

"Of course, you know, this wasn't what the people all around him paid for; and as repeated protests by them and by the management didn't work a cure, Jim was politely requested to keep away.

"He has got square, all right. How? Why, he bought a Phonograph and loaded her up with grand opera selections. Now on every opera night he lights a cigar, puts his feet up on the other chair, turns the crank, and has a musical evening just the same. Next scheme—and he whistles by the hour."—*New York Globe.*

Cannot Use Names "Edison" or "Edisonia"

A suit which may be of interest to our readers, recently decided in the United States Circuit Court at Philadelphia, has just been decided in Mr. Edison's favor. The defendant, one McCusker, carried on an amusement parlor under the name of "Edisonia," without Mr. Edison's consent or approval. An application for injunction was made, which was granted, as appears from the documents printed below. Other instances of similar practice have been brought to our attention in connection with which it is proposed to take corresponding measures to protect Mr. Edison's name.

IN THE
CIRCUIT COURT OF THE UNITED STATES
FOR THE EASTERN DISTRICT OF PENNSYLVANIA.

THOMAS A. EDISON, *Plaintiff,* v. JAMES MCCUSKER, *Defendant.* } In Equity. No. 16. Oct. Sess., 1907.

DECREE.

HOLLAND, J.

Plaintiff, Thomas A. Edison, having exhibited his bill of complaint in this cause, charging the defendant, James McCusker, with the unauthorized and unlicensed use of the word "EDISONIA" in connection with his business, and in disparagement of said plaintiff's rights therein; and said defendant having admitted plaintiff's rights therein and that said defendant has no right or license to use said names, or either of them, or any name resembling the word "EDISON" for the designation of his place of business or otherwise, and that said plaintiff is entitled to the relief prayed for in the bill of complaint; and said defendant having agreed that a decree should be entered and an injunction should issue directing and perpetually restraining him from any further use of the names "EDISON" and "EDISONIA" or their equivalents, for the designation of his place or business or otherwise as complained of in the bill of complaint:

It is by the Court ORDERED, ADJUDGED AND DECREED that said defendant, James McCusker, his attorneys, servants and agents, be and are hereby perpetually restrained and enjoined from using the names "EDISON" and "EDISONIA" or any equivalent thereof for the designation of his place or business or otherwise as complained of in the bill of complaint, or any further infringement of the rights of said plaintiff in the premises, and that said plaintiff recover from said defendant the costs of this suit to be taxed.

I agree to the entry of the above decree.

(Signed) JAMES MCCUSKER,
Defendant.

BY THE COURT.

Paid to Chas. N. Butler $27.61 in full settlement.

Attest: GEORGE BROOKER, Jr., *Deputy Clerk.*

IN THE
CIRCUIT COURT OF THE UNITED STATES
FOR THE EASTERN DISTRICT OF PENNSYLVANIA.

THOMAS A. EDISON, *Plaintiff,* v. JAMES MCCUSKER, *Defendant.* } In Equity. No. 16. Oct. Sess., 1907.

WRIT OF INJUNCTION.

UNITED STATES OF AMERICA, EASTERN DISTRICT OF PENNSYLVANIA. } ss.

The President of the United States,
To James McCusker, Greeting:—

Whereas, Thomas A. Edison lately exhibited his bill of complaint in the Circuit Court of the United States for the Eastern District of Pennsylvania, in Equity, against you, the said defendant, praying to be relieved touching the matter therein complained of, and especially that you, James McCusker, and all acting under you may be restrained from any further infringement of the rights of said plaintiff in the premises in such manner as required, in any way or manner contrary to law or equity.

We, therefore, in consideration thereof and also of the particular matters in said bill set forth, do strictly command and enjoin you, said James McCusker, your counsellors, attorneys, and all others acting under you, without delay, to desist and refrain from wholly and entirely desist and refrain from using the name "EDISON" or the name "EDISONIA" or any equivalent thereof for the designation of your place or business or otherwise as set out in said bill of complaint.

WITNESS, the Honorable Melville W. Fuller, Chief Justice of the United States, at the City of Philadelphia, Pennsylvania, this seventh day of January, A. D. 1908, and in the One Hundred and Thirty-second year of the Independence of the United States.

GEORGE BROOKER, Jr., *Deputy Clerk.*

Advertising Brings Customers

We have done two things. We have made a Phonograph so perfect that a hearing means a sale. We have advertised this Phonograph until it is known to everybody who can read.

You must do the rest. You must carry it in stock, believe in it, show it, talk it and exhibit its powers. Do not let a Phonograph customer get to your store before the Edison does. If you do, our advertising, so far as you store is concerned, is wasted.

Remove Marks from Cases

Un every case that we ship from the factory the words "From National Phonograph Company, Orange, N. J." appear in one corner. If Dealers and Jobbers use these cases for re-shipping, these words should be removed before the cases are delivered to the transportation company. Our Traffic Department is constantly in receipt of requests from the Agents of Transportation Companies throughout the country asking for disposition of shipments apparently made by us but which we find after long investigation originated from the store of one of our Jobbers or Dealers. The Agents naturally write us direct since our name appears in the corner as being the shippers of the cases. The trade will save us considerable trouble and correspondence by making a note of the above request and complying with it.

$13,500 Edison Business in a Town of 5000

A Western Edison Jobber a few days ago sent us a copy of a letter received by him from one of his Dealers. Omitting names, it read as follows:

"A hasty examination of our books shows we bought of you in 1907 $10,139 in Phonograph goods also $5,400 from the [naming another Jobber], making a total of $15,500 for the year. Will work to do better next year."

Our Jobber corrected the letter by stating that the exact amount of the purchase through him was $10,406.85. This Dealer is located in a town of less than 5,000 population.

Lost Money by Waiting

Here's an interesting letter about Edison goods. It was written to one of our salesmen by a salesman from one of our Jobbers, and, as it was not intended for publication, we are compelled to omit names of individuals and places.

You will excuse me for not answering sooner, when I tell you that we were nearly sold with business. Our Edison business is growing so fast that we can hardly keep pace with it. The Saturday just before Christmas (7) picked orders, and the following back Sunday morning, in two weeks and one day, our total Edison orders out on the road, I signed up the ——— and have two more prospects in ———. Why, it's the biggest kind of a proposition. Me, ——— and ——— will start out on a proposition that it had cost us thousands of dollars because we waited that year before we put in the Edison line.

Me, ——— says I've got to stay out all the time, and we have another regular man West, and before the year is out will probably put on two more, but I will say I never was as enthusiastic in my life over the prospects of business as right as I am now.

My last trip before Christmas was a eleven-day trip, and I sold a trifle over $2,100 in that time, not counting mail order repeat orders. To-day I mailed $400 worth right here in ——— for about 1,000 more. Mail Order In ——— for about 1,000 more. Mail Order In ——— I've got some dandy prospects all along the line. We are just beginning to realize what we have been missing; in fact, "Our eyes were open, but we were sound asleep" until we put in the Edisons.

Well, I don't want to bore you with a letter, but I will say I never was as enthusiastic in my life over the prospects of business as right as I am now.

Practical Gratitude

I wish to thank you for liberal exchange allowance, and I shall make my thanks practical and mutually profitable by using all, and more than the amount credited, in advertising Edison Phonographs and Records.—*W. D. Wilmot, Fall River, Mass.*

To show that he is doing as he said, Mr. Wilmot enclosed copies of some excellent newspaper advertising that is appearing in the papers of Fall River.

ONE MORE OPPORTUNITY

It was found to be impossible to check up the re-signed Dealers' Agreements in time to remove from our files and mailing lists the names of firms who have not re-signed. Consequently they will be continued a month longer. We wish that Jobbers would make one more effort to round up any of their Dealers who may not have signed and get their Agreements to us early in February. Dealers who want to continue handling Edison goods are urged to sign the new Agreement at once.

Catching the Crowd

We are going to tell you how [illegible] have a machine going out doors and [illegible] everything inside. We have a Triu[illegible] reproducer mounted on a cabinet, a tourin[illegible] horn through one door, a crane [illegible] grooved block screwed to store front, [illegible] an umbrella suspended by it and an 18-inch piece [illegible] rubber hose connecting with machine [illegible]. Our doors are double, so hole is bored [illegible] some remaining stationary.

During the holidays we attracted [illegible] her able attention. It is quite amusing to [illegible] people passing the store when a man is [illegible] pel, as nine out of ten are keeping pace [illegible] rap and "tumble" before they get by, when [illegible] Look up and grin to see if anyone is noticing.

We do not keep it going all the [illegible] as we are up the street a ways and this [illegible] a $5,000 town; hardly enough people going by to keep it going all hours. One afternoon there was a fire a few doors farther up on our street, so we hustled the machine into position and caught the crowd on the way back.

We can remember the time when we carried only about 50 Edison Records and one machine. Never thought of ordering a Triumph for stock. Now we frequently order two for stock. The beauty of the Triumph is when you sell one you make something. We can look back to people who bought a Standard, and we know now that we could have just as well sold a Triumph if we had one in stock. We now carry the complete catalogue of Domestic selections and have two rooms partitioned off in the rear of our store. In comparing our holiday trade with last year the Phonograph department is all that kept up to last year's volume. Piano and musical merchandise showed a falling off of over a third.—*Hiden, Billinger & Co., Waukegan, Ill.*

NOVEL HOLIDAY WINDOW DISPLAY BY FLINT & BRICKETT, SPRINGFIELD, MASS.

The above photograph shows a window display made during the holidays by Flint & Brickett, Edison Jobbers at Springfield, Mass. It shows a "Roman Knight" in full armor, standing in the center of a group of Edison Phonographs and pointing [illegible] one to a sign reading: "$5.00 puts one of these in your home." The "Knight" was about six feet three inches high and in his arms [illegible] a striking figure. "We had the sidewalk packed for three days and evenings to the extent that the police asked us to desist as we were blocking traffic," wrote Flint & Brickett. "People came way over from the other side of the street through the snow, and teamsters got off of their teams. Every one in the cars was talking about the man in Flint & Brickett's Phonograph window. What was he doing? There was no doubt that 50,000 people were held up, and they all know we sell Edison Phonographs. It was the talk of the town. Every one concedes it was the best piece of advertising ever done here."

A "Gem" Victory

We ask the indulgence of the Edison trade for the reference to competing goods in the letter printed herewith, but the letter would lose its point if the comparison was omitted. We get many letters of this kind, but seldom print any of them. This one is reproduced because it is above the ordinary. The name and address of the writer is purposely omitted.

DEAR SIRS:—Eighteen months ago I wrote to you for information about your Phonographs, and you sent me abundant literature, and referred ——————— of this city, to me. I wasn't worried into buying a machine either by that firm or your sales, much to my satisfaction.

In November of last year I read an advertisement of the "Gem," a *New Model*, and as a devotee of talking machines (I naturally interested me), we already had a machine (——which as you must know are very fond deservedly) popular. Still, my ideal was by no means reached by it. As you know, scratch and false volume is the chief drawback of the disc method of sound-reproduction. Anyway, that's my opinion in the matter.

So I got a Gem. My brother has a $50 disc machine —and it is undoubtedly very nice and also very loud— and when I told him of my purchase he said that I would be disappointed in a short time. Since then I have made a small collection of Records, three dozen, and of the following numbers:

Band—8088, 8205, 8120, 8110, 8084, 8121, 8020, 60, 79, 8026. Duets—8200, 8084, 8075, 8080, 8127, 8121, 8081, 7981, 8037, Piano—8071, 8080, 8084, (brilliant) 8210, Song, 8137, pianoforte—8077, 8080, 8076, 8078, Vocal—8136, 8137, 8040, 7988, violin—8040, 8076, Whistling—8040, 8035, Song, 8032, 'cello; 8205, xylophone—8040, 8076, 8082, 8075, French duets, 8085, vocal—8086, 8080, 8082, 8075, French —slow Waltz, Edison's Toreador's Song, Carmen. Grand —slow Waltz, Edison, Bessie Abbott.

Of course I have dozens of other makes (which were given to me) each demonstrating the superior tone of *your* Records by comparison.

Now this collection is small, but you will agree with me that each Record is well chosen, and thoroughly representative of your Records. Now for the object of this letter.

On Christmas I took machine and Records to the brother's house I mentioned. Naturally it was in direct competition with the *disc machine*.

The Edison was voted best for home use, because of its sweetness, purity of tone and distinctness.

Mark you, *for home use*—not that else is it intended for? Surely not to disturb neighbors—if they were I wouldn't have one. No, volume is not so much needed as the three qualifications above mentioned, and the Edison has the first two absolutely, and the last to a large extent—more so than any disc ever heard.

Louis J. Gerson Succeeds H. E. Marschalk

Henry E. Marschalk has withdrawn his interest and relinquished his management of the Musical Echo Company, Edison Jobbers of Philadelphia. Louis Jay Gerson, formerly assistant manager, has assumed the management, taking charge of the business January 1st. Mr. Gerson is very well known, having been identified with the talking machine industry for years. The President of the Musical Echo Company is F. W. Wentworth, of New York.

Going After Record Business

The letter given below is reprinted for the purpose of pointing out to the trade an excellent means of getting Edison business. It was sent out in the latter part of December by the Austin Music Co., of Dayton, O. As the letter indicates it was accompanied by a copy of the *Phonogram*. It was mailed to a special list of Phonograph owners.

DEAR CUSTOMER: In handing you the new Phonogram for January, I must sincerely wish you a Happy New Year, and a prosperous one at that. I also wish to thank you for your kind patronage during the year just ended, and hope I will be able to serve you and your entire family well during the coming year. You will always find, at my store a welcome for you.

I am this store to supply you in your wants for your Phonograph. This is a Phonograph store. I make this my business and study its detail, also keep in touch with all the latest and new Records, Records and supplies that come out. This is their main store and my store is for Phonographs and Records. If I wish to buy groceries I go to a grocery store. And if I want to buy shoes I go to a shoe store. The same can be applied to piano and sporting goods, and so on. For this buy Records I go to the Phonograph store. For this reason I can give you Records that are a distinct business to themselves, and you cannot get two things equally as well at one. In one line the dealer can buy more of his particular line than he could if he bought three or four lines, therefore giving the customer better prices, as he buys cheaper that a dealer who buys small lots.

However, we all know Edison Records sell for 35c all over the United States. And as I try to win your confidence by having the most complete line of Records you will find in the city and will extend to you courteous treatment at all times. If at any time you wish to call at our counter will you kindly let me know. I will consider it a favor and will be cheerfully attend to your wants. Business pleasures from business and nothing regrets. My private Edison room permits you to hear Records without being disturbed or annoyed.

Do you get the Phonogram each month? If not, send this valuable booklet each month to you. A copy of cost an expense to ourselves, but you get it? If not, kindly let me know and I will gladly, as you will find it very interesting. It has lots of helpful information that will get the full enjoyment out of your Phonograph, which you should get. It is very valuable. That is why I can do is to read this when it comes to hand. It will tell you all your wants about your machine. Also the other printed matter we enclose is helpful to you.

In reference to the new *January* Records, just out, I wish to call your attention to a few that are very good, and you should have one of them at least:

9222 In a Cook Store.
9221 Dreaming. This beautiful ballad is exceptionally pretty.
9252 Every Ship Will Find a Harbor. Sung by Harlan.

Try and make it a rule to buy at least one Record a month. Say this now as one of your New Year's pledges. That's only $12.00, and the enjoyment derived will cause home to smile.

The new Records are on sale the 25th of each month. On that evening we have a concert and play over these Records. So if the Phonogram doesn't reach you before you are that day it's the fault of the postoffice, but you can call at the store and get one as soon as come in.

Hoping this will be a prosperous and happy year for you, allow me to remain

In sending us a copy of a quarter-page advertisement that they have been running in their local papers for several months, The Century Co., Edison Dealers of Bridgeport, Conn., report that their business has increased over forty per cent. during this time.

Suggested "Copy" for Dealers' Advertisements

The following matter is printed for the purpose of furnishing Dealers with suitable "copy" for changing their advertisements in local newspapers or to encourage them in beginning such advertising.

PHONOGRAPH "COPY"

HEAR THE EDISON PHONOGRAPH

Have you a Phonograph? How long has it been since you have critically listened to one? Do you know how good the Edison Phonograph is to-day, how pure the tone, how satisfying the reproduction? If you have one, you know. If you have not one, you ought to know—it's easy to know. Come here and hear. Learn how inexpensive it is for a complete outfit, including records—and how favorable the terms. Then think of the pleasure you can give yourself, your family and your friends with the world's best music, it's most catchy songs and the monologues and dialogues of it's funniest comedians. And after doing all this you'll buy one—you simply can't help it.

THE EDISON PHONOGRAPH

The voice of the Phonograph is more versatile than even the human voice. It not only reproduces singing, but all music, no matter how rendered. It can reproduce the forty combined instruments of a band as well as it reproduces the singing voice. That is why the Edison Phonograph brings entertainment into every home where it goes. It is the most popular invention of the many which Mr. Edison has made, and is the best form of talking machine because it is the personal work of the inventor, and not an adaptation of his idea. Come in at once to our store and it will not be long before you have one in your home.

The utmost proof of the real superiority of the Edison Phonograph over other talking machines has been in the large number of sales.

Every American citizen knows Edison and his work and therefore feels convinced that the Phonograph, which is his pet invention, must be better than other forms of talking machines and sound producers— because Edison heads it.

The Phonograph may be a plaything and amuser, but it is nevertheless a scientific article and must be made with great care in a particular laboratory which knows just how to make every part just right.

The great success of the Edison Phonograph is due to the fact that it reproduces perfectly all sounds. Thus it has become the greatest amusement maker ever produced.

DANCE TO THE EDISON PHONOGRAPH

The dance music of the Edison Phonograph is irresistible. Its selections are clear, distinct, tasteful and in perfect time. It offers the most fascinating waltzes and spirited two-steps of the world's greatest composers as well as the popular dance music of the hour. It is a military band or a symphony orchestra at will, affording a delightful and widely varied program without expense or attention. The Phonograph represents the personal work of Mr. Edison, the inventor of the talking machine idea. Hear it at our store; you must compare it with others to fully appreciate its entertaining powers.

RECORD "COPY"

A NEW PLEASURE IN EACH NEW EDISON REGORD

It is the Record that is new—not the Phonograph. Each Month Recoded is as entertaining as any you ever heard when you heard it for the first time. The way to keep up your pleasure in the Edison Phonograph and get from it all the enjoyment you should, is to hear the new Records and pick out those you like. Let us help you make a selection.

NEW EDISON RECORDS

The delight with which you heard the first Record on your Edison Phonograph returns with every new Edison Record that you buy. Every month twenty-four new Records are added to those which are available for your enjoyment. They are on sale at our store on the 25th of the month. The new records for March are especially good. Come to our store and hear them. You will not leave the store without at least half a dozen to try on your Phonograph at home.

GET THESE NEW MARCH EDISON RECORDS FOR YOUR PHONOGRAPH

Keep in touch with the new songs and music. Enjoy the old favorites. Laugh at the country's best fun-makers. The best talent in the land is represented in this list of new Edison Records for March, on sale February 25th. Humorous selections predominate, but they are of a high order; just the sort of breezy entertainment the season suggests. Then there are songs, waltzes and marches enough to well round out the list. Go over these at our store and take home the ones you like. Then you will hear your Phonograph at its best.

THE BEST TALENT IN THE LAND MADE THESE MARCH EDISON RECORDS

Never forget that any musical instrument will grow stale unless it has new music. You may have an Edison Phonograph, and you may have forgotten how delightful it was when the Records were new. The way to renew that delight is to buy the new Records. You would get tired of a piano, a violin, an orchestra or a vocal quartette, unless it gave you new music from time to time. The Edison Phonograph is like other musical instruments: It will entertain you if you do not forget to keep in touch with the new music—the new records. Ask us for the March list, or hear them played at our store.

MARCH RECORDS

Keep your Phonograph always fresh by supplying it with the newest Records—it is what you hear in the Phonograph that makes it interesting, not the Phonograph itself. Hear the March Records as our store, and then order them.

Ready-Made Ads

A large number of Dealers have taken advantage of our offer to furnish electros of the illustrations in these ready-made, ads. We are sorry to say that all of them have not complied with our request to send us copies of papers or printed matter in which the electros were used. Dealers who have failed to do this will not receive any more of these electros. If Dealers will not comply with so simple a matter as sending the evidence that they have used electros already sent them, they cannot complain if we do not honor any further orders. These electros are sent out for the purpose of getting additional advertising, and we are entitled to the same evidence of their use that we would ask if we were doing the advertising ourselves. To new Dealers or to those Dealers who have had electros and have complied with the requirements for their use, we will be glad to send either or both of the electros in the ready-made ads shown in this issue. The order on the next page should be used or similar matter written in a letter.

February Advertising

The copy of our February Magazine advertisement, reprinted on page 20 of this issue, has been illustrated with a specially drawn sketch by Guernsey Moore, a well-known illustrator for magazines and other publications. This advertisement appeared in the Saturday Evening Post, Collier's, Associated Sunday Magazines, and about twenty of the magazines of largest circulation in the country. Our newspaper advertising has also gone on as originally planned. One of the large Phonograph ads appeared in nearly 145 newspapers published in the largest cities of the country on January 7th and 8th, being used in evening papers on the first date and in morning papers on the 8th. Another of the Record advertisements appeared on January 24th and 25th in the same list of papers. Another of the series of Phonograph ads will appear on February 11th and 12th, and another Record advertisement on February 24th and 25th. We believe that this advertising, together with all the advertising of other kinds that we are doing, has had much to do with maintaining the present volume of Edison business. Advertising is one of the features of our business in which there was no retrenchment nor will any attempt be made to cut it down in any particular. On the contrary, we are planning to increase its scope during the present year, giving the trade more and more assistance as these plans are worked out.

If there is any one class of young men who can appreciate an entertainer like the

EDISON

PHONOGRAPH

It is the college class. Think what it would mean to hear all the new popular songs in your own rooms, whenever you pleased, simply by turning them on.

Thos. Smith & Sons

SCHENECTADY, N. Y.

Electro in above ad is: Staple Column, No. 667. Double Column No. 668.

EDISON

There are many old songs, almost forgotten now except by older people, which can be restored by the Edison Phonograph.

Look over the catalogue and see how many of your favorites are to be had in Record form, and come into our store and hear some of them on the Edison Phonograph. You will never rest until you own one.

Busier Than Ever

Graves & Co. are busier than ever. They have recently received several carloads of goods. A carload of Edison Gold Moulded Records weighing 20,000 pounds, and a carload of 440 machines have recently arrived. They do an immense Edison trade. It was only a few years ago that F. W. Graves established this concern on a modest scale. The possibilities of the venture soon became apparent to him.

Several changes of location followed the quick demand for more room for the retail trade and increased stock. The last and most important move was to the present retail location opposite the Imperial Hotel in Washington street. Beautiful parlors were opened in this establishment and about this time the wholesale branch was added. This grew by leaps and bounds until the company found it necessary to erect their own building for the jobbing business in the northern part of the city near the customs house.

"It seems but yesterday that I started in a little store handling Edison machines," said Mr. Graves. "Although in reality it has been several years since I made the venture, yet I can scarcely realize that a business of such magnitude as we now control should grow in so short a time. The past season has been a brilliant and busy one with our house. We felt the recent stringency to a slight degree, but the holiday trade is magnificent. The Northwest has money and the people feel confident of the future, so do not hoard their dollars so closely as would be the case otherwise. Future prospects are of the best."—*Seattle, Wash., Correspondence to the Music Trades.*

The EDISON PHONOGRAPH

Makes home the most entertaining spot on earth. You can give a dance with an Edison Phonograph, supply music at a reception, accompany a singer, entertain the children, break the ice at a party, while away pleasantly a few hours when you are alone.

Put it to the test. Go to the nearest Edison store and hear the new model with the big horn. Let the dealer play for you some of the NEW FEBRUARY RECORDS. (Out January 25th.)

If you already own an Edison remember that to get the fullest enjoyment out of it you must keep up with the new records.

Ask your dealer or write to us for the new catalogue of Edison Phonographs, THE PHONOGRAM, describing each Record in detail; the SUPPLEMENTAL CATALOGUE, listing the new February Records, and the COMPLETE CATALOGUE, listing all Edison Records now in existence. Records in all foreign languages.

Edison Phonograph Monthly

VOL. VI. March, 1908 No. 3

Keeping At It

The man who attempts to say that business today is as good as it was six months ago fools no one but himself. The volume of every business has, in the past few months, undergone a shrinkage that in the aggregate is large, and that has varied considerably, according to the character of business. No one of sense will deny these facts and no good will be had by concealing them. The facts are like the proverbial spilled milk, they cannot be recalled. What caused the trouble is now of little moment, except to point out reefs to be avoided in the future. The chief concern of every business man should now be: What can I do to aid in building up the financial and industrial interests of our great country? Every man, with his eyes to the future, should resolve that he will strive to do his full share in restoring prosperity.

Such will be the effort of the National Phonograph Company and it solicits the co-operation of every Jobber and Dealer to the same end. In common with all other manufacturers we have not relished the reduced volume of business, but this reduction has not been anything like what some other lines have suffered. An offsetting gain has been the elimination of many items of expense that had crept in from time to time, and the re-organization of departments to a greater efficiency at less cost. From an organization and expense standpoint the depression has been advantageous, although we frankly admit that we would rather not have been compelled to reorganize and reduce. The same conditions have prevailed throughout the talking machine trade. All Jobbers and Dealers have eliminated every unnecessary expense and are now doing business on a solid and substantial foundation. They are in splendid shape for the future.

That the turning point was reached some time ago and that financial and industrial affairs are now showing a marked improvement are admitted everywhere. Our own business is showing a steady increase week after week, and the character of the orders sent in by Jobbers evidences a similar condition with the latter. The latter's orders, of course, are but a reflection of the state of business with Dealers. Considering that Phonographs and Records are classed as luxuries, (although many thousands seem to regard them as necessities), the talking machine trade is in splendid shape.

The trade can co-operate in making it better by not only putting forth the same efforts as they formerly did, but by increased effort. After all, ninety per cent of the people are as well off as they ever were. They have suffered no loss of positions or wages, and they are just as able as ever to buy Phonographs and Records. Dealers' advertising, circularizing, window displays, salesmanship and personal work will make sales almost as readily now as at any time in the past. The fact that we are doing no less advertising, are getting out just as much printed matter, and are keeping our salesmen on the road, show that we believe in keeping at the game the same as before, and our own work will accomplish the greatest results when the trade pushes business locally. Dealers should not relax in their efforts because of the feeling that it won't pay; they believed in pushing things a few months ago, and what has happened since has not been sufficient to make a material change. Don't seize upon a pretext to lay down. Keep on your feet and with head in air, eyes front and chest out, show the people of your cities and towns that you believe in your goods and are losing no opportunity to tell them so.

Keep Up Stocks

Conservatism in ordering Phonographs and Records is a trait to be commended in all Dealers, but to be conservative does not mean to let stocks run so low as to cause the loss of sales. Not to have a stock on hand sufficient to fill the demands of every customer is a lack of business judgment. Don't be that kind of a Dealer.

The New Edison Gold Moulded Records Jobbers' Advance List for May, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before April 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on April 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on April 25th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after April 20th, but must not be circulated among the public before April 25th. Jobbers and Dealers may, however, deposit Supplements and Phonograms in Mail Boxes or Post Offices after 5 P. M. on April 24th, for delivery on the following day. Jobbers are required to place orders for May Records on or before March 10th. Dealers should place May orders with Jobbers before March 10th to insure prompt shipment when Jobbers stock is received.

9818 Down in a Coal Mine — **Edison Concert Band**

A Record descriptive of daily life in a coal mine. To music of an appropriate character, the miners assemble, greet each other, enter the cage and are conveyed into the mine; they are heard working with pick and shovel; they stand back for a blast, and as they return to work they sing "Down in a Coal Mine," a song very popular some thirty or more years ago. Composer, Otto Langey; publisher, Carl Fischer, New York.

9819 If Those Lips Could Only Speak — **Allen Waterous**

Living in a beautiful mansion, with unlimited wealth and surrounded by luxury, the singer gazes upon the framed portrait of his dead wife and laments her departure in the following words:

If those lips could only speak,
If those eyes could only see,
If those beautiful golden tresses
Were there in reality;

Could I only take your hand,
As I did when you took my name!
But it's only a beautiful picture
In a beautiful golden frame.

Allen Waterous, who, by the way, is a brother of the Mr. Waterous who has sung duets with his wife, and not the duet singer, as stated last month, makes a splendid Record of this composition. Orchestra accompaniment. Words and music by Charles Ridgwell and Will Goodwin.

9820 Chimmie and Maggie at "The Merry Widow" — **Ada Jones and Len Spencer**

Chimmie and Maggie have yielded to the New York craze and have been to see Lehár's operetta "The Merry Widow." The Record begins as they are leaving the theatre. The calls for carriages are heard and the boys are selling the sheet music in the lobby. Maggie is inclined to be sarcastic about the members of her sex whom they have just seen on the "stoige." She especially comments on the "Widow" thusly:

Little puffs of powder,
Little dabs of paint,
Makes the merry widow
Look like wot she ain't.

Jimmie's replies make Maggie somewhat jealous. He, in turn, is put out when she wants to find the man who wrote the famous waltz. The sketch is original and is not published.

9821 Love's Roundelay — **Anthony and Miller**

"The Merry Widow" has a rival in the Viennese operetta "A Waltz Dream." It was given its first presentation at the Broadway Theatre, New York, in January and has since steadily grown in popularity. Its music is very attractive. A number of its airs are of the kind that are widely sung and whistled. Chief among these is "Love's Roundelay," which is most charmingly sung for our Record by Messrs. Anthony and Miller, two of the best singers in the Edison galaxy. Orchestra accompaniment. Music, Oscar Straus; words, Joseph Herbert; publishers, Joseph W. Stern & Co., New York.

9822 Somebody That I Know and You Know Too — **Manuel Romain**

Fully equal to Mr. Romain's previous fine Records is this short love tale with its somewhat unusual title. As might be surmised, the individual known to both is the object of the singer's fondest admiration. Mr. Romain is a delightful singer of ballads of this kind. Orchestra accompaniment. Music, J. Fred Helf; words, Ed. Gardenier; publishers, Helf & Hager Co., New York.

9823 My Gal Irene — **Collins and Harlan**

Irene is a village belle and this song dwells upon her charms and her talent as a performer on the accordion. What the playwright would call the "plot" is given in the chorus as follows:

My Irene is the village queen,
She's the queen of the village green,
And when she plays on the a-cor-deen,
A sicker gal why you never seen,

Irene's fat and she Slapjohn gal,
Every never could reach Irene,
Every time she starts some a-cor-deen a-ticklin' in the feet,
Why-Cake plays entire village down.

The air fitted to the song is of the easy-to-learn kind—the kind that holds the attention of those fond of popular airs. Collins and Harlan's rendition of the song will make it a big seller in the May list. Orchestra accompaniment. Music and words, J. Hapgood Burr; publishers, Jerome H. Remick & Co., New York.

9824 Tipperary — **Stella Tobin**

A sentimental son of Erin's fair isle sings of his love for a "typical Tipperary miss." Every line is full of "blarney," just the language that a lovelorn Irishman would use in singing of his charmer. Perhaps the most attractive feature of the song is the clever way in which the well-known Tipperary air is worked into it. This is Miss Tobin's second selection for the Edison catalogue, and in our opinion is even better than her first one, No. 9758, in the February list. Orchestra accompaniment. Music and words, Leo Curley, James M. Fulton and J. Fred Helf; publishers, Helf & Hager Co., New York.

9825 La Papillote — **Edison Symphony Orchestra**

From a musical standpoint, this is one of the best things of the month. The melody of the composition is delightful and its interpretation by our Symphony Orchestra is of a most artistic character. Altogether the Record is a gem. Composer, R. Gruenwald; publishers, Oliver Ditson Co., Boston.

9826 When Sweet Marie Was Sweet Sixteen — **Frederic Rose**

One of the ever popular sentimental ballads, in which a tale of love is set to enticing musical strains. Its composer will be remembered as the writer of "Sweet Marie." The chorus:

When sweet Marie was sweet sixteen,
In fairyland of emotional years.

And I was king and she my queen,
When sweet Marie was sweet sixteen.

Although Mr. Rose has been singing for the Edison public but a short time, he has acquired a wide popularity and his ballads are regarded by many as equal to any ever put out by this company. Orchestra accompaniment. Music, Ernest R. Ball; words, Raymon Moore; publishers, M. Witmark & Son, New York.

9827 My Mother's Prayer — **Edison Mixed Quartette**

A sacred selection with solo by James F. Harrison, accompanied by the organ and chorus by the quartette of mixed voices. It is a Record fully up to the high standard of the department of sacred music in our catalogue. The hymn is a well-known favorite. The rendition is fine. Music, W. S. Weeden; words, J. W. Van de Venter; published in hymn books.

9828 Just One Word of Consolation — **Irving Gillette**

Mr. Gillette has not, in some time, sung for us a more attractive ballad than this. The song is well known and its range fits Mr. Gillette's voice to a nicety. The refrain:

Just one word of consolation,
Even in silent sympathy,
Often helps the sad to cheer,
When distress o'ershadows thee.

Even in silent meditation,
When the soul from earth would part,
Just one word of consolation
Inwardness soothes a breaking heart.

Orchestra accompaniment. Music, Tom Lemoinier; words, Frank B. Williams; publisher, Charles Harris, New York.

9829 Under Freedom's Flag March — **Edison Military Band**

A stirring march of a semi-patriotic character, rendered with precision by our Military Band. One of those march selections that win a lasting popularity. Composer, F. Nowowieski; publishers, Joseph W. Stern & Co., New York.

9830 Hannibal Hope — **Arthur Collins**

Hannibal is a moke who left his Nashville home to go with a circus show. The circus is billed for Nashville one day and the song tells how his girl Mandy Green is enthusiastically waiting for his advent. Hannibal plays the steam calliope, which according to Mandy's notion of music has the angels' golden harps played to a standstill. Introduced into the Record are the effects of Mandy and a crowd of spectators waiting for the circus parade. Mandy can hardly contain

herself. Her remarks about Hannibal get the spectators keyed up to great expectancy. Now comes the band. Then the horses are heard. The animals cry, laugh and roar. Mandy suddenly shouts "That's My Hannibal!" and the fearful music of the calliope fills the air. The effect is made all the more ludicrous by an exaggerated burlesque of the calliope. Orchestra accompaniment. Music, Lou Hirsch; words, John B. Lowitz; publishers, F. B. Haviland Publishing Co., New York.

9831 The Girl Who Threw Me Down — **Edward M. Favor and Chorus**

An already very popular ditty, sung by an artist whose experience on the comic opera stage has made him a master of the art of producing a loud and clearly enunciated Record. The song concerns the lover who couldn't stay away from "that old Long Island town," notwithstanding the "twenty-three's" and other similar things that his girl handed him. An additional feature of the Record is the quartette chorus. An "in-the-money" Record. Orchestra accompaniment. Music, Albert Gumble; words, Benj. Hapgood Burt; publishers, Jerome H. Remick & Co., New York.

9832 One! Two! Three! All Over — **Billy Murray**

A bit of fun that cannot fail to make a hit with the public. It comprises two verses with choruses appropriate to each. Verse one relates the story of the would-be pugilist who, in the first round, was struck by something hard. As he fell he heard, intermingled with the count of the referee, the singing of birds, the ringing of bells and the rustling of angels' wings. Verse two tells of the similar visions of the youth who went skyward after his cigar came in contact with a gasoline tank of his automobile. Orchestra accompaniment. Music, Safford Waters; words, Paul West; publishers, Helf & Hager Co., New York.

9833 Jigs and Reels — **Charles D'Almaine**

Another brisk violin solo of the following well-known jigs and reels: "Bannocks o' Barley Meal," "Haste to the Wedding," "Prince Charles," "Cosmopolite" and "Rory O'Moore."

9834 Hoo-oo, Aint You Coming Out To-Night? — **Byron G. Harlan**

This song will carry most men back to the days of their boyhood, when their playmates gathered at dusk in front of their homes and shrilly cried out the above title. Johnny wants to go out to play, but mother, as mothers ever did, thinks that it is too near bedtime and refuses permission. Then, to Johnny's further discomfiture, comes the cry "Hoo-oo, Aint You Coming Out To-Night?" And, indeed, are these tragedies of childhood. The "kid" call is by Miss Stella Tobin. This song will be one of the hits of the coming season. Orchestra accompaniment. Music and words, Herbert Ingraham; publisher, Shapiro, New York.

9835 Summertime — **Allen Waterous and Chorus**

The warm weather character of this song is aptly shown in the words of the chorus, as follows:

Summertime, summertime,
Sweet summertime, sunny weather,
How all the days, seem to be,
All the world in rhymes.

Summertime, summertime,
Of all the year, the dearest,
We will find, no peaches, cream and honeys,
In the summertime.

Its publishers declare with confidence that this will be one of the leading songs in the coming summer, and their past predictions have demonstrated that they know what they are talking about. Orchestra accompaniment. Music, Harry Von Tilzer; words, Jack Mahoney; publishers, Harry Von Tilzer Music Publishing Co., New York.

9836 Stuttering Dick — **Edward Meeker**

A funny song about the love-making of Dick Alexander Simpson, who stutters badly, with a damsel similarly afflicted. His efforts to propose and her struggles to accept are very ludicrous. The stammering chorus is funny. Mr. Meeker scored a great success with this song while acting as an end man at the minstrel performances of Orange Lodge of Elks, some weeks ago. Orchestra accompaniment. Words and music, Clifford J. Werner; publishers, Orange Music Store, Orange, N. J.

9837 When You Steal a Kiss or Two — **Albert Benzler**

This song was listed in April as a vocal selection, but its air was too attractive to pass without further consideration and it is here given as a bells solo. It is a good one, too. Composer, Kenneth S. Clark; publishers, M. Witmark & Sons, New York.

9838 Pass It Along to Father — **Ada Jones**

Another of the "father" songs in which poor old dad gets the worst of everything. Whatever the rest of the family don't want is passed "along to father." He has reached that stage in married life when "he takes what he gets and he's not much bother." For instance, while the rest of the family have duck at dinner he is given the wish-bone and the suggestion is offered that he can "wish for a change of luck." One of the best songs of its kind since "Everybody Works but Father." Orchestra accompaniment. Music, Harry Von Tilzer; words, Vincent Bryan; publishers, Harry Von Tilzer Music Publishing Co., New York.

9839 The Country Constable — **Edison Vaudeville Co.**

Scene, a country roadside. The constable (Mr. Porter) is discovered "detectivating." He is so disguised with false whiskers that Zeb (Mr. Harlan) does not recognise him until he takes them off. They lay in wait for speeding automobilists. The first one pays no attention to the constable's call. The second one stops, but a ten dollar bill changes the speed from ninety to eight miles an hour. A singing party comes along, asks some questions, get pert replies to stop another speeding red auto, but, with a crash and a squeeze of the siren horn, the machine goes its way, leaving Zeb to wonder what has become of his wagon. A funny number.

9840 Sidewalk Conversation — **Steve Porter**

In this Record Mr. Porter gives a clever imitation of the vaudeville artist whose partner has gone back on him and he is left to talk the parts of both Mac and Reilly. Mac has a high voice and Reilly a low one. They indulge in one of those exchanges of pleasantries at each other's expense so familiar on the vaudeville stage, and which much be followed every second to catch all the funny things said. The Record closes with singing by Edward Meeker. As good as anything Mr. Porter has made.

9841 A Wee Bit o' Scotch — **Edison Military Band**

Distinctively Scotch is this band selection, for woven into the melody are strains of "Annie Laurie," "Coming Through the Rye," "Charlie is My Darling," "The Campbells are Coming" and "Blue Bells of Scotland." The composition as a whole is striking and our Record does it full justice. Composer, J. Fred Helf; publishers, Helf & Hager Co. New York.

2 Selections Made Over

In accordance with the notice already sent to Jobbers, we list below two selections that have been made over by the same talent. The May printed matter prepared for retail use will contain these selections. Jobbers should replace their stock of the original Records of these numbers with the new ones.

8765 Alexander — **Billy Murray**

8379 Pretty Peggy (Bells) — Made Over by Same Artist — **Albert Benzler**

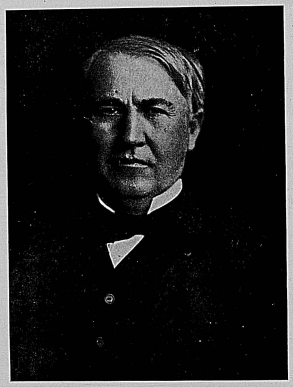
Made Over by Same Artist

Remove Packing Under Spring Barrel

Following is a copy of a notice sent to all Jobbers under date of February 3d:

TO ALL JOBBERS.

Please instruct your clerks, your salesmen and your Edison Dealers to always remove the piece of corrugated paper from underneath the spring-barrel of each Edison Phonograph, but the Gem, when unpacking it for use. Unless this is done the machine will not operate properly.



We are once more calling your attention to this matter because we find that frequently this packing is not removed as directed by the rug on each machine, which causes complaints that machines do not play the proper number of records.

NATIONAL PHONOGRAPH CO.

This notice should also have the attention of Dealers. In packing all Edison machines but the Gem we find it necessary to put a piece of corrugated paper in the bottom of the cabinet to support the main barrel and prevent the jars of travel from breaking the bolts which hold the mechanism in the cabinet. If this paper packing is not removed, as directed on the tag fastened to each machine, the spring barrel will not turn freely and the Phonograph will not operate properly. An investigation of a number of complaints that machines were not working right, resulted in finding that the paper packing had not been taken out and we believe that many similar cases still exist, without owners knowing the cause. Dealers who get complaints from customers that their machines are not working smoothly should ask if this packing has been removed and they should make it a duty to see that it is removed from every machine now in stock or hereafter received.

Lauder Records

The total of the advance orders for Lauder Records so far exceeded our expectations that we have been considerably delayed in making shipments to Jobbers. Dealers who do not get their orders filled as early as they expected will understand that Jobbers were not to blame. The advance orders, although unusually heavy, do not in our opinion represent the ultimate success of these Records. We are certain the later orders will be much greater as soon as the public have heard them. They are clever Records and deserve their success.

Thomas A. Edison

Dinner to Mr. Edison

Thomas A. Edison passed his sixty-first birthday on Tuesday, February 11, and in the evening of that day he was the guest of honor at an informal dinner given in celebration of the event at the Krueger Auditorium, Newark, N. J. His hosts were various officials and department heads of the National Phonograph Co., Edison Phonograph Works, Edison Manufacturing Co., Bates Manufacturing Co., Edison Portland Cement Co., and the Edison Storage Battery Co., men whom are brought in contact with him more or less frequently in their daily tasks. They were: R. A. Backman, W. G. Bee, F. A. Burnham, Jr., W. H. A. Cronkhite, D. A. Dadd, F. K. Dolbeer, N. C. Durand, W. E. Gilmore, J. E. Helm, A. M. Hird, A. C. Ireton, W. S. Mallory, L. C. McChesney, H. F. Miller, John V. Miller, W. H. Miller, J. H. Moran, A. T. Moore, H. I. Moyer, C. S. Osborne, Fred Ott, William Pelzer, E. H. Phillips, Edward S. Porter, O. A. Rogers, Walter Stevens, A. P. Waterman, Peter Weber, Alphonse Westee, C. H. Wilson, Albert Wurth and Charles Wurth. Messrs. Weber, Moore and Durand had charge of the arrangements. The dinner was of the most informal character and the entertainment that followed was marked by the same lack of formality. A number of songs were rendered by Harry Anthony and Edward Meeker. Two of the latter's selections were parodies on "Harrigan" and "I'm Afraid to Come Home in the Dark," in which Mr. Edison was made the subject of some comments that greatly amused all present because of their familiarity with them. No speeches were made. A number of late motion pictures were shown. Among them was a specially posed reproduction, in colors, of the "Old Couple" picture so familiar to the trade. The "old couple" were shown bringing in a Phonograph and setting it on a table. After a bit of by-play by the man and a display of eager expectancy by the woman, the machine was set in operation and the couple dropped into the pose shown in the regular picture. The reproduction made a great hit. The half-tone of Mr. Edison shown on the opposite page is made from one of his most recent photographs.

Edison Record Talent

This may be of interest to people who like to have the pictures of the Edison artists while the machine is playing. I have cut the photos out of all the *Phonograms* I had, and have pasted them on a board, and they are always handy to see the singers.—*Adolph Blumenthal, Standish, Mich.*

New Freight Rate on Horns

H. T. Leeming, Traffic Manager of the National Phonograph Co., appeared before the Western Classification Committee at the Homestead Hotel, Hot Springs, Va., on January 15th in behalf of our petition for a reduction on the classification of talking machine horns. He was the only representative present interested in this proposition. Our petition was favorably acted upon, and, effective about April 1st, the following change in the classification will be made:

Tin or sheet iron amplifying horns, first class nested; and one and one-half times first class, not nested. In car loads a third class rate will be charged, minimum weight of 16,000 pounds The classification on brass and nickel plated horns will remain the same as heretofore.

The advantage of the above change to the trade is that Jobbers and Dealers in making shipments to Dealers or customers will have to pay one and one-half time first class rate on shipments of a single horn as against double first class heretofore; and first class on shipments of two or more nested horns as against one and one-half times first class charged formerly.

It will be especially beneficial to Jobbers located west of the Mississippi River, as it will now enable them to compete favorably with Jobbers located east of the Mississippi.

Australia Reduces Duty on Phonographs

Australia has abolished the duty on Phonographs and Records. For several years, and until August 9, 1907, this duty was twenty per cent ad valorem. On and after that date this duty was increased to thirty-five per cent. This increase in duty brought forth a storm of protest from the users, dealers and jobbers, and also from the press, and efforts were immediately made to have the duty restored to the old rate, which resulted in a petition being presented to Parliament, praying for a reduction of the duty. The matter came up for discussion on Friday, December 6th, and on that date the duty on Phonographs and Records and accessories was entirely removed, these articles being put on the free list. This news proved very acceptable to all concerned, and, notwithstanding the fact that there was an enormous sale of Edison Phonographs in Australia, the removal of the duty (which naturally means a substantial reduction in the price of Phonographs and Records) will still further increase the sale of our goods in that territory.

The New York Case

The latest development in the litigation which for the past seven years has been pending against this Company, involving its right to do business in the State of New York, comes in the form of an opinion by Judge Hazel, of the United States Circuit Court. The immediate action in question was a motion to punish the Company for contempt of an injunction granted in March, 1906. At the time of the injunction we were advised by counsel that there were two patents involved in our products to which the New York Phonograph Company had territorial rights, giving to their contracts the interpretation placed upon them by the court, and which we, of course, accepted without question. The features of those two patents were therefore eliminated—and we warrant the assertion that but few of our friends ever noticed their disappearance—and on the advice of our attorneys we continued our business as before.

Last fall, more than a year after the injunction was granted, the New York Phonograph Company brought on their motion for contempt, and argued, as they had often done before, that they were the owners of exclusive agency contracts in Edison Phonographs and supplies for the State of New York, running probably in perpetuity, but at any rate for many years to come; and that no one could sell or use an Edison Phonograph or Record in that State without paying tribute to them. Our attorneys, on the other hand, argued that whatever rights the New York Company had were based absolutely on certain Edison patents, taken out in the early days of the North American Phonograph Company, and that since those patents had expired the rights under them had lapsed.

Judge Hazel holds that as to a few patents on the Phonograph, which have expired in this country by reason of the fact that corresponding earlier foreign patents have expired, the rights of the New York Company still exist; or in other words, that while such patents are public property as to everyone besides ourselves, we cannot use them.

The effect of the decision is to require us to omit a number of minor features, which we are now taking care of. The elimination of these features will not in any way affect the high character of our machines, but on the contrary will actually improve them, as we are now in position to make certain changes in design which we have had in contemplation for a long time. When the new models are examined, it will be found that our views on this point are fully confirmed.

On the whole, considering the persistent and untiring efforts of our adversaries to do us harm, and the proverbial uncertainty of litigation, we feel that the present situation is one for sincere congratulation, as it would seem to effectively put a quietus on the avowed determination of the New York Phonograph Company to control the business in the State of New York.

Pushing the Game

The March advertising for Edison Phonographs shows that we are not abating one jot in our determination to create business for Edison Jobbers and Dealers. On the last page of this issue we reproduce an advertisement that appeared, or will appear in a score of the magazines of greatest circulation in the United States. We also have a back cover in colors in the Saturday Evening Post for February 22, and a full page in colors in Colliers for February 29. The large advertisements in the newspaper series appeared in 145 leading newspapers on February 7 or 8 and February 24 or 25. Similar advertisements will appear in the same papers on March 12 or 13 and 28 or 29. If the trade would continue their local advertising and not let up in their other selling efforts, to the same extent as we are pushing the game, there would be the same increased demand for Edison goods as ever before. Go at the proposition, Mr. Dealer, just as if it was new, and put into it the same energy and thought that you did when you put in the line. More people know about and are interested in Edison Phonographs than ever before and many in your territory need only a little urging to buy. Try it and you will be surprised to find how much more business you can get out of your locality than you ever before thought possible.

Mexican Records

Some regret has been expressed because we cut out of our Foreign Record Catalogue certain Mexican selections that had become quite popular. This referred more especially to some of the band and orchestra Records. While most of the Mexican list was cut out of our regular catalogue, we can still furnish any of them to such Jobbers and Dealers as may have a demand for them. They are all being sold by our Foreign department and we can as readily fill domestic orders as before. We have no printed matter referring to them that we can supply in quantities, but will be glad to mail a complete list to any Dealer on request.

John F. Randolph

It is with the deepest regret that we announce the death, at his home in West Orange, N. J., on February 17, of John F. Randolph, Treasurer of the National Phonograph Co., and private secretary to Thomas A. Edison. His death was caused by a wound from a shot-gun, self-inflicted while temporarily insane. The sad affair shocked and grieved his employers and his business associates.

Mr. Randolph was born at Metuchen, New Jersey, October 22, 1865. His boyhood was spent at his native place, where he received the limited education afforded by the public schools. At the age of sixteen he entered the employ of Thomas A. Edison as an office boy. Mr. Edison then had his laboratory at Menlo Park, but a few miles from Mr. Randolph's birthplace. He continued in the service of Mr. Edison till the day of his death. He rose from one position to another, till he became the personal representative of Mr. Edison in most of his great enterprises. At his death his relations with Mr. Edison were the closest and of the most confidential character. No other man enjoyed Mr. Edison's confidence to the same extent, and the trust reposed in him was never broken in the slightest degree. He was at all times faithful and watchful of his chief's interests. The death of no other man in his service could have caused Mr. Edison as much grief as did that of Mr. Randolph. No other man was more highly esteemed.

Mr. Randolph was the private secretary of both Mr. and Mrs. Edison, even their household expenses being paid by him. He was Treasurer of the National Phonograph Company, Edison Phonograph Works, Edison Manufacturing Company, Bates Manufacturing Company, Edison Portland Cement Company, Edison Storage Battery Company and of several other lesser companies. He personally signed every check drawn by all of these companies and he performed an amount of work that would have been impossible for one who had not grown up with the several companies.

Mr. Randolph had witnessed the evolution of nearly all of Mr. Edison's most important inventions, including the Phonograph, dynamo, electric light, telephone, kinetoscope, storage battery, improvements to telegraphy, and many others not so prominent or not so successful commercially.

In 1887, when Mr. Edison built his present laboratory at West Orange and moved from Menlo Park to Llewellyn Park, Mr. Randolph followed him and lived there till his death. On June 29, 1893, he married Miss Anna E. Pierson, who survives him with two daughters, aged twelve years and ten years.

Mr. Randolph was unassuming and retiring to a fault. He could not be induced to join his fellow officers and employees in the various functions that occur in all large corporations. He was a member of practically no societies or organizations. He seemed to have no other ambition than to perform the duties devolving upon him by day, and be with his family by night. The respect in which he was held by all with whom he came in contact was no less complete than the high regard for him felt by Mr. Edison.

The funeral of Mr. Randolph was held at his late home, Valley Way, West Orange, February 19. It was attended by Mr. and Mrs. Edison and a large number of his former associates and employees of the companies with which he was connected. The pall bearers were R. A. Bachman, W. G. Bee, H. P. Miller, J. H. Moran, Fred Ott, Peter Weber, Alphonse Wester and C. H. Wilson, all business associates of the deceased. The services were conducted by the Rev. Robert S. Steen, pastor of the Hillside Presbyterian Church, Orange. The singing was by the Edison Male Quartette.

The interment was in Rosedale Cemetery, Orange. The entire Edison plant and also the Edison Laboratory were shut down at noon and kept closed the remainder of the day.

Most Old Dealers Have Re-signed

On February 1 we removed from our files and mailing lists the names of those Dealers who did not sign the new Agreement dated October 1, 1907. This operation showed that 80 per cent of our old Dealers had re-signed, a fact that speaks volumes for the stability of the Edison trade. This percentage was larger than had re-signed any previous Agreement. It is plain that as the years pass, there are fewer people taking on Edison goods in an experimental manner, and more of them making a success of it and continuing in the business. We believe that many have not re-signed because of negligence or oversight, and that when the work is finally checked up the unsigned number will not exceed 10 per cent. A special letter was sent to each unsigned Dealer on February 8, and a large number of replies have already been received. Another healthy sign about business is the fact that just so many new firms are becoming Edison Dealers as ever before. There seems to be no lack of confidence in Edison Phonographs and Records as a profitable business proposition.

Foreign Records

Our repeated references to foreign Records may weary some Dealers, but we would not talk or write about them so much if we did not believe that many Dealers fail to appreciate the money-making opportunity afforded by an intelligent handling of some of these Records. The foreign born population of this country is large. The average foreigner has a greater appreciation of music than Americans, and he is more delighted when he can hear it in his own language. With the possible exception of some parts of New England and the South, every Dealer is located in the center of some foreign born people. They may be German, French, Italian, Hungarian, Swedish, Danish, etc, but whatever language they speak, Dealers should find out what it is, put in a stock of the best Records in their tongues and then get some of them to call and hear them played. The sale of a machine or two in an Italian settlement, for instance, would soon be followed by others, and in a short time a substantial trade in Italian Records would be created. Jobbers who do not carry foreign selections would do so if there was a demand from Dealers, and they would help the latter to a selection of the best sellers. Many Dealers are now doing a nice business in foreign selections and many more would do equally well if they gave the subject the proper attention.

No Flower Horn Contemplated

The use of a flower horn in eerrain of our February advertisements and on a colored hanger of the same subject sent to the trade at the same time, has caused some Dealers to ask if it was our intention to get out a horn of this kind as an alternative to the present black horns. Nothing of the kind is contemplated. The horn shown in the illustration was used with no other thought than to work in some colors that would accord with the other colors in the sketch. We now appreciate that it would have been better not to have used the sketch in this form. In fact, in some later uses of the same sketch the horn was changed to accord with the present equipment.

Made-Over Records

Two more made-over Records are listed on page 5 of this issue. They are fully equal to any in the regular May list and Dealers can well afford to put in a stock and call the attention of their customers to them.

Edison Idelia Phonograph

A reproduction of the new Edison Idelia Phonograph, printed in four colors, was mailed to the entire trade on February 15. The print clearly brings out all the colors of the cabinet, the oxidized finish of the machine and the mahogany finish of the horn. Dealers are asked to put it up in their stores and call the attention of their patrons to the merits of the machine. In every community, however small, there are people who will buy a high-grade Phonograph when they would not consider one of ordinary cost. The Idelia is fully described in current catalogues.

Printed Matter

In printing the new order sheets with numbers of the foreign selections (from 12000 up) blank spaces were left at the end of each series of numbers for such numbers as might be listed later, the idea being that the trade would fill them in by hand when using the sheets for ordering. Since but few of the sheets are being used in this way, it would look as if the matter was not so understood. We prefer that Jobbers, any way, will use these sheets in ordering Records from us, and wish that they would fill in by hand such numbers as are not printed on the sheets.

A new edition of the new Foreign Record Catalogue, Form 1290, has just been issued. It contains all foreign selections listed for sale in the United States to and including March, 1908, except the Mexican and Cuban Records which we advised the trade some time ago would be eliminated from our catalogues, but carried in stock for such Jobbers as could find a demand for them. With the exception of a new cover and the omission of a few cut-out Records, this catalogue is practically the same as Form 1250, dated January, 1908.

The attention of the trade is directed to an error which appears in the new Alphabetical and Numerical Catalogue, Form 1240, on page 61. The German selection "Gruss an die Heimat," by Rost'sches Solo-Quartet, is listed under No. 15070. Its correct number is 15079. Dealers and Jobbers are asked to make note of this correction in the catalogues in their possession.

We are Edison Phonograph enthusiasts and handle them only. We believe in their superiority over any other machine on the market to-day. It is not difficult to make sales in competition with other machines, and let us say here that we are indebted to the National Phonographs Co. for their systematic advertising, which does so much for the dealer.—*Jones, Lloyd & Co., Richfield, Utah, per J. Lloyd.*

To the Trade. Change in Equipment

As soon after February 1st as circumstances will permit, we shall discontinue furnishing a chip brush as part of the regular Phonograph equipment and will substitute for it an oil can and a sample bottle of "3 in One" Oil.

This change will be effective when our present stock of each type of Phonograph is exhausted and the time may vary with each different type. No effort will be made to have shipments uniform in this respect—part may be equipped each way. Nor will any attempt be made to change the equipments of machines now in the hands of the trade.

NATIONAL PHONOGRAPH COMPANY.

The principal reason for the above change is to bring about the use of a standard brand of oil for use on Edison Phonographs—a brand that can be had everywhere. We have found that the use of various kinds of oil, without proper regard for quality, has caused many machines to gum up and work badly. Many Phonograph owners have gone on the plan that anything would do so long as it was oil. Any oil will not do. On the contrary, there are few kinds that are suitable. "3 in One" Oil is not the only good kind, but its present universal distribution makes it the best for our purpose. The sample we shall send out will be accompanied by a circular giving cost and stating that it can be had from all dealers. Heretofore if a dealer did not carry our regular Phonograph oil, his customer used any kind that came handy. "3 in One" Oil is especially well adapted to Phonograph work and we believe that its general use by the trade will be beneficial to all. It is sold in two sizes, retailing at ten cents and twenty-five cents a bottle. Its price to the trade will be: 10c. size (sold only in two dozen packages) per dozen, 80 cents; per gross, $9.00; 25c. size (sold only in one dozen packages) per dozen, $1.50; per gross, $17.50. It will probably be carried by all Jobbers.

Miss Jones is in Good Health

A report has apparently gained considerable circulation in the Middle West to the effect that Miss Ada Jones died recently. There is absolutely no foundation for the report. Miss Jones is in good health and is making Records for us each month. We have received a large number of letters from the admirers of her Records, asking for news on the subject and expressing the deepest regret should the report be true. The esteem in which Miss Jones is held cannot fail to please her, however much she may not relish the report about her health. Dealers are asked to deny the report when repeated in their hearing.

Mailing Supplements and Phonograms

As stated in the heading over the Advance List on page 2, Dealers are now permitted to deposit Supplements and *Phonograms* in mail boxes or local postoffices *after 5 P. M.* on the day preceding the selling date, for delivery on the selling day. This change was made at the request of Dealers who wanted to put mail matter into the hands of their patrons early on the morning of the selling date, something difficult to do under the old plan.

Personal

Mr. and Mrs. Thomas A. Edison and son Theodore, with Fred Ott, one of Mr. Edison's oldest employes, left on February 25 to spend two months at Mr. Edison's plantation at Fort Myers, Florida.

Edward L. Aiken, Assistant Superintendent of the factory of the National Phonograph Co., and Thomas J. Tighe, foreman of the moulding plant, sailed on the Lusitania on February 8 for London, where they will spend several weeks at the Record moulding plant connected with our London branch. They will introduce some new features of this department that have been successful at Orange.

F. K. Dolbeer, General Manager of Sales of the National Phonograph Co., and Mrs. Dolbeer will sail on March 7 to spend three weeks on the Bermuda Islands.

Record No. 12470, Cut-Out

The trade is advised that we have no more moulds or masters of No. 12470 "Sulla tomba che rinserra" (*Italian*), Mielino. As soon as our present stock of this selection is exhausted, we will place it on our cut-out list.

Edison Phonograph Monthly

VOL. VI. March, 1908 No. 3

Stick to Standard Goods

When is it advisable for a Dealer already carrying the standard lines of talking machines and records, to take up a new make of either? This is a question that Edison Dealers should give most careful consideration. The writer visited the store of one of our Western Dealers some weeks ago and was shown about the place. In addition to a complete stock of Edison goods and a line of standard disc goods, the Dealer had in stock a few machines and a few records of about every make that had been put on the market in the past ten years. Some of them were so old that their names are almost forgotten. Other had names that many people remember only too well and wish they never had known. They represented the greatest lot of talking machine junk imaginable. They represented a considerable money investment that never can be regained. And yet each brand in its turn had back of it claims that were designed to put the older companies out of business. They had been put on the market by companies with "ample" capital; they had been widely advertised; they had been pushed by a selling force and many dealers had been induced to put them in stock. Then the "ample" capital had run out, the advertising was cut down or discontinued, the salesmen were recalled and the trade "stuck" with the stocks on hand. In other cases, they were put out of business because they were infringing patents, but the result to the dealer was just the same. Hundreds of Edison Dealers will appreciate the truthfulness of these statements.

As a company, we do nothing to prevent our Dealers from selling as many different makes of talking machines and records as they may desire. We do not fear the competition of these companies of brief life. They deprive us of a small amount of business for the time being, but we become stronger than ever after they have gone their way. Our loss is nothing compared to the loss to Dealers who have put in their goods and cannot get rid of them. The subject is one, therefore, that we can discuss in good taste. The long established talking machine companies are spending enormous sums of money to create a demand for their goods and to uphold the trade. They do this not for a day, but year after year, the sums increasing with the years. They make their goods as stable as possible. Dealers who put them in stock know in advance that there will be a constantly increasing demand for them. The effort of these companies enable Dealers to build up a profitable business, without which the manufacturers of new machines would find no one to sell to. In fact, the latter trade upon the credulity of the Dealer in this respect. They count upon the efforts of the older companies bringing customers to Dealers' stores and hope to induce the latter to substitute their goods for those advertised. Fortunately for the established companies, even the arguments of Dealers do not in many cases swerve a prospective customer from getting the machine he wants.

The moral of all this is that every Dealer should carry the goods that are widely and steadily advertised, and back up the companies manufacturing them by refusing to consider other lines, no matter how alluring they may be offered. There will be no junk stock if this is done.

There was once an old merchant in Wales
Who complained of the slowness in sales.
Said a neighbor: "Be wise,
And your stock advertise."
Then his orders congested the mails.
—*Fame.*

Mr. Randolph's Successors

The positions in the various Edison companies left vacant by the death of John F. Randolph have been filled as follows: Alphonse Westee has been made Treasurer of the Edison Phonograph Works, National Phonograph Co., Edison Manufacturing Co. and the Bates Manufacturing Co. and some of the smaller companies, in addition to his former duties as Secretary of the same companies; Harry F. Miller has been appointed private secretary to Mr. Edison and Assistant Treasurer of the above companies.

Mr. Westee has been identified with the Edison interests from boyhood. For the past ten years he has successively filled many important positions in the various companies. Mr. Miller entered the employ of Mr. Edison when he built the laboratory at Orange in 1888, and in point of service is now one of the oldest in Mr. Edison's employ. For several years past he has been cashier of the Edison Phonograph Works, National Phonograph Co., Edison Manufacturing Co. and the Bates Manufacturing Co. The exigencies of business made it necessary for both Mr. Westee and Mr. Miller to enter upon their duties the day following Mr. Randolph's death. Walter Eckert, formerly Assistant Auditor, has been appointed Cashier vice Mr. Miller.

Thomas Alva Edison

Thomas Alva Edison was sixty-one years old yesterday. But if we were to measure his life by what he has accomplished, we would find him with two or three centuries to his credit. Take out of the world the things Edison has given to it and you take away things that have come to be necessities. There are, for instance, the numerous improvements in the telegraph apparatus, such as the quadruplex and sextuplex devices; the phonograph, based on a principle upon which all talking machines are constructed; the incandescent lighting system, the kinetoscope and even the simple megaphone. The world owes a vast debt to this wonderful man. He has had more patents issued to him than any other man, living or dead. He has now taken out nearly a thousand patents. He has done more than any other American for the advancement, comfort, ease and amusement of the human race.—*Utica (N. Y.) Observer, February 12, 1908.*

The Edison Phonograph has demonstrated to dealers that it pays, because it has demonstrated to users that it pleases. There is no limit to the business you can do with Edison Phonographs, because it is the most perfect talking machine, has the most accurate and distinct Records, and is the machine that comes nearest to expressing Edison's idea of what a Phonograph should be.

A New South Wales Opinion

P. W. Blake, an Edison Dealer at Albury, New South Wales, recently issued a circular to the prospective patrons in his vicinity, expressing his views about the Edison Phonograph in the following terms:

All who are acquainted with Edison's Phonograph, and the present day Gold Moulded Records, are of one opinion, that they are without doubt the best means for home entertainment procurable and the price is now so reasonable that they are within reach of all classes of the community.

The established prices of the machines are as follows * * *

There are a number of other Talking Machines on the market, such as the * * * I am familiar with most of them and have handled them in business and they have all, with the exception of the true Edison Phonograph proven to some degree unsatisfactory. The Edison Phonograph, which I have in my home, is one that delights my family and friends and I have always pleasure in introducing it to my visitors. It is an endless source of delight and merriment, reproducing perfectly the singing of the best artists of the world, the recitations of the best reciters, the concerted music of the best bands, the laughable jokes and funny stories that fertile brains the world over can produce. All this and more right at our own fireside.

Since I hold the responsibility of a home I can think of no purchase that has given me more genuine satisfaction and so much pleasure as my Phonograph.

The earlier results on the Phonograph had the effect of prejudicing me against them, and I know of many who feel the same way, to those and to all others I extend a cordial invitation to favour me with a visit at my Phonograph Department, attached to my business at the Book Bazaar and give me the pleasure of contributing to your enjoyment and proving the bona fides of all I say. You are always welcome, the department is removed from the bustle of the Bazaar and you will not feel in the way, nor in any way interfere with the general conduct of business.

The Difference

I had been in the Talking Machine business some fourteen years and am an Edison man from A to Z, and have always earned my daily bread, not by the sweat of my brow, but by the Edison Phonograph. I had an experience some few days ago, which struck me as being the limit.

A gentleman came into our place of business, not to buy a talking machine, neither does he own one, but to make inquiries about a man who used to work in the store. While talking to the proprietor, one of the clerks put on a disc Record, "Traumerei," a 'cello solo, afterwards putting on the same piece by the same man on the Edison' Phonograph. As soon as the Edison had finished, he told the clerk, "For God's sake never bring out the disc machine and try to sell it again."—*Letter from a Western Jobbing firm.*

Harry Lauder

When Harry Lauder, the famous singer of Scotch songs, first appeared in New York the *New York Journal* spoke of his singing and comicalities as follows:

Harry Lauder, the Scotch comedian who is advancing vaudeville at the New York Theatre, threatens to become as popular as the Scotch highball. He is the longest and at the same time one of the shortest headliners that we have helped across in many a tide. He is as long as an hour about his high-satarled job, and he is almost as short as the lowest waiter in Lew Field's employ. To say that he is beautiful would be to break our golden rule to tell the truth no matter whom it hurts. And so as near as we can get to a description of Mr. Lauder without being too flattering, is to say that he has Arthur Dunn's face and Francis Wilson's legs.

You may judge by this that he is not strangely beautiful. He is a comic picture in kilts. His bare legs are always turning a corner, but his shamelessly bare face keeps ever to the front, even if it has to do so by looking backward.

And now for the songs. Two riotously funny affairs, judging by Lauder's convulsive laughter, interfered with his really funny monologue when he broke into the lilt yesterday afternoon. Usually when a comedian laughs at himself, you're quite content to leave it all to him. Your shy smile fades away and hides itself under—well, whatever you happen to be wearing. But it's different with Lauder—or rather, it's different with you. Before you know it, you are laughing with him. You have taken your laugh out of cold storage and told it to spread itself through the house. You may have heard "Stop Your Tickling, Jock" before and thought it very silly, but now you know it is silly and rejoice in the discovery that you are equally silly.

Lauder's next song, "I'm the Saftest of the Family," was horribly funny, just as a half-witted lad is sometimes horribly funny. This Lauder lad was almost an imbecile. The bleareyed, twisted, mumbling boy, pulling his toy treasures from a deep pocket and telling the little story that went with each, was a job for the alienist, not for the critic. This bit was often unpleasant and its homely humor was sometimes very "strong," but it showed Lauder to be a character actor of uncommon cleverness and raised him far above the level of the ordinary comic singer. Here and there were real boyish touches, as, for instance, the reply of the lad when the angry old man whose "windy" he had broken caught him by the collar and asked why he was running away: "Wasn't I runnin' home for money to pay for it?"

"My Scotch Bluebell," as Lauder sang and danced it with a pretty, light-haired girl, was pure, light-hearted gayety. He pranced about with joy and pride in his fair possession, and the audience danced with him to the pretty music of the song.

Lauder then tried to get away, but after arguing the matter with the balcony and gallery, he finally rigged up in sailor clothes and "obliged" with "We Parted on the Shore." Here again his talk was better than the song. The song was really a running sea of conversation. "I've seen the sea so bad," he remarked, "that the captain couldn't stand on the bridge." And then lighting his pipe he added: "Ah! I've seen the captain so bad he couldn't stand on his feet."

Our list of Lauder Records includes all of these songs, and they are as funny as they are described.

Gives Music With His Stamps

(*From the Chicago Daily News.*)

Some of the most even-tempered postal patrons in Chicago belong to Wilmamac station of the Chicago postoffice. Bowmanville is the other name of the place.

The reason that the people of this station in the far northwestern section of the city are so good natured is that they have been soothed and charmed by the music that goes with every two-cent stamp and postal card that is sold in the place. A man buys a money order to the tune of some patriotic air, and is impelled to keep time with his feet while he is registering a letter.

Milton M. Potter is the genius and the superintendent of Winnamac. Inside the carriers' railing of the station is a Phonograph. Attached to the instrument's horn in which one could hide a bag of mail. Near by is a specially contrived rack that holds 200 Records. There is a medley in that rack that eclipses anything that ever came from a brass band or a full orchestra. From the newest productions in ragtime to the dearest old songs of the long ago, they are all stacked up in the case and any one of them may be found in the dark. From behind the wicket of the money-order department the superintendent scans a face as the owner fills out an application. From a nice discriminating sense that has been developed in the office, Uncle Sam's servant knows exactly what kind of music will best please the patron. While the writer is still scratching away on the bit of blank on the desk, the superintendent sticks his first two fingers in a record and extracts it from the rack. The next instant it is on the Phonograph, and about the time that the patron is separating himself from his money for the little blue strip that the postmaster makes out, he is hearing his favorite song or instrumental selection.

Postoffice inspectors have made scores of reports to the effect that Winnemac is one of the best-managed stations in Chicago.

The foregoing clipping from the Chicago *Daily News* was sent us by Mr. Potter with the following comment:

It attracted a good deal of attention and for several days and weeks after, I had compliments and congratulations showered upon me in profusion. Friends I had not seen for years, read it and called to see me and to hear the wonderful music and see the wonderful instrument that could produce it.

The following day after its appearance, a large delegation of representative citizens called to congratulate me and asked me to "make good." I did it to their entire satisfaction and after I had played a score or more favorite airs voted, unanimously, to endorse all the writer had said. The Phonograph I have is an Edison Home.

Easier to Keep Than to Break

Under date of January 15, F. K. Dolbeer, General Manager of Sales, sent a letter to all Dealers in Cleveland, Ohio, reading as follows:

We have been advised that some of our Dealers in your city are still selling Edison Phonographs with the old equipment, notwithstanding the fact that you have been notified that such action upon your part would be considered a violation of our Terms and Conditions of Sale as outlined in our Contract, copy of which you have signed.

We cannot believe that you would place yourself in a position to be suspended for a violation of this nature, and we would respectfully request, if you have been disposing of Edison Phonographs with anything other than the equipment supplied by our factory, that you discontinue this practice at once, or we will take such action as the case may warrant.

Hoping to have your assurance that you understand this matter very fully, we remain,

The replies as a whole were satisfactory, but two of them were especially interesting from our standpoint. They were:

I beg to assure you that I am not one of those Cleveland Dealers who have been selling Edison Phonographs with old equipment.

I bought new equipments for all Edison machines I had in stock as soon as I could procure them, and have never sold a machine without the new home equipment since the new contract went into effect.

I have been very particular to conform in every way to the strict letter of the contract in all respects.

It is my opinion that a Dealer who has no more principle than to violate any conditions of the Dealers' contract should be cut without delay.

For my part I am glad to have the protection and equity which the contract affords to every Dealer. With best wishes for "Edison" supremacy and continued prosperity, I am,

H. G. MERTON.

I have been selling the Edison line for six years and have not found it necessary to violate terms and conditions of agreement signed by me. It is easier to live up to the agreement than it is to break it.

We have not sold nor have had in stock since October 1, 1907, any horn other than Edison.

HOME GOLDEY,
Prop. Talking Machine Co.

It is as foolish to waste money in advertising a poor article as it is to lose money in not advertising a good one.

Machine Troubles

Having had a peculiar experience with a Home machine I herewith write you the way I corrected the trouble. This machine always had a peculiar tremble or tremlo tone which I looked long to find the cause of. It was in the governor disc, which had become untrue in the flat, and each revolution the felt pads on the friction device would cause a momentary stop or rather retarding which gave the tremlo effect. To correct this I removed the disc and sleeve and put in a jeweler's universal or bezel chuck and turned a new face with a slide rest and tool, after which I stoned the face with a slate pencil to make it smooth. When replaced and in use the tone of the machine is as perfect as it could be. I had looked the reproducer over many times for some defect, which afterwards I found in the governor disc. For the benefit of others who may have some such trouble will say to use a pointed piece of wood in testing for the trueness of the face.
—*F. R. Pancoast, Hastings, Mich.*

A Monster Newspaper Advertisement

The Knoxville Typewriter & Phonograph Co, of Knoxville, Tenn., broke all advertising records, (so far as we have any knowledge) on January 22d, when they used four full pages of the Knoxville *Sentinel* at one time, the entire space being devoted to exploiting talking machines. A unique feature was the printing of about 3,000 names of those who have purchased talking machines from the firm in the past four years, these being part of a total of over 5,000.

Form for Recital Invitation

The form given below is a reproduction of an invitation used by J. S. Sweet, an Edison Dealer at Galt, Ont., Canada, in announcing his monthly Phonograph recital. The necessary details as to time, etc., are filled in the blank spaces.

Galt,.....

Dear.....

You are cordially invited to be present at our Edison Phonograph Recital to be held at

.....

on.....at 8 p. m., when you will have an opportunity of hearing the.....issue of Edison Gold Moulded Records.

Yours respectfully,
J. S. SWEET.

Present this card at door for admission.

The back of the card is printed with blank spaces so that listeners may put down the numbers or names of such Records as they want.

Dealers, This is Worth Reading

The January issue of the *Hardware Dealers Magazine* contained an article written by B. P. Stone that was of unusual interest, and all that was said in it is quite as interesting to talking machine dealers as to those selling hardware or any other merchandise in competition with mail order or catalogue houses. The article in scathing terms first tells in detail how the catalogue houses succeed in getting a big business, a large part of it coming from under the very noses of local dealers. All of the reasons for their success are known to dealers themselves and need not be repeated here, even if we could spare the space for the purpose. The article then tells in equally plain words how dealers can fight the competition. Part of this refers quite as well to talking machines as to any other line and we reprint it, with the request that all Edison Dealers read it carefully:

THE WAY TO BEAT THE GAME.

You have viewed the situation with a great deal of dissatisfaction for a long time. You have talked it over with others many a time. Perhaps it has at times alarmed you and you have wondered where the thing was going to stop. It is not going to stop at all. If you want it stopped you will have to get out and put a stop to it yourself. It is all very well to talk the thing over in your conventions, and so on. It is all very well to say that the standard goods must be kept out of the hands of these people. But all this does not hit the situation where it affects you. Do you know how much money is going out of your own town to these same concerns? I will warrant that you will be both surprised and disgusted when you find out. This money belongs at home. It belongs in your town, where every dollar of it will pay a $100 worth of debts or make a hundred dollars' worth of purchases, if it is kept in circulation. The point is how? The answer is: Educate your trade. All the talking you merchants do among yourselves is so much time wasted. It never reaches the correct place. It is not criticism but education which will do the business. Do the thing the way the C. H. does it. Get after them and keep after them. Keep up the fight. It can not be done in a day, or a week, but must be a continuous process, for as soon as you let up a little the C. H. will be after them again. In fact they will keep after them, too, just as they are doing now. Do not try to reform the whole country at once, nor to put the C. H. out of business. Let other sections of the country fight their own battles. You will have enough to do, you and your fellow-merchants, to get the people of your own locality in line. Now for a definite plan.

EDUCATE YOUR PEOPLE.

The plan is strictly educational. It will do less than no good at all to call the C. H. a pirate and a menace. Nobody cares about the menace part of it. You must educate your people until they can see that there is an actual money saving in buying at home. Then you must add all the other arguments one by one. Keep at this and you can get back your trade and keep it. This cannot be done by you alone. You must have the support and assistance of every business and professional man in your community so far as you can get them together. Remember that this is not a campaign for the good of your business alone. It is to keep the money at home and all should join. In the first place you want the assistance of the local paper or papers. Just here let us ask a question. Have you in the past and are you now giving the right sort of support to the local paper? If not this is the time to commence. Get the paper into the game and give it the right sort of support, both in the way of advertising patronage and otherwise.

DO SOME GENEROUS ADVERTISING.

What you want to do now is to present to the village, town and farming population all the arguments you can muster in favor of home trade. Use, for this purpose, advertising in the local paper, advertising by circulars and personal appeal. Form a local association or club. This will make concerted action possible and will allow of a much greater spread of your activities as all can contribute toward the cost. Put a standing advertisement in the paper, bearing on this subject, and let it be issued in the name of the club. In addition to this let each one interested insert individual advertisements, but let all of them send on the same points. Let this be helped out by editorial comment, not once in a while, but in every issue of the paper. The publisher of your local paper will fall in with your plans readily enough, for he depends for success on the general prosperity of the community just as much as you do, and it is a pretty safe bet that he realizes that fact fully as well as you do and possibly a little better. There will be no difficulty about him you may be assured. Every man who owns a foot of real estate in your town should be with you, and will be if the case is properly put. The value of his holding depends on the prosperity of the town. Let one store or factory move out of town and it lessens the value of that holding appreciably. If the business of the community is not going to stay at home, some one will move out. If enough business goes abroad, all of you will move out. Where will the values of the real estate go then?

The same is true of the professional men. A town which is no good for business is no good for them. The same is the case with the clerk and the laborer. And if prices and service are equal the farmer would rather trade at home than go abroad, so it is simply a case of showing him that prices and service are a little better at home than abroad.

EXTEND YOUR DELIVERY SERVICE.

There is another point. It it easy for the farmer on a rural mail route to write a check and send away for what he wants. Make it just as easy for him to get the same stuff from you. Extend your delivery service. Anything which the C. H. can send by mail, you can send by mail just as well. Lay stress on that. Make it easy to buy from you and the trade will come your way. The comments of the local paper on the situation will have weight with all who read the paper. See that every one does read it. If there is a family in the district which is not a reader of one of the local papers, see to it that frequent sample copies are sent. An arrangement to this effect can easily be made. This gets your arguments into the hands of the people you want to reach. Follow this up with other matter, both that issued by the association and that issued by yourself. You will see by this time that advertising is the only way to do the thing you want done and so you must become an advertiser.

Now about the advertising. Don't have it written and prepared by the office boy or the porter. Get some one to do the job who makes a business of it. Remember that you are competing with those who understand the advertising game thoroughly, and get the best there is to be had. See what the catalogue house has done with their advertising and do not be afraid to follow suit. The other fellow offers bait and there is no reason why you should not do the same. An occasional big bargain will do the cause no harm and will bring in trade. Use all legitimate methods of getting your customers into town and into your store. And when you get them there do not waste time in reproaches or statements that there is a wrong done when goods are bought outside, but be diplomatic and simply show them that the goods are cheaper and better at home than abroad.

Is it clear fight or lie down. Which shall it be in your town? If the trade is worth having it is worth going after. Go after it if you want it. You are not called upon to fight the battle of the trade at large. All you are interested in is the trade which is legitimately yours. You can get it all if you will pull together with the other retailers and get all those vitally interested to help. It is up to you. Don't whine, but hustle.

An Edison Phonograph Now a Complete Instrument

Heretofore the sale of a Phonograph and the sale of horns have been two distinct transactions. This was because no Phonograph had a satisfactory horn. Now the Edison Phonograph has its own horn and swinging support. The horn is large, handsomely shaped and exactly adjusted to the instrument's needs. It sets the Phonograph off, attracts interest, and best of all, it pleases purchasers every time. The horn business has always been a drawback to the trade. It led to price-cutting which affected profits, necessitated carrying a large stock of horns and complicated selling methods generally. Now the customer gets the best and most suitable horn to be had, as a part of the Phonograph, pays the price for both in one transaction, and the Dealer makes a good profit on both.

What Dealers Say and Do

I have been doing a successful piano business for about eight years, always having instruments in stock. Recently I added your Phonographs and have not at *any time* been without Triumph, Home and Standard machines, Edison Records and record cabinets in stock; have demonstrated your Phonographs in public, in families and given many entertainments at my home, disposed of several thousand cards and catalogues, and feel that I did a fair amount of business during the brief season. I have given this business considerable thought and have planned to increase my sales for the next season. I am personally acquainted with men who started your goods in this small way and are now extensive Dealers.—*W. C. Doyle, Pittsburg, Pa.*

Last August, six months ago, I stocked the minimum quantity of Edison Records and Phonographs. Immediately I received a good patronage, notwithstanding that there was an old established Phonograph store in a better location than mine. Gradually my business has increased, (not even affected by another new store being opened in the same business) until I was compelled to move into a better location and nicer and larger store. This is due to the success of Edison goods which are always popular here. Will open my new Phonograph store February 12. Wishing you success in the continued sale of Edison goods. —*Louis E. Murray, Ogdensburg, N. Y.*

Charles W. Card, an Edison Dealer of Port Ewen, N. Y., sends an odd form of advertising. It is a tin cup with his advertisement of Edison goods on the inside. The idea is that the drinker from it cannot fail to read it. The advertisement is glazed over so that water does not effect it. Mr. Card places them at school houses, springs and wells along the highways, in railroad stations and other places where they will benefit him.

C. H. Breen & Co., Edison Dealers at Millheim, Pa., sent us a series of six post cards, each showing a pair of interesting youngsters in a different photographic pose in connection with an Edison Phonograph. The series is called "Our Three Friends."

The following is extracted from letter received from B. T. Parson, salesman in the employ of C. T. Hussey, Edison Dealer, Caribou, Me.:

"Since I was at the factory your salesman has been here and persuaded us to put in the complete line of domestic Records. It is the best business proposition in the Phonograph line that a man ever took hold of, for I know it has more than trebled our sales."

Sketch by Sheridan

The illustration in our March magazine advertising, reproduced on the last page, was drawn by John E. Sheridan, of New York, an artist who has made a more than ordinary success with his sketches showing types of college boys.

The Phonograph and Art

[From the Fort Worth (Texas) Telegram, February 6, 1908.]

In New York recently a number of prominent musicians, mostly composers, formed an organization to combat the spread of Phonograph music. Not that they objected to hearing it, but because they argued that the dissemination of phonographic Records deprives composers and singers of the true artistic appreciation and, what gets nearer the heart of the matter, money the composers might get for sales of sheet music and money the singers might get for tickets to theatres and concert halls where they sing.

It is a selfish and narrow view. Perhaps it applies to New York. Certainly it does not apply to the considerably large portion of the United States outside the borders of Manhattan.

A composer writes a song. Before it becomes popular and there is any demand for its sale it must be sung by a singer of repute before a good many audiences. If it is not a song, and is a piano composition, or one for an orchestra, it must be played, and often, before people take enough interest in it to create a market demand. Then, if the song or the composition is a hit, people want copies of it. Vesta Victoria sings "Waiting at the Church." It is not an artistic masterpiece, but the men like it and applaud. Straightway young women who can play the piano want copies of it to play on Sunday evening when their best young men call. The composer reaps a harvest from the sale of sheet copies and gradually, as other vaudeville singers present the song at different places in the remainder of the country, the demand for it spreads.

A Phonograph company hires the fascinating Vesta to sing her song into a brass horn and the records of it are put on sale almost immediately at every city of size in the country. Does the young man who calls on Sunday evening like to hear his best girl play it badly on the piano so much as he does the phonographic reproduction of the original? Whether he does or not is foreign to the real essence of the discussion. The best girl might play the tune on the piano every Sunday night for six months and it would not create the same demand to hear Vesta sing it as a single reproduction of her song on the Phonograph. No matter if the Phonograph plays the tune a hundred times the hearer wants to hear the original when she comes to town. The Phonograph makes a market for originals and originals pay composers royalties every time they appear. Is it much different whether the composers get the royalties from the singers or from the sheet music?

Supposing Vesta's song made a hit in New York, but the rest of the country heard nothing about it? And Vesta should suddenly jump from New York to Fort Worth for a single night. How many would go to hear her? A market for songs and all music has to be built up and the Phonograph is the best builder.

Jan Kubelik played in Fort Worth the other night to a house that downstairs was hardly half full. Had Kubelik's playing been made familiar by a year of phonographic records in the homes of Fort Worth, the opera house would not have held the people who would have wanted to hear him.

The Phonograph's manufacture of a market goes even further. It goes into the little towns and villages and hamlets, where the artists themselves never venture. And when the artists themselves come within reaching distance people travel from the towns, villages and hamlets to hear them.

Aside from the work the Phonograph does in familiarizing the masses with music they could never otherwise get, as a cold business proposition, it is a money-maker for the artists themselves.

Moving picture shows at a nickel might be imagined to have an effect on theatre receipts, but they do not. People pay a nickel to see a clever pantomime reproduced on a film and then, when they pay a dollar and a half to go to the theatre, they appreciate all the pantomime arts of the actors which they had never been taught to enjoy before. Shrewd actors recognize this and that is why we are seeing more pantomime on the stage every year, and less dependence on the effects attained by shouting lines and repeating jokes so that the audience may catch them.

To spite their chins the New York and Eastern musicians would bite off their noses. If they succeed in keeping their music from the Phonographs they will only succeed in getting themselves forgotten or ignored by the masses. And, of course, if they want that, they are welcome to it.

Two Letters and a Moral

The letters printed below are given in full because they show how a Phonograph in perfect condition can be made to work badly by a cause quite apart from the instrument itself. The moral it teaches is that a too careful examination cannot be made of everything connected with the machine when it operates badly. The letter was written by a man of more than usual intelligence and business capacity, and one not likely to overlook ordinary causes of Phonograph troubles.

THE COMPLAINT.

Minneapolis, February 10, 1908.

I bought a Standard in December, 1906, then a Home, and finally a Triumph No. 58766, and Records every month since. I had the reputation of having one of the best machines in the city, but the last three weeks it has "gone back" on me. I have had it twice to Mr. Hough's, but he says it is a puzzle to him. He thought at first that the mandrel had too much play, but that does not meet the difficulty. The machine runs finely, but all the Records, no matter, songs, bands, or solo instrumental, are harsh, flat, not up to key—make discords. For instance, B-21, at the high notes, about three-fourths from the commencement, and about one-fourth from the ending, it blasts so it is like a shriek, and would drive one from house and home; same with B-4, about one-fourth from the commencement, there is a fearful blast or rather shriek. It is not in the Records, for at Mr. Hough's they sound all right and as they should. It is not in the reproducers, for I have three, two of Model C, one Model B, for wax, and have borrowed two of C from Mr. Hough, and the discords are same when used on my machine, and O. K. when on Mr. Hough's.

I have regulated the feed nuts, and the gait from so would not run, to would give plenty of play, and to with no play, and feed nuts right, still the same discords, blasts and shrieks. Mr. Hough also has regulated, but still the same.

Instead of the Phonograph being a comfort and pleasure, it is harrowing to hear it, would drive one from home if played. It's a puzzle to Mr. Hough—says he never ran up against such a proposition.

Can you inform me what and where the trouble is? It is some minor defect that suppose can easily be remedied.

It went wrong all at once, and without my doing anything to it, for all I have done is to keep it well oiled. Tried it to see if any nuts loose, but all O. K. Please let me hear from you soon.

THE EXPLANATION.

Minneapolis, February 11, 1908.

Found out last night what was the trouble with my Triumph. Borrowed a Standard from Mr. Hough and found the same discords, etc. Then examined the horn and found there had some way got into it a piece of rubber hose, formerly used to connect reproducer and horn. When I forced it out, the Triumph was the same good machine it was before. Regret that I did not find out before writing you yesterday. Please pardon any trouble I may have caused you.

Stores of Four Edison Dealers

E. B. SILBERMAN 1641 Milwaukee Avenue, Chicago

THOMAS A. PURKISLOVE, Northampton, Mass.

CLARION MUSIC HOUSE, Clarion, Pa.

BARNHART & DE FOREST, Warren, Pa.

Ready Made Ads

Judging by the demand for electros and the number of papers that we receive containing them, these ready-made ads have struck a popular chord among Dealers. Either or both of the electros shown in the ads on pages 20 and 21, either single or double column, will be mailed to any Dealer who will comply with the simple provision that copies of papers containing them shall be sent to us. This must also be done by those who have already had electros, but have not yet sent us papers containing them. These electros can be had in no other way than direct from our Advertising Department. They will not be supplied to Jobbers for redistribution.

About Edison Jobbers

Charles C. Adams & Co., of Peoria, Ill., one of the largest music and piano houses in the State outside of Chicago, have become Jobbers of Edison Phonographs and Records. The *Peoria Journal* on February 7th contained the following reference to the fact:

BREAKS ALL RECORDS.

The biggest shipment of musical instruments ever received in Peoria reached here yesterday afternoon, consigned to the Charles C. Adams Company on South Adams street. There were 150 Edison Phonographs and 15,000 Records, all of which made a carload. The shipment was from the National Phonograph Company to the local firm, which is the western distributors of the Edison instruments.

A fire in the establishment of I. Davega, Jr., 125 West 125th street, New York, January 18, inflicted damage to stock to the amount of $5,000. It was fully insured, and since then the loss has been satisfactorily adjusted. The place has been redecorated and rearranged throughout, the wholesale talking machine department now being transferred to the basement, 20 x 85 feet, which is entirely occupied for this purpose. The retail department is on the second floor, with the sporting goods stock in the store off the street. Mr. Davega occupies the entire building, and reports business greatly improved.

The Standard Talking Machine Co., of Pittsburg, who secured the business of the Theo. F. Bentel Co., last March, have recently purchased and taken over the entire talker business of H. Kleber & Bro., piano dealers, who have been handling talking machines for the past fourteen years. They have also bought out the Keystone Musical & Specialty Co., 444 Sixth avenue, Pittsburg, and have greatly increased their record capacity.

The pleasure of the Edison Phonograph as an entertainer in the home cannot be guessed. You must try it to know.

EDISON

PHONOGRAPHS

You can hear an Edison Phonograph at our store with very little trouble, and you can buy one with very little outlay.

Ask to see the new model, hear some of the new Records, and find out what our easy-payment plan is.

John Palmer & Co.
Elizabeth, N. J.

Electro in above ad is: Single column wide, No. 671; Double column wide, No. 672.

For the Whole Family

EDISON

THE EDISON Phonograph is the greatest wonder work of the Wizard of Llewellyn Park. It is the genius of Edison that has made possible the interpretation of sound into Records, and then of Records into sound. All music with perfect clearness can be had with the Edison.

The EDISON PHONOGRAPH

"For it's always fair weather when good fellows get together"

—particularly if that prince of good fellows, the Edison Phonograph, happens to be one of the crowd. Never was there a jollier companion or a more versatile entertainer. It's a whole show in itself. It sings all the new songs, has a wonderful repertoire of all sorts of good music and can tell a funny story with the best of them. You need never be lonely or blue, or lack for amusement if you have an Edison Phonograph for company.

Ask your dealer to show you the new Edison model with the big horn, or send for booklet describing it.

A Remarkable List of March Records

On sale at all Edison stores February 25th.

Seven New Records by Harry Lauder, the Famous Scotch Comedian

A New York manager paid Harry Lauder a fabulous salary to come over from England and sing to us. He has made a tremendous success; nobody else can sing comic songs in the Scotch dialect as Harry Lauder does. Harry Lauder has enriched the March list by making Records of seven of his best songs.

Five New Grand Opera Records

have been added to our already large list. Well-known selections from standard operas, sung by famous operatic stars.

Thomas A. Edison.

The Regular List of Twenty-four New Records

contains the usual quota, the best recent instrumental music and the best of the old music that you never get tired of.

Go to the nearest Edison store today and spend a delightful half-hour in hearing the new March Records.

Ask your dealer or write to us for

The Phonogram, describing each Record in the list; the Supplement Catalogue, listing the latest Two-Minute Records; the new Catalogue, listing all Edison Records now in existence.

Records in all foreign languages.

NATIONAL PHONOGRAPH COMPANY, Lakeside Ave., ORANGE, NEW JERSEY

Edison Phonograph Monthly

VOL. VI. April, 1908 No. 4

Business Outlook Bright

Business is coming back in a healthy manner; steadily, surely, and bearing with it the undoubted marks of general confidence. It is healthy because conservatism is still the strongest factor in the make-up of every order. There is no disposition anywhere to plunge; no desire to take unusual chances by putting in needlessly large stocks of goods. March orders were smaller than they were a year ago, but there were more of them. Instead of placing one order a month for a large quantity of machines and Records, some Jobbers will place three orders in the same time and the aggregate will be nearly the same. This practice, while not as desirable from the manufacturers' standpoint as the old one, is the best indication of a healthy business condition. That it will give way to the former order of things in a short time there is no doubt. The change will come with the strengthening of confidence.

With us orders have more than held their own during March. A satisfactory increase has been made over February and the outlook for April is still brighter. Orders for machines are still slow, but the demand for Records has been surprisingly large. The orders both for current stock and the advance list show but a slight difference over the same months of 1907.

Now that the trouble is largely over and business everywhere is on the mend, we cannot refrain from expressing our satisfaction at the splendid way in which Edison Jobbers and Dealers passed through the depression. Beyond a slowing up in orders and a smaller volume of business none have suffered greatly. The failures have been so small in number as to be hardly worth noticing, and most of the few Dealers who did stop business would have stopped sooner or later, no matter what the condition of trade might be.

The outlook for the future gets better every day. No one is overstocked, useless expenditures have been cut out and it needs but a little further improvement to get business back into its former state of activity.

More New Dealers Than Ever

One of the most gratifying features of the Edison business at the present time is the unusually large number of firms who are becoming Dealers in Edison Phonographs and Records. At no time in the history of the Phonograph have so many agreements been received from new Dealers. For several weeks the weekly average has been greater than at any time last year. The greater part of these come through Jobbers, but our salesmen are also having unusual success in interesting new firms, especially in towns where we heretofore have not been represented. During January, February and March the number of new Dealers created by the salesmen was decidedly in excess of the same months in 1907. Existing business conditions seem to have had the effect upon many firms of causing them to drop some of the lines they have been selling and take on others that offer better profits and have the additional advantage of novelty. It cannot be gainsaid that the introduction of the Phonograph into a Dealer's store awakens a new interest among his customers and not only gets business for the new line, but also aids in selling all others in the store. Much credit for the increase in Dealers must be given to our present extensive and widespread advertising. It is reaching everywhere and creating a demand that literally compels firms to see the advantages of putting in Edison goods.

An amusing incident happened a few days ago. Party had heard a prominent talking machine play a duet that he liked the swing of, and had figured out the title to be "Harry Warner." He wanted to hear the song on an Edison machine. I told him there was no such Record listed, but by further questioning, decided it must be "Arrah Wanna." We played it for him and struck it the first time. We sold him an Edison outfit and a small collection of Records. He said that if he wanted good music and be able to get all the words right, he must have an Edison—*Wadena Phono Co., Wadena, Minn.*

Advance List of New Edison Records for June, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before May 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on May 23d. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on May 25th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after May 20th, but must not be circulated among the public before May 25th. Jobbers and Dealers may, however, deposit Supplements and Phonograms in Mail Boxes or Post Offices after 5 P. M. on May 23d, for delivery on the following Monday. Jobbers are required to place orders for June Records on or before April 10th. Dealers should place June orders with Jobbers before April 10th to insure prompt shipment when Jobbers stock is received.

9842 Thousand and One Nights Waltz — **Edison Concert Band**

One of the earliest and best known compositions of the famous "Waltz King." It may truly be styled a dance classic. It was originally from the operetta "Arabian Nights." Everyone who has ever danced will recognize the air as an old friend, even though they may not know its name or history. The work of the band is fine. Composer, Johann Strauss; publisher, Carl Fischer, New York.

9843 Good-Bye, Sweetheart, Good-Bye — **Alan Turner**

Ever since No. 9292, "In Happy Moments," by Alan Turner, was listed in July, 1906, we have had numerous letters from Phonograph owners, expressing admiration for his voice and asking when another Record by him might be expected. Mr. Turner has made over masters of selections previously catalogued, but this is the first opportunity we have had to include another of his Records in the monthly list. The ballad selected is one that displays his fine voice to perfection, and the Record will surely increase his popularity. Orchestra accompaniment. Music, Albert Von Tilzer; words, Arthur Lamb; publishers, The York Music Co., New York.

9844 When the Song of Love is Heard — **Ada Jones and Billy Murray**

Miss Jones and Mr. Murray have each acquired an added vogue with these duet selections, for each new Record of their making is more in demand than the previous one. The above is a comic song from "A Waltz Dream," the Viennese operetta that is becoming as well known as "The Merry Widow." The song portrays the feline love-making of the back-yard denizens. The chorus is more general in its meaning, a feature being the long kiss, neatly imitated by the violin. The air is catchy. The singers also intersperse a funny dialogue. Orchestra accompaniment. Music, Arthur Weld; words, Joseph Herbert; publishers, T. B. Harms Co., New York.

9845 Rag-time Don't Go With Me No More — **Arthur Collins**

A comic coon song, wherein Hannah expresses her deep aversion to rag-time songs and music and declares that hereafter she wants nothing but Wagner, Strauss or Verdi, Lohengrin or Trovatore. It has a rag-time accompaniment, with a phrase of "Pinafore" in the chorus. It is one of those songs of which Mr. Collins is the recognized leading exponent among Phonograph artists, and it is quite up to his reputation. Orchestra accompaniment. Music, John B. Lewis; words, Matt. Woodward; publishers, Helf & Hager Co., New York.

9846 Lollypops — **Albert Benzler**

A splendid xylophone solo, with a lively attractive air and played exceptionally well by the versatile Mr. Benzler. Its composer styles it a "musical confection." Orchestra accompaniment. Composer, J. B. Mullin; publishers, J. B. Mullin Music Co., New York.

9847 Just Some One — **Manuel Romain**

Words of more than usual merit, an air of singular piquancy and sweetness, and the singing of as delightful an artist as ever made an Edison Record, combine to make this selection

one of our most attractive ballad Records. Few people ever tire of songs like these, and to be able to sing them over again, as often and where one will, is one of the Phonograph's greatest charms. Orchestra accompaniment, with a violin obligato as an extra feature. Music and words, Will R. Anderson; publishers, M. Witmark & Sons, New York.

9848 Shall We Gather at the River? — **Edison Mixed Quartette**

Beyond a word of praise for the excellent manner in which our Mixed Quartette renders this widely known and universally admired sacred song, it is unnecessary to say anything. Few sacred selections have been sung more times since its music and words were written by the Rev. Robert Lowry. Unaccompanied. Published in hymn books.

9849 Somebody Loves You, Dear — **Harry Anthony**

Somebody loves you, dear,
Somebody loves you, dear,
And tho' the world divide us,
I'll love you 'till close to rest.

Somebody loves you, dear,
Call me and I shall hear,
Altho' the world divide us, remember
Somebody loves you, dear.

So runs the chorus of this delightful sentimental ballad. Mr. Anthony's singing is quite as charming as the words. Orchestra accompaniment. Music and words, Annie Andrus Hanley; publishers, M. Witmark & Sons, New York.

9850 When It's Moonlight on the Prairie — **Byron G. Harlan and Chorus**

This Record will gratify the oft-expressed wish of Mr. Harlan's legion of admirers that he sing something different from his usual repertoire. The song tells a pretty love story of the prairie. A quartette joins in singing the chorus, a feature that enhances the attractiveness of the Record. Orchestra accompaniment. Music, S. R. Henry; words, Robert F. Roden; publishers, Joseph W. Stern & Co., New York.

9851 Humoresque on "The Merry Widow Waltz" — **Edison Concert Band**

"What, more 'Merry Widow?" we can hear the Phonograph public exclaim, upon reading the title of this selection, but when that public once hears this Record played it will agree with us that the series would not be complete without it. It gives the famous waltz in four funny instrumental imitations, as follows: 1. As the little German street band plays it. 2. As played on the banjo, (a la Rag). 3. A street piano imitation. 4. Imitation of the amateur trombone artist. In the language of the street, "it's a scream." Every one will want it. Music, Lehar-Bellstedt; publishers, Helf & Hager Co., New York.

9852 Daddy's Little Tom Boy Girl — **Stella Tobin**

The motherless little girl pathetically complains to her father that the other girls call her "tom boy" and will not play with her. He replies in the chorus:

You will always be Daddy's best child,
You will always be that's best claim,
We were pals in the days of old, dear,
We'll be pals in the years to come.

For you've had no mother to pride you
To put your dear hair in a curl,
And there ain't another girlie in the world like you,
Daddy's little Tom Boy Girl.

The verse is written in common time and the chorus in march tempo. Orchestra accompaniment. Music, J. Fred Hager; words, Robert F. Roden; publishers, Helf & Hager Co., New York.

9853 Krausmeyer's Birthday Party — **Spencer and Mozarto**

Although humorous in itself this vaudeville sketch is more noteworthy for the clever instrumental selections by Mozarto, a well known vaudeville artist. These include a one-string violin playing an Hungarian Rhapsody, a one-string violin and an ocarina playing a selection from "Faust," and a clarinet duet. Mozarto actually plays all the instrumental features. In the violin and ocarina duet the ocarina is played by means of a rubber tube leading from his mouth to the ocarina, which is fastened to the violin. He plays the two clarinets at the same time, one in each side of his mouth. These facts will give added interest to the Record.

9854 I Said "Hello" She Said the Same, Then We Both Said "Good-bye" — **Bob Roberts**

A comic number of which three verses are given on our Record. The singer is placed in most perplexing embarrassment throughout the song, but gracefully extricates himself on each occasion by carrying out the title of the selection. Mr. Roberts' rendition is fully up to his high standard. Orchestra accompaniment. Words, Edward Rose; music, Max Silver; publisher; F. A. Mills, New York.

9855 Cecilia, With a Capital C — **Edward M. Favor**

"Not Bedelia, nor Cordelia, nor Ophelia, nor Amelia, but Cecilia, with a Capital C" is the way the Irish lover sings of his fair charmer. To save his voice he sang several songs to the Phonograph and sent them to Cecilia. They told of his love for her Irish ways and they created quite a sensation when she played them the following Sunday night before a gathering of friends. Mr. Favor is a postmaster of the art of singing Irish songs. Orchestra accompaniment. Music, Seymour Furth; words, E. P. Moran; publisher, Shapiro, New York.

9856 Nigger in the Barnyard — **Edison Military Band**

A selection that is brimful of darkey melody and dance music—quite typical of this light-hearted and music-loving race. Interpolated in the band music is the chorus:

When de sun rise he is de sorrels. — Dat's de time de dark's take wands'.
Down by de yellow corn. — When Uncle blows de horn.

It is one of those Records combining band music and singing, so popular in the past and of which we have not made one in some time. Composer, Charles Lovenberg; publisher, Carl Fischer, New York.

9857 Over the Mountain of Sorrow — **James F. Harrison**

It is some time since Mr. Harrison has made a solo Record for us. His rich baritone voice is heard to excellent advantage in this sacred selection, with its sweet melody and beautiful words of comfort and hope. Orchestra accompaniment. Music, George Lowell Tracy; words, Dexter Smith; publishers, Louis H. Ross & Co., Boston.

9858 Honey, Won't You Please Come Down? — **Collins and Harlan**

A colored Romeo is serenading his dusky Juliette, with the same shining moon, blinking bob-links, glimmering stars and rippling stream, characteristic of the Shakespeare version. It is a rag time appeal to Liza Brown to descend and hear the love-tale of the darkey swain. A typical Collins & Harlan coon duet. Everyone who has a Phonograph will know what this means. Orchestra accompaniment. Music and words, Dave Reed; publishers, M. Witmark & Sons, New York.

9859 All She Gets from the Iceman is Ice — **Ada Jones**

Another song that Vesta Victoria is singing with great success. Jane's divinity and affinity is the iceman. There is something about his business that effects his temperature, for he is as frigid as his ways. Between the first and second singing of the chorus, there is a funny bit of by-play. The iceman is heard driving up the street and stopping in front of the house. Jane cordially invites him in, but he is as cold as his reputation and his business, and replies: "Naw, I can't; dis is me busy day." Mr. Meeker impersonates the iceman. Orchestra accompaniment. Music, Alfred Solman; words, Arthur J. Lamb; publishers, Joseph W. Stern & Co., New York.

9860 The Lanky Yankee Boys in Blue — **Edward Meeker**

A march song that shows by its martial air and patriotic words that the spirit of '76 still lives. At the call of their country the Yankee boys leave their work and homes, and without regard for rank or wealth, go forth to meet the common foe. The music is of a lively marching character, with enthusiastic cheering, drums and bugle calls between the verses. Mr. Meeker improves with each new Record that he makes. Orchestra accompaniment. Music, Theodore Morse; words, Edward Madden; publishers, F. B. Haviland Publishing Co., New York.

9861 Yankee Girl Caprice — **Edison Symphony Orchestra**

To a composition written in caprice tempo, add an attractive arrangement of notes and a practically perfect orchestration and the resultant product is a Record of marked beauty. Composer, Theodore Moses-Tobani; publisher, Carl Fischer, New York.

9862 Big Chief Smoke — **Billy Murray**

The tale of an Indian whose chief occupation is smoking. His fondness for the weed is objected to by his squaw and brings on a family row. The squaw hits the chief's pipe a swipe. "No more he smokes the pipe of peace, he smokes a piece of pipe." The melody and orchestral effects are Indian like. The peculiar guttural grunt of the Indian is well featured. Sung in the musical comedy play "Lonesome Town." Orchestra accompaniment. Music, J. A. Raynes; words, C. William Kolb; publishers, M. Witmark & Sons, New York.

9863 Santiago Flynn — **Ada Jones and Len Spencer**

Santiago serenades Norah McCarty in true Spanish style. In broken Spanish he sings his love-story to the accompaniment of a mandolin. Norah has nothing for him but sneers and quips, till he tells her that, although born in Mexico, his father's name was Flynn. Then nothing in the house is too good for Santiago, and the priest in due time made them possible subjects for the divorce court. Toward the close of the Record, Miss Jones sings a verse from "Santiago Flynn," of which the music is by Theodore Morse, the words by Edward Madden and the publishers are F. B. Haviland Publishing Co., New York.

9864 The Laughing Spectator — **Steve Porter**

Did you ever go to a vaudeville performance when the jokes of the "sidewalk conversationalists" were greeted by one of those billy goat laughs from a spectator that is five minutes and the remainder of the house in an uproar? This Record is a life-like duplication of such a scene. Mr. Porter again talks the dual part of Mac and Reilly, Mr. Meeker does the laughing spectator and various members of our Recording Department staff add to the realism. In the incidental singing Mr. Porter is accompanied by the orchestra.

9865 Harry Lauder Medley — **Edison Military Band**

The tremendous popularity achieved by the Harry Lauder vocal Records will gain for this medley a wide and heavy sale. It introduces: "Tobermory" (Record No. 19272); "We Parted on the Shore" (Record No. 19276); "Stop Yer Ticklin' Jock" (Record No. 19279); "I Love a Lassie," (Record No. 19278); "The Safest o' the Family" (Record No. 19277); "She's My Daisy," (Record No. 19274).

5 Selections Made Over

We list below five selections that have been made over by the same talent. The June printed matter prepared for retail use will contain these selections. Dealers should replace their stock of the original Records of these numbers with the new ones.

14 **Bridal March from Lohengrin** — **Edison Concert Band**
1559 **Where is My Wandering Boy To-night?** — **Reed Miller**
Formerly by Harry MacDonough

7323 **Dare Devil March** — **Edison Military Band**
7722 **Dancing With Ma Baby** — **Edison Military Band**
7885 **American Eagle March** — **Edison Military Band**
Formerly by Edison Concert Band

New Plan for Supplying Trade Information

With a view to simplifying the matter of issuing trade information to Jobbers and Dealers, we have put into effect a plan of doing so by means of special bulletins, these to take the place of form letters and the present advices in the PHONOGRAPH MONTHLY. The plan provides for mailing specially printed bulletins direct to Jobbers in every case, and for using the pages of the PHONOGRAPH MONTHLY to furnish the same information to Dealers, following in the latter case the same bulletin form of notification. These bulletins may be issued from any one of several departments, but in each case it will be made clear which department they emanate from. Each department will have its own set of numbers, so that they may be filed separately, or those of one department may be kept and another thrown away if desired. To illustrate the plan: Suppose the sales department wants to advise the entire trade of a change in prices. It will issue "Sales Department Bulletin No. 1," print it especially for Jobbers and mail copies direct to the latter. The same matter will be printed in the PHONOGRAPH MONTHLY, bearing a sales department number. This number may differ from that of the Jobbers' bulletin, because more bulletins are sent to Jobbers than to Dealers. Jobbers are urged to keep separate files for the bulletins of each department. Dealers should carefully watch the pages of the PHONOGRAPH MONTHLY and keep a complete file for future reference.

Where, because of tariff conditions, etc., the same bulletin will not apply to Canadian Dealers, a special bulletin will be mailed direct to the latter. Where they do not receive a special bulletin, Canadian Dealers will understand that those printed in the PHONOGRAPH MONTHLY are also addressed to them.

Scotch Record Recital

In order to introduce to its retail trade the seven Lauder Records, the R. S. Williams & Sons' Co., of Toronto, gave a Scotch recital on February 29th. They made up the following programme of Scotch music and songs, which our readers will admit was an interesting idea:

19315—Blue Bells of Scotland.....Band
49th Highlanders Band
9325—Bonnie Banks o' Loch Lomond.....Soprano
Miss Maria Narrella
9470—Coming Thro' the Rye.....Piccolo
Frank C. Stanley
19173—Rob Roy *Macgregor*.....Comic
Harry Lauder
19174—She's *My* Daisy.....Comic
Harry Lauder
9454—Bonnie Jean.....Tenor
Byron G. Harlan
9020—Coming Thro' the Rye.....Humoresque
Edison Concert Band
19175—Tobermory.....Comic
Harry Lauder
19176—We Parted on the Shore.....Comic
Harry Lauder
9540—Love's Secret.....
Edison Venetian Trio
9772—Her Bright Smile Haunts Me Still.....
Edison Venetian Trio
9669—Sweet Spirit Hear *My* Prayer.....
Edison Venetian Trio
19178—I Love a Lassie.....Comic
Harry Lauder
19179—Stop Your Ticklin' Jock.....Comic
Harry Lauder
9254—Coming Thro' the Rye.....Soprano
Miss Maria Narrella
12877—Cock of the North.....Band
49th Highlanders Band
19177—The Safest o' the Family.....Comic
Harry Lauder
5021—God Save the King.....Baritone
Frank C. Stanley

Keep up your stock. Advertise. Circularize. Call on your customers personally. Don't let any business get away.

Another Decision Against Price-Cutting—This Time in Philadelphia

By hard experience persons who set out to cut prices on Edison Records have learned that they can only carry on their illegal operations until they have been discovered, and that when application is made to the courts, these illegal practices will be speedily stopped. Occasionally, however, someone imagines that he can sell Edison Records at cut prices, and that the courts will protect him in so doing, and, therefore, at intervals a price-cutting suit is fought through the courts until final hearing. This has happened only four or five times since our present selling system was inaugurated, and in every such case the decision has been in favor of our selling contracts, and the illegal sale of Records at cut prices has uniformly been enjoined.

Just recently a new case has been added to this list of contested cases, and this decision is precisely in line with former decisions of the Federal courts upon the subject. This is the decision of the New Jersey Patent Company and National Phonograph Company vs. Fred G. Schaefer, in the U. S. Circuit Court for the Eastern District of Pennsylvania. The decision in this case was rendered in February, 1908. Schaefer kept a small store in Philadelphia, and each month he succeeded in obtaining a number of Edison Records, which he sold at cut prices. He was not himself a Dealer, but he got a man by the name of Dyer to sign a Dealer's contract and buy a hundred or two Records each month at Dealer's prices, with money which he advanced to Dyer.

These practices were brought to the attention of the National Phonograph Company and suit was immediately brought against Schaefer, and a preliminary injunction was granted, enjoining him from selling Records at cut prices during the pendency of the suit. Schaefer, thinking he had a right to sell Edison Records at whatever price suited him, decided to contest the suit, and evidence was taken on each side, and the case was brought to final hearing and argued by Frank L. Dyer, General Counsel, with the result above mentioned. Now, Schaefer is not only prevented from the sale of Edison goods, but he is out his expenses in the suit, together with the costs of both parties. The effect of this decision will be to effectually prevent further price-cutting on Edison goods, and it will probably be the last case of this sort which will be contested for some time, as a contest of this kind costs quite a tidy little sum and its outcome can be clearly predicted from the start. Our selling contracts have been carefully drawn up in view of the decisions of the Federal courts, and have been uniformly sustained thereby, and any contest against their provisions will be highly unprofitable to the contestant. The opinion in the Schaefer case is as follows:

IN THE CIRCUIT COURT OF THE UNITED STATES
FOR THE EASTERN DISTRICT OF PENNSYLVANIA.

NEW JERSEY PATENT COMPANY and NATIONAL PHONOGRAPH COMPANY, *Complainants,* vs. FRED G. SCHAEFER, *Defendant.*	}	April Session, 1908, No. 7 In Equity.

FINAL HEARING.

FRANK L. DYER and CHAS. H. BUTLER for Complainants.

JOHN H. FOW for Defendant.

HOLLAND, J.

This is a suit to restrain the infringement of Letters Patent No. 782,131, and for an accounting. The Complainants are the New Jersey Patent Company, a corporation, which holds the legal title to the patent, subject to the assignment of the inventor and which holds the legal title to the patent, and the National Phonograph Company, another New Jersey corporation, which holds the exclusive right to manufacture, use and sell throughout the United States, the inventions covered by the said patent. The invention of the patent in question covers a composition comprising a metallic soap and a hard wax added thereto adapted for the manufacture of phonographic records. These records are manufactured and sold to jobbers and retail dealers under the trade name of "Edisonian Records," "Edison Standard Records," or "Edison Gold Moulded Records," and the Edison Phonograph Jobbers are required to enter into a selling agreement which provides, among other things, incorporated in a license which all jobbers and retailers are required to secure from the company. These licenses and agreements are the same for all, requiring every jobber, upon receipt of these records, at certain prices fixed by the company, to enter into the license and agreement which the company has with the jobber restricting his right to sell at retail for less than thirty-five cents apiece. The licensee is required to observe other conditions, and both the jobber and retail dealer stipulate, amongst other things, that:

"Upon the breach of said condition, said Blanks are revested in United States patents, and void under the condition that the license to use and vend them, implied from such sale, is dependent on the observance by the vendee of all the foregoing conditions; upon the breach of any of said conditions the license to use or vend said Phonographs, Records and Blanks immediately ceases, and the vendee, as to any use or vending, is an infringer of said patents, and may be proceeded against by suit for injunction or damages, or both."

Each record is encased in a box or carton, upon which is printed in prominent type, a notice that

"This record is sold by the National Phonograph Company upon the condition that it shall not be sold to dealers, jobbers or others for less than thirty-five cents. It shall not be sold or offered for sale by the original, or any subsequent purchaser (except by an authorized jobber to an authorized retail dealer) for less than thirty-five cents apiece.

"Upon any breach of said condition, the license to use and vend the record, implied from such sale, immediately terminates."

In his answer he avers that "the records sold by him and offered for sale, about which the complaint is made, were purchased from owners of phonographs, who, after having used the same, sold them to him, or exchanged them for other records." He was cross-examined by counsel for complainants, and testified, in substance, that he never aided or assisted any other person in the violation of any contract made with the complainants.

These statements are untrue, and his testimony at the final examination was directed in the support of these allegations. It subsequently developed that he had induced Dyer to procure a retail license, for the purpose of enabling him to secure new records at a price less than he could purchase them from jobbers or from the company, and that he did sell new records, obtained in this manner, at less than licensed retailers were permitted by the company to dispose of them to the public. The defendant admits that he purchased second-hand records of owners of phonographs and disposed of them at such figures as he could obtain therefor. This, however, we have no concern. The bill charges the defendant with an infringement of the patent, in that the defendant has sold these records in violation of the restrictions contained in their form of license and the agreement which they entered into when the licenses were secured, and the evidence in the case fully sustains the truth of these allegations. True, he acted through his representative, Dyer, in whose name the license was secured, but he is the responsible party. He disposed of the records of the complainant company to the public in violation of the price restrictions contained in their retail licenses. It is true that Dyer was not a party to the complainants, but his representative did. Dyer was a retail licensee who, in direct violation of the agreement, sold to defendant records at a price which made him an infringer, and the defendant secured his records from Dyer, with full knowledge of the facts, and thereby infringed the patent. In so doing, the defendants came the infringer himself. Where an infringement of a patent is brought about by consent of action between a defendant and complainants' licensees, all engaged directly and intentionally become joint infringers. Heaton, &c., Manufacturing Co. v. Eureka Specialty Co., 77 Fed. Rep. 288; Wells, &c., Co. v. Detroit, &c., Co., 149 Fed. Rep. 946. If they are empowered, under the patent law, to place such restrictions upon the sale of the inventions, the complainants are entitled to an order restraining the defendant and requiring him to account.

These contracts restraining the right of licensee to sell upon certain conditions have been before the courts in a number of instances, and the last in which my attention has been called was upon a jobbers' agreement to sell only at a certain price. The defendant sold the patented article at a price less than those specified in the jobber's agreement. The Circuit Court of the United States for the Eighth Circuit, in the case of National Phonograph Co. v. Menke, 158 Fed. Rep. 733, reversed the Circuit Court, and held that the agreements which the company had with the jobber restricting his right to sell at retail for less than thirty-five cents apiece. The licensee is required to observe other conditions, and both the jobber and retail dealer stipulate, amongst other things, that:

"Upon the breach of said condition, said Blanks are revested in United States patents, and void under the condition that the license to use and vend them, implied from such sale, is dependent on the observance by the vendee of all the foregoing conditions; upon the breach of any of said conditions the license to use or vend said Phonographs, Records and Blanks immediately ceases, and the vendee, as to any use or vending, is an infringer of said patents, and may be proceeded against by suit for injunction or damages, or both."

Each record is encased in a box or carton, upon which is printed in prominent type, a notice that

"This record is sold by the National Phonograph Company upon the condition that it shall not be sold to dealers, jobbers or others for less than thirty-five cents. It shall not be sold or offered for sale by the original, or any subsequent purchaser (except by an authorized jobber to an authorized retail dealer) for less than thirty-five cents apiece.

"Upon any breach of said condition, the license to use and vend the record, implied from such sale, immediately terminates."

In his answer he avers that "the records sold by him and offered for sale, about which the complaint is made, were purchased from owners of phonographs, who, after having used the same, sold them to him, or exchanged them for other records." He was cross-examined by counsel for complainants, and testified, in substance, that he never aided or assisted any other person in the violation of any contract made with the complainants.

These statements are untrue, and his testimony at the final examination was directed in the support of these allegations. It subsequently developed that he had induced Dyer to procure a retail license, for the purpose of enabling him to secure new records at a price less

than he could purchase them from jobbers or from the company, and that he did sell new records, obtained in this manner, at less than licensed retailers were permitted by the company to dispose of them to the public. The defendant admits that he purchased second-hand records of owners of phonographs and disposed of them at such figures as he could obtain therefor. This, however, we have no concern. The bill charges the defendant with an infringement of the patent, in that the defendant has sold these records in violation of the restrictions contained in their form of license and the agreement which they entered into when the licenses were secured, and the evidence in the case fully sustains the truth of these allegations. True, he acted through his representative, Dyer, in whose name the license was secured, but he is the responsible party. He disposed of the records of the complainant company to the public in violation of the price restrictions contained in their retail licenses. It is true that Dyer was not a party to the complainants, but his representative did. Dyer was a retail licensee who, in direct violation of the agreement, sold to defendant records at a price which made him an infringer, and the defendant secured his records from Dyer, with full knowledge of the facts, and thereby infringed the patent. In so doing, the defendants came the infringer himself. Where an infringement of a patent is brought about by consent of action between a defendant and complainants' licensees, all engaged directly and intentionally become joint infringers. Heaton, &c., Manufacturing Co. v. Eureka Specialty Co., 77 Fed. Rep. 288; Wells, &c., Co. v. Detroit, &c., Co., 149 Fed. Rep. 946. If they are empowered, under the patent law, to place such restrictions upon the sale of the inventions, the complainants are entitled to an order restraining the defendant and requiring him to account.

These contracts restraining the right of licensee to sell upon certain conditions have been before the courts in a number of instances, and the last in which my attention has been called was upon a jobbers' agreement to sell only at a certain price. The defendant sold the patented article at a price less than those specified in the jobber's agreement. The Circuit Court of the United States for the Eighth Circuit, in the case of National Phonograph Co. v. Menke, 158 Fed. Rep. 733, reversed the Circuit Court, and held that the agreements which the company had with the jobber restricting his right to sell at retail for less than thirty-five cents apiece. The licensee is required to observe other conditions, and both the jobber and retail dealer stipulate, amongst other things, that:

"Upon the breach of said condition, said Blanks are revested in United States patents, and void under the condition that the license to use and vend them, implied from such sale, is dependent on the observance by the vendee of all the foregoing conditions; upon the breach of any of said conditions the license to use or vend said Phonographs, Records and Blanks immediately ceases, and the vendee, as to any use or vending, is an infringer of said patents, and may be proceeded against by suit for injunction or damages, or both."

Each record is encased in a box or carton, upon which is printed in prominent type, a notice that

"This record is sold by the National Phonograph Company upon the condition that it shall not be sold to dealers, jobbers or others for less than thirty-five cents. It shall not be sold or offered for sale by the original, or any subsequent purchaser (except by an authorized jobber to an authorized retail dealer) for less than thirty-five cents apiece.

"Upon any breach of said condition, the license to use and vend the record, implied from such sale, immediately terminates."

In his answer he avers that "the records sold by him and offered for sale, about which the complaint is made, were purchased from owners of phonographs, who, after having used the same, sold them to him, or exchanged them for other records." He was cross-examined by counsel for complainants, and testified, in substance, that he never aided or assisted any other person in the violation of any contract made with the complainants.

These statements are untrue, and his testimony at the final examination was directed in the support of these allegations. It subsequently developed that he had induced Dyer to procure a retail license, for the purpose of enabling him to secure new records at a price less

Mr. Edison in Florida

Mr. and Mrs. Edison and son did not go to Florida on February 25th, as stated in the March issue of the PHONOGRAPH MONTHLY. All arrangements had been made to start on that date, but on February 23rd Mr. Edison went to New York to consult Dr. Arthur B. Duel, specialist in aural diseases, about some trouble in his ear that had affected his hearing more than usual. Dr. Duel advised an operation for mastoiditis, similar to one performed by him on Mr. Edison about two years ago. Mr. Edison went to the Manhattan Eye, Ear and Throat Hospital and the operation was performed the same day. It was entirely successful. Except for one day, when his temperature was somewhat alarming, Mr. Edison made a steady recovery. He returned to his home in Llewellyn Park, Orange, on March 10th, and left for his plantation at Fort Myers, Florida, on March 14th, accompanied by Mrs. Edison, Master Theodore Edison, Miss Margaret Gregory, of Montclair, and Mr. Edison's private physician, Dr. Page, of New York. They left Newark at 9:58 a. m. in a private Pullman car, "Pilgrim," which was attached to the Florida and West India Limited and which arrived at Jacksonville, Fla., 8.20 p. m. Sunday, continuing on to Lakeland, Fla., arriving at 9.40 Sunday night. On account of there being no through train service to Fort Myers, the car was placed in a quiet spot until Monday morning, when it was attached to train leaving Lakeland at 7.55 a. m., arriving on time at Fort Myers, Fla., 1.05 p. m. Mr. Edison stated just prior to his boarding the car that he felt first rate and he was in excellent spirits. The party was accompanied as far as Philadelphia by Mr. Edison's daughter, Madeline, Miss Lucy Bogue and J. V. Miller. The party will return in May.

Foreign Record Changes

The Trade is hereby advised that we have no more Records or masters of Record No. 18609, "Himno Nacional Mexicano" (Mexican), by Banda de Zapadores. Our entire stock of the above has been discarded. This selection has, however, been made over by the Banda de Policia, and is now listed under No. 20083 in our catalogue.

The Trade should also take note of the following cut-out: No. 19328, "Eine Szene auf der Alm" (German) by Resoch und Huber. This Record is defective, and since we cannot obtain additional masters or moulds, it will be dropped from our catalogues.

I heartily approve of the Dealers' agreement. I do not think the Phonograph has had its day. My outlook is better every day for Edison goods. The future never was so bright for Edison Phonographs and Records. Mark me down as an Edison worker, who will not deviate one penny from agreement.—*Eller Grove, Milford, Ind.*

Are you trying as hard now to get business as you did six months ago? No? Then go back to the old way. It's a mistake to let up at any time.

Trade Information for Dealers

Sales Dept. Bulletin No. 1—March 13th, 1908

FOR UNITED STATES DEALERS ONLY

Correspondence concerning this Bulletin should mention its number and be addressed to National Phonograph Co., Sales Department, Orange, N. J.

We append herewith price list for Edison Horn Crane parts:

	Dealers.	List.
Gem chain rod and chain	$ .11 net	$ .15
Gem upright rod	.11 "	.15
Standard, Home and Triumph chain rod and chain	.18 "	.25
Standard, Home and Triumph upright rod and thumb Screw	.36 "	.50
Standard, Home and Triumph base	.36 "	.50
Standard, Home and Triumph brace	.07 "	.10
Standard, Home and Triumph base holder and s	.11 "	.15

These prices are based on the Triumph style of horn crane, which has now been adopted for the Standard and Home also. Such prices will, however, apply to parts of the cranes heretofore used in the Standard and Home.

Prices for parts of the Idelia Horn Crane will be just double those of the Standard, Home and Triumph.

The above are all net prices, from which no discounts whatever are to be allowed.

Sales Dept. Bulletin No. 2—March 13th, 1908

FOR UNITED STATES DEALERS ONLY

Correspondence concerning this Bulletin should mention its number and be addressed to National Phonograph Co., Sales Department, Orange, N. J.

Beginning at once all Phonographs ordered with mahogany cabinets will be equipped with mahogany finish horns, instead of the regular black horns, as heretofore. This will change the prices of the complete outfit, and instead of quoting an extra price for the mahogany cabinet and horn (as heretofore), we will quote prices on the outfits complete, which will be as follows:

Gem Phonograph with mahogany cabinet and mahogany finish horn								$ 16.50 List
Standard	"	"	"	"	"	"	"	36.50
Home	"	"	"	"	"	"	"	47.50
Triumph	"	"	"	"	"	"	"	75.00
Balmoral	"	"	"	"	"	"	"	85.00
Conqueror	"	"	"	"	"	"	"	100.00
Alva	"	"	"	"	"	"	"	105.00

These prices are subject to the regular machine discounts. Should you have any machines mounted in mahogany cabinets in stock, they should be equipped with the mahogany finish horns, which can be purchased from us as extras, and then sold at the above list prices. This will leave in your possession to be sold as extras the black horns with which such machines were originally

Sales Dept. Bulletin No. 3—March 13th, 1908

FOR UNITED STATES AND CANADA DEALERS

Correspondence concerning this Bulletin should mention its number and be addressed to National Phonograph Co., Sales Department, Orange, N. J.

Made Over Selections

We list below five selections which have recently been made over by the same or new talent. Continuing the plan begun last month, we will print them as part of the June printed matter prepared for retail distribution.

14	Eridal March from Lohengrin	Edison Concert Band
1559	Where is My Wandering Boy To-night? Formerly by Harry MacDonough	Reed Miller
7323	Dare Devil March	Edison Military Band
7722	Dancing With Ma Baby	Edison Military Band
7885	American Eagle March Formerly by Edison Concert Band	Edison Military Band

If you are not ordering these Records regularly and do not exploit them among your patrons, you are overlooking an excellent opportunity to increase your Record business. These made-over selections are equal in every way to the new Records listed by us each month, and in reality should be considered as an addition to the twenty-four.

German Selections Re-listed

The trade is hereby advised that we have obtained new moulds for German Records No. 25100, "Die Kappelle," by the Meistersinger Quartette, and No. 15391, "O Susanna," by H. Grossman, and are now in a position to fill orders for both selections.

Orders cancelled in December last, because of our inability to fill them, due to defective moulds, should now be renewed, and Jobbers who have not ordered at any time should put in at least a small stock of each selection.

Sales Dept. Bulletin No. 4—March 17th, 1908

FOR UNITED STATES AND CANADA DEALERS

Correspondence concerning this Bulletin should mention its number and be addressed to National Phonograph Co., Sales Department, Orange, N. J.

It has been brought to our attention that, in anticipation of a continuation of the Record Exchange Propositions which have taken place during the past two years, certain Jobbers are already taking back Records from their Dealers and storing them, with the expectation of returning them to us whenever the next Exchange Proposition takes place.

If this policy is being pursued now, is, no doubt, has been in the past. Such methods are not only a direct violation of agreement, but are, and always were, directly and absolutely contrary to the interest and purpose for which our Record Exchange Propositions were adopted.

It may be that such conditions do not now, or never did, exist, but to prevent any controversy or misunderstanding arising later on, we consider it advisable to now notify you that there will be no further *Record Exchange Propositions* along the same lines, or of the same nature as those which have heretofore taken place.

Production Dept. Bulletin No. 1—March 20th, 1908

FOR UNITED STATES AND CANADA DEALERS

Correspondence concerning this bulletin should mention its number and be addressed to National Phonograph Co, Production Department, Orange, N. J.

We are now furnishing the same horn crane for all types of machines, with the exception of the Gem, it being understood that the Idelia crane has the oxidized finish.

The packages containing cranes are marked for the reason that the braces for the three different types vary. The brace for the Standard crane is a little longer than the brace for the Home, and the brace for the Triumph machine is longer than the brace for either the Home or Standard, this being necessary in order that they properly line up with the crane bases. The cabinet base of the Standard machine being wider than the base of the Home, the relative position of the crane base is not the same as on the Home, and the base moulding of the Triumph cabinet being wider, brings the horn crane base further away from the machine, thereby changing its relative position.

To take care of the different lengths of horns, the chain rod is to be adjusted in the usual way. When the crane is in proper adjustment, the suspension chain is in a perpendicular position. In future all envelopes containing the small parts of horn cranes will be illustrated, showing the proper position of horn and crane.

It is pleasant indeed to record the return to health of that notable inventor, Thomas A. Edison, of whom all Americans are proud. At the close of last month, after submitting to a delicate operation, the life of this grand old man, according to medical experts, was for a short time trembling in the balance, but thanks to splendid medical skill and excellent vitality Mr. Edison rallied from the shock successfully and has been steadily improving ever since. He is now out of all danger and has been removed from the hospital, a statement which will gladden the hearts of thousands of World readers in every land on earth who have grown to admire and love this splendid man and inventor, who has shed so much luster upon American inventive ability. May the span of life he long extended to Edison.—*Talking Machine World.*

The Alva a Wonder

At last we have *the* Phonograph, *"The Alva;"* it's great, and to say that it's the wonder of the twentieth century is expressing it very mildly. One and all of us join me in wishing a speedy return to good health of our dear friend, Mr. Edison, and to you all, continued success.—*Sol. Heller, 235 W. 102nd St., New York.*

Edison Phonograph Monthly

VOL. VI. April, 1908 No. 4

April Advertising Spells Optimism

Here is the list of weekly and monthly publications in which the advertisements of Edison Phonographs and Edison Records appeared, either in the latter part of March or in the April issues: Collier's Weekly, Saturday Evening Post, Associated Sunday Magazines, Youth's Companion, Puck, American Magazine, Cosmopolitan, Everybody's, McClure's, Munsey's, Review of Reviews, Ladies' Home Journal, Woman's Home Companion, Ladies' World, Argosy, Red Book, Metropolitan, Pacific Magazine, Sunset Magazine, World To-Day, National Magazine, and Ainslee's.

The two large advertisements in the regular newspapers appeared in 145 daily papers on March 12th or 13th and March 24th or 25th. Similar advertisements will appear in the same papers on April 14th or 15th and April 24th or 25th.

We shall have a full page advertisement in colors on the fourth cover of the Easter number of Collier's Weekly on April 11th. It has been designed by Will Bradley, one of the foremost men in his line in this country. Mr. Bradley has charge of the designing and typographical work of Collier's Weekly and is probably the highest salaried man occupying a position of this kind. He has designed our advertisement to harmonize with the front cover, which will also be done by him. Both pages will be printed in four colors. Dealers should get a copy of this issue and let the Edison advertisement occupy a prominent place in their stores or show windows.

Don't all of this advertising, costing many thousands of dollars every month, show that we have even greater faith than ever in the future of Edison Phonographs and Records? Do you suppose that we would keep on advertising like this if we didn't feel certain that it will pay big dividends in the near future? We know that just now it is not making as many retail sales as it would if there were less men out of work and more money available for luxuries. We feel assured, however, that it is as active as ever in creating in thousands of homes a desire to own an Edison Phonograph and that the desire will be gratified as soon as the means are at hand. In other words, it is making just as many sales as ever and only the formality is lacking of making the payments and carrying home the goods.

In continuing our advertising plans as made last fall, we will have no lost ground to regain, no vain regrets for lack of faith. We will be in the position of the victorious general who won because he did not let up at any point of his campaign, even though at times it seemed easier to do so.

We wouldn't want to give the trade the impression that our advertising is not making present sales, for it is not only making sales, but it is a strong factor in the present status of our business, which we believe is in much better shape than nineteen out of twenty other lines throughout the country. It is in such shape that it needs but little to make its volume equal to anything in its history.

Off to Mexico

Walter Stevens, manager of the Foreign Department of the National Phonograph Co., left on March 16th for a visit to the Mexican office of his department at Avenida Oriente No. 117, Mexico City. He will be absent about six weeks. He was accompanied by his wife and daughter. Rafael Cabanas, formerly in charge of the Mexico City office, but who has been in New York for some months past, returned to Mexico at the same time. Mr. Cabanas will shortly sever his connection with the company and become a Jobber in Edison Phonographs and Records in Mexico City. George J. Werner and Frederick Burt, of the New York City Recording Department, sailed from New York on March 19th on the steamer Monterey, of the Ward line. They went by boat to Vera Cruz and from there by rail to Mexico City. With the assistance of Mr. Stevens and Mr. Cabanas, they will make another series of Mexican selections to supplement those already in the Edison catalogues.

Lauder Records Grow More Popular Daily

No series of Records, other than the monthly list, ever put out by the National Phonograph Co., has achieved such a success as the seven Lauder Records issued in the latter part of February. Jobbers generally recognized their attractiveness and placed orders that in the aggregate far exceeded our expectations. The judgment of the Jobbers, however, fell short of meeting the demand. The Records did not get fairly before the public until March 1st, and since then the original orders of Jobbers have been entirely sold out and many of them have sent in rush orders for quantities larger than their first orders. Even this cannot be said to represent their ultimate sale, for they will get more popular as time passes and their fame gets into the smaller and more distant places. It will pay every Jobber and Dealer to carefully watch his stock of these selections and keep ordered ahead. At present we are working the moulds to the limit and expect to do so for some time. Consequently it will be a case of first orders in, first filled.

Advertising and Sales

It is not half so hard to get trade as it is to retain it.

What an advertisement sets forth the advertiser should bring forth.

Don't jar the "funny bone" too much. Business is a serious matter.

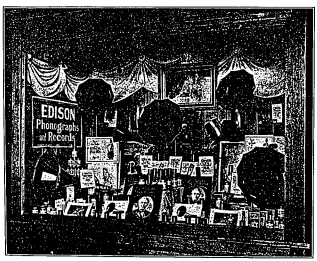
Every advertising man who lives up to his profession is an advance agent of optimism.

A customer dissatisfied, either in his purchase or by the service rendered, can be marked non-returnable.—*Printers' Ink.*

Interesting But Visionary

Everyone is familiar with the legend "with phonographs," which appears on the title pages of books. Some day the legend may be expanded to read: "With photographs and phonograms," or, perchance, one may come upon the phrase "with phonograms" alone. In other words, there seems to be very little to hinder an enterprising author or publisher from issuing, along with a book, a set of phonographic records, which, by means of sound, may serve to illustrate far more forcibly than photographs ever can, sometimes, the subject matter of the book. When "phonograph" supplements become tolerably common, your booklover will have, as a necessary adjunct to his library, a Phonograph, by means of which he may use the phonographic records of a book while he reads the volume. Coming to page 13, for instance, he may find a star in some important paragraph, and against the star at the bottom of the page he may come upon a note, "See" or hear "phonographic record No. 17." It will be a matter of a minute or so to adjust "record No. 1" upon the machine and turn on the power.

Of course, if "phonograms" with books ever become popular some genius, possibly Edison himself, will find a cheaper means of making the records lasting, and gradually, like the growth of the bicycle, and apparently that of the automobile, they will become cheaper and cheaper, so that an author or publisher who does not furnish "phonograms" with his books will be hopelessly out of the book market.—*Newark, (N. J.) Sunday Call.*



Edison Phonograph as a Public Instructor

Recently a lecture was given in one of our public school halls on "The Makers of Wisconsin History." Among other important personages mentioned were the authors of song—"Silver Threads Among the Gold"—Record No. 9162 and—"Sweet Bye-and-Bye"—Record No. 2021, both men being natives of our State. To better illustrate the subjects, the speaker, who happens to be a friend of mine, kindly requested the loan of my Edison Phonograph and at the proper moment while he was referring to the above authors and their work I turned on the Record and caused the words of the song to be thrown on the screen so that the audience could easily follow the lines as they were being played. It instantly took the "house" by storm, coming as it did a complete surprise and something that was not on the programme. So prolonged and insistent was the applause that I was obliged to repeat the Records again and again. The Edison Phonograph certainly did cover itself with glory that evening. I understand that these two Records have since become a part of the regular equipment of the lecture course and are being played wherever practicable.—*W. P. W., Milwaukee, Wis.*

Window Dressing

Are you one of the Edison Dealers who takes advantage of the splendid opportunity to advertise your business by constantly keeping an attractive display in your show window and changing it from time to time?

If you are, then we want to congratulate you upon your enterprise and progressiveness. You doubtless have your own ideas about attractive window displays and do not need assistance from us, although you may get some additional ideas from this department.

WINDOW DRESSING EXHIBIT No. 1.

If you have given window display but little attention, then we want to enroll you as a student of our window dressing department and urge you to give it serious consideration. As a means for increasing your business it is as good as any other form of advertising that you can use. In fact, if you do not dress your show window invitingly, all other means you may employ to advertise will suffer. Many a sale has been lost because the prospective purchaser was repelled by the unattractive appearance of the entrance and show window of a Dealer's store.

Every month, for a time at least, we are going to print in the PHONOGRAPH MONTHLY a photograph of an attractive window display, with some comments on it that will aid Dealers in duplicating it so far as the size of their window and stock of goods will permit. The displays will be simple in character, care being taken to use only such stock and material as can be had in almost any Dealer's store. Nor will any displays be made that will require unusual or difficult carpentry.

Before dressing a window, the Dealer should see that the glass is clean and bright and that dirt and dust are removed from the space back of the glass. No window display can ever be attractive unless cleanliness prevails. Every article placed in the window must be dusted, and care taken to keep out dust after the window has been dressed.

The display illustrated this month was made in a window ten feet wide and six feet deep. The opening is six feet high. Other than the Phonographs, Records, etc., there are used in the display five boxes 1 x 1 x 3 feet in size, open at the top (see Fig. *A*), about twenty-five yards of white cheesecloth and about half that quantity of green cheesecloth. The boxes and cheesecloths are the only articles involving expense, and they may be used over each month.

Having carefully cleaned the glass and display space, tack up green cheesecloth lengthwise and with an occasional fold, so as to give a draped effect (see illustration). Do not tack it smoothly like wall paper. Next tack up a festoon of white cheesecloth at the top of the green cloth, to get the effect shown in the picture. The rosettes are made by gathering up the cloth at regular intervals and fastening it with pins. Lay white cloth on the floor, getting the same loose effect as shown on the sides. Tuck in the ends neatly

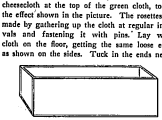


FIG. A.

where they meet the sides. Use one of the back folds as an entrance and dress the window so that the features near this entrance can be arranged last and while standing on the store floor. Be careful not to walk on the white cloth with dirty shoes.

Five of the boxes referred to above are used in this display. Two stand on end, one in each corner at the rear of the window. Two are placed across the back, one on top of the other, so as to make the height two feet. The fifth is placed at right angles with the front and close to the two in the rear. All are covered with white cloth. The display is now a matter of arrangement, according to the picture. The machines should be placed in position first, except the one nearest to the entrance, which should be left till the last. Begin the placing of Records, catalogues, signs, etc., at the farthest point and work back toward the entrance. Look at the work once in a while from the front to be sure that the balance is right.

Dealers who want to duplicate these displays but do not have all of the material are asked to do the best they can with what material they have and make application to us for the missing articles, stating what they do not now have and giving the name of the Jobber through whom shipment may be made. Or shipment will be made by express at the expense of the Dealer when so requested. It may not always be possible to supply everything shown in the displays, but we will send all that we have. Some of the matter can be supplied by Jobbers without writing to us. All correspondence referring to window dressing must be addressed to Advertising Department, Orange, N. J.

We will be glad to have the names of Dealers who follow this display, with photographs of such displays where convenient.

A Compact Record Stock

I send a photograph of my Record Stock, the feature of which is the small floor space and the unusual capacity for the space occupied. The floor space is 5 feet 4 inches by 10 feet 4 inches and the Record capacity 1,829; height of Record shelves, 6 feet 5 inches. Cost of counter and shelving in cash, $4.50. I did my own work. Your paste-board fillers, or what you pack Records in to ship by freight, are used in my shelving in full size sections with wire inserted to hold them in place. It works fine. However, the convenience, compact feature, extreme cheapness, etc., etc., would make a hit with many merchants where space cuts a figure. Shelving so cheap would be a great inducement for carrying a full stock of Records where Dealers have only been carrying part of them and have been bothered by not having them in an economical arrangement. The wholesale house could furnish these paste-board fillers made special for this work.—*Chas. Bowden, Lake City, Ia.*

H. L. D'Entremont, an Edison Dealer at Peabody, Mass., in advising us of the removal of his business to 1856 Lowell Street, writes:

I have placed a horn over the top of the window and pointing directly toward the square, and we can always attract attention by playing a few Records on the Phonograph inside, and it is a profitable advertisement, as I sold three Phonographs in two days last week. Edison's inventions are well represented here, as directly across from my store is Thomas Renzi, also selling Phonographs, and the Olympic Theatre with moving pictures is also across the street. This section of the street is being called "Amusement Row" now.

Phonograph on the Wellman Expedition

A year ago, just before the Wellman Expedition left on its trip in search of the North Pole, President Gilmore, of the National Phonograph Co., presented Major H. B. Hersey, the well-known meteorological expert and balloonist, with an Edison Home Phonograph and a supply of Edison Records. In the latter part of July, Major Hersey wrote to Mr. Gilmore concerning the pleasure that the Phonograph afforded to the members of the expedition and enclosed a photograph showing a party of the explorers enjoying a concert by the Phonograph. Through some mistake the letter and photograph failed to reach Orange. We have just succeeded in getting another copy of the letter and a duplicate of the photograph. The letter is as follows:

THE PHONOGRAPH IN THE ARCTIC CIRCLE

CAMP WELLMAN,
DANE'S ISLAND, SPITZBERGEN,
July 25, 1907.

I want to tell you how the Phonograph works up here in the Arctic close to 80° north latitude. We unpacked it soon after arriving here and found it to be in perfect condition. The Records came through the rough trip without injury. Dr. Fowler, our surgeon, was appointed "master of ceremonies," and soon had the Records rolling out the sweet song that carried us back in spirit to the homes and friends we left far away.

And you have no idea what a treat it is up here in this land of eternal ice and snow to listen to this music. Nearly every night, if we may say night when the sun shines 24 hours in the day, we have the instrument at work, and we seem never to tire of it. Two or three times a week we take the outfit over to "Pike House," where our Norwegian workmen sleep, and give them a serenade. They enjoy this keenly. The other evening we took a photograph of their quarters with the Phonograph working. The expression on their faces is so good that I am going to send you a copy of it.

In closing I will add that the Phonograph and Records have given splendid satisfaction in every way.

H. B. HERSEY,
Executive Officer.

The System Suits Him

P. H. Idol, Edison Dealer at Beaver, Utah, in writing about signing our new Dealer's Agreement, said in part:

Regardine that part of your letter concerning continuing selling the Edison machine, will say I do not see any reason why I should not, provided our business relations continue as pleasant in the future as they have been in the past and you keep me posted with the latest literature published by you and at the earliest possible moment. Since I came into this territory a little more than one year ago the other agents have gone to parts unknown to me. The country hereabouts is thickly settled, but of course you are aware that I have sold more than 200 Edison machines and a large quantity of Edison Records and very few of any other makes of machines. I might state for your information that the reason why the business all went to you was because you kept me posted with your latest publications; and you maintain a uniform price with us all. These two things suit me and are worthy of the consideration of every Dealer who has the ability to sell goods at all. Of course, a good salesman can sell any machine made, but your business methods are a great help to any salesman.

Hanger for Dealers' Stores

Almost every Edison Dealer has, at one time or another, been asked by customers to do something contrary to the provisions of the Dealers' agreement and been compelled to enter into a long explanation as to the reasons why they could not comply. To save Dealers the trouble of making explanations and show that they are not to blame for the restrictions, we have printed a supply of hangers like the above and shipped a small quantity to each Jobber, who in turn will furnish one to each Dealer on request. It is Form 1292. It is 22x28 inches in size and printed in blue ink on white paper. Dealers having trouble with customers are urged to get one of these hangers and put it up in their stores.

As a Protection to the Public and the Trade, Edison Dealers are Positively Forbidden:

1. To sell Edison Phonographs and Records at less than the prices given in our catalogues.
2. To sell Edison Phonographs without horn or in any other way than shown in our regular catalogues.
3. To offer Edison Phonographs and Records as prizes of any kind.
4. To allow rebates or commission of any kind on sales of Edison goods.
5. To accept other goods in part payment for Edison goods.
6. To make advertising contracts in exchange for Edison Phonographs or Records.
7. To offer for sale as second-hand articles, Edison goods that have been used, or shopworn or damaged.
8. To sell, play or exhibit Edison Records on advance lists before 8 a. m. on the selling date fixed by this Company.
9. To exchange Edison Records on ANY basis.
10. To sell any other than genuine Edison repair and supply parts for use on Edison Phonographs.

Violation of any of these provisions renders a Dealer liable to suspension and loss of his right to sell Edison Phonographs and Records.

Thomas A. Edison

NATIONAL PHONOGRAPH CO.
ORANGE, NEW JERSEY

I am glad to say that we are doing much more business in selling the Edison Phonograph now than before, on account of its new equipments. Last Saturday two brothers (attorneys) came into my store, asking me to show them some styles of Edison Phonographs. They at once fell in love with the Edison Gem, telling me that they liked the Gem on account of its horn and stand. After trying some of the March Records for them, they each bought an Edison Gem Phonograph and one dozen Records. Therefore I think this new equipment is a very good idea, as I have no trouble whatsoever in selling an Edison Phonograph.—*A. Abelowitz, 152 St. Mark's Place, N. Y.*

"Follow-up" Letters

C. W. Graves, Edison Dealer at Logansport, Ind., uses with much success, in "following-up" prospective customers, the two letters printed below, the second following the first after a short interval:

FIRST LETTER.

DEAR SIR: I am enclosing you printed matter relative to the most wonderful invention and the most charming home entertainer the world has ever known.

The Edison Phonograph is the original and the only perfect talking machine—invented, perfected and manufactured by Thomas A. Edison, the most wonderful inventor the world has ever known. You may have been disgusted with some imitation phonograph—you surely will not be disappointed with the Edison Phonograph and the Edison Gold Moulded Records.

There are no disagreeable noises in the Edison Records. You can understand them. Their volume and brilliant quality of tone is especially adapted to parlor use. This is a distinct feature of the Edison Records. Neither the sound box nor the record fib—the tones which you are drawn out by a mechanical surface noises. You cannot afford to be without an Edison Phonograph in your home. Most valuable as an educator and indispensable as a versatile entertainer. The most reasonable priced machine and the only pure life-like reproducer of the human voice.

With the Edison you can make perfect records of your friend's voice—of grandpa's—or the baby's. Why not have phonographs of their voices as well as of their faces to remember them by when they are gone?

Let us demonstrate to you how badly you need "Edison Music" in your home.

It will be a real pleasure to us, and to you, if you will call and hear the wonderful Edison Phonograph of today.

Do yourself, your family, your friends, and us a favor and let us hear from you soon regarding the Edison Phonograph.

Edison Standard Phonograph, Horn and Stand and your choice of 12 Records for $20.50. Payments made easy.

SECOND LETTER.

DEAR SIR: We trust you have not abandoned the idea of putting a Phonograph in your home. As we have already written you, no printed matter can adequately tell what this instrument is or what it will do.

We want to show you. We want you to call, select the music you like and hear it played or sung. We want you to compare the Edison Phonograph, with its Records, with the noises—is short, get acquainted with it.

Until you do you cannot decide whether you want it or not with fairness to yourself or to the Phonograph. This is a home proposition; it delights every member of the family; it plays and sings while dancing.

Terms to suit you, all cash or little-done settlement. It never becomes a bore; say more than the theatre does, because the bill continuously changes. New Records, including all of the songs, band and orchestra selections are always obtainable, and every new Record makes the Phonograph better.

We do believe you fully appreciate the possibilities of this instrument, and it is to prove that it is more than the most enthusiastic descriptions of it would indicate that we are asking you to call.

Very truly yours,

Another Dealer's Invitation

Louisburg, N. C., March 2nd, 1908.

You and your family are most cordially invited to call at our store on the 11, 12, 13 and 14th of March and each evening from seven-thirty to eleven to participate in a free concert given by us to our friends and patrons

Edison Phonograph

With the largest horn made and several hundred of the very best selections of music turned out. Come and have a good time, bring your friends.

J. W. HOLLINGSWORTH.

Ready Made Ads

Whether or not Dealers use the ready made ads that we are running in these columns is of little moment, so long as they do *some kind* of advertising. It does not follow that these specimens represent the best advertising that can be done. Many Dealers can write advertisements that will get better results in their own localities than any of these, and no one who can do so should hesitate to write and print his own copy. Next to doing some kind of advertising it is important to change the matter with each insertion. If you cannot write an advertisement of your own, these ready made ads will help you.

Dealers may have an electro of either or both of the illustrations in these ads on request. They must, however, agree to send our Advertising Department copies of the papers containing them. If they have had electros of previous ads they must send us papers showing them or no attention will be paid to new requests. Dealers who prefer to use an electro of the Phonograph, or a combination of the Edison portrait and signature, or any other electro carried in regular stock by us, may have it mailed by stating type of machine or otherwise designating electro wanted. Requests for electros must be addressed to Advertising Department, Orange, N. J.

The Customer is the One You are Trying to Please

He wasn't pleased with the old Edison Phonograph Horn. He isn't pleased with the horns of other machines. Neither is he pleased with the idea of buying a horn in addition to the machine, or pleased with the results after he gets one.

This is why we brought out a new Edison Horn with crane to support it and have included this equipment in the price of the Phonograph.

The customer gets a better horn than he could buy from a horn stock, gets better results with it, because it is made especially for the Phonograph, and is pleased over his purchase.

You benefit from his satisfaction and you benefit in other ways. You sell a Phonograph and a horn with one set of motions, you make a liberal profit on both and you are relieved of the expense of carrying a stock of horns.

The Edison Phonograph, with its new equipment is the best talking machine proposition on the market.

No single thing furnishes so much entertainment to a family, especially where there are children and young folks, as an Edison Phonograph. It supplies all kinds of amusement at little expense; it keeps you up to date with every kind of music; it gives you a means of entertaining your friends.

W. E. WILSON
No. 44 Canada Street
Richmond, Va.

☞Electros in above ad is: Single column wide No. 673. Double column wide, 674.

At less per week than the price of a cheap theatre ticket you can put the Edison Phonograph into your home. And it's a lot more comfortable and a lot more enjoyable to hear good music in the easy chair at your own fireside than it is to hear it in a hard, uncomfortable seat at the theatre.

F. K. SMITH & CO.
No. 57 Henry Street
Columbus, Ohio

☞Electros in above ad is: Single column wide No. 677. Double column wide, No. 678.

The EDISON PHONOGRAPH

SOME music never grows old, particularly if it recalls pleasant memories. The Edison Phonograph can reproduce for you the marches, ballads and airs that stirred you in the old days, just as well as it can sing the song that is the current hit in the metropolis, doing it with a clearness, a fidelity and a beauty and volume of sound that is not to be found in any similar instrument.

The Edison Phonograph is all things to all men at all times. Simply by changing a Record it may be a brass band at one moment and a violin virtuoso the next, a singer of ragtime or of grand opera, a funny vaudeville team or a quartette singing a sentimental ballad.

If you haven't heard the Phonograph lately, you'll be surprised at the wonderful improvement in the new model Edison with the big horn. Ask your dealer to show it to you or send to us for booklet describing it.

On March 25th go to the nearest Edison Store and hear the April Records

The April list of twenty-four new Records is made up of the choicest bits of vocal and instrumental music recently produced together with a sprinkling of things not new but good. These Records have been made by the best procurable talent with a skill and artistic finish that assure you rare pleasure in listening to them. And if you hear the April Records you'll buy—there's no doubt of that.

Ask your dealer or write to us for THE PHONOGRAM, describing each Record in detail; THE SUPPLEMENTAL CATALOGUE, listing the new April Records; THE COMPLETE CATALOGUE, listing all Edison Records in existence. Records in all foreign languages.

NATIONAL PHONOGRAPH COMPANY, 24 Lakeside Ave., Orange, N. J.

Edison Phonograph Monthly

VOL. VI. May, 1908 No. 5

Loosen Up

If we should ask every Edison Jobber and Dealer to raise his right hand to the question: "Are you to-day making the same effort to get business that you did six months ago?" we doubt if one in a hundred would put up his hand. Fully nine-tenths would frankly admit that they were not doing so and would defend their position with the claim that business did not warrant their making the effort or spending the money. This is one of the great drawbacks of quiet times. When everything is booming and everybody is doing a big business, every firm of any life advertises, circularizes and adopts every known method for getting business. The more they have the more they want. Their efforts add to the work of printers, salesmen, solicitors and scores of people in other lines. Those in other lines then come back and buy Phonographs and Records. It's a case of "tickle me and I'll tickle you."

But let something happen to business generally and everybody instinctively lets up in his efforts. Advertising of all kinds is cut down, salesmen are withdrawn and retrenchment becomes the cry. Many times this is done before a firm's business shows any signs of being affected and apparently only in obedience to a cry of "wolf." Clerks get the germ and use it as an excuse for relaxed efforts. The natural result of such a state of affairs is to make business poorer and times harder. The tickling game once stopped, the volume of everyone's business suffers. Those who have ready money hold on to it like grim death, fearful that it will not return if once spent.

Business to-day needs nothing but a loosening up on all sides. Edison Jobbers and Dealers can do their part by patronizing the printer, the newspaper publisher, by putting men on the road and doing all the things they did six months ago. It may seem unprofitable for a short time, but the printer will put more men at work, the newspaper publisher will extend his efforts, the families of salesmen will have more money to spend and before long the wheels of business will hum as merrily as ever. Put your shoulder to the great business wheel and do your part in making it go round. Don't lie down, crying: "It's no use." That is not the part of the up-to-date American business man.

An Absurd Claim

Our attention has been called to the fact that the traveling salesmen from a competing company are making the statement that the reason for the difference in price between their Records and ours, is due to the fact that we are compelled to pay them a heavy royalty.

This statement is so absurd on the face of it, that we have never paid any attention to the matter, but in order that the trade may be fully posted on the situation, we need only say that the report is absolutely false and without any foundation, and that the difference in price between the Edison Records and those supplied by our competitors, is due to the care with which our Records are made, the special quality of materials used, and the high character of labor employed, all of which make it necessary for us to obtain a higher price for our goods.

Orders for No. 8591 Held Up

We have no more moulds or masters at present of Record No. 8591, "Come Ye Disconsolate," mandolin solo, by Samuel Siegel. It is expected that we will be able to secure Mr. Siegel some time during the month to make over this selection, and that we will again be in a position to fill orders about the middle of June. In the meantime we ask the indulgence of Jobbers who have orders on file for this selection.

Now is the time to sell Phonographs to people going to the country for the summer. They cannot take their piano and as they want music even in summer, what better substitute can they get than an Edison Phonograph.

Advance List of New Edison Records for July, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before June 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on June 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on June 25th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after June 20th, but must not be circulated among the public before June 25th. Jobbers and Dealers may, however, deposit Supplements and Phonograms in Mail Boxes or Post Offices after 5 P. M. on June 24th, for delivery on the following day. Jobbers are required to place orders for July Records on or before May 10th. Dealers should place July orders with Jobbers before May 10th to insure prompt shipment when Jobber's stock is received.

9866 Polish Dance, No. 1 — **Edison Concert Band**

A famous composition by a famous composer and known the world over. Our Record gives a true interpretation of the grace, gay abandon and fire of this national dance of Poland. It is played in mazurka tempo. Composer, X. Scharwenka; publisher, Carl Fischer, New York.

9867 Needles and Pins — **Edward M. Favor**

In three verses and three choruses the old saying, "Needles and pins, when a man marries his troubles begins," is made the subject of a funny travesty on married life, beginning with the little hen-pecked man who wrote "No Wedding Bells for Me," and ending with Yankee fathers who sell their daughters to the highest bidder among the dukes and counts and earls. Each chorus includes a phrase from the "Bridal Chorus." Orchestra accompaniment. Music, J. Fred Helf; words, Edward Moran; publishers, Helf & Hager Co., New York.

9868 Tell Me the Old, Old Story — **Anthony and Harrison**

Few gospel hymns are better known or more popular than this selection by W. H. Doane. Many hymns have been written by Mr. Doane, but it is doubtful if any of them have more admirers than "Tell Me the Old, Old Story." The words were written by Miss Kate Hankey. The singers are accompanied by the orchestra.

9869 Cupid's Wedding March — **Albert Benzler**

A bells solo of one of the songs featured in "Playing the Ponies." It is a charming, simple melody, particularly well adapted for a bells solo. The arrangement includes a phrase from the Bridal March from "Lohengrin," effectively played on the chimes. Composer, Theodore Morse; publisher, F. B. Haviland, New York.

9870 O'Brien Has No Place to Go — **Edward Meeker**

O'Brien is the father of three pretty daughters of marriageable age. Each has a "steady," and not infrequently they all call at the same time. Then Nellie goes to Dad with this plea:

Don't go into the front room, Dad,
Nancy's in there with a sailor.
Daddy, dear, won't you stay out here,
Rose has her friend in the parlor.

Don't go into the kitchen, dad,
I'll be out there with my beau,
Since each of his girls has a steady young man,
here, O'Brien has no place to go.

But one night O'Brien came home tight and did the turning act of the proverbial worm. When things had quieted down the three young men were on the street, much the worse for "Daddy's" persuasive methods and O'Brien had changed the title of the song. Orchestra accompaniment. Music, George Evans; words, Stanley Murphy; publisher, Jerome H. Remick & Co., New York.

9871 Whistling and Singing Farmer Boys — **Harlan and Belmont**

An amusing combination of whistling and singing, together with a lively and realistic rural scene between the farmer and his "boys." The chorus is the well-known song about the farmer who had a dog named "Bingo." The Record is one of unusual attractiveness and certain to be popular. Mr. Belmont's whistling is clever, as usual. Orchestra accompaniment. Words, Joe Fulton; arrangement is special and not published.

9872 Smarty — **Ada Jones**

What grown-up cannot look back to his or her childhood days and recall the chorus of this song as follows:

Smarty, Smarty, Smarty, thought you had a pony,
Don't forget what the teacher taught
You'll be sorry if you are caught,
You pets' to tell your mother.

Just see if you don't care,
You're reading but a smarty cat,
So there, there, there.

Miss Jones cleverly adds to the realism of the song by singing it in the childish accents of a five-year-old. Orchestra accompaniment. Music, Albert Von Tilzer; words, Jack Norworth; publishers, York Music Co, New York.

9873 Fawn Eyes — **Edison Symphony Orchestra**

A new selection by the composer of "Lola," (our Record No. 9417). It is graceful in theme and has all of those characteristics familiar to admirers of recent popular Indian songs. Composer, Charles L. Johnson; publishers, Charles L. Johnson & Co., Kansas City, Mo.

***9874 Parson Jones' Three Reasons** — **Arthur Collins**

Parson Jones is about to leave his congregation. In consequence of a notice given out the week before, the church is crowded to hear his three reasons for leaving. They are given in the chorus:

Firstly, these ain't no love in this congregation,
Secondly, God a Mighty knows I've been here;
Thirdly, I've got a better offer to accept.
Ain't had a cent of salary in a year.

And thirdly, I done accepted a call
As chaplain of the pen'tentiary,
And I go to prepare a place for you all.

The parson also makes an address between the first and second verses. Orchestra accompaniment. Music and words, Arthur Longbrake, (writer of "Brother Noah Gave Out Checks for Rain," our Record No. 9642); publisher, Joe Morris, Philadelphia.

9875 When We Are M-A-Double-R-I-E-D — **Ada Jones and Billy Murray**

This unique spelling duet is one of the successful songs in "The Talk of New York," in which it is sung by Nella Bergen and Jack Gardenier. The love passages between the happy pair as sung in the chorus are particularly original. A witty dialogue follows the first chorus. Music and words, George M. Cohan; publisher, F. A. Mills, New York.

9876 Queen of the Earth — **Alan Turner**

An old standard song very much admired by vocalists who cater to audiences that enjoy music of the higher grade. Mr. Turner's rendition is that of the true artist. Orchestra accompaniment; music, Ciro Pinsuti; writer of words unknown; publishers, Oliver Ditson Co., Boston.

9877 Whistling—Intermezzo — **Edison Military Band**

An intermezzo full of bright and catchy melody, introducing a chorus of whistlers, who assist in emphasizing the principal theme. The whistling feature is a decided novelty in band Records. It will make the selection a pleasing and popular number. Composer, Leon Copeland; publishers, L. J. Sovelle, Milwaukee, Wis.

9878 You Have Changed the Winter in My Heart to Glad Spring-Time — **Manuel Romain**

The title of this song leaves little to tell concerning its character or its sentiment, just as the fact that it is sung by Mr. Romain leaves nothing to say about its attractiveness as a ballad Record. After listening to the Edison Records made by Mr. Romain it is not hard to see why he was so popular as a member of Dockstader's Minstrels. Orchestra accompaniment. Music and words, Jean Havez; publishers, Helf & Hager Co., New York.

9879 When the Roll is Called Up Yonder — **Edison Mixed Quartette**

Another well known sacred hymn reverently and splendidly rendered by our Mixed Quartette. Messrs. Anthony and Harrison sing the verses as a duet and the quartette join in the refrain. This makes a new combination of duet and mixed quartette. Orchestra accompaniment. Music and words, J. M. Black; published in hymn books.

9880 I Was a Hero, Too — **Billy Murray**

Sam Bernard's big success in the musical comedy "Nearly a Hero." It defines in witty verse and chorus just when a man is really a hero. One of the occasions was when he was compelled to eat a mince pie made by his wife. The song tells of several other times, all combining to make the Record desirable from the comedy standpoint. You get every word, too, when Mr. Murray sings. Orchestra accompaniment. Music, Egbert Van Alstyne; words, Harry Williams; publishers, Jerome H. Remick & Co., New York.

9881 Medley of Irish Jigs — **John Kimmble**

An accordion solo of a number of well known Irish jig airs. The large and steady sale of Mr. Kimmble's Records shows how popular the accordion is throughout the country. This selection is made with a piano accompaniment as usual, bands and orchestra accompaniments serving to confuse the peculiar melody of the accordion. Original and not published.

9882 Topeka — **Frederick H. Potter and Chorus**

A spirited song descriptive of Indian life on the plains and telling of the love of an Indian brave for his little maid Topeka. The chorus:

*This selection will be illustrated on cover of the July *Phonogram*.

My own Topeka, I've come to seek her,
What'll he harness and hope and polish,
You're the queen of my heart.

If you'll become, dear,
My own Topeka, my sunflower bride.

Indian yells, tom-toms, bells and the quartette chorus are other features of this selection. Orchestra accompaniment. Music, Henry W. Jones; words, James O'Dea; publishers, Jerome H. Remick & Co., New York.

Collins and Harlan

9883 Nothing Hardly Ever Bothers Me

A jolly coon duet, full of mirth and laughter. This happy dusky couple never borrowed trouble and considered life "one big jubilee." Their motto was "Be cheerful while you may." When they died they expected to be dead quite a while, so while they lived they were going to laugh and smile. The music is of a typical rag-time character. Orchestra accompaniment. Music, Albert Von Tilzer; words, Jack Norworth; publishers, York Music Co., New York.

Allen Waterous

9884 If I Had a Thousand Lives to Live

A new song of high merit, full of deep sentiment and splendid melody. Rendered with true feeling and artistic finish. It will appeal to lovers of the better class of songs. The chorus:

If I had a thousand lives to live,
I'd give each one to you!
If I had a thousand hearts to give,
I'd give each one to you!

A thousand sorrows I would bear,
For one as fair, so true,
If I had a thousand lives to live,
I'd give each one for you!

Orchestra accompaniment. Music, Alfred Solman; words, Sylvester Maguire; publishers, Joseph W. Stern & Co., New York.

Edison Symphony Orchestra

9885 The Rose of Mexico Waltz

A typical Spanish waltz, fascinating in its dreamy rhythm. The principal theme is each time played by the mandolin, its dulcet tones adding to the charm of the Record. Composer, John J. Dunn; publishers, T. B. Harms & Co., New York.

Bob Roberts

9886 Common Sense

Another song hit by the writers of "He's a Cousin of Mine," (our Record No. 9422). Jim Green was a Tennessee coon, who was credited with being the bravest man in town. One day the circus came to town and Jim was offered one hundred dollars to lead the lion around. Jim declined, declaring that one hundred dollars wouldn't be of much use to him after his death. His chief reason for declining was because he had too much common sense. Jim thought it would be fine to go to war and fight. But when the battle field Jim could not be found. He sent the captain a note, however, stating that a soldier's life was too much like flirting with the undertaker to suit him, so his common sense compelled him to refuse to become a target for the enemy. Orchestra accompaniment. Music and words, Chris. Smith and John Larkins; publishers, Thompson Music Co., New York.

Ada Jones and Len Spencer

9887 The Frisky Farmer and the Modest Manicure

A vaudeville sketch which opens with a scene in a barber shop. The fun begins there: After the Irishman (who is slightly under the influence) has been tonsorily and electrically treated, the frisky farmer enters. He is at once taken in charge by the modest mercenary manicure, who proceeds to trim his nails and likewise his purse. The dialogue between the farmer and the manicure is extremely witty and the sketch concludes with Miss Jones singing "The Modest Manicure," a song from "The Hurdy Gurdy Girl." Orchestra accompaniment.

Steve Porter

9888 "He" and "She" in Vaudeville

"He" and "She" are two Irish characters in vaudeville. They are married and their stunt is to stand before the audience and abuse each other. Mr. Porter enacts both parts. "He" begins with a song to the effect that he is the bravest man in town. "She" butts in and asks

"What know ithing dit you ever did?"
"I prevented you toon dying an old maid, didn't I?"

Then follows an exchange of complimentary remarks of which these are samples:

Her. Silver mated, darlin', I know a man that would give tin thousand dollars to see you.
She. Who is he?
Her. A blind man.
She. Mebbe I'm not good lookin', but I dress out o' sight.
Her. Well, that's the proper place to dress. Say, I'm goin' to celebrate my birthday tomorrow.
She. Is it true you've been married a pretty nice fifty.
Her. Well, it seems that long.

Her. Say, you promised to give me a quarter of your salary every week.
She. Well, what did I give you?
Her. Twenty-five cents.
She. Well, that's a quarter ain't it?
Her. Everyone knows that you married me for money.
She. Well, it was the only way I could get it.
She. Is that so!

The sketch is original for our Record and not published.

Edison Military Band

9889 Cubs on Parade March

A new and spirited march, full of stirring strains and military dash. It is dedicated to the Chicago National League Baseball team. Like these champions, it is a sure winner. Composer, H. R. Hempel; publisher, Tomas F. Deather, Chicago.

Advance List of Edison Grand Opera Records Supplement Number 10, July, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before June 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on June 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on June 25th. Supplements will be shipped with Records *when ordered*. These may be distributed to Dealers after June 20th, but must not be circulated among the public before June 25th. Jobbers are required to place orders for these Grand Opera Records on or before May 10th. Dealers should place Grand Opera orders with Jobbers before May 10th, to insure prompt shipment when Jobber's stock is received.

B. 65 Eri tu, ("And would'st thou") "Un Ballo in Maschera" *Verdi*

By ANTONIO SCOTTI, Baritone. Sung in Italian, Orchestra Accompaniment

Verdi's opera "Un Ballo in Maschera"—"The Masked Ball" scored one of the big successes of *Ricardo*, Earl of Warwick and Governor of Boston, *for Amelia*, wife of his secretary *Renato*. Conspirators plot to take the life of *Ricardo*, and when *Renato* discovers that the Governor is in love with *Amelia*, he—*Renato*—joins them and is chosen as the one to assassinate *Ricardo*. The final scene is a masked ball. The love between *Ricardo* and *Amelia* being an innocent one, the *Rebato* penetrates the disguise of *Ricardo* and stabs him to death. The present record is sung by *Renato*, near the beginning of the third act. He has accused his wife *Amelia* of infidelity and this aria, the text of which begins: "And would'st thou thus have sullied a soul so pure, in whose chasteness my spirit delighted!" It is an appealing, dramatic moment of the opera.

B. 66 Stride la vampa, ("Fiece flames were raging") "Il Trovatore" *Verdi*

By MME. JACOBY, Contralto. Sung in Italian, Orchestra Accompaniment

The story and music of "Il Trovatore" are too familiar to need any particular introduction, so there remains but to be pointed out the dramatic circumstances attending this canzone. It occurs as the second number of the second act, coming immediately after the familiar "Anvil Chorus". The scene is that of a gypsy camp in the mountains of Biscaya. *Azucena* sings this song to the gypsies obviously in order to paint the gloom of the gypsy's life, but in reality it is a flames are raging, loud clamor fills the air, mad crowds rush forward, eager for horrors." The melody of this canzone is one of the best beloved in the entire score, its frank tunefulness not having lost its charm with years.

B. 67 Sono un poeta, ("I am a poet") "La Boheme" *Puccini*

By FLORENCIO CONSTANTINO, Tenor. Sung in Italian, Orchestra Accompaniment

Rodolfo, a poor poet, lives in an attic in the Latin Quarter. With him, as with his three friends, *Schaunard*, *Marcello* and *Colline*, life is gay and care free so long as there is a coin in the purse; and when there is none, then the task of living becomes wearisome and cruel. Into his attic there comes to *Rodolfo*, the youthful *Mimi*, a fellow lodger, and she begs for a light for her candle. She is faint and swoons, dropping her candlestick and key. *Rodolfo* revives her and she goes on her way, with her candle lighted; but she returns in an instant to look for her key, and then a draught from the open door blows out both her own candle and *Rodolfo's*. In forth a little cry of surprise, and he finds that her hand is frozen, and holds it to restore it to warmth. It is then that Rodolfo confides to *Mimi* that he is a poet, living by means of his fancy's thoughts. The composer Puccini has taken this opportunity of writing one of the finest lyric bits to be found in the entire opera.

B. 68 Ihr habet mich willkommen, ("Ye bid me welcome")
"Der Trompeter von Sackingen" *Nessler*

By OTTO GORTZ, Baritone. Sung in German, Orchestra Accompaniment

Victor Nessler's opera "Der Trompeter von Sackingen" is a work that has enjoyed an enormous success in Germany. It is still frequently produced there; and in other countries the work is known by its favorite songs. The present song is one of these numbers. The English

text begins: "And so ye bid me welcome! A stranger here am I! Restless, inconstant, ever from North to South I fly." And then it proceeds: "What vainly I have sought for, tho' every place I've scanned, at last my sight encounters in this enchanting land." The music is frankly melodious, rising at its close to a moment of climax which voices the mood of the wanderer who has found his goal.

B. 112 Il fior che avevi a me to dato, ("The flower you gave to me") "Carmen" *Bizet*

By ANGIOLO PINTUCCI, Tenor. Sung in Italian, Orchestra Accompaniment

When first the fickle *Carmen* spies the soldier *Don Jose*, she begins to coquet with him and finally plucks a flower from her hair and throws it in his face, while she scampers away. *Don Jose* picks up the flower and tucks it away in the bosom of his military coat. It follows afterward that *Carmen* cajoles him to aid in her escape, while on his way to prison; then the two meet again in an inn, and here she dances for him, and makes him a slave to her charms. He is recalled to the sense of duty by the trumpet signal of his regiment, and he prepares to leave. In rage, that he can have thoughts other than of her, *Carmen* bids him go, and jeers at his declaration of love. He protests, and taking the faded flower from its hiding place in his uniform, he sings is romance, which is one of Bizet's most lyric inspirations.

Trade Information for Dealers

Sales Dept. Bulletin No. 5—April 13th, 1908

FOR UNITED STATES AND CANADA DEALERS

Correspondence concerning this Bulletin should mention its number and be addressed to National Phonograph Co., *Sales Department*, Orange, N. J.

We list below one selection which has recently been made over. Continuing the plan already begun, we will print this selection as part of the July printed matter prepared for retail distribution.

8800 Ballet Music from Coppelia Edison Concert Band

Did you follow our advice last month and order a stock of these made-over selections? If not, don't you think they are worth some consideration, at least?

Sales Dept. Bulletin No. 6—April 22, 1908

FOR UNITED STATES AND CANADA DEALERS

Correspondence concerning this Bulletin should mention its number and be addressed to National Phonograph Co., Sales Department, Orange, N. J.

Dealers are hereby advised that inasmuch as we have no more moulds or masters of them, the following selections will be considered as cut-outs after our present stock is exhausted.

12093	El Cafe de Puerto Rico (Spanish)	Vargas
12155	Yo quiero un besito (Spanish)	Vargas
12184	Yas Cigarreras, De Madrid a Paris (Spanish)	Vargas
12407	Martha, nimm zum frohen Bunde (German)	Walter and Hofmann

Texas Sentiment

"When its moonlight, Mary darling, 'neath the old grape-arbor shade."

I've just been playing this on my Edison Phonograph, and the words and the music keep ringing in my ears.

When all the world seems dark and dreary and all affairs seem sad and weary, and my mind's all topsy-turvy, I find there is nothing—nothing mechanical at least—that brings sweet solace to my tired and weary soul like a few choice selections on the Edison Phonograph; something catchy by Bob Roberts or Billy Murray or something snappy or otherwise by Ada Jones, or a sentimental song by Manuel Romain.

I want to re-echo what Thomas A. Edison, its inventor, said: "I want to see a Phonograph in every home." It's a great machine and I am glad he invented it; why life without it would be as desolate as a home without happiness— or its home newspaper.—*From the "Midnight Musings" of the editor of the Belton, Texas, Evening News.*

Advance List of New German, Polish and Swedish Selections

The Records named below will be ready for shipment from Orange between June 1st and 10th. Samples of any or all of them will be shipped May 1st to such Jobbers as place orders for them. None will be shipped without orders. Jobbers' stock orders received by May 20th will be shipped as fast as possible after June 1st. Care will be taken to make shipment at one time to all Jobbers in the same city. Separate supplement of each list will be shipped with Records to all Jobbers who request a supply. State quantity required of each kind.

10 German Records

15189	Edelweiss, *Peuchet*	Robert Leonhardt
	Mit Orchesterbegleitung	
15664	Ich bete an die Macht der Liebe, *Bertmanski*	Nebe-Quartett
	Mit Orchesterbegleitung	
15669	Lotte, du süsse Maus, *Morse*	Max Steidl
	Couplet mit Orchesterbegleitung	
15670	Goldfahlied, aus "Geisha," *Sidney-Jones*	Hofopernsängerin Gertrud Runge
	Mit Orchesterbegleitung

20513	Natmarschen,	Herr O. Edberg och G. Wennman
20514	Serenade,	Herr Kållstrôm
20515	Canlos sång,	Herr Nyblom

Stock Up and Advertise

Our advertising campaigns are designed not only to cover the whole field of magazine readers but by special advertising in local newspapers to stir up a wide universal interest in all parts of the country. This great publicity will result in a greater demand than ever before for Edison Phonographs and Records. Every Edison Dealer must get the advantage of this, but the man who reaps the greatest profit from it will be the man who carries a good stock. The "I want what I want when I want it," spirit is always in evidence among buyers of Edison Phonographs. If another Dealer has the machine desired, the purchaser will seldom wait until the first has stocked up. The small Dealer can never be expected to carry a full stock of Records or a large number of Phonographs; but if he studies his customers' tastes he will seldom go wrong in ordering from the monthly list.

No Dealer should imagine that because we spend an enormous amount of money in advertising and advertising literature, he is relieved from doing any for himself. He should supplement what we do with advertisements in his home papers, fitted to local conditions. If he is in a district given up to agriculture, he should make special efforts to make sales to farmers. He should remember that farmers cannot always come to town as readily as other people, and consequently may not hear and buy new Records as often as they would if they were close to the Dealer's store, and able to hear them played over. One of our Dealers makes a monthly list of visitors to his store, and when he finds Phonograph owners who have not been in, he takes the Records to their homes, and rarely fails to make sales.

It's a peculiarity about the Phonograph, and a peculiarity that is a money making one, that people who do not buy new Records and use their machines often, are inclined to regard it as an unprofitable investment. It is like having a horse in the stable eating his head off in idleness. Most people object to this state of things and Phonograph owners seldom like their machines long idle. There is a deal of sentiment rallied about the old songs and, although this may be genuine, it is the new ones that are in demand, and it is not often that anyone is content with a few Records. Human vanity plays some part in the matter of Record collecting. One Phonograph owner does not like to feel that his collection is numerically far inferior to that of a friend, and the tactful Dealer by recommending Records that he knows to be good will often make large sales, where the man who is not enterprising and does not study his customer will sell very little. It pays Dealers to know all they can about the Records they sell, and to know, makes the selling a hundred per cent. easier.

Among the Jobbers

The Pittsburg Phonograph Co., of 937 and 939 Liberty avenue, Pittsburg, was completely burned out on the night of April 9th, causing a loss of from $80,000 to $85,000, covered by insurance. The company occupied the two lower floors of the building and had a storage room on the fourth floor. The blaze started on the third floor, which was occupied by the Hamburg Furniture Company. The loss on the building is fixed at $15,000. The Pittsburg Phonograph Company have secured temporary quarters, have put in a stock of goods and are already filling the orders of their Dealers.

The Utica Cycle Co, Jobbers of Edison Phonographs and Records in Utica, N. Y., have purchased the property at 11 and 13 Columbia street, and will erect a modern four-story building 55x112 feet. The site will be completely cleared and the work of erecting the new block will be started about May 1, with the expectation that it will be finished about October 1. The front and side walls of the building will be of Indiana limestone, which will give it a most attractive appearance. On the ground floor there will be two stores having a frontage of about 26 feet, with an entrance to the upper floors in the center. The Cycle Co. will use the store No. 13 as an office and salesrooms, the second and third floors as stock rooms and the fourth floor as a shop and repair department. The Utica Cycle Co. began business in 1895. The firm consists of M. J. and W. F. Carroll.

Grinnell Bros, Edison Jobbers at Detroit, Mich., have removed to their new store on Woodward avenue. The occasion was celebrated informally and it is expected that the formal opening will take place later in the spring. The removal marks an epoch in the business history of Grinnell Bros., who started in 1882 in a small way. In a little over twenty-five years the firm has grown to be one of the largest in the middle west. The new building contains seven floors. Fourteen rooms have been set aside on the basement floor for showing Phonographs and talking machines. The floor also has a capacity for 200,000 Records. For some time to come

Grinnell Bros. will have two stores on Woodward avenue, and besides their establishments in Detroit, the firm have seventeen branch stores in the largest cities of Michigan and one branch at Madison, Wis.

The corporate name of the Clayton Music Co., Edison Jobbers at Salt Lake City, has been changed to the Clayton-Daynes Music Co. In all other respects the business is unchanged.

R. C. Bollinger, Music House of Fort Smith, Arkansas, are new Edison Jobbers. A large part of their initial order for approximately $12,000 worth of Phonographs and Records has already gone forward. The firm is one of the largest and oldest established in their section of the country, having been actively engaged in the sale of high grade musical goods since 1878. For some years they have had remarkable success as Edison dealers and Mr. Bollinger has been of the opinion that they could repeat their success in the jobbing field. W. H. Petrie, late of Lyon & Healy, Chicago, is to have full charge of the talking machine department, and altogether it looks as if the Bollinger Music House are to be very important factors in the distribution of Edison goods.

New Equipment an Achievement

When you sell the new Edison Phonograph, you sell a complete instrument. The new horn and swinging crane have eliminated the necessity of additional purchases on the part of buyers. You are relieved of the expense and trouble of carrying horns and pleasing a buyer with what you have in stock.

The customer gets a better horn, a handsomer horn, and a horn more suited to the Phonograph, for less money than he or she would otherwise spend. You are assured a profit on the horn as well as on the Phonograph, as one cannot be sold without the other, and the price of both cannot be cut by anybody. The Edison Phonograph was never so attractive a proposition as it is now.

Idelia Reproducers and Recorders

The following prices have been fixed for the Edison Reproducers and Recorders, when made with oxidized bronze finish, as used on the Idelia Phonograph: Reproducer, $6.00; Recorder, $4.00. Both prices are subject to regular machine discounts.

London Office Removed

Most of the departments of the National Phonograph Company, Limited, London, have been moved from the Clerkenwell Road address to the Edison Works at Willesden. Work on the offices has been pushed with all possible speed, and much has been accomplished. Considerable work, however, still remains before the various departments can settle down into the regular routine. The offices, when the further improvements are completed, will be everything that can be desired. The Recording Department will remain for the present at 103-105 St. John street, the old address, until suitable premises can be secured in the West End, where a city office will also be maintained in place of the Clerkenwell Road address. By centralizing practically the whole of the work at Willesden, the company will save time in many ways, much to the advantage of its trade. Present trade conditions in Great Britain are satisfactory, all things considered, and the future holds out good prospects of a considerable all-round trade increase in both machines and Records.

Personal

F. K. Dolbeer, General Manager of Sales and Credit Manager, spent three weeks during April on a trip through the South. He visited nearly all of the Jobbers in the Gulf States.

W. E. Gilmore, President of the National Phonograph Company, with his family, went to Virginia Hot Springs, on April 15th for a two weeks' stay.

Mr. and Mrs. Thomas A. Edison and party have returned from their vacation at Mr. Edison's plantation, Fort Myers, Florida. Mr. Edison has almost entirely recovered from the effects of his recent operation.

Binder for Phonograph Monthly

Do you file all numbers of the EDISON PHONOGRAPH MONTHLY as issued? If so, do you have any trouble in finding them readily when wanted? Inasmuch as we have practically discontinued the mailing of separate form letters covering changes in prices, etc., to Dealers, and further since we will in future print all notifications of this kind in the PHONOGRAPH MONTHLY, it is important that you keep all issues in some convenient manner for easy reference. Although Dealers in general are not aware of the fact, we are furnishing a neat binder, which will contain twelve issues, at 50c. If your Jobber does not carry them in stock, we will fill your order direct, post paid, upon receipt of the above amount.

Edison Phonograph Monthly

VOL. VI. May, 1908 No. 5

Tray System and Larger Record Stocks

There are two features connected with the business of selling Edison Records about which few Dealers disagree, namely: Keeping Records according to some approved system and carrying the full list of American selections. In some of the smaller places it may not be profitable to carry every selection in the Edison catalogue, but no matter how small a Dealer's stock of Records may be, there is no question about the wisdom of keeping the stock in a systematic manner—in such a way as to know just what titles are in stock, and be able to find any one of them at a moment's notice. Making proper allowance for the merits of all other systems of carrying Records, none seem to possess as many advantages as the one known generally as the tray system, originally devised by Victor H. Rapke and now used in probably four-fifths of the large stores carrying Edison Records. This system keeps Records clean and compact. It makes an attractive display and with it Records are always found quickly. No matter how small or how large a Dealer's stock may be, it is easy to find any Record wanted. We have no interest in the sale of anything that enters into the tray system. Our interest lies in selling more Records, and we know that Dealers who carry Record stocks in a systematic manner sell more goods than those who do not, and the better the system the larger the sale. Therefore we favor the tray system.

Hundreds of Dealers are to-day pointing with much pride to the fact that they carry every Edison Record in the domestic catalogue. They make it a feature of their advertising, they announce it in their circulars and they glow with satisfaction when they say to customers: "Name any Edison Record you want and we can produce it in an instant." But they don't carry the full line for the pleasure it gives them. They carry it solely because of the greater profit. It is nothing but good business. We can point to scores of Dealers who were persuaded somewhat against their judgment to put in the full line, but who to-day frankly admit that it was the best move they ever made. Hundreds of Dealers still labor under the mistaken idea that their towns are too small to make the full list profitable. Dealers in towns of but 500 population have made it a success. Even where the full list is not possible, it is an unquestioned fact that the greater the number of titles carried the larger the profit earned. The Dealer who carries 200 different titles would do better with a total of 400; and one with 400 could double the number with a proportionate increase in profit. The subject is one worthy the thoughtful attention of all Dealers who are carrying a limited Record stock without a proper system.

French Records Popular

The National Phonograph Company's list of French Records has proven to be in great demand among the French Canadians employed in the mills in Maine and other border States.—*American Exporter.*

An Original Business

"Canned Music Our Specialty," is the original designation given their business by the Musical Echo, James L. Andrews, Manager, Edison Dealers at Bradford, Pa.

Printed Matter

Copies of the April edition of the Record Catalogue (American selections) Form No. 1300 have just been mailed to all Dealers. Shipments were made to Jobbers as early as March 1st and all Jobbers now have a supply on hand. The only difference between this and the previous edition is the addition of the Records for January, February, March and April—a difference not sufficient to affect the usefulness of such copies of the December edition as Dealers may have on hand. They should be used up before getting a supply of the later edition.

A limited edition has been printed of a four-page folder advertising the Edison Idelia Phonograph. The new machine is shown on the inside pages, printed in four colors. A description is given on page four. In cities or towns where there are a number of wealthy people, Dealers should get a few of these circulars and mail them to such individuals, accompanied by a specially written letter on the subject. Many people can be induced to buy a Phonograph of this kind who otherwise would not consider doing so. The Idelia is a handsome machine and well worth the attention of the trade.

We have in stock a small quantity of three-color prints of our oil painting, "The Phonograph," and will take pleasure in filling Jobbers' orders for a limited supply while they last. The size of the print itself is 6xg inches, on paper 9x12 inches in size. Dealers will undoubtedly find use for two or three in connection with any window display they might make.

In announcing last month, the appearance of a new hanger, Form 1292, "As a Protection to the Public," etc., we should have stated that the posters in question would be packed with the May monthly printed matter sent to Jobbers, which would in most cases reach them before the 15th of April. If your Jobber delayed filling your order for a copy, it was probably due to the late arrival of his supply. At any rate, he has a quantity of them now. If you have not done so, secure a copy at once and display it in a conspicuous position in your store, as proof to your customers that certain restrictions are placed by us on the sale of Edison goods.

Copies of a new edition of the Accessories Catalogue has just been mailed to the entire trade. It is Form No. 1519. It contains the list prices on a number of articles not found in the machine catalogues. Dealers should keep the copy mailed them, so as to have it handy for easy reference.

May Advertising

The full page magazine advertisement shown on the last inside page of this issue appeared in the latter part of April in the following periodicals, comprising the best and most widely circulated publications of their kind in this country: Ainslee's, Associated Sunday Magazine, Collier's Weekly, Cosmopolitan, Delineator, Everybody's, Ladies' Home Journal, Ladies' World, McClure's, Munsey's, Outlook, Pearson's, Puck, Saturday Evening Post, Success, Sunset, Woman's Home Companion, World's Work and Youth's Companion.

The back cover in the Easter number of Collier's Weekly, dated April 11th, referred to last month, was a beauty. We looked for something very attractive, but the printed page far exceeded our expectations. Our advertisement was designed by Will Bradley, of Collier's, to harmonize with the front cover and we are inclined to think that we had the more attractive page of the two.

The newspaper advertising went on as usual, the two large advertisements appearing on April 8th and 25th, in the same list of prominent daily papers as before.

The illustration in the May magazine advertisement is from a sketch by J. J. Gould, of Philadelphia. It is the first of a new series, each one of which has been drawn to illustrate an idea in connection with the Edison Phonograph. Each will be an interesting picture aside from its use for advertising purposes.

One Year After

Just one year ago this month we made our bow as Jobbers of Phonographs and talking machines. Our only regret is that we did not start in this great business long before.

Our success has seemed wonderful to us, and we know that our service and treatment has been satisfactory to the trade, or we could not have built up a business in one short year, which is now the largest of its kind in this section of the country.

We know that your efforts have helped us to do this, and we want to thank you most sincerely for contributing so generously to our success, and trust that during the coming year we may receive even a larger share of your business.—*Letter to Trade from Ross P. Curtice Co., Lincoln, Neb.*

Copyright Legislation

When asked recently for an opinion concerning the proposed compromise copyright bill before Congress, Frank L. Dyer, general counsel for the National Phonograph Co., who has followed all the copyright developments with great interest, and who spoke at the hearings, said:

"The National Phonograph Co. have signed no agreement providing for a two-cent royalty. The agreement to which you refer does not appear to include any talking-machine manufacturer.

"It was suggested by Senator Smoot at the close of the copyright hearings in Washington, on March 28, that the conflicting interests, if possible, should agree on some mutual agreement, and it was the understanding that the conferences for this purpose should be held in New York.

"Admitting that copyright protection can constitutionally extend to talking-machine records, and that the public interests require new legislation on this point, my client, the National Phonograph Co., is willing to agree to any fair and reasonable arrangement. I am convinced, however, that the scheme is neither constitutional nor expedient. Masters of this sort, involving enormous commercial interests, cannot be disposed of hurriedly, but should have serious consideration in order that the rights of all parties may be protected.

"I am willing at any time to meet the responsible interests which favor the new legislation, and to discuss the matter fully with them with a view of reaching some mutual understanding, but I certainly cannot permit my company to be prejudiced in any way by any so-called 'compromise' to which it is not a party, and which appears to have been made by persons having no

Shelving from Record Boxes

F. M. Atwood, Edison Jobber at Memphis, Tenn., recently wrote to the *Talking Machine World* as follows: "I have lately increased the capacity of my Edison Record bins from 12,000 to 22,700. The new part I consider to be both novel and original. It is what I call sectional shelving and can be run to any height or any length and is made entirely of lumber taken from the Edison 300 Record packing cases. They are first knocked entirely apart except the ends which are cut into pieces to form the height or distance between each shelf, leaving the cleats on to give strength. The shelf is then nailed on the top of two of the ends also piece on the back. They hold six records deep and ten wide. Of course, the width may be divided to suit the Jobber or Dealer. I use no partitions in them, but use gum labels over each number. They could also be used in connection with tray system. These shelves are set one on top of the other and the lower sections are held in place by quarter-inch iron rod run through a hole at each end. The base should be made about 6 inches wider to project in front and 12 inches high. This projection of the base is very convenient to step on in getting Records from the top shelves. I have stained the front of this a dark green and it makes a very nice appearance. In conclusion, will say that my wholesale business so far this month is more than double what it was the entire month of March last year.

The New Phonogram.

In accordance with our practice in the past we reprint below the terms upon which PHONOGRAMS may be had by the trade, this information being chiefly of value to firms who have become Dealers in the past six months:

DELIVERED WITH GOODS.

Blank, per 1,000 copies	$2.50
Imprinted, 500 copies, per 100	1.50
Imprinted, 1,000 copies	2.75

No orders filled for less than 500 copies requiring imprint, and all imprinting orders must be for multiples of 500.

Jobbers will be glad to supply Dealers on the above basis.

BY MAIL.

Single copies, per year	$ .20
Five copies to one address, per year	.40
Twenty-five copies to one address, per year	1.00
Fifty copies to one address, per year	2.00

Unless they have open accounts on our books, Dealers ordering PHONOGRAMS sent by mail are requested to send cash or stamps with their orders. The amounts are too small to handle in any other way.

PHONOGRAMS must be sold by the Jobber to his Dealers at the prices quoted above; any reduction of these prices will be considered as a violation of contract. The Jobber who gives PHONOGRAMS away is offering a special inducement to Dealers to trade with him, and may obtain thereby an unfair advantage over the Jobber who charges, in the same way as he would if he cut prices.

An Imposter

Franklin E. Bomberger went to York City, Pa., a short time ago and, representing himself as an agent of the National Phonograph Co., secured a lease of a prominent store for the purpose of handling a line of Phonographs and Records. His actions, however, aroused suspicion, and the officers of the National Phonograph Co., at Orange, were communicated with. They informed those interested that Mr. Bomberger was an imposter and asked that he be arrested. Bomberger, however, fled the city. A few days ago, however, he was captured in Lancaster and is now in the county jail in York awaiting a hearing. He is charged with improperly securing a signature to a lease for a room and with falsely representing himself as an agent for the National Phonograph Co. in making a lease for a Bell telephone.

Will Tell Story by Phonograph

If what I tell you here below is of interest to you, the PHONOGRAPH MONTHLY can have it for what it is worth. In 1857 a band of Sioux Indians massacred all the settlers at Spirit Lake, Iowa, 42 in all, and carried into captivity three white women and one little girl, 13 years old. In memory of this event the State of Iowa erected a monument on the grounds of the massacre and Spirit Lake has become one of the great summer resorts of the Northwest. The little girl that was taken captive fifty-one years ago is now the only survivor of the Spirit Lake massacre and during the outing season she returns to her father's log cabin on the banks of the lake in which her father, mother and little brothers and sisters were murdered by the Indians. Every one of the thousands of tourists who come to the lake go to the log cabin and ask the woman, now Mrs. Abbie Gardner Sharp, to tell them the story of the massacre. This she has told so many times that her nervous system has been wrecked by the continual strain. I went to see the old lady last week and induced her to repeat the story to my Edison Phonograph, which she did very distinctly. She immediately ordered a Phonograph and will use it in the old log cabin to tell of this harrowing event of her girlhood. Here in Spencer, where the Records were made, a constant stream of people have poured into my residence all day long to hear the Phonograph story of the Indian massacre.—*H. S. Jones, Edison Dealer at Spencer, Iowa.*

The Same But Different

"In offering an Edison Phonograph to the public on instalments," said an Edison Jobber recently, "We never quote the total price, as for instance, 'This Edison Phonograph and six Records, $40.00,' but placard the machine or quote as follows: 'This Edison Phonograph and six Records, $3.00 down and $1.50 weekly, for 25 weeks.' It never seems so high to a customer when the price is given in this way. Then, too, it enables us to get a better price for instalment sales than for cash."

This is something worth imitating by other Jobbers and Dealers.

You Get the Benefit

It isn't enough that we make the best Phonograph that can be constructed. It isn't enough that you know that the Edison is the best. It is necessary that the user, the Phonograph buyer, should know. That is why we advertise. This trade will go by your store if you do not encourage it to come in.

The Edison Won

A little incident occurred here recently which we thought you might like to hear as it is rather complimentary to your Phonograph. One of the moving picture halls in this city is using a —— —— to sing the illustrated songs, and also for music during the performance. We went to him at the request of many of our friends and Edison enthusiasts, and asked him if we might furnish the music for him for a time on ar Edison machine. He said that the Edison would not fill the room, but if we wanted to try it, he would allow us to do so, and would play both machines, and let the people decide which was the best. The majority decided for the Edison. The good point, however, is that it created a great deal of talk, and was the best advertisement we have had since we have been in business. As a result we have had an exceptionally good sale on Phonographs. We sold every Phonograph we had in stock, and were compelled to bring down a Phonograph from home to play Records. We have placed an order for more Phonographs, and will probably receive them to-day. Among the Phonographs sold in the last week, was one to another picture parlor in this city. We wish to say that The National Phonograph Co. is the most satisfactory firm we have ever dealt with. We are putting out a great many Phonographs in this vicinity.—*Shaw Bros., Aledo, Ill.*

Pertinent Points for Dealers

Quit thinking about what this or that competitor of yours can seemingly do so much better than you.

Stop fearing the retail mail order houses, and this or that store so much "bigger" than yours.

Work your own field. Use all your own tools. No matter how little you are you can win.

Determine what territory you can reasonably hope to draw trade from. Set out to make everyone in that territory know you and your store.

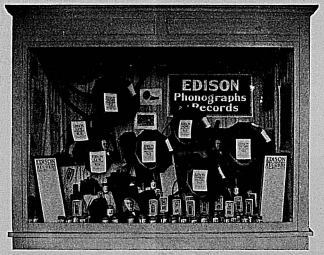
Admit that you cannot advertise on the scale of the big fellow. Don't try to do so. Do less, but make that distinctive.—*Talking Machine World.*

A great deal of favorable comment is heard regarding the extensive advertising in the local dailies by the National Phonograph Co. Not only is large space being used, but the text is forceful and convincing and presents in simple but strong manner the advantages of owning a phonograph. A systematic campaign such as the Edison people are making along these lines cannot but enable Edison dealers to make sales to many people whom they have not hitherto found it possible to interest.—*Chicago Correspondence of the Talking Machine World.*

Our Buenos Aires Branch

Printed below are reproductions of photographs showing the exterior of the building occupied by the Compania Edison Hispano-Americana, Victmonte 515, Buenos Aires, branch of the National Phonograph Co., in this city; also of a part of the retail department. The branch is in charge of T. J. Kennedy, who is shown standing in the right hand door, under the company sign. This company is making excellent headway in extending the sale of Edison Phonographs and Records, and in fact all Edison products, in South American countries. Jobbers and Dealers are rapidly being established and a large volume of business has been created. South America is regarded as being a great future field for Edison Phonographs and Records, the name of Edison being held in the highest esteem in those countries.

EXTERIOR OF BUENOS AIRES BRANCH



INTERIOR VIEW RETAIL DEPARTMENT

Window Dressing

The second photograph in the window dressing series is given below. The display was arranged in the same 6x10 window as that of last month and the same materials are used. The EDISON boxes have again been used as platforms upon which to place the Phonographs, and the Records, catalogues, signs, etc., are such as may be found in the store of the average Dealer. At a glance one forms the impression that there is too much in the window and yet it is this feature that gives it additional advertising value. It is striking enough to get the attention of the passer-by and cause him to stop and look it over in detail. When he does this, the mission of a window display has been accomplished.

The sides of this window are again draped with white cheesecloth and the same material is loosely placed on the floor. The boxes are also covered with cheesecloth. They are placed diagonally in the window, the horns of the machines pointing to the right hand corner. The Records festooned in the left corner in back are threaded on pieces of stout cord.

We shall be glad to have good photographs of displays made by Dealers. They must not, however, show glass reflections, for such photographs do not make good half tones.

WINDOW DRESSING EXHIBIT No. 2

A Good Reading Notice

E. O. Little, Edison Dealer at Auburn, Ind., sends the following reading notice advertisement, which he says has been widely commented on and has brought him much business:

THE NEW CITY HALL.

A committee of Councilmen will leave in a few days on a tour of inspection of city halls in cities the size of Auburn. They will make quite an extensive trip and expect to find a hall suited to the needs of Auburn. Incidentally while looking up city halls they will see if they can find a better or more complete line of Phonographs, Jewelry, etc., than that carried by E. O. Little, the Little Jeweler.

Have you a Phonograph? How long has it been since you have added (almost) to your list of records? Do you know how the Edison Phonograph is to-day, how pure the tone, how satisfying the reproduction? If you have one, you know. If you have not one, you ought to know—for easy to know. Come here and hear. Learn how inexpensive it is for a complete outfit, including records—and how favorable the terms. Then think of the pleasure you can give yourself, your family and your friends. Then think of the many evenings you can spend with the monologues and dialogues of the funniest comedians. And after doing all this you'll buy one—you simply can't help it.

Ed. sells Phonographs on easy payments and it will pay you to investigate his. One dollar per week proposition.

It is offered as a pattern for other Dealers.

A Good Store and Complete Stock

Under another cover I am sending you a picture of my Phonograph department, which perhaps will be of interest. The fixtures are black mission finish, and the drapery is red silk. The tops of tables, etc., are of red. We use jet black wrapping paper with the red

twine and the sticker to match. We keep the full list of Edison Records in the box trays, all labeled with numbers. I have found the den which the picture shows a great Record seller, and since the picture was taken it has been much improved with cushions, pictures, draperies, etc.—*E. G. Bassett, Bristol, Conn.*

Ready-Made Ads

Until we began printing ready-made ads in these columns and instituted our present system of compelling Dealers to send us papers showing that they had used the electros sent them, we did not realize the extent to which Dealers were advertising Edison goods. It is evident that Dealers are more and more alive to the advantages of doing local advertising and otherwise benefit from the national advertising being done by us. Hundreds of Dealers have taken advantage of our offer to send electros of the illustrations in these ready-made ads and have used with excellent results. These electros are furnished with the simple stipulation that Dealers getting them shall send copies of papers in which they are used. Some Dealers have refused to do this and have waxed sarcastic at our expense, but we regard the request as fair and shall continue the system. Furnishing these electros costs us a large sum of money in the aggregate and the least that Dealers can do is to show that they have used them. We will furnish electros of the illustration in the two ads on the next page, either single or double column, upon request. Order by number.

WHOLESALE PHONOGRAPH DEPARTMENT OF THE DENVER DRY GOODS COMPANY

EDISON
PHONOGRAPHS

DON'T let the young folks get into the habit of seeking amusement outside of their own homes. It's so easy to give them the best sort of amusement—clean, hearty, wholesome fun—in their own homes by means of an Edison Phonograph. It sings the songs they like to hear, gives them the monologues of clever comedians, plays the music they are fond of and renders waltzes and two-steps that set their feet a-tripping.

YOUMANS & CO.
409 Pearl Street
Duluth, Minn.

EDISON

PHONOGRAPHS

YOU needn't be barred from the fun of having an Edison Phonograph in your home simply because you can't afford to pay for it all at once. We'll be glad to fix it so that by paying a small amount down you can have the Phonograph delivered and begin to enjoy it at once, paying the rest in instalments that will be less than it costs you for an evening's entertainment at the theatre.

M. J. MONTAGUE

"One touch of harmony makes the whole world kin."

THE Phonograph would never have become the great popular entertainer it is but for Edison. He made it desirable by making it good; he made it popular by making it inexpensive.

The EDISON PHONOGRAPH

has brought within reach of all, entertainment which formerly only people of means could afford. It has even displaced more expensive amusements in homes where expense is not considered.

THE NEW RECORDS FOR MAY

are the work of artists of reputation. Each is perfect of its kind and many of your kind are included. You can hear them at any Edison store April 25th. Get of your dealer, or of us, THE SUPPLEMENTAL CATALOGUE, listing all the new May Records, THE PHONOGRAM, describing each Record in detail, and the COMPLETE CATALOGUE, which lists all Records now obtainable for the Phonograph.

NATIONAL PHONOGRAPH CO., Lakeside Avenue, Orange, N. J.

MAY MAGAZINE ADVERTISEMENT

Edison Phonograph Monthly

VOL. VI. June, 1908 No. 6

Summer Business

The Edison Dealer must begin now to talk up the Edison as the world's leading summer-time entertainer. No form of summer amusement is better than sitting on the porch or lawn and listening to the bright, snappy song hits from the new musical plays, or to charming band pieces played with real military dash and swing by the Edison Military Band. Did you ever hear an Edison on a summer's night across the lawn or over a stretch of water? Great! Here is an opportunity to paint a word-picture that will make your customers hungry for an Edison Phonograph, and don't forget the possibilities of the Edison for furnishing the finest two-steps and waltzes for summer dances.

How about the people who are going away for the summer? They will be in a position to take life much easier perhaps than at home, so must have more music to fill idle hours. They will not take their pianos along. Why not an Edison? It is so easy to carry one from place to place, and they can have the new Records mailed to them if they wish. Look through your city directory and pick out the names of persons who will likely go away for the summer. Suggest by letter or personal call that they take a Phonograph with them. Tell them all about how easy it will be to have the new Records mailed to them. This will land you a few sales.

How about your vacationists—business men and women who go away for visits of ten days or more? Some of them will take Edison Phonographs if you only bring it to their attention. Get up a list of business people who go away on vacations and go after them the same as you do after families who go for the summer. One letter could be gotten up that would do to send both classes—something like the following:

Dear Mr. Smith:

Going away this summer?

You will certainly want to take an Edison Phonograph with you.

It's so easy to carry as a hand-satchel. And there'll be no dull moments on your vacation.

You can pick out a selected assortment of good Records, and should you want others, we will gladly mail them to you.

When you get back you will have the Edison as a delightful reminder of your vacation, and a source of fun for us and of the distant and best entertainment in the world. Ask any Edison owner.

Have you heard the new type of Phonograph, which embodies Thomas A. Edison's latest ideas, including the big horn that gives a perfectly natural and musical tone?

Did you know that the new-process Edison Records will wear for years and be as good as the day you got them?

And, best of all, did you know we will sell a complete, up-to-date Edison "Gem" Phonograph for $12.50 or a "Standard" for $18.00 on terms as low as $1.00 a month?

Come in and hear a few of the new Records. It's a pleasure to play them whether you think of buying a Phonograph or not.

Yours very truly,

T. A. WILLIAMS & CO.

No doubt you can improve greatly on the above letter. However, it gives a good idea of what should be used. Put vacation talk into your newspaper advertisements. Remember, the quieter the places they go on vacations the more enjoyable an Edison will be. Whatever you do, don't let any present owners of machines slip away without taking their Phonographs and a lot of new Records along. When you mail out your next Supplements put in a type-written circular on this subject.

Here is another thought: why not interest the summer hotels and boarding houses in Edisons? Could anybody use one to any better advantage? Furthermore, think of what fine Record customers they would make. Their guests would enjoy the concerts, and dances could be arranged for any evening without the expense of a regular orchestra to furnish the music.

Are there any moving picture shows in your section? Any new ones starting up this season? They need Edison Phonographs for attracting people at the front and for the illustrated songs that are a feature of the programs of most of the shows of this class. Did you ever try giving free Phonograph concerts at lawn party fetes and other church entertainments during the summer? There are many such, and you can get some fine advertising by taking advantage of such occasions.

Advance List of New Edison Records for August, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before July 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on July 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on July 25th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after July 20th, but must not be circulated among the public before July 25th. Jobbers and Dealers may, however, deposit Supplements and Phonograms in Mail Boxes or Post Offices after 5 P. M. on July 24th, for delivery on the following day. Jobbers are required to place orders for August Records on or before June 10th. Dealers should place August orders with Jobbers before June 10th to insure prompt shipment when Jobber's stock is received.

9890 Sweet Sixteen March — **Edison Military Band**

Kerry Mills' latest march and one of his best. To many this is the only recommendation needed. "Sweet Sixteen" has an infectious military air running through it and has inspired the Edison Military Band to give one of their most spirited performances. A fine out-of-doors Record for summer nights. Music, Kerry Mills; publisher, F. A. Mills, New York.

9891 Only an Old Fashioned Cottage — **Manuel Romain**

A sentimental home ballad of very decided heart-interest. Mr. Romain has endeared himself to Phonograph owners everywhere by his charming rendition of songs of this type. The national reputation he first won as a minstrel tenor has been fully equalled by the great following he has built up as an Edison artist. The sub-title of the song is, "But it's all the World to Me." The words and air are so fascinating that they will hold one's interest from beginning to end. Orchestra accompaniment; music, Alfred Solman; words, J. Hayden-Clarendon; publishers, Jos. W. Stern & Co., New York.

9892 It Always Comes With the Summer — **Dorothy Kingsley**

A new Edison singer makes her debut in this dainty summer song and makes good too. While it is different in style from both, still there is much in this song to recall two other famous successes by the same composer, "The Bird on Nellie's Hat" (our Record 9450) and "When the Snowbirds Cross the Valley" (our Record 9459). Orchestra accompaniment; music, Alfred Solman; words, Arthur J. Lamb; publishers, J. W. Stern & Co., New York.

9893 Lady Binnie and the Shores of Lake Erie — **William Craig**

A new Edison artist, William Craig, the violinist, of Glenburnie, Scotland, is presented with this Record. Mr. Craig was especially engaged to give us a series of the celebrated Scotch dances, Strathspey and Reel. His first selection offers an opportunity for some dexterous bowing and shows him to be a violinist of very unusual ability. Piano accompaniment. Original and not published.

9894 I Want to be Loved Like a Lending Lady — **Ada Jones**

The comic song success that Marie Dressler has used to delight thousands in "The Girl Behind the Counter." Mandy Lee's beau hugged too much like a bear to suit her high ideals. What she most wanted was to be wooed and won in the tender passionate way of her favorite stage heroes. Ada Jones is entirely at home in this selection. Orchestra accompaniment; music, Herman Avery Wade; words, Paul West; publishers, J. W. Stern & Co., New York.

9895 Yankee Doodle Comes to Town — **Billy Murray**

General U. S. Grant used to say he only knew two tunes; one was Yankee Doodle and the other wasn't. Here is a "Yankee Doodle" song that is a sure enough "dandy." It is being featured in the latest Geo. Cohan show, "The Yankee Prince." We think this George Cohan-Billy Murray number is due to repeat the success of "Yankee Doodle Boy" (our Record 8900) and "You're a Grand Old Flag" (our Record 9256). Orchestra accompaniment; music and words, Geo. M. Cohan; publishers, Cohan & Harris Pub. Co., New York.

9896 By the Old Oaken Bucket, Louise — **Frederic Rose**

One of those songs, distinctly popular in flavor, that the public seem never to tire of. It recites "Love's old, sweet story" in a setting that is very familiar to most:

Let us wander over yonder, where in childhood,
I first told you love's story old, my dear Louise,
Down the hillside past the millside, through the wildwood,
To the little rustic bench beneath the trees.
Can't you see the moonlight gleaming on the well, dear,
And the bucket hanging low, ready for a drink,
And to know 'twas love, tonight he's dwelt, dear,
Those happy days let's live them o'er again.

By the old oaken bucket, Louise,
While the moon shot its light thro' the trees,
There I drank from your eyes, 'neath the soft summer skies,
That sweet story old, and yet never told.
In the cozy mossy dell, dear Louise,
By the old oaken bucket we'll rest well, on my knees,
And I swear I'll never, love to you, cease to be,
By the old oaken bucket, dear Louise.

Mr. Rose sings the entire selection in capital voice and the effect of an exceedingly pretty refrain is augmented by an accompaniment of bells and violin. Orchestra accompaniment; music, Harry L. Davis; words, Earle C. Jones; publishers, J. W. Stern & Co., New York.

9897 Forest Whispers — **Edison Symphony Orchestra**

This is the kind of selection in which the Edison Symphony Orchestra most delights. The music can best be described as softly sweet with a perfect blending of remarkably lifelike bird whistling and some clever bells solo work. We do not know of an instance in which music and title have fitted one another better, for the effect of this piece, as played by the Symphony Orchestra, is about as soothing as a trip through a picturesque stretch of woods in mid-summer. Music, F. H. Losey; publisher, Carl Fischer, New York.

9898 Mother Hasn't Spoke to Father Since — **Arthur Collins**

It seems Father had a letter in his pocket from some other lady whom Mother at once took to be an Affinity. She also found a hair upon his coat. That would seem to be about the limit. But no, Dad did not stop at simply causing her jealousy. He left the window up one stormy night with the thermometer 20 below. The bed filled with snow and when Father awoke to find his feet icy cold his first thought was to raise their temperature by a hot application of Mother's back. Mother made it warm for him all right when she came to and "Mother Hasn't Spoke to Father Since." Two verses and three choruses. Orchestra accompaniment; music, Jean Schwartz; words, Wm. Jerome; publishers, Shapiro, New York.

9899 The Home Over There — **Edison Mixed Quartette**

No lover of sacred music will willingly miss the chance to add this beloved hymn to his collection. As it is sung by the Edison Mixed Quartette, unaccompanied, the full effect of its noble words and music, which have been an inspiration and an incentive to countless thousands, is obtained. Music, Tullius C. O'Kane; words, Rev. D. W. C. Huntington.

9900 Let Me Hear the Songs My Mother Used to Sing — **Byron G. Harlan**

This attractive ballad contains a very pretty bit of sentiment, the scene portrayed being that of boyhood's happy home graced by the songs and gentle care of a sainted mother. The words:

I can see the shady mountain by a bright and sparkling stream,
Where a boy I used to wander all the day.
Memory brings the picture back, and seems to delight to brightly gleam
In the dear old days that long have pass'd away.
When the shadows fell at evening in our happy little home,
I would listen with a heart that knew no care.

For I always found her waiting when at evening I'd come—
Mother's face and mother's songs were always there.
Refrain:
Let me hear the songs I heard in days of childhood,
Let me feel again the joys they used to bring;
Far away tonight I'm lonely for their music,
Let me hear the songs my mother used to sing.

Harlan sings it with a world of feeling. Indeed his manner strongly recalls that great seller by himself, "Always in the Way," (our Record 8901.) Orchestra accompaniment; music, Edward Gabriel; words, Janet Gordon; publishers, McKinley Music Company, New York.

9901 Blue Violets — **Edison Concert Band**

A really excellent concert number—one of the earlier and best known compositions of Rich. Eilenberg, the celebrated European composer. Its leading features are a showy introduction, a brilliant clarinet cadenza and a mazurka movement of unusual grace and beauty. Music, Rich. Eilenberg; publisher, Carl Fischer, New York.

9902 When the Autumn Moon is Creeping Thro' the Woodlands — **Will Oakland**

This Record introduces a new Edison artist, Will Oakland. He has a counter-tenor voice of bell-like sweetness, which is heard to excellent advantage in this pretty, romantic ballad:

I can see in fancy far away, the sunny meadow bowls,
And the cottage with the ivy 'round the door;
Once again with you I linger, dear, in a light and sunny mood,
Where we used to while away the golden hours.
Oh, we were happy then together and my first true love was yours,
Would you have me now forget those happy days?
They will linger in my memory, dear, as long as life endures,
And there can be a thousand different ways.

Chorus:
When the Autumn moon is creeping thro' the woodlands,
When the golden leaves bedeck the meadows o'er,
By your side I'll wander,
Waiting by the old oak tree.
When the Autumn moon is creeping thro' the woodlands,
sweet Lenore.

Many of our Edison friends have expressed a desire to hear a good counter-tenor or falsetto singer, and Mr. Oakland can rest assured of a flattering reception. Orchestra accompaniment; music, Alfred Solman; words, Monroe H. Rosenfeld; publishers, J. W. Stern & Co., New York.

9903 A, B, C's of the U. S. A. — **Ada Jones and Billy Murray**

Alphabet songs are the "latest." It remained for George M. Cohan to top all such successes with this unique Alphabetic Duet. It is easily one of the brightest things in "The Yankee

Prince," the newest Cohan show. The breezy musical dialogue as given by Ada Jones and Billy Murray will be pronounced O. K. from A to Z. Orchestra accompaniment; music, and words by Geo. M. Cohan; publishers, Cohan & Harris, New York.

9904 I'm Savin' Up My Money for a Rainy Day — **Edward Meeker**

A genuine comic rag-time song that recalls the well known "All In, Down and Out" (our Record 9492). Like his selfish predecessor this coon believed firmly in holding on to a dollar every time he got his hands on one, only his stinginess carried him to much greater extremes, which are told about in the song. The chorus has a musical swing. Orchestra accompaniment; music, Percy Wenrich; words, C. P. McDonald; publishers, McKinley Music Company, New York.

9905 "Dialogue"—Flute and Clarinet — **Edison Symphony Orchestra**

Something decidedly new: an animated musical conversation between a flute and a clarinet with the orchestra "butting in" between times. A clever idea, which was originated by a well known European composer. The questions and answers are clearly defined and easily understood. A highly interesting and amusing Record. Music, J. V. Hamm; publisher, Carl Fischer, New York.

9906 All For Love of You — **Harry Anthony**

A love song by the composer of the most popular ballad of the day, "Love Me and the World is Mine" (our Record 9371). Few songs have been waited for more eagerly than "All for Love of You," but we feel that it will fully measure up to expectations, as it's the same style of sentimental ballad as its famous predecessor and gives Mr. Anthony equally as good a chance to display his sweet high-tenor notes. First verse and refrain:

The world to me seems born anew,
Since fate, love, guided you my way;
My life is but a golden dream of you,
Ah! I would that dream might last for aye.
All for love of you, dear love,
What for beyond I never know—
Till to! your beauteous vision brought the light
And set a fire, dear, all for love of you.

All for love of you, dear love,
All for love of you!
I'd gladly leave e'en death's dark isle
If I but thought I could serve you there.
Dismal would though the earth might be,
Bloom of all beauty, too,
Could I but know that you, dear, as here's to me,
And I'd live all for love of you,
All for love of you.

Orchestra accompaniment; music, Ernest R. Ball; words, Dave Reed; publishers, M. Witmark & Sons, New York.

9907 A High Old Time in Dixie — **Collins and Harlan**

We feel perfectly safe in guaranteeing a great demand for this dandy negro duet by those two past-masters, Collins and Harlan. It's in the same class as "Nigger Loves His Possum" (our Record 9256) and "Bake Dat Chicken Pie" (our Record 9259). Rastus and his Mandy have been north and are "Gwine Back to Dixie." A farewell committee of friends wait on them at the station and there are great doings. As the train pulls out the clang of the engine bell and the toot of the whistle are mingled with cheering and affectionate good-byes. Orchestra accompaniment; music, George Schleiffarth; words, Ben Lowen; publishers, Albright Music Co., New York.

9908 For the Red, White and Blue — **James F. Harrison**

An inspiring song of our new navy, dedicated to "Fighting Bob" Evans. Patriotic devotion to Old Glory is reflected in every line and there is a swing to the melodic that makes you mark time. Mr. Harrison sings it with an enthusiasm that amounts almost to a patriotic hurrah in the chorus. Orchestra accompaniment; music and words, Monroe H. Rosenfeld; publisher, The Powers Clearing House, New York.

9909 The Kerry Mills Barn Dance — **Edison Symphony Orchestra**

The barn dance is on the top wave of popularity this summer. Kerry Mills, of "Georgia Camp Meeting" fame, has given us a typical barn dance number that is sure to be accepted at once as the standard for this class of music. The music is perfectly timed for the steps of the dance and the orchestration is above criticism. Music, Kerry Mills; publisher, F. A. Mills, New York.

9910 I'm the Man — **Bob Roberts**

Everybody knows what a great success "That's Gratitude" (our Record 9864) has been. The words and music of this song are by the same composers. Of course, Bob Roberts had to sing this as well as their earlier effort. Notice particularly the self-conceited and self-sympathetic way in which he says, "I'm the Man." That alone is worth the price of the Record. The words of the two verses and choruses are so clever we give one of each below:

Who held the Nation's honor high at old Manila Bay?
I'm the man.
And in the scrap at San Juan Hill, who was it saved the day?
I'm the man.
Who faced the hail of shot and shell that came with each attack,
Who saw the comrades all around him falling in their tracks,
Who was the battle scars to-day, three ballots in his back?
I'm the man.

I'm the man, the very self-same man,
That wore a soldier's uniform, and marched behind the band.
We've got good fighters left us yet,
We've got Generals, sure, don't forget,
But who can beat them on a bet?
I'm the man.

Orchestra accompaniment; music, Sheppard Camp; words, George A. Norton; publishers, F. B. Haviland Co., New York.

9911 Fun at the Music Counter — **Jones and Spencer**

A laugh-making burlesque on familiar scenes at a sheet-music counter. The fun results from the saleslady taking the literal meaning of the titles of songs asked for by customers. An Irishman calls for "Won't You Come Out To-night, Mary Ann" and she considers he is asking for a date. Somebody asks for "The Songs My Mother Used to Sing." "What songs walker, also a German, Irishman, Rube, Tough and several other customers get in on the fun, which is fast and furious, and concludes with "Much Obliged to You" sung by the saleslady. Original vaudeville sketch not published.

***9912 Finnegan's Flat** — **Steve Porter**

A laughable descriptive sketch which tells of how Mike and Mary Ann did their best to observe the Day of Rest in their flat. Their plans were opposed by their musical neighbors. There was a crying infant, an amateur cornetist, a couple of pianos in the hands of the O'Brien and Guggenheimer kids, a near-professional trombonist, taking a fall out of the "Merry Widow Waltz," and a German Saengerbund—the grand finale being a united effort to tormentors. There are vivid sounds of a free-for-all fight and Mike returns get in on the with a black, black eye. She asks who did it, is told the "Dutchman," and begins to call him fearful names, but Mike cautions her, "Don't spake that way o' the dead." The sketch is original and is not published.

9913 "Smarty" Medley — **Edison Military Band**

A highly effective medley arrangement of three recent song hits; "Smarty," the dainty child-song in which Ada Jones scored last month (our Record 9872), "Summertime," the tuneful Von Tilzer number (our Record 9852), and "I Was a Hero, Too," another of the July successes, sung by Billy Murray (our Record 9880). Nothing in the way of a band piece meets with wider popular favor than a good medley, played with characteristic finish by the Edison Military Band. A Record of this description, that combines several up-to-date hits, represents extra value for the cost. Arrangement is special for our Record and not published.

2 Selections Made Over.

We list below two selections that have been made over by the same talent. The August printed matter prepared for dealers we will contain these selections. Jobbers should replace their stock of the original Records of these numbers with the new ones.

7597 Over the Waves Waltz — **Jos Belmont**

8838 Jovial Joe — **Edison Military Band**

Formerly by Edison Concert Band

* This selection will be illustrated on the cover of the August *Phonogram*.

Grand Opera in Summer

Had it occurred to you that Edison owners can listen to Grand Opera all summer when their friends in the great opera centers have to make out on the memory of last seasons' performances? There's a thought well worth acting on. Patrons of the Metropolitan and Manhattan Opera Houses in New York City must wait until next fall before the great Scotti, Constantino, Aboni, Campanari, Rappold, and the many other Edison opera stars can be heard again. The great singers are now away enjoying well-earned vacations, but the Edison Grand Opera Records mean opera all summer—on the porch—beneath the trees—in vacation haunts. Edison owners can hear at their pleasure all the music that New Yorkers raved over and spent hundreds of thousands of dollars to hear the past season. Put this thought before the more musical of your customers.

One Dealer's Success

There is one point about the Edison Phonograph that sticks out with the distinctness of a sore thumb, and that is, there is nothing to compare with it as a profitable side-line. We receive hundreds of letters like the one printed below. Many of them state that while the Dealer took the Edison on as a side-line at first, it soon became his leader.

A. H. Curry, Corpus Christi, Texas.

Kodaks & Supplies, Phonographs & Records.

"At the time of placing my initial order for Edison Phonographs and Records, two years ago, the net worth of my business was less than $700. To-day it is worth $8,000, and is on a secure foundation. I have handled the Edison for two years, which is not bad, considering the size of my town and the limited amount of capital on which I started. I now carry stock all of the American and Standard Records, and can at all times give my customers just what they want."

The ten Bryan Records are going to help you do a fine summer business. See pages 6 and 7.

Ten Edison Records by William Jennings Bryan

WE take great pleasure in announcing ten Edison Records by William Jennings Bryan. They were made by the "Great Commoner" in the library of his home in Lincoln, Nebraska, one of our recording expects going there for the purpose. They are among the plainest and most natural Records we have ever turned out. No one who has ever heard Mr. Bryan speak will fail to recognize all of the wonderful charm of voice and manner for which he is famous.

Mr. Bryan needs no introduction. His prominence as the two-time and prospective third-time Democratic candidate for President, together with his remarkable gifts as an orator, have made him known everywhere, while his upright, Christian character and fearless exposition of his political beliefs stamp him as one of the foremost Americans of history.

The Records are composed of telling passages chosen by Mr. Bryan from his favorite orations. Hearing one of these tabloid addresses produces the same effect as a long speech from almost anyone else, so carefully has Mr. Bryan chosen his remarks.

In soliciting trade on these Records, Jobbers and Dealers should not fail to make it plain that the Records are made by Mr. Bryan himself and that they will appeal very strongly to women as well as men, as women always flock in large numbers to hear Mr. Bryan whenever he makes a public speech.

The Bryan Record should go a long way towards offsetting the present trade dullness. We shall not be surprised if they outsell any set of Records we have ever issued, owing to Mr. Bryan's prominence in the current Presidential campaign.

THE Bryan Records will be shipped from Orange to all Jobbers in the United States and Canada as soon after June 1st as possible, and they will be reshipped to Dealers as soon as received. They may be placed on sale at once. Dealers will ship Supplements to such Dealers as place orders for these Records. State number required. Dealers should at once place orders with Jobbers to insure prompt shipment when Jobber's stock is received.

TEN RECORDS BY WILLIAM JENNINGS BRYAN

9914 Swollen Fortunes

This is a subject of national interest that is likely to figure prominently in the coming Presidential campaign. Mr. Bryan favors active enforcement of the "Equal rights to all, special privileges to none" clause of the Bill of Rights, in order to secure a more equal distribution of the country's wealth. The reasons he advances for his views form a veritable gem of political logic. They are sure to cause wide discussion when Mr. Bryan takes the "stump" actively later on.

9915 The Labor Question

In a thoroughly characteristic way Mr. Bryan upholds the fairness of the eight-hour day and arbitration of labor disputes. With equal vehemence he attacks government by injunction, which, he states, amounts to a practical denial of the laboring man's right to trial by jury. These are all live topics of the day and the Record will appeal particularly to the laboring classes. Every paragraph is a carefully rounded period freighted with vivid meaning.

9916 The Railroad Question

"Where does Bryan stand on the Railroad Question?" is being asked on all sides. He has been so widely, and in most cases, erroneously, quoted since his recent Madison Square Garden speech that the whole country has been waiting for an authoritative answer to their question. This Record comes as his personal word on this important subject. It is certain to be greatly in demand.

9917 The Trust Question

A brilliant exposition of the Bryan idea of trusts and trust evils, delivered with all of that rare enthusiasm with which the speaker is gifted. You may or may not share his political views, but must admit that none has ever shown a better mastery of the greatest problems of the day. He says: "Private monopolies can not be regulated by the government. We have tried that and the result was the monopolies regulated the government instead of being regulated by the government." He advocates extermination as the only practical remedy and brings the full measure of his persuasive eloquence into play to drive the point home.

9918 The Tariff Question

"During the civil war," says Mr. Bryan, "the tariff was raised to carry on the war. It was continued after the war to allow our infant industries to stand on their feet. But it was not long until the 'infant industries' were standing not only on their own feet, but all over the feet of other people." A telling shot on the tariff. It is one of many delivered in his most vigorous style, for the tariff has always been a favorite subject with Mr. Bryan.

9919 Popular Election of Senators

Never is the commanding power of Bryan's eloquent logic shown off so favorably as when he strikes at some great legislative evil. He describes the popular election of Senators as "The most popular reform of the day." What follows is of the deepest interest, for it gives us a splendid example of his wonderful grasp of public questions and his untiring zeal in getting at the bottom of existing evils. This Record will appeal to all alike for, as Mr. Bryan points out, it is not a party question.

9920 Imperialism

This is a subject on which Mr. Bryan never fails to delight his hearers. Territorial expansion will never want for a "fiery foe" so long as he is in the lists. "Our experiment in Colonialism has brought us not profit but loss," he says, and piles argument upon argument to show that he is in the right. He believes the retention of the Philippine Islands to be contrary to all American precedent and to the republican form of our government, which derives its power from the consent of the governed. The climax of his address comes with an impassioned demand that the Filipinos be given their independence and allowed to work out their own destiny.

9921 Guaranty of Bank Deposits

Here is a subject that is brimming with interest because it outlines the much-discussed Bryan remedy for the banking troubles through which the country has just passed. "The Government demands protection on its own deposits," says he. "Why should not private individuals have equal protection?" This Record also treats of a live political issue and the Record will undoubtedly be very popular.

9922 An Ideal Republic

Perhaps no American of to-day can equal Mr. Bryan in the difficult dual art of conceiving ideal conditions and finding suitable languages for describing them. This Record gives him the same kind of opportunity as his speech on "Immortality," and seldom has he drawn on the wonderful store-house of his imagination with such fine effect. "Behold a Republic," he exclaims, "where every citizen is a sovereign, but none cares to wear a crown; whose flag is love while others' is only fear." His peroration is very fine and concludes with these words, "A Republic, whose history, like the path of the just, is as the shining light that shineth more and more unto the perfect day."

9923 Immortality

This Record consists of selections from Mr. Bryan's best known lyceum lecture, "The Prince of Peace." Mrs. Bryan likes it best of all his addresses. We do not recall having heard a more affecting description of supreme faith in a "life beyond." Mr. Bryan is evidently as profound a thinker upon such questions as upon those affecting the country's political welfare. There are passages in "Immortality" that have rarely been excelled for beauty of thought and expression. It shows the speaker at the height of his oratorical powers, and, as an example of fervent American oratory, can only be classed with Ingersoll's "At the Tomb of Napoleon."

Newsy Notes

Rose P. Curtice Co., Edison Jobbers of Lincoln, Neb, are getting out a house organ, which they call "The Curtice Phonometer." The first issue is highly creditable and contains much interesting news matter. The Phonometer will be mailed free to Dealers in Phonographs, pianos, small instruments, and sheet-music in the section tributary to Lincoln.

Lawrence McGreal, Edison Jobber of Milwaukee, Wis., has moved to his handsome new quarters at 172-176 Third street. Saturday, April 25th, was formal opening day and 10,000 visitors including Mayor Rose and the city officials, called to inspect the beautiful store. Each visitor received rose and carnation souvenirs of the occasion. Mr. McGreal was also the recipient of a large number of floral offerings from Milwaukee's leading business men. A feature of the new establishment is eight sound-proof Record Parlors. These are octagonal in shape and are finished in mahogany and French bevel plate glass. The equipment of the entire store is of correspondingly high grade. Every improved feature for the conduct of the wholesale and retail Phonograph business on a large scale is to be found on the four floors of the building, which makes one of the handsomest talking-machine establishments in the country. Mr. McGreal has been in business in Milwaukee since 1902 and has quickly become recognized as one of the foremost business men of the city.

Charles E. Robertson, formerly a successful Edison Dealer at 4223 Lancaster Avenue, Philadelphia, has discontinued business at his old stand in order to take charge of the retail department of Louis Buehn & Brother, 45 North 9th Street, Philadelphia.

The Milner Music Company, 25-27 West 6th Street, Cincinnati, Ohio, have bought out the Edison Jobbing Agency of L. E. McGreal of that city, and will succeed that firm as wholesale representatives of the Edison goods. The Milner Music Company are widely known as successful dealers in pianos, Edison Phonographs and musical merchandise. Joseph Milner, President, and Raymond Strief, Secretary and Treasurer, are excellent types of bustling, modern music tradesmen and there is no doubt that they will make a fine record as Edison Jobbers.

Louis Buehn & Brother, Edison Jobbers at Philadelphia, suffered about $1,200 water damage from a fire on the fourth floor of their building May 2nd. There was no interruption of regular business.

It is seldom that a lot of new Foreign Records sell as rapidly as have the 10 German, 16 Swedish and 6 Polish Records announced in last month's PHONOGRAPH MONTHLY. They are being ordered out in unusually large numbers by Jobbers who look for a wide demand. They are better than any previous Records in those languages. Jobbers' shipments will go forward between June 1st and 10th.

Jobbers should see to it that their Dealers get the benefit of the reduced freight rate on horns. Nested horns in shipments of two or more now take first-class rate, as against 1½ times first-class previous to May 1st. Single horn shipments take 1½ times first-class, instead of the old double first-class.

The five new Grand Opera Records for July will probably prove to be the most popular we have ever issued. Jobbers' orders are even heavier than expected. Dealers who have not already ordered, should do so at once, or Jobbers may not be in a position to supply them in time for opening day, which is June 25th.

The fifteen French and fifteen Holland-Dutch Edison Records that went on sale April 1st are having a very gratifying sale. Are there any French or Holland-Dutch people on your list of Phonograph owners? They will be greatly pleased with these excellent Records. Are there not a number of families of these nationalities in your city who would be glad to invest in an Edison if they knew they could get their native music by the best native singers?

A few of the three-color prints of our famous oil painting, "The Phonograph," are left. Jobbers who speak quickly can get them for their Dealers' use. No charge.

We shall be very glad to hear from Dealers who have made a success by putting in the complete line of Domestic Records, also from those who are building up a good trade on the Foreign Records. Address the Advertising Department.

Truth in Advertising

The more truth you put into your advertising the stronger it will be. A promise made must be kept, because no business can move be sustained by dishonest methods. The confidence of people may not be abused without a reaction. Once lost it is never regained. Some misstatement is made and it will take a generation to kill that lie.—*Talking Machine World.*

Tolstoy Uses the Phonograph

The millions that admire and love Tolstoy will learn with interest that that wonderful old gentleman, now eighty years of age, has just begun using an Edison Phonograph as a labor saving device.

Tolstoy learned from Stephen Bonsal that many newspaper reporters used Phonographs. Bonsal told the story to Tolstoy, while visiting the grand old Russian, and the latter was deeply interested.

Subsequently Arthur Brisbane, of the *New York Evening Journal*, who had bought seven of the Edison Phonographs at different times for his own use, sent to the Edison Business Phonograph Company an order to ship a Phonograph with full equipment of cylinders, etc., to Mr. Tolstoy in Russia, as a present from the Hearst newspapers.

The order reached the hands of Thomas A. Edison, who insisted that he himself would send the Phonograph to Tolstoy.

Tolstoy got the Phonograph, and is using it, as may be seen from the letter received by Mr. Brisbane some time since from Vladimir Tchertkoff, Mr. Tolstoy's literary agent and intimate friend.

Dear Sir:—My friend, Leo Tolstoy, has requested me to inform you that he has at last received the Phonograph so kindly sent him. He thanks you most cordially for your kind attention and begs you to transmit to Mr. Edison his sincere thanks for his generous present.

He does not usually care about new inventions of a complicated mechanical kind, seeing that their practical application is as yet mostly confined to the needs and fancies of the wealthy and used for purposes of more successful oppression and exploitation. But in this particular case he is *exceedingly* glad of the possibility granted to him of dictating into this wonderful instrument answers to the numerous letters he receives and has to deal with after his day's literary work, when he naturally feels tired from writing and desires quiet and solitude.

I may add that incidentally this instrument will be the means of conserving his voice for those who are not able to converse personally with him, and for future generations, which will undoubtedly afford great pleasure to many and many.

I have just come from Tsenaya Poliana, where, together with another friend, I have fixed up the apparatus sufficiently well to take and reproduce his dictation and reading. But in order to put everything in perfect order and give his daughter, who is his amanuensis, the necessary instructions for keeping the machine in good working order, I have engaged a mechanic in Moscow who will in a few days run down to Tsenaya for this purpose.

I will in a short time send you and Mr. Edison a copy of all my publications of Tolstoy's and kindred writings in English, issued under the forms of "The Free Age Press," and beg you and Mr. Edison to accept them as a very slight token of my deep feeling of gratitude to you for your kind consideration towards one whose life work we esteem in common.

Yours very sincerely,
VLADIMIR TCHERTKOFF,
Editor of "The Free Age Press."

The *New York Journal*, commenting on the incident in its editorial columns, says:

"The use of the Phonograph is perfectly simple, but it is intensely interesting to know that Mr. Tolstoy, in his old age, is still young enough to utilize this modern invention to simplify the task of communicating thought to the rest of the world.

How beautifully and simply mankind's problems are solved when human beings co-operate to help one another, instead of combining to fight one another!

Here you have the mechanical genius of an Edison serving marvelously the literary genius and the high conscience of a Tolstoy. The fine combination of two kinds of human genius benefits the entire world. Thomas A. Edison represents America and its kind of talent. Just about as Tolstoy represents Russia and its mental strivings."

Subsequently to the receipt of the above-mentioned letter by Mr. Brisbane, Mr. Edison received the following from Tolstoy himself:

Tsanaya Poliana, Toula, Russia.

Dear Mr. Edison:—

My friend Tchertkoff has already, at my request, written to thank you for the Phonograph you have so kindly given me. But owing to a misunderstanding the letter was posted to you without having previously been handed to me to be signed as I had intended to do.

Not wishing to appear discourteous, I am now sending you these lines in order to repeat how grateful I feel to you for your amiable attention. I am using your Phonograph for answering letters and as I gradually get more accustomed to its manipulation, I find it more and more helpful.

Hoping you have recovered from the illness you have, I hear, been suffering from, I am

Yours very sincerely,
LEO TOLSTOY.

March 1st, 1908.

The new binders that we are getting out to hold twelve copies of the PHONOGRAPH MONTHLY are proving just what a great many Dealers wanted to preserve their copies of the MONTHLY. Order through Jobbers, or if yours does not have them, we will send one direct, postpaid, for fifty cents.

Trade Information for Dealers

Sales Dept. Bulletin No. 7—April 27, 1908

FOR UNITED STATES AND CANADIAN DEALERS

Correspondence concerning this Bulletin should mention its number and be addressed to the National Phonograph Co., *Sales Department*, Orange, N. J.

Beginning at once, all orders for reproducing points only will be filled with reproducing points assembled in the arms, and no orders whatever will be filled for reproducing points separate from the arms.

The list price for reproducing points assembled to arms will be the same as heretofore charged for reproducing points only, and Dealers' discounts will remain the same as heretofore.

This change is made because in a great many instances where we ship the reproducing points and arms separately, they are not properly assembled by outside parties.

Sales Dept. Bulletin No. 8—April 30, 1908

FOR UNITED STATES AND CANADIAN DEALERS

Correspondence concerning this Bulletin should mention its number and be addressed to the National Phonograph Co., *Sales Department*, Orange, N. J.

Dealers are hereby advised that inasmuch as we have no more moulds or masters of them, the following selections will be considered as "cut-outs" after our present stock is exhausted.

12087	Sal á tu Ventana (Spanish)	Vargas
12204	Guarda esta flor (Spanish)	Vargas

Sales Dept. Bulletin No. 9—May 2, 1908

FOR UNITED STATES AND CANADIAN DEALERS.

Correspondence concerning this Bulletin should mention its number and be addressed to the National Phonograph Co., *Sales Department*, Orange, N. J.

This Bulletin is issued to clear up a misunderstanding that exists with part of the trade concerning the allowance of 25 cents each on horns, whether ordered with machines or as extras. This matter was covered by our letter to Dealers dated February 25, 1908.

The allowance can only be made on lots of 5 of any one kind or even multiples of 5, that is 10, 15, 20, etc.

It cannot be allowed where we are put to an extra expense for re-crating. If an order calls for 12 horns of one kind, the allowance will be made on 10 only.

Nor can it be allowed when 5 or its multiples is made up of two or more kinds. For instance, no allowance can be made on an order for 2 Gems, 3 Standards and 1 Home.

An order for 7 Gems, 9 Standards, 6 Homes and 3 Triumphs would get the allowance on 5 Gems, 5 Standards, 5 Homes and no Triumphs, a total of 15 out of 25 machines ordered.

We are able to make the allowance on even lots of 5 of one kind because the horns are shipped to us in crates of 5 or multiples thereof and we are not compelled to re-pack them.

If you are still in doubt on any feature of this allowance, please write the Sales Department at once.

Sales Dept. Bulletin No. 10—May 6, 1908

FOR UNITED STATES AND CANADIAN DEALERS.

Correspondence concerning this Bulletin should mention its number and be addressed to the National Phonograph Co., *Sales Department*, Orange, N. J.

Hereafter all orders for feed nuts will be filled with the feed nut riveted to the feed nut spring, and no orders whatever will be filled for either feed nuts or feed nut springs separately.

The list prices for the Standard and Gem feed nut combined will be 25 cents, and for the Home

25 cents, these prices being the same as heretofore charged for feed nuts only. The list price of the Triumph feed nut and spring combined will be 50 cents, this being 20 cents less than heretofore charged for the 2 nuts only. Discounts to Dealers will remain the same as heretofore.

This change is made because in a great many instances, feed nuts and feed nut springs are not properly assembled when shipped separately.

Sales Dept. Bulletin No. 11—May 8, 1908.

FOR UNITED STATES AND CANADIAN DEALERS.

Correspondence concerning this Bulletin should mention its number and be addressed to the National Phonograph Co., *Sales Department*, Orange, N. J.

We list below two selections which have recently been made over. Continuing the plan already begun, we will print these selections as part of the August printed matter prepared for retail distribution.

7597	Over the Waves Waltz	Joe Belmont
8838	Jovial Joe	Edison Military Band

(Formerly by the Edison Concert Band.)

The quality of these Records is equal in every way to our new monthly lists and the selections themselves have always been consistent sellers. It's "up to you" to order a quantity of them for shipment with August Records.

Legal and Agreement Depts. Bulletin No. 1—May 20, 1908

TRADE INFORMATION FOR UNITED STATES AND CANADIAN DEALERS.

Correspondence concerning this bulletin should mention its number and be addressed to the National Phonograph Company, *Legal Department*, 10 Fifth Avenue, New York, N. Y.

We desire to caution all Dealers against disposing of Edison Phonographs or Records in bulk, to any individual or concern at prices or under conditions contrary to those governing the sales of Edison goods by Dealers. Sales by Dealers in bulk to unauthorized Dealers are strictly prohibited.

We will take immediate action against any Dealer disregarding this notice.

Real Wolf Howls

"Have you heard the wolves howl at the Lyric Theatre?" That is the way they are advertising "The Wolf," a play of the Canadian woods, in New York City. In the climax of the third act, when the hero and villain fight in the dark, a pack of wolves send forth their shrill cries. The effect is so realistic that the audience are said to hold their breath, expecting the animals to rush upon the stage. And it's all done by a Phonograph behind the scenes. When the play was first put on a gang of stage hands did the wolf-howling act, but the author decided it lacked the proper realism. He determined to get the real thing. So an expedition was made to the Bronx Zoo and the cries of seven hungry, full-grown wolves were recorded just before feeding time. Their appetites were specially whetted for the occasion, and in order to increase one mother wolf's howls her baby was taken from her and placed outside the cage. This explains the question that one meets on every hand in New York, "Have you heard the wolves howl at the Lyric?"

A Dealer's Circular

A very clever advertising circular has been received from the Klar & Kress Jewelry Company, Hillsboro, Ill. There are four pages, 12 x 18, printed in red and black, with a good-sized cut of the four Edison leaders—Gem, Standard, Home and Triumph. A full description accompanies each and a special installment offer. Klar & Kress Company are another instance of a jewelry store that have found the Edison Phonographs and Records very profitable in themselves and a means of drawing a desirable class of jewelry customers to their store. We will venture the guess that this firm are having no trouble whatever because of competition by mail order houses, and would commend their methods to other firms who are out for their share of the local trade.

Edison Phonograph Monthly

Published for the Man Who Sells Edison Phonographs and Records by The National Phonograph Co., Orange, N. J.

All communications to *The Phonograph Monthly* should be addressed to the Advertising Department, Orange, N. J.

NEW YORK: 10 FIFTH AVENUE.

EDISON GESELLSCHAFT, M. B. H., SUD-UFER 24-25, BERLIN.
COMPAGNIE FRANCAISE DU PHONOGRAPHE EDISON, 42 RUE DE PARADIS, PARIS.

VOL. VI. June, 1908 No. 6

What's the Use?

We have seen a clever drawing of a forlorn-looking little boy wiping tears from his eyes. It's a dandy sketch and would stand on its own merits. But its value is doubled by this title, printed in four lines:

What's the use of livin'?
All the dogs bark at me—
All the cats spit at me—
And I've just been chased by a turtle.

Foolish childhood! Period of imaginary ills and misfortunes. Yes, but how about you with your grown-up wisdom? Have YOU any more nerve in facing your grown-up problems than the youngster has in facing his little ones?

What are you doing to get more business nowadays? Are you going after it with newspaper advertising, and window displays, and Edison demonstrations every day? Are you mailing out your monthly Supplements of the new Edison Records? Are you talking to your customers as strongly as ever about the advantages of owning an Edison Phonograph? Or if they already own one are you telling them about those fine new Records? Are you offering them Edisons on time payments to make it easier for them to buy? In a word—are you hustling as hard for sales as ever you did in your life, or are you being chased by the hard times "turtle"?

Of one thing you can rest assured—the goods are going to move out of your store no faster than the turtle moves—and the dollars are coming into your cash drawer no faster than the turtle moves if you sit back and say, "What's the use?"

There's all the use in the world. Ralph Emerson, who has said so many of the most practical and sensible things ever said by anybody, tells us that the true American hustles most when things seem to be breaking worst for him. Not that business is worse now than ever, for it isn't. Things are a little dull, but we want to point out that the Dealer in Edison Phonographs and Records can do an absolutely normal business—can even improve on the ordinary business of fairly busy times by a little aggressive hustling.

How shall he go about it? First of all, by advertising in the local newspaper. Newspaper advertising at this time will pay far better than when business is humming and everybody is advertising. If you have your ad in the paper along with those of two or three other Dealers you divide the attention of the reader between you. If your ad has only one other to compete with you get a larger share of the reader's notice. If yours is the only one you get it all. That's a pleasant thought!

Now, let us suppose a condition that actually does exist everywhere all the time. Suppose a dozen people in your town are going to buy Phonographs within the next few days. In the ordinary course of things we will say you would land three of the sales. What effect will a little advertising have? In all probability three or four more of the buyers seeing your announcement of a complete new stock of Machines and Records will be led to make their purchases of you instead of from some one of your competitors. It doesn't matter at all to the average buyer which particular store his outfit comes from and seeing your announcement at the right moment decides him in your favor. So you sell a machine and Records to each and add some new Record customers to your list.

Dealers will find this rule works out every time and every satisfied customer gotten in this way means sales to that customer's friends.

You have no idea how many people there are who are ready to buy Edison Phonographs, but hold back simply because they are not asked by some home Dealer to buy. In order to appreciate the impression that is being made by our advertising, which reaches 25,000,000 people regularly month after month, you must do a little advertising yourself, reminding your part of the public that the latest type of Edison Phonograph and all the new Records are right at their doors.

While others are saying to themselves "What's the use?" and letting the cobwebs grow on their stock and in their doors, is the time for you to make a noise like "the biggest Edison Dealer in your section." You will find the ready-made ads that we supply free of all charge a very great help in doing this.

Personal

W. E. Gilmore, President of the National Phonograph Company, has returned from a three weeks' vacation spent with his family at Virginia Hot Springs.

Walter Stevens, Foreign Manager, is back at his desk after a seven weeks' business trip to Mexico. George J. Werner and Frederick Burt, experts from the Recording Department, accompanied him for the purpose of making 300 new Mexican Records. All the latest mechanical accessories in use at the main laboratory were carried along and as the foremost Mexican singers and instrumentalists have been engaged to make the Records, the trade can look for something extra when they come out.

F. K. Dolbeer, General Manager of Sales and Credits, is away on a trip to the Pacific Coast. He hopes to visit Edison Jobbers throughout the West and Northwest. Returning he will reach Denver, Colo., in time for the annual convention of the National Association of Credit Men, at that city, June 23rd to 26th.

H. T. Leeming, Traffic Manager, addressed the Trans-Continental Traffic Bureau, at Chicago, on May 18th, on several matters of interest to the trade, one of the principal ones being the restoration of the commodity rate of $2.09 a hundred on Phonographs and Records to the North Pacific coast. It was owing to his representation that the rate was secured some time ago, but it was cancelled May 9th.

How Many Records?

There are 2,710 Records listed in the three Edison Record Catalogs up to and including the Records for June, 1908. There are 1,649 Domestic, 996 Foreign, and 65 Grand Opera. The Domestic list is about equally divided between vocal and instrumental selections. There are 596 Vocal Solos, 161 Vocal Duets and 53 Vocal Quartets, 327 Band and 83 Orchestra Records. In the Foreign Catalog 19 languages are represented, viz.: Bohemian, British, Chinese, Cuban, Danish, French, French-Canadian, German, Hebrew, Holland-Dutch, Hungarian, Italian, Japanese, Mexican, Polish, S. A. Bands, Spanish and Swedish. The Grand Opera Records are sung in five different languages and are divided: French 4, German 21, Latin 2, Italian 36, Spanish 2.

Our New Power Plant

The work of erecting new concrete buildings for the National Phonograph Company and the entire Edison interest at Orange, N. J., has been going on steadily for some time past. It is now about finished and the long line of white walls spread out over more than eighteen acres of ground presents an appearance not unlike that of some great fortress. One of the last buildings to be completed was the new boiler house. This is 32x69 feet and is a model in design and equipment. Three Climax tubular boilers have recently been put in—two of 750 H. P. and one of 500 H. P. This makes seven boilers altogether, with a total capacity of 3,400 H. P. In the engine house, which adjoins the boiler house, a new 1,500 H. P. Allis-Chalmers vertical cross compound Corliss engine has just been installed. A special feature of this remarkable piece of machinery is a three-wire generator, which produces 4,000 amperes of 250 volts in one side and 125 in the other. The entire engine which weighs in the neighborhood of 100 tons, rests upon a foundation of solid concrete. Added to the previous equipment of one Allis, one French and one Arrington and Sims engine, this brings the capacity of the power plant up to 2,800 H. P. and places it in the front rank of the world's great manufactories. Power is here generated for the entire Edison interests, which take up fourteen acres of floor space and include the Edison Phonograph Works, the National Phonograph Record Works, Edison Laboratory, Edison Kinetoscope and Film Works, Edison Storage Battery Plant, Bates Numbering Machine Works and the office buildings, electric light, elevator and pumping systems.

Attractive Stores

"I send a flashlight photo of an end of my store, showing part of my Edison stock. The plate did not take it all in, but enough is shown to give a good idea of arrangement, etc. I believe the long horn, shown standing, is the

largest in use in this State. It is seven and a half feet long and has been used often for giving concerts from the balcony at the front of my place. It may interest you to know I am overhauling for a customer Home Machine No. 703, which is pretty old, as you can judge from the number."—*George Smith, West Newcastle, N. S. W., Australia.*

We have previously published correspondence from Martin & Company, of Young, N. S. W., Australia, telling of their fine success in handling the Edison goods. Below is a view of an exhibit made by them at a local fair. It is reproduced as a striking sample of how they do things in the Antipodes. Was anybody under the impression that they are behind the times on the other side of the world?

The illustration of the warerooms of the Macon Phonograph Company, of Macon, Georgia, which is printed below, shows a very neat arrangement of Phonographs and Records without too much crowding. Their Record stock looks especially good. They are great believers in "a place for every Record and every Record in its place."

Rough on Rats

"Such a peculiar remark was passed in my store to-day that I could not resist the temptation to pass it on," writes the Garland City Music Store, Ashland, Wis.

"Some three months ago I sold an Edison Standard Phonograph on the easy payment plan to a man here. He came in night before last and said he was unable to pay any more on the machine. I told him in that case the Phonograph would have to be returned, according to the terms of his contract, as he had not paid for it. He replied: 'All right. My wife doesn't like it anyway, as it scares the baby.'

"His wife accompanied him when he brought the machine in to-day. I asked her what the trouble was. She said it scared the baby; that every time a Record was put on the baby would cry. I asked her if she did not think that in time the baby would learn to love the music. The baby is a girl and is only five months old, and I thought if given a fair chance, we might make good with her. But the mother said: 'I don't think so, as baby cries every time she hears it, but I will say this for the Phonograph, it certainly did scare all the rats away from the house, and the house was over-run with them before we got it.'

"We read many different testimonials about the good qualities of the Edison from enthusiastic owners, but this brings out a point that I do not think anyone has touched on before."

"P. S. Forgot to mention that after his wife said the above, the gentleman turned to one of my clerks and said that as soon as he could get a divorce he would be the owner of a new Phonograph."

There are a whole lot of people in your town who want put off owning an Edison Phonograph another day if you tell them about the Bryan Records. Do it now.

Ready for Your Scissors

Below are a set of three advertisements and three readers for newspaper use. They may be of help to the Dealer who is too busy to write his own ads. The ads will be made more effective by the use of an illustration, such as those we furnish free in the Ready-Made Ad Department.

GOING ON A VACATION?

Take an Edison Phonograph with you.

It's the most wonderful entertainer in all the world, because it's all the world's best entertainers in *one*.

It's a Band if you like, an Orchestra, a Grand Opera Singer, a Vaudeville Team, a Singer of the latest popular songs, a Violin, Banjo, Cornet, Xylophone—in a word, everybody and everything you care to listen to on any occasion.

So light and easy to take along with, too.

It will be the jolliest summer trip you ever took with the jolliest companion, if you take an Edison.

Edisons at $12.50 and $25.00, on easy payments of $1.00 a week.

Come hear the new Records just received.

[*Firm name and address here.*]

IS EVERYBODY HAPPY?

The Edison Phonograph equals a $1,000-a-week Grand Opera or Vaudeville Artist, and yet *One Dollar a Week* soon makes it yours.

You can listen in your own home to the real voices of Scotti, Ahott, Constantino, and many more of the highest-priced Grand Opera stars.

You can hear the magnificent Edison Symphony Orchestra play "The Merry Widow Waltz."

You can laugh till your sides ache at the funny cracks in the "Georgia Minstrels" by the Edison Minstrel Company.

You can listen to the catchy air of the latest Broadway song-hit sung by one of the celebrated Edison artists.

All this and much more for only $1.00 a week.

Come in and let us play a few of the latest Records and explain the easy payments.

[*Firm name and address here.*]

A MAN 72 YEARS OLD SAYS:

"A few tunes on the Edison Phonograph every morning are all the medicine I ever take."

Maybe you would need less medicine if you took good cheer in large doses from this wonderful Home Entertainer, which is all the musical instruments of the world rolled into one.

A dandy Edison Phonograph, all complete, sells at $12.50, and others at $25.00 and $35.00.

Easy $1.00 a week payments.

Records that wear forever only 35 cents each.

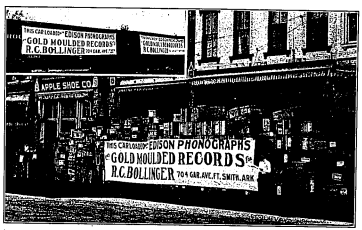
Come in and hear the newest Edison with the big horn.

FOR READING NOTICES

The following are intended to be run in the newspapers as straight news matter. Give your paper an order for some regular display advertising and ask them to run the following as free notices. You will thus get double value for your money, for a notice like these is very effective in arousing interest and gives the impression that a store is the leader in its line.

THE HAPPIEST HOME.

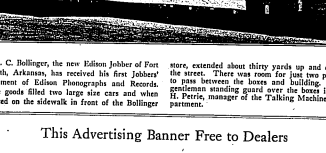
Opinions differ as to just what is needed to constitute the ideal happy home, but everybody agrees that music is one of the most important things. Can you think of a single happy home where they do not have music in some form? Music promotes happiness because it improves the tempers and dispositions of the worst of us. Especially in summer, when it is possible to sit on the porch or lawn and listen to the charming music of an up-to-date Edison Phonograph. The Edison is by turns a band, an orchestra, a soloist, a comic talker, or anything you can call for in the realm of music or entertainment. A great many are being sent to local homes by ....., the popular Phonograph Dealers.



VACATION DAYS HERE.

Now is the time when the vacationist and summer boarder is studying advertisements in the papers and railroad time-tables, deciding where to go for a breathing spell. We want a place where there's boating and bowling and fishing and driving, dancing and tennis, hammocks and croquet, and by all means one where there is good music. The way to be sure of getting the music you want when you want it is to take along some handy music-maker like the Edison Phonograph. ..... are Edison headquarters and they have any quantity of Records that are just the thing for vacation purposes.

SICK PEOPLE TAKE MUSIC.



A great many doctors prescribe music for sick people. It is claimed that music soothes the nerves and puts the patient in a calm and peaceful frame of mind that is most favorable in promoting recovery. Here is a great chance for ..... of ..... to sell Edison Phonographs. Doctors may disagree about the kind of music a patient needs, but an Edison will fit any doctor's prescription, as it's all the musical instruments of the world combined in *one*.

R. C. Bollinger's Large First Shipment

R. C. Bollinger, the new Edison Jobber of Fort Smith, Arkansas, has received his first Jobbers' shipment of Edison Phonographs and Records. The goods filled two large size cars and when placed on the sidewalk in front of the Bollinger store, extended about thirty yards up and down the street. There was room for just two people to pass between the boxes and building. The gentleman standing guard over the boxes is W. H. Perrie, manager of the Talking Machine Department.

This Advertising Banner Free to Dealers

An advertising banner, like the above reduced fac-simile, is to be sent to Edison Dealers through their Jobbers about July 1st. Size, 10 feet long by 3 feet deep; printed in four rich colors on white muslin; edges turned and stitched; fixed ready for hanging at the store front or in the window. If you failed to order one of these handsome banners on the order blank which was sent out in last month's PHONOGRAPH MONTHLY, and want one to use as suggested, fill the blank out now and send it in. If the blank has been misplaced, write at once to National Phonograph Company, Advertising Department, Orange, N. J. There is no charge whatever for the banners.

Jobbers' Convention

The annual convention of the National Association of Talking Machine Jobbers will take place at the Hotel Chalfonte, Atlantic City, N. J., July 6th and 7th.

The committee of arrangements in charge of the details of the convention are J. Newcomb Blackman, proprietor of the Blackman Talking Machine Co., New York City; C. V. Henkel, president Douglas Phonograph Co., New York City, and Louis Buehn, of Louis Buehn & Bro., Philadelphia, Pa.

A large room at the hotel has been placed at the disposal of the members as a meeting room, as well as another room for the accommodation of committees. A material reduction in the hotel rates has also been given.

It is suggested that in order to get the benefit of reduced rates, members of the association or representatives of manufacturers will mention that they are to attend the convention as delegates and ask accommodations based on special rates offered the association.

A better opportunity could hardly be offered to Jobbers and members of the trade in general to take a pleasure vacation and at the same time attend an important convention. In selecting the days—July 6 and 7—it was with the idea that most everybody would arrive on the 5d or early on the morning of the 4th, thus getting the benefit of Saturday, the 4th, and Sunday, the 5th, without taking two days from business.

It is quite likely that most every jobber will take some vacation himself and provide one for the family, and with this idea in view, the committee urge Atlantic City as first choice. Jobbers will find plenty of opportunity to make use of their trip for business visits while the family are enjoying the pleasure of the seashore. It is very likely that the leading manufacturers of talking machines and supplies will be well represented, and it will be a very good opportunity to bring jobber and manufacturer together on anything, such as new goods, improvements and plans for the fall business.

Dealers who would like to make this trip should take advantage of the reduced hotel rates and railroad fare, which the committee will be very glad to offer them. The second day's session being to a very large extent an open one, it may be that some of the live dealers would like an opportunity to bring up subjects from the dealers' standpoint. A letter addressed to any member of the committee will receive prompt attention, for it is proposed to make this convention a record breaker in attendance. Members of the association should come prepared to give their ideas on any subject they would like considered.

While the Traffic Association have not yet committed themselves regarding the application for reduced railroad rates, it is likely that they will grant the same and take action at their next meeting, which will be held in the near future. A circular letter will be addressed to members of the association and the jobbing trade in general, giving such details as are considered necessary, and in any cases where the jobber receives this letter and is not a member, it should be a notice for him to immediately send in his application for membership.

It may be that some of the jobbers do not understand the benefits of membership, and it is therefore well to explain that one of the most important features is the system of credit reports, which are very valuable to jobbers who have outstanding accounts. For example, one case may be mentioned where an account, amounting to over $100, had been charged by a jobber to profit and loss about two years, and through the system of credit information he learned that another member had succeeded in finding the debtor and obtaining a settlement. This resulted in the second jobber getting busy, with the result that he made a settlement of $50, which therefore went to the credit of profit and loss. This is only one of many cases, and this feature of membership alone is worth several times the annual dues, which are but $25.

It is very much easier for manufacturers and jobbers to get together on any subject if the former can feel that the National Association includes practically every jobber. Various single ideas are brought into one perfected thought, and improvements result. Many changes and desirable improvements that have been made by the leading manufacturers were the result of suggestions made through the association. It will therefore be understood that every new member adds to the strength and improvement of the organization. The dealer is also benefited, for if he has any subject that he would like taken up he can ask his jobber to do so through the association. Communications on the subject addressed to the secretary would receive attention.

Everyone interested in the advancement and improvement of the talking machine industry should support the National Association of Talking Machine Jobbers, for they are working in a good cause. There should be fully 40 or 50 new members before the convention. Applications should be sent to the secretary, Perry B. Whitsit, 213 South High street, Columbus, O.

A Live Question

Do you make it a point to keep in close touch with the people to whom you sell Edisons? When a month or two elapses without selling them any Records do you find out why? There may be some trifling reason that can be at once adjusted. Sometimes through carelessness or accident something will happen to put a Phonograph out of commission. One of your employees could put it in running order in a few minutes and make the customer a regular buyer again.

The temptation to sidetrack a Phonograph if it slips a cog is just as strong in your customer as is your temptation to forget him if he doesn't call for a month or two. It's like throwing good money away to neglect owners of Phonographs.

Window Dressing

Our model window this month is simple and very easy to reproduce. The walls are hung in the white cheese cloth used last month. It is gathered at frequent intervals all the way around to give a slight wave effect. Floor and boxes are covered with the same material; which is tufted on the floor. Three of the 12x12x5 ft. boxes stand on end at the back with boards across their tops to support Phonographs and Records. Three more of the boxes are laid flat, the middle upright box standing on the centre one. The four leading types of machines—Gem, Standard, Home and Triumph—are shown set up complete with price cards in their horns. The Gem rests on four Record boxes. The machines on the floor without horns are a Standard and a Home. Cards advertising the Idelia are placed between them. Most Dealers have in stock all the material needed to duplicate this window trim. Price cards like those shown can be secured of Jobbers, also the steel signs containing the picture of Mr. Edison, and the Idelia window cards. The lists of new Records are the ones next Dealers regularly, and it's a very simple matter to get suitable frames for them. The cheese cloth is very inexpensive and can be made to last some time if care is used to keep it clean. Always have the window perfectly clean before you start to dress it and the glass clear so that everything may be plainly seen. Remember the customer judges your store by the window, and if it is not attractive he may never feel any curiosity to know what the interior looks like. Your window can be made one of the best possible advertisements of your business, and it is an advertisement that costs you practically nothing at all.

Wu Ting Fang Visits Mr. Edison

Wu Ting Fang, Chinese Minister to the United States, spent the morning of May 21st with Mr. Edison in his laboratory at Orange, N. J. The distinguished foreigner is greatly interested in the Edison Phonograph and other matters on which Mr. Edison is engaged and enjoyed his visit immensely. He started back to New York in an automobile, which conformed to the Far-Eastern opinion of "Devil Wagons" by breaking down in Newark. Newspaper reporters at once besieged him, and between seeing to the repairs of the machine and standing the reporters off he spent a very busy half-hour. One reporter succeeded in breaking through the Oriental reserve and secured the following for his paper:

"I was very interested in what I saw to-day. The Edison works are indeed wonderful, and Mr. Edison, he is wonderful, too. No wonder you Americans call him the—the—the——"

Wu became confused over the deficiency of his memory, and had his skin not been a dull yellow a blush might have been seen.

"The electrical wizard," interpolated the reporter.

"Yes, yes," went on the executive representative of the Chinese Empire. "He has done a great deal for his country and for the world."

Effects of Trade Depression

In these times of business depression it is encouraging to find that many regard the present outlook most hopefully. A striking example of hopefulness in the Talking Machine Trade is the following article by J. Newcomb Blackman in the May *Talking Machine World*:

"It is generally conceded that all business has been affected by the general depression, which started with the financial panic last October, and has been felt throughout the country since that time. The country before this period was considered at the height of prosperity, from what appeared on the surface. During the present depression the "light" has been "turned on," and it will be well for manufacturers, jobbers and dealers of talking machines and supplies to carefully note what it reveals.

You will have no trouble in finding people in our line who condemn the talking machine business at the present time, but their opinion is probably based entirely on the fact that sales are not as large as they were a year ago. Most things are judged by comparison and the present condition of the talking machine industry is no exception to this rule. Let us, therefore, compare the effect of the business depression on the talking machine industry with other lines of, not only luxury, but business in general.

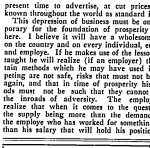
In what line of business will you find the statement that sales are larger than they were a year ago? It is not likely that you can name one case. In this respect we will say that the comparison is about the same, although you will find that as compared to other articles of luxury the talking machine business has not shown as large a decrease in sales and has certainly more than held its own. Don't overlook the fact, however, that the word sale does not always mean profit. How many sales at the present time made in other lines of luxury, or even what might be termed staple lines, are bringing the same profit?

Is it not true that most articles sold throughout the country in general business are regulated very largely by the law of supply and demand, and that prices fluctuate accordingly? Will you not therefore find that in most lines of business the manufacturer, jobber and dealer is not only selling less goods, but selling them at lower prices than he anticipated or expected would be necessary when they were purchased? It will be very easy for you to figure the damage this does, not only through the dwindling of profit, but by the depreciation of the value of stock on hand. We will compare this condition with what we find in the talking machine industry based 'of course' on goods sold under price restrictions. We find that sales are less, but we do not find that values have depreciated. The dealer still gets full price for machines and records, so that although he must suffer a little temporarily by the loss in sales he makes the same percentage of profit, and stock on hand has not depreciated in value on account of the business depression.

This condition illustrates the value of restricted prices and every jobber and dealer at the present time, to be fair, should first compare the talking machine business with other lines in general before attempting to criticise the former. If he does this, and will make a fair comparison, I think he will agree that the talking machine business has more than held its own in sales and stands in a class by itself in regard to values being maintained. It is not a bad thing to be in the talking machine business during a business depression, if you handle lines that are sold under restricted prices, and the present test should be recognized as a valuable guide to the future policy of manufacturers, jobbers and dealers.

You will note by my remarks that I am a strong advocate of the policy of the leading talking machine companies in insisting upon a maintenance of prices from the time the goods leave the factory until they are paid for by the retail purchasers at the full list price. This naturally requires a firm stand on the part of the manufacturer in order to enforce conditions that will insure the jobber and dealer maintaining prices and preventing unfair competition. Suppose most of us jobbers and dealers were not surrounded by this cloak of protection at the present time and during the last few months.

Have you considered what might have resulted and what good cause you would have had for complaint, not only on sales, but with the methods employed in this business? Certain dealers who have been unable to meet their accounts as promptly as jobbers would expect, would have been forced to dispose of their stock at prices that would ruin the trade in that vicinity. A dishonest dealer could have auctioned his stock off and disappeared thus, not only hurting values in that territory, but causing the jobber a certain loss. This class of dealer is now held in check, for it is generally known by auctioneers that they have not the same liberty in selling talking machines under the hammer that they find in other lines.



This may have kept many a dealer in the straight path and the jobber's pocketbook in a better condition than had the situation been otherwise. The dealer who has, to a certain extent, been attacked with what might be termed "cold feet," I claim, is benefited because he is unable to quit so easily at cut prices, and at the same time injure others in the trade, for he will probably "stick to the ship" and "weather the storm." There are cases where dealers will not be able to do this, but these are handled in such a diplomatic way by the manufacturer that failures, so far, have not resulted in injuring the maintenance of prices. With jobbers the situation is practically the same. Many who handle talking machines as a side line and are not sufficiently interested financially would not hesitate to turn their stock into money in ways injurious to the business in general. The manufacturers themselves are forced to maintain the policy which they have inaugurated, although I have no doubt that they would have plenty of opportunity to keep busy now if they were to accept ruinous propositions from cut price merchants, who would like an opportunity at the

present time to advertise, at cut prices, goods known throughout the world as standard in price.

This depression of business must be only temporary for the foundation of prosperity is still here. I believe it will have a wholesome effect on the country and on every individual, employer and employe. If he makes use of the lesson it has taught he will realize (if an employer) that certain methods which he may have used in conpeting are not safe, risks that must not be taken again, and that in time of prosperity his methods must not be such that they cannot stand the inroads of adversity. The employe will realize that when it comes to the question of the supply being more than the demand, it is the employe who has worked for something more than his salary that will hold his position, and will be considered a part of the organization who has contributed to the building, and will therefore remain a part of the structure.

During the summer the manufacturer will make use of the present slackening of business and prepare to stimulate the business with improvements that will make the talking machine industry as desirable as ever. The jobber who maintains a suitable stock of goods will hold what trade he has and probably draw trade from others, who have not had the required amount of optimism to keep them alive. The dealer who maintains a suitable stock and puts in all his spare time in getting in touch with everyone in his territory, will be known and remembered in the fall when, I believe, everything will again have assumed a good momentum."

THE EDISON BUSINESS PHONOGRAPH

TRADE MARK

Thomas A. Edison

Dealers Wanted

After three years perfecting the Business Phonograph and securing electric motors for all electric currents, we are prepared to appoint dealers in every locality to sell the appliances at a liberal discount. Write for circulars and terms of agreement TO-DAY.

EDISON BUSINESS PHONOGRAPH CO.

Mail Electros No.....

We agree to use them in newspaper advertising and to send you copies of papers containing them before asking you for other electros. We intend running a..... inch advertisement.

Name.....

Street.....

City and State.....

We buy through.....

New Ready-Made Ads

Here are two more Ready-Made Ads that we furnish free for Edison Dealers' use in newspaper advertising. Hundreds of live Dealers all over the country are asking for these electros and using them regularly in their local papers with fine results. The thing that pleases us most, next to seeing them advertise, is that they often write up some copy of their own to go with the cuts we send in preference to using the talk we print in the Ready-Made Ads. This shows that they are going in to win. They are thinking the matter out for themselves, and the result is they know just about what to say in their ads to attract customers. The electro cut that we furnish include the illustration and the word "Edison" or "Edison Phonograph," as the case may be. Dealers then add reading matter to take up whatever space they wish. The original drawings from which our electros are made are the work of the best New York artists and are quite costly, but we figure that they are not any too good for the goods they advertise and as long as they help Edison Dealers to get results in their advertising as they have been doing, that part is all right.

We will send you either or both of the electro illustrations shown on this page in single or double column width, prepaying postage, so that they will cost you nothing. All you need do to get them is to agree to use them in your paper and send us copies of the newspapers containing your ads for our files.

EDISON PHONOGRAPHS

Don't make the mistake of thinking that every talking machine is a Phonograph.

The Edison Phonograph is the only one invented by Thomas A. Edison. It gives clearer and better renditions of music than any other form of sound-reproducing machine. Hear the new model at our store.

R. W. FOSTER
197 North 18th Street
New York City

☞Electro in above ad is: Single column wide No. 681. Double column wide, No. 684.

☞Electro in ad below is: Single column wide No. 685. Double column wide, 686.

EDISON PHONOGRAPHS

AT home, in the evening, with an Edison Phonograph to make things lively—what better combination can be imagined? Stop and think of this, father of a family, on your way home, and then stop in and hear the Edison Phonograph and have one sent home. A very small preliminary payment will make it yours.

L. W. MACK
14 Cosmopole Street, Scranton, Pa.

The EDISON PHONOGRAPH

represents not only the original sound-reproducing idea invented by Mr. Edison, but it also represents every improvement Mr. Edison has been able to make in his original invention.

It is now the product of the Edison Phonograph Works and Laboratories, and is backed by it for years and years with the resources of nearly a million dollars.

Every Edison Phonograph sold by the Jobber is guaranteed by him to be in accordance in each and every respect to the standard described and represented by him, and by the making of the sound test he is required to give the Edison Phonograph and Edison Records an opportunity to demonstrate their superiority.

THE TWENTY-FOUR NEW RECORDS FOR JUNE

are made up of some of the current song records and some of the best dance music. Ask your dealer to play them for you. If he cannot do so, write to us. They can be had at any Edison store on May 15th. You'll be sure to want some of them in your Phonograph.

Write for booklet describing the Edison Phonograph and Records. It will save explanations and useless argument.

NEWSPAPER ADVERTISING.

The advertisement of which this is a reduction occupied 56 inches, on May 11th, in a list of 146 leading daily papers throughout the United States. Their combined circulation is 3,107,145, so that it would be safe to say that the advertisement was read in a large majority of homes that can afford Phonographs. In addition to this we also ran a double-page advertisement in the twenty-fifth anniversary edition of the *New York World*, Sunday, May 10th. This was a 200-page paper and had a wide distribution, covering a very large part of the country. It was a costly bit of publicity, in fact, the costliest single talking machine advertisement ever inserted in a newspaper. Dealers everywhere are bound to profit by our extensive advertising, but the ones that profit most are those who go in for local newspaper advertising themselves.

Have you gotten one of the new hangers, "As a Protection to the Public," from your Jobber? If you have not, by all means do so at once and hang it in a conspicuous place where your customers can read it as an answer to their requests that you make this, that and the other special concession on Edison Phonographs and Records. It will save explanations and useless argument.

Have you been wishing something would happen to help business? Something has happened—the ten Bryan Records, with a big percentage of the country's population is the best argument you can offer for an Edison Phonograph.

MAGAZINE ADVERTISING.

This is a fac-simile reproduction of our full-page advertisement in the following list of twenty national monthly and weekly periodicals: American Magazine, Argosy, Everybody's, McClure's, Metropolitan, Munsey, National, Pacific Monthly, Red Book, Review of Reviews, Outlook, World Today, Saturday Evening Post (back cover). It also occupied a half page in Collier's Weekly and quarter-pages in Ladies' Home Journal, Ladies' World, Woman's Home Companion, Youth's Companion, Associated Sunday Magazines, and Puck. The combined circulation of this list of national magazines is eight-and-a-half millions. Allowing for only three readers to a magazine, that means over twenty-five million people reached by the June announcement. Is it any wonder that more Edison Phonographs are sold than all other talking machines combined when this advertising is kept up month after month throughout the year? The Dealer that does not follow our lead in going after business in a sincere, aggressive manner, cannot complain if competitors get the lion's share of sales. Read this copy of the PHONOGRAPH MONTHLY through for advertising suggestions.

The EDISON PHONOGRAPH

MR. EDISON would like to see an Edison Phonograph in every American home because he knows that there is in this, his favorite invention, more

sound, healthy amusement

than can be had in any other way for so little money. After all, what is it that we want in the way of entertainment? We go to the theatre to hear songs and dialogues; to the dance hall for music and motion; to the concert hall or grand opera to hear good singing, when we can get them all, at far less expense and trouble, in our own homes with the Edison Phonograph.

See and hear the new Edison model with the big horn at the nearest Edison store, or send for a complete catalogue describing it.

REMEMBER EDISON stands for the Edison Business Phonograph and that EDISON stands for the Edison Phonograph and that EDISON stands for the Edison Phonograph and that EDISON stands for the Edison Phonograph. Write us for full particulars.

WE INSURE GOOD LITTLE DEALERS as well as Edison Phonograph Jobbers. Write us for full particulars.

National Phonograph Co., 72 Lakeside Avenue, Orange, N. J.

Edison Phonograph Monthly

VOL. VI. July, 1908 No. 7

Our Aim

THE EDISON PHONOGRAPH MONTHLY is not a smart or "slick" publication. At least not in the sense in which those terms are generally used.

We are doing our best to get out a serious, practical, matter-of-fact trade journal that will *help Edison Dealers sell goods.*

It shall be our ambition to make the PHONOGRAPH MONTHLY more readable—more helpful each succeeding month.

The most we ask of you is that you make use of all the practical suggestions you find for improving your business. The least we expect of you is that you read your copy through each month.

Isn't that a fair deal?

Don't Play Records too Fast

We cannot make this caution strong enough. It is absolutely necessary to run an Edison Phonograph at a speed of exactly 160 revolutions per minute to get perfect results. All master Records, from which Edison Records are made, are recorded at this speed. They must be reproduced at this speed—no more, no less.

Every Phonograph is adjusted to run at 160 revolutions a minute when it leaves the factory. If by accident or carelessness, the governor should become displaced on the pinion shaft or the speed-adjusting screw underneath the top plate turned so as to change the speed, it can be easily adjusted. Raise the top on the Standard or Home and turn the speed-adjusting screw to the right to make the cylinder run more slowly or to the left to make it run faster. The way to judge the speed is to have the Phonograph fully wound up and running at full speed with Reproducer arm down as for reproducing. The Reproducer arm should travel from one of the circular rings on the back rod to the other in exactly one minute. The circular rings are 1 6-10 inches apart. When the Reproducer arm travels this distance it indicates 160 revolutions.

Foreigns Pay Him

We want every Edison Dealer to read the following letter. The good thing about it is there is some German or French or other foreign customer of yours waiting to be "shown" just as Mr. Haupt's friend was. You ought to go after this trade the same as he is doing:

"A friend of mine whom I had not seen for some time paid me an unexpected visit. He had just returned from Germany where he had heard a number of German Records which he supposed were never made in this country. He especially mentioned one Record, 'O Susanna.' I did not answer him but took the Record and put it on the machine. He was so delighted with it that he immediately gave me an order for an Edison Triumph Phonograph, a cabinet, and a great many Records, most of which were German. His purchase amounted to $297.50. He never before had any thought of buying a machine until he heard 'O Susanna.' Now he is so interested in the machine that he regrets that he had passed so many years without an Edison Phonograph."
—Star Phonograph Co., B. Haupt, Prop., 1034 Broadway, Brooklyn, N. Y.

A Question

Are you one of the Edison Dealers who invite Phonograph owners to come to their stores one night each month to hear the new Edison Records played?

"INITIATIVE," WRITES ELBERT HUBBARD, "MEANS DOING A THING WITHOUT BEING TOLD. THE NEXT BEST THING IS DOING IT WHEN YOU ARE TOLD ONCE." THE DEALER WHO DOES HALF THE THINGS HE IS TOLD IN *THE PHONOGRAPH MONTHLY* TO DO IS GOING TO WIN, BUT THE DEALER WHO DOES THREE-FOURTHS IS GOING TO BEAT HIM TO IT.

Advance List of New Edison Records for September, 1908

RECORDS listed below will be shipped from Orange in time to reach all Jobbers in the United States and Canada before August 25th, 1908, all things being favorable, and they may be reshipped to Dealers at 2 P. M. on August 24th. They must not, however, be exhibited, demonstrated or placed on sale by Jobbers or Dealers until 8 A. M. on August 25th. Supplements, Phonograms and Bulletins will be shipped with Records. These may be distributed to Dealers after August 20th, but must not be circulated among the public before August 25th. Jobbers and Dealers may, however, deposit Supplements and Phonograms in Mail Boxes or Post Offices after 5 P. M. on August 24th, for delivery on the following day. Jobbers are required to place orders for September Records on or before July 10th. Dealers should place September orders with Jobbers before July 10th to insure prompt shipment when Jobber's stock is received.

9924 Mexican Kisses — **Edison Concert Band**

Here is a most delightful concert number that has much in common with the ravishingly sweet "Habanera," the Spanish national dance. It is built upon a melody that is as dreamy and rhythmic as any old-world danseuse of old Spain could wish for. As usual with Spanish and Mexican dance music, castenets are introduced with fine effect to emphasize the dance tempo. Composer, Charles J. Roberts; publisher, Carl Fischer, New York.

9925 Let Me Crown You Queen of May with Orange Blossoms — **Manuel Romain**

A picturesque love ballad that vividly recalls Record 9928, "When It's Moonlight, Mary Darling, 'Neath the Old Grape Arbor Shade." The music is by the same composer and serves equally well to bring out all the latent sweetness of Romain's fine tenor voice. To hear this Record is to wish to own it. Orchestra accompaniment; music, J. Fred Helf; words, Bartley Costello; publishers, Helf & Hager Co., New York.

***9926 Take Me Out to the Ball Game** — **Edward Meeker**

The love-ball hit of the season—a home run at least. Katie Casey is a true-blue, dyed-in-the-wool base-ball "fan," and can give her big brothers pointers on "rooting" for the home team. She'd rather munch peanuts on the bleacheries than caramels at a matinee—which is saying a good deal for a girl. Meeker must have taken Katie to a game or two, judging from the interest he takes in singing about her. The tune is a jolly, infectious one and you get every word. Orchestra accompaniment; music, Albert Von Tilzer; words, Jack Norworth; publishers, York Music Co., New York.

9927 Dancing in the Barn — **Edison Military Band**

A new interpretation of an old-time favorite greatly in demand for the reigning barn dance, which seems to have come to stay. The Band has succeeded in making a remarkably good Record, loud and clear in tone with the rhythm perfectly marked. Publishers, Thompson & Odell, Boston, Mass.

9928 Hugo — **Ada Jones**

Here is more proof that Ada Jones' versatility has no limit. This charming entertainer can sing an Irish song "to beat the Dutch," and then turn right around and sing Dutch to beat the Irish. That may seem like a very difficult feat, but there will be no room for doubt after hearing "Hugo," which is her latest Dutch dialect song. A winning combination of genuine comedy with a pleasing waltz tune that suggests the most musical of Vesta Victoria's English comedy songs. Orchestra accompaniment; music, Ted Snyder; words, Edgar T. Farran; publishers, Ted Snyder Co., New York.

9929 Sim and Sam, the Musical Coons — **Len Spencer and Mozarto**

A racy vaudeville sketch. Sam and Sim are a pair of vivacious coons who get back at one another with a lot of witty ragtime repartee leading up to some clever musical stunts. The latter are done by Mozarto, the European vaudeville performer, who was tempted to visit America by the large salaries paid here to artists in his line. He plays about every type of

* This selection will be illustrated on cover of September Phonogram.

instrument, his strong point being taking them two-at-a-time. We are treated to a saxaphone duet, "Sycamore Tree"; to "Suwanee River" on a one-string violin and ocarina, and to a clarinet duet, "Jamaica Two-Step." Mozarto being the sole performer in all three duets. As good as it's novel. Not published.

9930 Childhood — **Byron G. Harlan**

Byron Harlan's child-songs are classics in their way. Many owners of Edison Phonographs give them a place ahead of all other Records. And no wonder, for who could turn a deaf ear to such rare gems of song as "Why Don't They Play with Me?" "Daddy's Little Girl," "Will I Find My Mamma There?" "Little Boy in Blue," "Hello, Central, Give Me Heaven" and "School Days." In "Childhood" Kerry Mills gives us his idea of a song written in the popular waltz time. The fascinating refrain is accompanied with bells. Simply charming and charmingly simple. Words and music, Kerry Mills; publisher, F. A. Mills, New York.

9931 Dance of the Clowns — **Edison Symphony Orchestra**

A realistic descriptive number that portrays the frolicsome glee of a whole company of clowns belonging to "the greatest show on earth." Apparently they have been given a free rein to do as they like and have the entire ring of the circus all to themselves. The entire selection is played in a lively quick-step to keep time with the make-believe quips and pranks of the sportive merrymakers, the oboe and bassoon having solo parts that are decidedly bright and tuneful. Composer, Geo. J. Trinkhaus; publishers, Theo. Bendix Music Co., New York.

9932 Mother's Lullaby — **Matt Keefe and George Stricklett**

A plaintive slumber song with yodle—the first in a long while. The song is by Stricklett and the yodle by Matt Keefe, a new Edison artist. Mr. Keefe is also the composer and has worked in many of those peculiar and strikingly pretty yodling effects that have made his fame in vaudeville. Orchestra accompaniment; music and words, Matt Keefe; not published.

9933 I've Taken Quite a Fancy to You — **Ada Jones and Billy Murray**

Nothing that these clever duetists have done together rivals their spicy love-duets. "Kiss, Kiss, Kiss" (Record 9681) was the starting point of their success in this field. Later we were treated to "Smile, Smile, Smile" (Record 9724) and later still, to "When the Bird of Love is Heard" (Record 9844). Their latest is a distinctly amorous flirting-song, which offers both singers a number of spirited solo parts and a swinging chorus, in which their voices blend delightfully. Orchestra accompaniment; music, Theodore Morse; words, Edward Madden; publishers, F. B. Haviland Publishing Co., New York.

9934 Cohan's Rag Babe — **Arthur Collins**

Still another of the bright musical things from "The Yankee Prince." A jolly, rollicking number that is as joyfully raggy as the "raggedy man." It tells a story of a new two-step that's coming to town (and of course George Cohan would be expected to know about a new two-step ahead of anybody else). If you want a lightning-fast Cohan ragtime number, served up in style by Arthur Collins, don't omit this Record from your list. Orchestra accompaniment; words and music, George M. Cohan; publishers, Cohan & Harris Publishing Co., New York.

9935 Society Swing Two-Step — **Edison Military Band**

A catchy two-step played in dance tempo that will at once take a conspicuous place in the repertoire of the leading dance orchestras. The composer was also responsible for the fashionable "College Life Two-step." The Edison Military Band gives a finished, even performance with ample volume for dancing. Music, Henry Frantzen; publishers, F. B. Haviland Publishing Co., New York.

9936 Somebody Lied — **Bob Roberts**

Bob Roberts has a great opportunity here in one of the best comic coon songs heard in months. Both words and melody are away above the average. The story the coon tells on himself is that somebody (presumably a phrenologist) felt his head in his pickaninny days and said he'd be a President at least—and of course "somebody lied." Later in life he was at work in a livery stable and somebody ordered him to curry a mule, saying, "Don't be afraid of her hind legs, she's gentle as can be." Once again "somebody lied," this time with disastrous effects. Orchestra accompaniment; music and words, Jeff T. Branen and Evans Lloyd; publisher, Will Rossiter, Chicago.

9937 Throw Out the Life Line — **Edison Mixed Quartette**

No hymn in the entire Gospel Hymn Book is more universally beloved than this one. It is probably more used than any other in church revival work. The Edison Mixed Quartette has given it an original interpretation that will reveal new beauties not yet thought of by its tens of thousands of admirers, the soprano and tenor singing the verse and the quartette the refrain. This affords a most unusual example of contrast in form and plan—one singing most many church choirs will undoubtedly copy. Music and words, Rev. E. S. Ufford.

9938 Starlight Maid — **Billy Murray and Chorus**

The brilliant feature-song of "The Auto Race," this season's spectacular production at the

New York Hippodrome. This song has probably won more encores at the world's largest theatre than any ever offered there. Billy Murray sings the solo part and a male quartette assists in the captivating chorus, accompanied by a bells obligato. Orchestra accompaniment; music and words, Manuel Klein; publishers, M. Witmark & Son, New York.

9939 Beau Brummell — **Albert Benzler**

An Edison owner asks, "Can we have too many of the Benzler bells solos?" The answer is a decided "no," especially if we could always have a favorite selection like the ever-charming "Beau Brummell"; but unfortunately there are not many such. The arrangement, in gavotte tempo, lends itself nicely to bells work, and chimes are introduced with just sufficient prominence to bring out the full harmonic contents. Music, Theo. Bendix; publishers, Oliver Ditson Co., Boston, Mass.

9940 Oh, Glory! — **Murry K. Hi**

Murry K. Hill's cleverest comic song-success that has been heard and O. K'd all around the big vaudeville circuits. The singer has a droll method which is all his own, although he has been widely imitated. He has only made one other Record, "In the Good Old Steamboat Days" (9629). The thousands of Phonograph owners, who have this, will hardly wait to read the announcement of a new and even better one by this ever-popular vaudeville artist before determining to own it. The words picture several highly amusing situations and Hill works in a couple of his odd introductions on two of the verses that if anything are more comic than the lines of the song. Orchestra accompaniment; words and music, Murry K. Hill.

9941 Down in Jungle Town — **Collins and Harlan**

We were all ready and waiting for another Collins and Harlan Jungle Song ever since they gave us "In Monkey Land" (Record 9700). It certainly had a "more" to it, and a delight be added, its popularity shows no signs of waning. "In Jungle Town" is by the same composers and they call it the legitimate successor to their earlier effort. We wish to stamp our cordial O. K. on their opinion, but think Collins and Harlan deserve a world of credit for the splendid manner in which they have brought out all its good points. The tune is teething and the chorus goes with a double-swing, helped considerably by a xylophone accompaniment. Orchestra accompaniment; music, Theodore Morse; words, Edward Madden; publishers, F. B. Haviland Publishing Co., New York.

9942 Flanagan's Shopping Tour — **Steve Porter**

This is probably the most comical experience our friend Flanagan ever had. It seems Mrs. F. was sick and Flanagan, like the good fellow that he is, offers to do her shopping. She sends him out to tackle the bargain counters at the department stores. He has a long shopping list and isn't very clear in his own mind as to what it wanted. The sales-girls (mean things) take advantage of him at every turn. For instance, he asks innocently if they have the thinnest thing in shirt waists. The answer is, "We have, but she's out to dinner." This is kept up through eight different departments, each situation being funnier than its predecessor. The act concludes with a rousing comic song. The sketch is original and is not published.

9943 Schottische Medley — **John Kimmble**

Have you heard a Kimmble accordion solo? No? Then don't fail to ask your Dealer to put this Record on for you. The accordion used by Kimmble has no relation to the ordinary concertina type of instrument. You will be astonished at its sweet tone and variety of musical expression, while the volume is sufficient to fill a large-size concert hall. This selection is a potpourri of popular melodies played in schottische tempo. It is well suited to the barn dance. Piano accompaniment; not published.

9944 Your Picture Says, "Remember" tho' Your Letter Says, "Forget" — **Frederic Rose**

This month's sentimental ballad represents the united efforts of A. J. Lamb, who wrote the words of "The Heart You Lost in Maryland You'll Find in Tennessee" (Record 9282), and S. R. Henry, who composed the music of "Down in the Old Cherry Orchard" (Record 9723). The first will be recalled as Rose's great success on our March list, while the latter was the song selected by him for his first Edison Record. This touchingly pretty ballad may therefore be fairly said to have been made to order for the singer and to fit him "like a glove." Orchestra accompaniment; music, S. R. Henry; words, A. J. Lamb; publishers, J. W. Stern & Co., New York.

9945 Tony and Rosetta — **Ada Jones and Len Spencer**

Ada Jones and Len Spencer in their element. As Tony and Rosetta they run a "dago" fruit stand and make a fair start to riches. The competition for laughs is very keen between their fast and witty repartee and that of their customers. These include an Irish cop, a Jew, a boodleist, and Danny, Rosetta's second-best friend. The mandolin, harmonica, popping corks, fizzing soda and steaming peanut roaster provide incidental music, and Rosetta (Ada Jones) tops it all off with a great dialect song, "It's My Brud." The sketch is original and is not published.

9946 Every Mother's Son There Sang "The Wearing of the Green" — **Edward M. Favor**

Truly Irish and truly comic. The events of McVeigh's birthday celebration are graphically

pictured in lines that abound in real Irish wit. All the neighbors had assembled on the parlor floor of the McVeigh tenement and proceeded to make an Irish night of it, by partaking of the cup that cheers and singing "The Wearing of the Green." Then followed a genuine Irish scrap, resulting from Dan McCann trying to dance the "Merry Widow Waltz" with the wife of Murphy's bonnet. A copper "blew in" on the scene in time to pinch the whole "shebang," so the rest of the evening was spent in jail. Three verses and three choruses. Orchestra accompaniment; music, Joe Hollander; words, Ed. Rogers; publisher, Shapiro, New York.

9947 The Top Notch March — **Edison Military Band**

All that the name implies—a new march and a sure enough live one. One hears so many so-called marches that are simply a jumble of old worn-out tunes "oft heard before" that a snappy, original number such as this one is as refreshing as a cool shower after a hot day. Note particularly the haunting melody in the trio, and the stirring military flavor which gives the Edison Military Band an opening for some of their wonderful ensemble work. Music, Charles Arthur; publisher, Carl Fischer, New York.

2 Selections Made Over

We list below two selections that have been made over by the same talent. The September printed matter prepared for retail use will contain these selections. Jobbers should replace their stock of the original Records of these numbers with the new ones.

2216 The Old Oaken Bucket — **Edison Male Quartette**
8270 Santa Claus Song — **Geo. P. Watson**

Home Made Records

Get the owners of Edison Phonographs started on making their own Records at home. It's easy to do and will pay you big. Voice photography is more novel—more fascinating than ordinary photography and far less trouble. Baby prattle recorded now will prove the most delightful music in the world in later years. And the recorded words of relatives and friends will be a priceless possession when they are far away. Such talking points make an irresistible argument with Edison owners.

Be the first to push home-made Records in your town. It will pay you big because you sell the Record Blanks at a good profit and charge for shaving them off. You also sell the recording horns and (to owners of Gem and Standard machines) the Recorders. Don't lose a sale because a customer objects to buying the recording horn. Sell it if you can, but failing in this, show them how to make one of card board.

The minute you announce that you can supply the equipment for making Records at home and are prepared to shave the blanks, it is bound to add greatly to your prestige. It will attract Edison owners to your store who have been going elsewhere for their regular Records. It will also influence the prospective buyer of a machine to get an Edison, as it is the only type on which Records can be made at home.

We are going to give liberal space in the *Phonogram* to home record-making from now on. That will help you.

Write at once to the National Phonograph Company for a catalogue of accessories and any further information.

An Idea

One Edison Dealer makes it a rule to print the full lists of new Edison Records in his newspaper advertisements. He features this double line in bold face type:

Call and hear the new Records
Whether you own a Phonograph or not.

A very clever scheme, for it not only reminds Phonograph owners that the new Records are out, but invites the public in to hear them. Use the idea in your advertisements.

They Are "With Us"

We have looked over the Edison bill-boards and find them well located and nicely put up.

They are certainly fine and an expensive piece of work. But without a doubt, like all GOOD advertising, they will pay well.

We are spending considerable this year for advertising Edison Phonographs in local newspapers, sign boards and mailing advertising matter direct. Last, but not least, we endeavor to sell every customer a quiet running, carefully adjusted machine, and a good selection of Records, which secures a satisfied customer—the best advertisement procurable—free of cost. We are with you to strengthen the Edison business.—*Olinger & Warwel, No. Manchester, Ind.*

Appellate Division of New York Supreme Court Decides Davega Case in Favor of the National Phonograph Co.

The decision of Judge Keogh, in the Davega suit in favor of the New York Phonograph Company, was reversed on June 5th, by a unanimous decision of the Appellate Division of the Supreme Court of New York. As several hundred suits brought against New York jobbers and dealers of the National Phonograph Company by the New York Phonograph Company are substantially terminated by this decision in the Davega suit, which was selected practically as a test case, it is of exceptional interest to New York Jobbers and Dealers. The decision is a document of very considerable length and while its importance would merit its reproduction here in full, lack of space restricts this article to a brief statement of the material points decided and a few extracts from the more important portions of the decision.

Judge Miller, in writing the opinion, concurred in by all the Judges of the Appellate Division, treats the case in two branches; first, deciding that on the merits of the controversy the decision in the court below should have been against the New York Phonograph Company, and secondly, directing a dismissal of the bill of complaint on the ground that the suit was really a patent case, which should have been tried in the Federal Courts and of which the State Courts have no jurisdiction.

On the question of the merits, the decision is in substance as follows: On June 28th, 1888, the North American Phonograph Company, under an agreement with Mr. Edison, acquired the exclusive right to exploit and introduce the Phonograph commercially throughout the United States and Canada. This was a license agreement under certain inventions patented prior to that time, which patents would expire, by the termination of the seventeen-year period for which they were granted, not later than 1907. By a subsequent agreement of August 1, 1888, Mr. Edison undertook to assign to the North American Company his Phonograph inventions made within a period of fifteen years thereafter, on condition that the North American Company should pay his expenses for experimental work, and for obtaining the patents.

The North American Company granted an exclusive license to the New York Phonograph Company, the plaintiff, and its predecessors, to sell Phonographs and appliances within the State of New York, up to March 26th, 1905, and so long thereafter as it should have exclusive rights to grant, under its contract with Mr. Edison. This contract was one between the North American Company and the New York Phonograph Company, and its predecessors. Mr. Edison was not a party to it.

In the year 1894, the North American Phonograph Company became insolvent and a receiver was appointed, and in February, 1896, its assets were sold to Mr. Edison, who was the sole bidder and the largest creditor. The North American Company, after its insolvency, paid no part of the expenses incurred by Mr. Edison in making his subsequent experiments and in securing his patents, and therefore, under the terms of its agreement with him, acquired no right to such inventions. The decision of the trial Court, which granted an injunction restraining the defendant, Davega, from selling Phonographs and phonographic appliances, within the State of New York, up to August, 1921, was based upon the theory that the rights of the New York Phonograph Company continued during the life of a patent of Mr. Edison, granted in August, 1904, and applied for on August 1, 1903, the last day of the fifteen years during which Mr. Edison was to make inventions for the North American Phonograph Company, assuming that the above conditions were complied with. No one pretends that the patent in question was used by the National Phonograph Company, or by any one else, but the patent was practically selected as a *measure of time*, during which the original rights of the New York Company were supposed to be in force, and not, as is ordinarily the case with patents, to define the scope or extent of a right. But as the North American Company, subsequent to the receivership in 1896, paid none of the expenses relating to the making of inventions and the taking out of patents, the Court held that it was not entitled to an assignment of that invention and hence its rights could not possibly be dependent thereon; and for this reason, the decision of the Court below was reversed.

On the question of jurisdiction, the contention of the New York Phonograph Company was that this was not a patent suit, because the validity of patents or the violation of patent rights was not presented for decision, but the Court found that an infringement suit does not necessarily involve the validity of a patent, that the rights which the New York Phonograph Company asserted arose, if at all, under the patent laws of the United States and that the construction of the patent laws, as well as the construction of the patents themselves were involved and announced its determination upon the subject of jurisdiction as follows:

"This conclusion seems inevitable that whatever rights the plaintiff has as against the defendant (Davega, the jobber) or his vendor (the National Phonograph Company) are patent, not contract rights. If so, any suit to enforce those rights arises under the laws of the United States, and the Courts of this State cannot take jurisdiction of it."

The decision furthermore disposes summarily of the principal contention of the New York Phonograph Company that the rights secured from the North American Company were derived from a general selling contract and not from a license under patents, in the following language:

"I do not discuss the point argued by the plaintiff that the term of said contract was fixed not by the life of the patents owned or controlled by the licensor, or which it might become entitled to under its contract with Mr. Edison, or that *position is obviously untenable.* The parties understood when said contract was made that all of the patents then in force would expire before or during the year 1908 and the continuance of the contract beyond that time depended on the making of subsequent inventions by said Edison, which said licensor should become entitled to as aforesaid."

Another contention which lies at the foundation of the claims made by the New York Phonograph Company was that the National Phonograph Company, which acquired a part of the assets of the North American Phonograph Company is the successor of that company and as such is bound to perform all its agreements for the future. On this subject the Court says:

"The respondent's position is that the National Phonograph Company is the successor of the North American Phonograph Company; *but that position is untenable (N. Y. Bank Note Co. v. Hamilton B. M. Co.,* 190 N. Y., 280.) The National Company purchased through Mr. Edison the assets of the North American Company at receiver's sale pursuant to a judicial decree. There was nothing in that decree which required the purchaser to assume the obligations of the old insolvent company, and the purchaser at a judicial sale of the assets of an insolvent corporation does not assume the latter's obligations.

* * * * * * * * * * * *

"If it be the law that the purchaser at a receiver's sale of the assets of an insolvent corporation assumes its obligations even under executory contracts, no responsible person could safely bid at such a sale *but as already shown that is not the law.*"

Throughout this litigation numerous unfounded accusations have been made against Mr. Edison in relation to his conduct toward the North American Company. As a matter of fact it was through Mr. Edison's efforts that the North American Company remained in business as long as it did; and instead of endeavoring to wreck it, as he has been accused of doing, he made many personal sacrifices to sustain it. We are pleased to note the following passages in this decision which indicate how unfounded were the charges made against Mr. Edison:

"There is a finding 'that such acts' (*referring to acts set forth in previous findings*) 'were done pursuant to a scheme or plan and as an expedient and device to unlawfully invade the said exclusive territory of this plaintiff.' But so far as that may refer to the appointment of a receiver of the North American Phonograph Company, the sale of its assets and the purchase thereof by the National Phonograph Company, *there is no evidence to support it.* It is undisputed that when the North American Phonograph Company was insolvent, a receivership was necessary and Mr. Edison or a company organized by him had as much right to purchase the assets as anybody had. *In fact, his purchase was probably fortunate for the creditors.*"

* * * * * * * * * * * *

"I am not saying that Mr. Edison could wreck the North American Phonograph Company for the purpose of acquiring its assets and destroying the value of the plaintiff's contract without being answerable in damages therefor, but I am not willing to put a strained construction upon words wrong, but which must be read in the learned counsel for the respondent on that subject, *there is no proof whatever to the record to warrant it.*"

We regard the decision in the Appellate Division as of great importance, and believe that it must substantially end the campaign which for years has been directed against our Jobbers and Dealers by the New York Phonograph Company.

Jobbers' Convention

Everything is in readiness for the annual convention of the National Association of Talking Machine Jobbers at Atlantic City, N. J., July 6 and 7. The committee of arrangements reports that there will be a fine attendance and many Dealers will also make the trip, as it offers an unusual opportunity for combining business and pleasure. Atlantic City is the nation's playground about the time set for the convention, and hotel accommodations should be engaged in advance. The Hotel Chalfonte will be headquarters. The committee also recommends the Raleigh Hotel, which is near at hand, and suggests that everyone attending the convention ask for the special hotel rates that they have arranged for.

Prices for Gold Plating the Idelia

The Sales Department, in response to a request from the trade, recently quoted a list price of $13.50 for the Idelia Phonograph *gold plated* instead of oxidized, subject to the regular Jobbers' and Dealers' discounts. This makes the additional price of gold plating $2.50. If a gold-plated Idelia is ordered with repeating attachment, no extra charge will be made for gold plating. Only the regular charge for the repeating attachment, $12.50, will be made.

Sales Department Bulletin No. 12. June 20th, 1908.

FOR UNITED STATES AND CANADA DEALERS.

Correspondence concerning this Bulletin should mention its number and be addressed to the National Phonograph Company, *Sales Department,* Orange, N. J.

Dealers are hereby advised that inasmuch as we have no more moulds or masters of them, the following selections will be considered as "cutouts" after our present stock is exhausted:

12074	La Marcha de Cadiz (Spanish) Vargas
12876	Blue Bells of Scotland (French-Canadian) 48th Highlanders' Band

WHY NOT BECOME A DEALER IN EDISON BUSINESS PHONOGRAPHS? OTHER DEALERS ARE FINDING IT HIGHLY PROFITABLE. FOR FULL INFORMATION WRITE TO *EDISON BUSINESS PHONOGRAPH CO., ORANGE, N. J.*

How to Unpack and Set Up Edison Phonographs

There is a right way to unpack Edison Phonographs and Records that is so far ahead of the multifarious wrong ways that we are going to explain it fully for the benefit of Edison Dealers who do not have it in use.

Edison Phonographs reach the Dealer in the same shape as when they leave the Edison Phonograph Works at Orange, N. J., as the Jobber re-ships them just as they are received. This means they are in perfect condition, and all that's needed is a little care to get them out whole.

The box should be placed on a bench, or on another box, top-side up. If you are a six-footer, the store counter may not be too high for the purpose. Now draw the nails out with a NAIL-PULLER. We write this with capitals because it's by far the most important part of the operation. If you do not have a nail-puller, by all means get one. Ninety-nine per cent of all damaged goods found in our shipping boxes comes from indiscriminate, strong-arm use of hatchet or hammer and chisel in opening them up.

The latter is just about as effective a way of opening up Phonograph goods as an axe is on a can of tomatoes. Your little ten-cent can opener does the trick in thirty seconds and saves the can, saves the contents, saves your good humor for the day. And you know how the axe scheme works. Well, the Phonograph is not far below the top of its box, and it won't take much of a stab from hatchet or chisel to open up a gaping hole in its cover. Get the nail-puller and save all of those good boxes that will come in fine to sell or to set things on in your window trims.

When the box top comes off a good thick layer of excellent padding is found. Take this out and a couple of stout strips will be seen extending across, to help hold the Phonograph firmly and prevent slipping around. The way to get these

out is to turn the box over on its side and get busy with your nail-puller, as shown above.

After the strips are out look out for a parcel containing the horn crane in four parts. The Phonograph is found tightly wrapped in tough, heavy wrapping paper. Remove this and at each end is a catch lever. Pull these out and the cover can be lifted off. The Reproducer will be found tied securely. Lift the lid on which the mechanism rests until the supporting link at the left end catches to hold it in position. Now remove the straw-board blocking that is underneath the spring barrel. [See illustration below.]

It is put there to hold the mechanism firmly in position and prevent its being jostled in shipping. It is surprising how many Dealers send the Phonographs out without removing the padding or telling their customers about it. The result is the machine refuses to go.

A package will be found inside the case containing winding crank, horn connection, oil can and sample bottle of oil, and set of instructions. With machines higher-priced than the Standard a Reproducer is also included. Follow the directions to the letter when you are ready to set the Phonograph up and start it playing.

An envelope will be found in with the horn crane parts containing diagrams and instructions on adjusting the horn. There is one thing in which great care must be exercised—and that is the position of the horn. Connect the horn with the Reproducer and set the Reproducer at the centre of the Record cylinder. Now make the chain rod of such length that when the horn is swung from the end the chain will hang perfectly straight, or perpendicular as seen from the end of the machine. If the chain slants toward the Phonograph it pushes against the Reproducer so as to cause friction and slow up the movement of the carriage. If it slants the opposite way, it pulls the Reproducer away from the Record and weakens the tone.

Use the same care in opening up your Records, only more of it, for the Records are much more fragile and apt to break. Use the nail-puller and use it carefully. In handling a

Record, insert two fingers in taking it out of carton and putting it back, also in removing it from the Phonograph cylinder after it is played. Put it into the carton straight. Don't put it in on a slant, knocking against the edge of the box.

Some Dealers, who know as much as we do about opening up their goods, may suggest that all this sounds like A. B. C's to them. The answer is, "Can any Dealer know too much about the A. B. C's of the business?"

Push the Bryan Records

What are you doing on the William J. Bryan Records?

The question is suggested by the fact that the Bryan Records will help you to do a much larger summer business if you push them properly. Many Edison Dealers began advertising the Bryan Records in their newspapers when they were first announced. They had public interest worked up to a high pitch when they received the Records and put them on sale.

There are very few Dealers who are not making especially strong efforts to sell the Bryan Records to Phonograph owners. That's right. It's the easiest thing you know, getting almost anybody to pay 35 cents to own one of Bryan's speeches delivered by Bryan himself. Be sure all of your Edison owners know about them and you can depend upon them to do the rest.

You ought by all means, to advertise in local newspapers. Make use of the advertisements that were printed on the circular we mailed you. And see that your paper runs some reading notices for you free of charge. We gave you a few good ones with the advertisements. Ask the editor to write an editorial. Many of them have done so. Editors of democratic papers would like nothing better.

Fix up your window like the sample window shown in this issue of the PHONOGRAPH MONTHLY. You will see that we have made the most of Bryan's prominence in the Presidential campaign in introducing the platform idea. This makes the window a capital eye-catcher and above all it is perfectly simple for you to copy.

The window display ought to be made at the same time your newspaper advertising is running so that the two will pull together.

Have you mailed out to your Phonograph owners your special Bryan supplements that came with the Records? That should be done by all means. You should also put the supplements in the hands of non-owners who may thus be interested in purchasing Phonographs. You ought to be ashamed to look your Phonograph business in the face if you fail to sell a lot of machines on the strength of the Bryan Records.

Another thing—don't make the mistake to think that men are your only possibilities. Far from it. Women flock to hear Bryan whenever he speaks. It takes a large "men only" sign to keep them away, and even then they do not stay away through choice. The few women who are not interested in politics in the heat of a Presidential election will still be delighted with his orations on Immortality and An Ideal Republic—no indeed, you cannot afford to overlook the ladies.

It wouldn't be a bad idea to have some hand bills printed up, to be left at front doors and posted in conspicuous places. The same reading matter given for the advertisements would answer nicely.

A typewritten letter to be mailed, sealed, to a list of men would give you good results. Something like the following:

DEAR MR. JONES:

If William Jennings Bryan offered to deliver his favorite orations in your home, you would consider you had a very great privilege, would you not?

Well, we make you an offer that practically amounts to the same thing.

Bryan has just made Records of his ten best speeches for the Edison Phonograph, and hearing them is like hearing the living man.

The Records are composed of telling passages chosen by Bryan from his favorite orations. He discusses leading issues of the Presidential campaign, and you can hear first-hand just what his views are, if you own a genuine Edison Phonograph.

Will you not call at our store and hear a few of the Bryan Records?

It will not obligate you in any way. We want you to hear the Records whether you have any idea of securing a Phonograph or not.

Remember, we sell genuine Edison we will sell you one for $12.50 or $25.00, on terms as low as $1.00 a week. The Records are only 35 cents each.

Do not fail to call.

Yours very truly,
SMITH & CO.

All of the above mentioned forms of advertising will pay you. Adopt as many as you can.

The Phonograph Sells Sheet Music

A music dealer writes that the Edison Phonograph helps him immensely in the sale of sheet music. A great many others have made the same report. Here is a hint to sheet music dealers. Why not have an Edison Phonograph in the sheet music section for demonstrating your music?

There is an Edison Record of most of your music, and it would help the sale of both vocal and instrumental pieces. Then, too, many of your sheet music customers may be interested in an Edison Phonograph by hearing how well it plays and sings their favorites. Try it.

VOL. VI. July, 1908 No. 7

House-to-House Work

There is a large and constantly growing number of Edison Dealers who make a specialty of selling Edison Phonographs the way sewing machines are sold. That is, they have a light wagon that will accommodate one of each of the three leading types of Phonographs and about 50 Records. They get up their lists of prospects and make regular rounds so as to let the people hear the Edison in their homes.

This is certainly a very effective way of going after business, especially in small towns where a Dealer has trade scattered through the country district. Combine this policy with an offer of the Edison on the weekly payment plan and it will certainly land many sales that could not be made in any other way.

A rig similar to the one shown below would be just right. This is owned by M. J. Learn, of Cuba, N. Y.

So Can You

The *Talking Machine World* says: "The Milner Musical Co., of Cincinnati, will entertain the big Democratic club of that city, in a few days, by giving a concert, using an Edison Phonograph and ten Bryan Records."

Edison Jobber Honored

C. A. Grinnell, head of the firm of Grinnell Bros., Detroit, Mich., has been elected president of the National Association of Piano Dealers for the year 1908-09.

This Really Happened

A Dealer's salesman was playing an Edison Phonograph for the benefit (?) of a customer. The Phonograph was going at a fierce clip that ought to have gotten him arrested for exceeding the speed limit if he had been driving an automobile instead. The customer quickly left (without buying of course) and the salesman's attention was called to the mistake. Imagine the surprise that resulted when he replied, "Oh, that was all right. I was hittin' her up to get through in a hurry."

Are YOU studying your customers' likes and playing the Records you think will please them most so as to make them feel they simply must own an Edison Phonograph? Are you going about it as if you really enjoyed it as much as anybody? Or are you "Hittin' her up to get through in a hurry?"

ANOTHER WAY INSTALLMENT SALES FIGURE AHEAD: THE PROFIT ON RECORDS SOLD TO INSTALLMENT BUYERS OF PHONOGRAPHS WHEN THEY CALL TO MAKE PAYMENTS, TAKES CARE A HUNDRED FOLD OF THE INTEREST ON THE MONEY OUTSTANDING.

William E. Gilmore to go Abroad

William E. Gilmore, President and General Manager of the National Phonograph Company and the several other Edison interests, will leave July 7th for Europe on a year's vacation. His family will accompany him. During his absence the executive management of the Edison Manufacturing Co., National Phonograph Co., Bates Manufacturing Co., and Edison Business Phonograph Co. will be vested in an Executive Committee composed of Frank L. Dyer, Chairman; P. Weber, C. H. Wilson, A. Weaste, F. K. Dolbeer and L. C. McChesney. The committee will meet regularly once a week or oftener if necessary. The report that Mr. Gilmore had resigned from the management of the Edison interests is without foundation. Both Mr. Edison and Mr. Gilmore authorize the statement that Mr. Gilmore has not resigned and has no intention of doing so.

Selling Record Blanks

Below is a letter from an Edison Dealer that shows how easy it is to interest Phonograph owners in making their own Records at home.

"I will give you a little experience we had. A number of friends met at our home a few nights ago, and as several were leaving us, I requested all present to talk, sing or whistle into the Phonograph, and to announce their names. There were fourteen in the party and all did as requested when we found we had about a third of the blank left. One of the ladies completed it by singing a verse of a song. It was quite a success, and makes a nice souvenir.

"On the strength of the Record, we sold a number of blanks."—*G. F. Wimek, Pottsville, Ore.*

Praise for Bryan Records

(Taken from Letters.)

Have just received word of your latest achievement and feel that congratulations are in order. The Bryan Records will be beyond doubt the greatest sellers your list can show.—*S. M. Field & Bro., Little Rock, Ark.*

We are more than pleased to state that we are receiving telegraph orders for Bryan Records. We feel there will be a larger demand for these than for any other set.—*Schmelzer Arms Co., Kansas City, Mo.*

We are glad to hear you are getting out Records by our distinguished citizen and certainly believe they will be a tonic to the present trade dullness. We believe repeat orders will be much larger even than initial orders.—*H. E. Sidles Phonograph Co., Lincoln, Neb.*

Over the Counter

(The Dealer in EDISON PHONOGRAPHS, who reads these Counter Conversations regularly every month is going to get a mighty good line on the kind of talk that sells EDISON PHONOGRAPHS and RECORDS.)

CUSTOMER: "What kind of talking machines do you sell?"

SALESMAN: "We sell the genuine EDISON PHONOGRAPH. But I hate to hear it called a talking machine. It's considerably more than a talking machine. It's the greatest musical instrument in the world.

The EDISON PHONOGRAPH is the one that was invented by Thomas A. Edison and bears his trade-mark signature. Edison has been working on it ever since and has gotten it so good that it will repeat the music of a band or orchestra or the human voice so truly to life that there is no difference from the original.

Mr. Edison called his invention the PHONOGRAPH from the two Greek words, "Phonos" and "Graphe" which mean a sound-writer. You can see that the Phonograph is the standard talking machine of the world from the fact that the word Phonograph has become a part of the English language. You will find it in all of the modern dictionaries.

Dealers call ordinary talking machines Phonographs but Edison's is the only one that can use the word PHONOGRAPH on the instrument.

Broadly speaking the EDISON PHONOGRAPH is the best Phonograph because it is the original and genuine. It's Mr. Edison's favorite of all his great inventions. And it is made by his own companies working under his supervision. He is at the factories every day to see that everything is carried out according to his own ideals. Of course it is no miracle that Mr. Edison and his own companies can turn out a better instrument than any of the imitations.

There are a great many imitations, and many of the companies making them only stay in business a year or two before they fail and go out of business. The Edison has gained in sales every year since it was first put on the market. More Ediisons are sold to-day than all others combined. Could you ask for any better argument than that?

It is the ambition of Mr. Edison's life to see an Edison Phonograph in every American home and they are already in more than a million. Yes sir, a million and there are only about eighteen million homes in this country. Think of that."

(To be continued next month.)

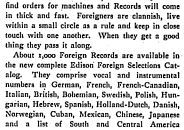
Foreign Records Sell

The Foreign Record business of a prominent Edison Jobber has doubled twice within the past sixty days! This is of great interest to Edison Dealers because it means that the Foreign Record business of a number of Edison Dealers has gained in the same proportion.

How did it happen?

In just the way that the PHONOGRAPH MONTHLY has repeatedly pointed out as a sure winner. The Jobber stocked the full line of Foreign Records, urged his Dealers to go after their foreign trade, and many were wise enough to take the hint.

On February 10th the Jobber put in a stock of 1,700 Foreigns. Previously he had been handling his orders for Foreign Records as specials, and by this method sales had averaged about 150 Records a month. From the date of putting in the full line to April 22nd—a little over sixty days—the jobbing firm had re-ordered 1,800 Foreign Records and found it necessary to increase their regular Foreign stock from 1,700 to 2,000.



The point is right here: there is nothing in the success of this jobbing concern's Dealers that any Edison Dealer cannot duplicate. There is a ready-made demand for the Foreign Records in every community. The way to make the most of it is to first stock the Records and then make it known that you have done so.

The public is not going to run after any dealer on any article, for the public has many uses for its hard-earned dollar and isn't over anxious to spend it on anything. A dealer couldn't sell clothing—he couldn't sell groceries, shoes, pianos, jewelry or anything else if he did not first get the goods on his floors and then make it known. No; your customers are never going to force you to put the Foreign Records in—not in a thousand years. Foreign customers would be the last to think of such a thing. You do the thinking for them. They are not the recipients of many such special propositions as you have to offer in the songs and instrumental music of their native land. When they get your suggestion that they can hear in their own homes their favorite national songs, dances and concert numbers by leading native artists, it will strike them as a very happy thought.

The proper way to start in is to look around you to find what nationalities of foreigners are best represented and order your Records accordingly. Any Jobber who carries a full stock of Foreign Records can help you on selection, and it would be a good idea to take this part up with some of your foreign-speaking acquaintances. When the Records arrive, have some of the people you are seeking to reach, come in and hear them. Just make a sale or two and you will find orders for machines and Records will come in thick and fast. Foreigners are clannish, live within a small circle as a rule and keep in close touch with one another. When they get a good thing they pass it along.

About 1,000 Foreign Records are available in the new complete Edison Foreign Selections Catalog. They comprise vocal and instrumental numbers in German, French, French-Canadian, Italian, British, Bohemian, Swedish, Polish, Hungarian, Hebrew, Spanish, Holland-Dutch, Danish, Norwegian, Cuban, Mexican, Chinese, Japanese and a list of South and Central America National Hymns. The vocal Records were made by the foremost native talent, not by foreign-speaking Americans. They are faultlessly recorded and are perfect in accent and enunciation.

Write to your Jobber to-day for the Foreign Record Catalog and get a line on your Foreign prospects while the catalog is on the way.

A SECTION OF THE STORE OF ALONZO WILKES, AMSTERDAM, N. Y.

Mr. Wilkes uses the Tray System for keeping his Records and his racks have a capacity of 10,000 Records.

Jobbers' Advertising

We have received samples of attractive circular matter gotten out on the Bryan Records by the following Edison Jobbers: Schmelzer Arms Co., Kansas City, Mo.; The Ball-Fintze Co., Cincinnati, O.; Harger & Blish, Dubuque, Iowa; R. C. Bollinger, Fort Smith, Ark.; W. J. Dyer & Bro., St. Paul, Minn.

Ready for Your Scissors

Here are three timely advertisements and three reading notices to run in your local newspaper. Order the display ads. and see that your paper runs the readers free as news matter.

(Advertisements.)

HAVE A TIME ON THE FOURTH

Get the family together. Call in a few friends. Start up your genuine *Edison Phonograph* with "Yankee Doodle," "Dixie," "Stars and Stripes Forever," and "Star Spangled Banner"—all played with true military dash by the famous Edison Military Band.

Next give them "Lincoln's Speech at Gettysburg," and the patriotic poem, "Our National Airs" with incidental band and orchestra music.

Then the inspiring vocal duet, "The Battle Cry of Freedom."

What a program!

Genuine Edison Phonographs, $12.50 and $22.00—$1-a-week payments. Edison Records, 35 cents each.

At such a price and terms can your home afford to longer do without the world's greatest entertainer?

(Dealer's name and address.)

BRYAN SPEAKS TO-DAY.

William J. Bryan delivers choice passages from his best orations at our store to-day.

The Great Commoner has made Edison Records of his ten best speeches. When you hear these Records on a

Genuine Edison Phonograph

you hear his actual voice. Bryan decided the perfected Edison would do his oratorical gifts full justice.

You are cordially requested to come in and hear Bryan speak on

The Trusts	Imperialism
The Railroads	The Bank Laws
The Labor Question	Election of Senators
The Tariff	Swollen Fortunes

A Genuine Edison Phonograph, $12.50, or $25.00 at $1.00 a week. Records, 35 cents each.

(Dealer's name and address.)

GOING TO GO?

Don't go on your vacation without an Edison Phonograph.

It costs so little, is so light and easy to carry around, and it will give you a whole world of the jolliest pleasure.

There won't be a dull moment on your trip with your Edison singing all the popular song hits, playing the band pieces heard in the park concerts—delivering William J. Bryan's great speeches (by Bryan himself).

The Genuine Edison at $12.50 and $25.00 on $1.00-a-week payments.

Come and hear the new Records.

(Dealer's name and address.)

(Reading Notices)

WM. J. BRYAN IN TOWN

William Jennings Bryan, the "Peerless One," is in our midst in the person of Thomas A. Edison's Phonograph. Bryan decided that Mr. Edison's perfected machine would do full justice to his oratorical powers in reproduction, so he delivered extracts from ten speeches into the horn of an Edison. The wax Records did their duty, catching every word just as he spoke it.

Now the Edison Company are unable to cope with the demand all over the country for the duplicate Bryan Records. Bryan himself is being heard in thousands of homes upon all the burning political questions.

———— of ———— street, are giving free demonstrations of the Bryan Records at their store daily and are entertaining large and enthusiastic audiences.

(The following reader calls for the window trim shown on page 15.)

A SIGHT WORTH SEEING

Have you seen the Fourth of July show window of ———— ———— street? Dont miss it. It's a sight worth seeing. They certainly hit on the most original idea for a patriotic window that has been seen.

Thomas A. Edison's Phonograph is made the centre of the picture which we would take pleasure in describing fully if it were not certain that seeing will be much more enjoyable than hearing of it.

HAPPY VACATIONISTS

The woods are full of 'em, as the saying goes. If you wish to be an up-to-date vacationist you must make your plans so that there'll be no dull moments on the trip. A great many of our citizens have been won over by the suggestion of ———— at ———— street that they take an Edison Phonograph along. Probably there never was a summer when so many Phonographs were to be heard in the country at summer homes and in camps. Fishing parties find them just right for an evening's entertainment before turning in, and house parties depend upon the Edison to furnish dance music for their nightly soirees. Then there are the speeches by Wm. J. Bryan that everybody is talking about. If Mr. Business man wants to set the political pot boiling for a few minutes he settles himself comfortably in a hammock and summons up the Great Commoner to repeat his views on the political issues of the presidential campaign—nothing like it.

Questions and Answers

We have opened this department in order to print, each month, questions asked us in letters from Dealers and Phonograph owners about the regulation of their machines, together with our answers. This information will serve to clear up many important points on which you should be posted so as to keep your own Phonographs in perfect running order, and also give your customers valuable advice.

A. C. B., Bridgeport, Okla.—My Edison Standard Phonograph gave perfect satisfaction until recently. It trembles and at times plays so low it can scarcely be heard. We have cleaned it carefully, but this only helps for a few seconds. The Reproducer weight seems to get caught and won't let go, and then quivers until hardly intelligible. [This is probably due to the Reproducer weights not being in proper balance. Take the Speaker from the Speaker Arm and hold it in front of you, with the weight hanging toward you. If one side of the weight hangs lower than the other, or if it does not balance perfectly, the hinge screw on which the weight hangs has probably become bent. You should take the weight in your hand and give it a slight twist to straighten the hinge and cause the weight to hang in proper balance.

When the Speaker and a Record are placed on the machine the weight should hang parallel to the surface of the Record; and when reproducing, the little pin in the weight should rest in the centre of the wire loop. You should also apply a tiny drop of oil to the speaker weight hinge screw and clean out the other joints of the Reproducer with a soft cloth.

The tremble might also be due to the fact that the Feed Nut does not fully engage with the threads of the Feed Screw. The tension of the Feed Nut spring should be such that when the Speaker Arm is let down on the straight edge, you can tap it with your finger and it will not bound upward. On the other hand, the tension should be strong enough to make sure that the threads of the Feed Nut engage fully with the threads of the Feed Screw, so they will not slip out at any time when the machine is running.

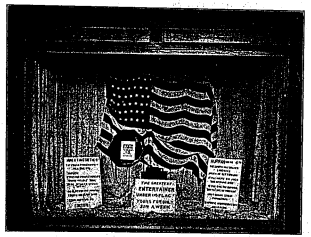
The reason the Speaker does not give satisfactory results is that the point is either dragging behind or dropping ahead of the groove in the Record. The object of our suggestions is to enable you to adjust your Speaker so as to overcome the tendency of the sapphire point to leave the groove in the Record.]

As the Phonograph Monthly goes to press, it is plain that the W. J. Bryan Records are causing a great sensation all over the country. Jobbers' orders are for in excess of our strongest expectations. Many Jobbers have three and four separate orders in. Do not wait until you are sold out before reordering. Your Jobber may not be able to fill your order if you do.

Fourth of July Window

The best thing about the Fourth of July window on the opposite page is that it is timely and so simple that it can be duplicated by any Dealer. The flag is pinned to the white drapery so as to give it a waving effect. The Edison Standard Phonograph stands on the box in which it is shipped. White cheese cloth is thrown loosely over this and over the floor. Small blocks are placed under it at intervals to give a tufted appearance. The large signs are home-made, and anyone who is at all handy with a brush can equal them.

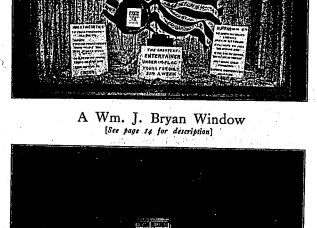
The wording on the two cards at the sides is as follows: No. 1—Have a Time on the 4th. The Edison Phonograph Will Give You "America," "Stars and Stripes Forever," "Yankee Doodle," "Dixie," "Star Spangled Banner," etc., etc. All played by the Famous Edison Military Band. Come in and Hear an Edison. Sign No. 2—Hurrah for the 4th. The Edison Will Deliver "Lincoln's Speech at Gettysburg." It will recite the poem, "Our National Airs." It will sing the Inspiring "Battle Cry of Freedom." Own a Genuine Edison Phonograph. Be Patriotic Independence Day and Every Day.



Price cards like the one in the horn can be secured from Jobbers for "Gem," "Standard" and "Home" machines. Be sure to get your window looking just like this a day or two ahead of the Fourth. It is good enough to cause town talk.

Bryan Window

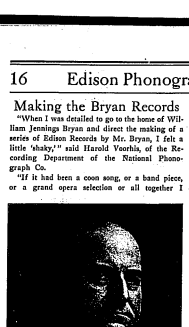
Here is another rattling good idea window that will talk almost as strongly as Mr. Bryan himself. The thought it plainly expresses is that Bryan now speaks in everyone's home on the leading political issues through the Edison Phonograph. Simplicity is again the keynote. The platform is nothing but a couple of boxes with light 30 x 45 inch boards on top. Each board is lettered on the end to correspond with a Bryan Record and a plank in the Democratic platform. The sign at the back is the two-color hanger that went out with the Bryan Records. The Bulletins of the new July Records you should have also, and the illustrated card on the same subject. The other two signs are home-made. After you get your boards made you can trim this window in fifteen minutes. You should do so as soon as your 4th of July window is taken out. If it does not sell Edison Phonographs and Records we are mighty poor guessers.



A Fourth of July Window

[See page 14 for description]

A Wm. J. Bryan Window



[See page 14 for description]

Making the Bryan Records

"When I was detailed to go to the home of William Jennings Bryan and direct the making of a series of Edison Records by Mr. Bryan, I felt a little 'shaky,'" said Harold Voorhis, of the Recording Department of the National Phonograph Co.

"If it had been a coon song, or a band piece, or a grand opera selection or all together I

wouldn't have worried, for those are every-day affairs. But a trip half-way across the continent to the home of the Great Commoner was different. I don't think any one can appreciate how different without trying it themselves.

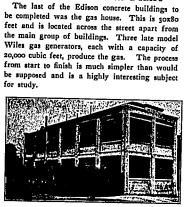
"I knew the Records were to be important ones, especially with Mr. Bryan so prominent in the Presidential campaign, and I was more than anxious to secure good results.

"I reached Lincoln, Nebraska, on a Friday morning, with my recording apparatus and a plentiful supply of wax masters. Everything had been arranged and when I got to the Bryan home I found Mr. Bryan ready for work.

"We lost no time in putting the library in shape and were soon ready to make a start. Mr. Bryan had his speeches in typewritten form, and had timed himself several times in getting them the right length. Nevertheless we found on trying the first that it was too long to get on the Record so it had to be cut down and another trial made. Mr. Bryan seemed a little nervous when he first started, much more so he said than he ever felt in facing an audience of ten thousand people.

"Considering that his words were to be reproduced all over the world in perhaps a million homes, and that it might mean a great deal to him how his speech was received, I thought he showed remarkable composure. All Record artists are very nervous on their first attempts and it usually takes a good many trials to get a good Record. Mr. Bryan had practiced a little, however, and was quickly at his ease. We kept at it pretty steadily all of Friday and Saturday mornings, and a few Records were thrown out, though not nearly so many as I expected.

"Mr. Bryan rested occasionally and several times went to his private office to dictate an important letter or two. Once his son came in for a few minutes, and on another occasion Mrs. Bryan entered. She is a charming lady and intellectually she appeared to be a fit "running mate" for the Great Commoner. I understand she is a full graduate in law. Mrs. Bryan said she liked Mr. Bryan's address on 'Immortality' best of all. It is taken from his lecture on 'The Prince of Peace.' The latter was rather long for a title, so Mr. Bryan decided to call the Record 'Immortality.'



"Some workmen who were engaged in repairing a porch annoyed us with their hammering and Mr. Bryan went out to tell them to let up for a while. He did not want to arouse their curiosity so told them he was talking into the 'phone. For all that we heard a few stray knocks later on and one or two of these were caught by the Phonograph in his speech on 'The Tariff Question.

"When our work was at last finished on Saturday, the library floor looked as if it had been visited by a snow storm, so thickly was it strewn with the wax shavings. I made apologies to Mrs. Bryan, which she assured me were entirely unnecessary, and as quickly as I could get my things together I was on the way back to Orange, N. J., with the Records. If I had been the bearer of the crown jewels I wouldn't have guarded them more carefully."

The Ready Made Ads on page 20 will do nicely for vacation advertising. You can get either or both electros, in single or double column widths, free, by filling out the coupon and mailing it in.

New Edison Gas Plant

The last of the Edison concrete buildings to be completed was the gas house. This is 50x80 feet and is located across the street apart from the main group of buildings. Three late model Wiles gas generators, each with a capacity of 20,000 cubic feet, produce the gas. The process from start to finish is much simpler than would be supposed and is a highly interesting subject for study.

The starting point is the pea and buckwheat coal, small mountains of which are kept near at hand for supplying the generators. A small quantity (100 pounds) is used for starting the fire in the hopper on top of the generator. By lifting a lever this is moved down into the generator and an automatic supply system is constantly delivering one hundred pound lots inside as needed. The coal inside is all afire and burning continuously, thus converting it into carbonic acid gas. A pipe at the bottom supplies a constant draft to keep the fire going. A pound of coal will produce 95 cubic feet of gas on an average, and each of the three generators will deliver 17,000 cubic feet an hour.

As fast as the crude gas is extracted from the hard coal it is sent through a blower pipe into what is known as the wet scrubber. This is an 18.5-foot tank which is filled to within a short distance of the bottom with coke and water. This serves to clean the gas which enters at the bottom and passes up through the coke. A pipe next takes it to a large 9x20-foot holder tank. Here we meet with an ingenious tank-within-a-tank arrangement. The larger one contains water and the smaller is inverted and placed inside of it. The large delivery pipe runs up above the water line within the inverted tank and the gas is thus stored within the vacuum above the water, which seals it and effectually prevents leakage. Two other pipes enter the holder tank. One returns all surplus gas to be cleaned over again and the other carries the regular supply on to the dry scrubber, a 9x10-foot tank resting on the floor and filled with excelsior and sawdust. At this point the gas is ready for distribution and at once enters the 16-inch main gas line, which is 250 feet long and is laid four feet under the ground. The size tapers to 12 inches at the farther end.

The outsider can form no idea of the prominent part that gas takes in the manufacturing end of the Edison business. Two 10-inch pipes supply it in enormous quantities to the National Phonograph Record Works, where it is used in the gas furnaces that melt all of the Record material. Another 6-inch line distributes it throughout the Edison Phonograph Works where it is used for japanning all black metal parts used on the outside of the Phonograph cabinets and also for soldering. Thus it will be seen gas is one of the most vital auxiliaries of our business, and were the gas plant to go on a sudden strike, it would be necessary to partly shut up shop. Moreover, it is by far the best and most economical form of heat for our special requirements.

Before the completion of the new gas plant illuminating gas was used from an outside concern. Four times as much of the present gas is used, but even at that the company finds it far cheaper to do their own manufacturing.

Together with the new boiler house and the electrical power house the gas plant completes a power, heating and lighting system that is considered one of the wonders of the manufacturing world.

Grand Opera Records

Five new Grand Opera Records went on sale June 25th. Did you order a supply? We have never presented a more attractive selection of classic songs than this list. There is not one among the more musical of your customers who would not be delighted to secure several of these exquisite Records. And do not overlook your extra profit. Here is the list. Look it over and do not put off ordering a few of each number, if you have not already done so:

By ANTONIO SCOTTI, Baritone
Sung in Italian. Orchestra Accompaniment

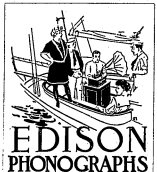
B. 65. Eri tu (And would'st thou), "Un Ballo in Maschera".....*Verdi*

By MME. JACOBY, Contralto
Sung in Italian. Orchestra Accompaniment

B. 66. Stride la vampa (Fierce flames were raging), "Il Trovatore".*Verdi*

NEW By FLORENCIO CONSTANTINO, Tenor
Sung in Italian. Orchestra Accompaniment

B. 67. Sono un poeta (I am a poet), "La Boheme" .....*Puccini*



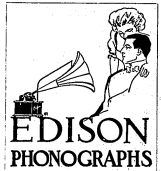
By OTTO GOERTZ, Baritone
Sung in German. Orchestra Accompaniment

B. 68. Ihr helmet mich willkommen (Ye bid me welcome), "Der Trompeter von Sackingen".....*Nessler*

By ANGELO PINTUCCI, Tenor
Sung in Italian. Orchestra Accompaniment

B. 122. Il for che avevi a me tu dato (The flower you gave to me), "Carmen" .....*Bizet*

The EDISON PHONOGRAPH
is the only sound-reproducing instrument with Edison's latest improvements. It has the clearest, strongest Records, the most durable reproducing point and the correctly shaped horn.
Ten Edison Phonograph dealers in one town of moderate size—almost as many as there are newspapers—and that is the last thing in the world we would have. Why? Because we have given each dealer a monopoly—and a monopoly which can not be taken away from him—and hence he is the natural and logical one to make money on Edison Phonographs and Records. Here is Office Building



EDISON
PHONOGRAPHS

Real Entertainment
Anywhere and All the Time

HAVEN'T you ever noticed that no matter where you start an Edison Phonograph it immediately becomes the center of interest? As an entertainer it has no competitor. With each new record, whether a song from the latest musical comedy, a waltz or two-step by band or orchestra, a selection from grand opera or a ballad of long ago, the Phonograph becomes a new pleasure. An Edison Phonograph in your home means enjoyment for each member of the family and for all occasions. Come here to-day and let us play some of the latest Records for you.

EDISON
PHONOGRAPHS

The Edison Phonograph is a case where three is company and not a crowd.

Two people and an Edison Phonograph can pass a very pleasant evening. This does not prevent it from being the best entertainer for any kind of a gathering, from an informal evening up to a large reception.

If you do not know the possibilities of the Edison Phonograph, come into our store and hear what it can do.

The EDISON PHONOGRAPH MONTHLY
Vol. VI. AUGUST, 1908 No. 8

If the new, big, flat envelope which carries this issue of the Phonograph Monthly has induced you to look inside, and the attractive cover of the publication has induced you to investigate farther, then we would like your attention for a minute to say—that

beginning with this number we shall endeavor to make this little publication more informing and more helpful to you than ever before.

We want you to read every issue for your good and for ours. If you have been in the habit of laying it aside for future perusal and then forgetting about it, or if you have decided that it contains nothing that will make you any money, then break the habit or reverse your decision as the case may be, for you are wrong on both counts.

It is impossible to get out a publication every word of which will be vital to every dealer. But we are positive that somewhere in each issue every dealer will find some bit of advice, some helpful suggestion, some item of news that will be worth the effort of sifting it out.

This publication is our best method of keeping in touch with you. We want to help you all we can and we want you to help us. We are the producing end of the business; you are the selling end. We have experience that you need; you have experience that we need. Let us swap this valuable information.

Let us consider the Phonograph Monthly a Clearing House for ideas. Send us yours and we will print them along with our own.

Ask us questions and we will answer them. Call for our views on any subject and we will give them. Thus we will have a live publication that will help all of us to make more money.

For the New Dealer, the New Clerk and the New Owner

After our advertising has created an interest—after your advertising has brought an interested prospect to your store—then it is up to the Phonograph.

The demonstration is the important thing. It either clinches or kills the sale.

Most Edison Dealers are experts in the handling of the Phonograph. These suggestions on how to play a Record are for Dealers who have just taken on the line, for the new clerk of an old Dealer and possibly, for all Dealers to reprint and give to purchasers so that they may get the same results at home as the demonstration at the store afforded.

Wind the motor by inserting the winding crank in its hole at the right end and turning it to the right with an even, steady motion. Be very careful not to over-wind. Stop winding when the spring seems to "give."

Open the swing arm at the right end of the Record cylinder. Put the Record on the cylinder, having the title end next to the swing arm. Push it as far as it will go with a slight pressure. Close the swing arm.

Make sure that the horn is swinging just right by sliding the reproducer to the center of the Record cylinder and regulating the length of the chain rod so that the chain hangs perfectly straight looked at from the end of the machine.

Start the Phonograph running by pushing the starting lever to the left. (On the Gem, turn the starting knob to the right to the first stop.)

Slide the reproducer arm to the point where the threads of the Record begin. Let the reproducer down by pulling out the button on the Gem and Standard or by pushing down the lift-lever on the Home and Triumph. This brings the sapphire point of the reproducer in contact with the surface of the Record, when it will track in the minute grooves, following exactly all of the numerous indentations.

When the Record is played, lift the reproducer by the opposite method from that used to lower it, and stop the machine's playing by pushing the starting lever to the right. (On the Gem the starting knob is turned to the left.)

Slide the reproducer to the left about halfway and loosen the Record from the cylinder by pushing gently on the left end with the thumb and forefinger of the left hand. Open the swing arm and remove the Record with the right hand by inserting two fingers in the end and spreading them apart.

A "Bryan" Window

A very clever and original window display on the Bryan Records was that gotten up by the Silverstone Talking Machine Co., St. Louis. A Ferris Wheel nine feet in diameter was made of wire. Edison Record cartons were fastened around the inside of the rim and seventeen 12-inch horns were placed around a smaller circle half way between the center and the outside rim. "Gem" machines where suspended from the cross beams to represent the cars of the Ferris Wheel and on each was a price ticket.

In front of the hub Bryan's picture and the words, "Records by Wm. J. Bryan For Sale Here" were shown on a pasteboard card. On the spokes of the wheel were pasted strips with the titles and numbers of the different Bryan Records. All of the lettering was taken from one of the Bryan hangers sent out with the Records.

The wheel carried twelve red, white and blue electric lights and revolved slowly so that all of the wording could be read. Across the bottom of the window at the front there were nine Standard machines bearing price cards.

A Fourth of July Float

The Winnek Co., Prineville, Ore., have been responsible for some clever Edison advertising. Their latest "stunt" was a Fourth of July float which made a decided hit.

The float consisted of a rough copy of a large Edison Phonograph and Record mounted on a flat-top wagon. The machine cabinet was a 6x3½ feet box, with the word "Edison," on all four sides. The Record was on top of this and was 4 feet long by 3 feet in diameter. The words, "Edison Phonographs and Records" were pasted on the black Record in large white letters and the Record was made to revolve slowly by a rope belt running from a drive wheel at its end to a drive wheel on the hub of a wagon wheel.

The horn was 8 feet long and 4 feet across the bell end. It was made of ½ by ¾ inch strips covered with red cloth, which was striped with gilt. A large cloth sign hung on each side of the wagon below the machine and bore the name of the firm.

The Winnek Co. write, "Advertising pays. July 1st we thought we had enough goods to last through the season. When we closed the store the evening of July 4th, we had only one Standard machine left. All "Homes" had been sold, also two that were on the way."

Store Management

A monthly comment on things Edison dealers have done with a few suggestions on what they should do to increase sales.

If you want a bargain—a genuine bargain—take advice.

Considering its cost—which is usually only a minute or two, just long enough to listen or to rent—advice is the greatest bargain on the market to-day.

Take advice. Listen to it. Read it.

But don't act on it unless your better judgment tells you it is *good*.

The man who "knows it all" puts cotton in his ears, blindfolds his eyes, and starts down hill.

The man who succeeds is the man whose eyes and ears are open, who profits by the experience of others, and who has the wit to let other men's wits work for him, as well as use his own.

It is with this purpose in view that we plan to run a department in the PHONOGRAPH Monthly called "Store Management. A monthly comment on things Edison Dealers have done with a few suggestions on what they should do to increase sales."

You, as an Edison Dealer, must realize that we have all the same interests in common. We do not sell a single Phonograph or Record except to a Jobber, who in turn sells to you. When you sell a Phonograph we sell a Phonograph. When you lose a customer we lose a sale, too. We are vitally interested in your personal, individual success, because our success depends on yours.

Naturally, then, we are anxious to help you sell all the Phonographs and Records you can.

One of our ways to help is to give you the best advice and suggestions that we can secure. We shall give you the ideas of men who have been successful in solving those problems which every Dealer must meet. And from the suggestions published each month we are confident that you will get at least one idea which you can adapt to your particular business needs and use with profit.

In return we are going to ask that you help us with your experience. Write us. Tell us of successful selling plans, of practical economies in store managing, and of special schemes that have worked out well.

It costs just as much to operate your store whether you sell one Phonograph a week or ten. You cannot cut down your fixed expenses and you must push up your profits. One way to increase your sales is to make your store work more.

You work—your clerks work—your stock works—but how about your store? Does it work? Does it make people want to buy Phonographs? And when you have sold Phonographs, does it make people want to buy Records?

When the Bryan Records were put on the market they sold like hot cakes. They are selling yet. When Bryan was nominated, how many of you made a special push on Bryan Records? How many put his picture in the window? The nomination of Bryan was the most important news in the papers Wednesday, July 8th. A very little effort on your part would have made it your advertising.

But that's all over now. Let's take up to-day. The new Records are new only one day in the month, but you can sell old Records all the time. An old Record is just as good as a new one if a man hasn't heard it. Some Dealers begin to look forward to new Records as early as the middle of the month. Next month's Records are no newer to most of your customers than those you have right on your shelves, and the profit is just as good. Don't let the dust gather on old Records while you try to sell new ones.

Make the outside of your store work as well as the inside. Use the wall space to advertise your goods, something you sell—Edison Phonographs. We have a big banner for any Dealer who will put it up outside—where it can be seen—where it will work for you.

A Dealer who appreciates that a lively store sells most goods will make the Edison Phonograph sell itself. Keep it playing. Nothing you can say about a Phonograph will have as much effect in making a man want to own one as what the Phonograph says for itself. Nothing you can tell them about the Records will sound as well as the Records. Have a regular concert once a week and an impromptu concert whenever there are several people in the store.

A certain number of people are going to buy Phonographs and Records every week; not all of them are going to buy Edison Phonographs, and not all of them are going to buy at your store, but you can count on a certain, steady trade somewhere in your town—it is up to you to get it.

It is up to you to make the people in your town believe that your store is the best store to buy Phonographs and that the Edison Phonograph is the best Phonograph to buy.

If you do this you will get your share of the trade. The trade is there. It is just as certain and just as steady as the trade in any other line of goods.

Our national advertising takes care of that. We are reaching practically every family in the United States every month with advertisements of the entertaining qualities of the Edison Phonograph.

Making the windows work is simply keeping in them Records and Phonographs which will interest the passing public.

Elsewhere in this number will be found attractive show cards which can be easily lettered in your own store.

These call attention to the new Records, to old Records or to the Phonograph itself; to some special phase of enjoyment to be had with the Phonograph.

Very little skill in window dressing will make your windows good advertising for your store.

Never forget that the primary object of the Edison Phonograph is to amuse—a number of people are willing to pay for amusement. The best of theatres are crowded with spectators with high prices for good seats—all catering to amusement.

The Edison Phonograph supplies the same sort of amusement that people go to the theatre to get. In no other form can so much of this sort of amusement be had for so little money as in the form of the Edison Phonograph.

If you have a successful window display take a phonograph of it and write to us about it; tell us how you did it and what the results were. It will do you good to describe your own window and how it worked and it will help other Dealers in other towns.

We are so interested in getting Edison Dealers to make the most of their windows that we propose shortly to offer a series of prizes for the best windows.

If you have a bright, young clerk in your employ with a knack for such things, set him to work dressing windows using only the material in the store, that is, the Phonograph, the Records, the various cards, posters and other things that we supply. We furnished enough material to produce a series of excellent windows if intelligently handled.

All this matter is free to the dealers who will use it; the whole thing is to get you to use it—to make the most of your opportunity. The entire advertising system of the National Phonograph Company is intended to help you sell more Phonographs and more Records—but you must take advantage of it.

Have the Records people ask for and they will ask oftener.

An old Record is new to all who have not heard it. Let the people hear those on your shelves as well as those which have just arrived for August.

Sell for cash if you can; on the payment plan if you must.

August is an out-of-doors month. The Phonograph is an out-of-doors entertainer.

A Phonograph lasts a life time; the new monthly Records mean a perpetual revenue.

Make the welkin ring with the Bryan speeches—now's the time.

One-price puts it squarely up to the Dealer. Your Competitor who orders by the carload has no advantage over you. Whether you make a success depends upon your service and your advertising. Study to make both perfect.

Selling the Goods

ADVERTISING:—One of the most important and often one of the most neglected branches of a dealer's business.

Team Work

Team work is a great thing.

When you pour forth music into the street from the big horn of a talking machine you draw an interested but curious crowd—interested in the music; curious to know what instrument it is that affords such real entertainment.

When you announce by means of a window card that the instrument is an Edison Phonograph and that the selection is the big scream of a new Broadway success, then you make a general proposition a specific one.

That's team work.

On page 20 of this issue we show our September magazine advertisement. On or about August 20th this advertisement will reach the eyes of millions of people. It has a pleasing picture and presents arguments calculated to interest readers in the Edison Phonograph and Edison Records.

On page 21 of this issue you will find a newspaper advertisement similar to our magazine advertisement in picture but differing somewhat in type matter.

Enclosed herewith is this same advertisement in larger size. The small ad is for your local newspaper; the larger one is for your window.

Here is a chance for some profitable team work.

When we say in our advertising to the people in your city: "You ought to have a Phonograph," your part is to say: "We sell them."

Then the people have been reminded of a need by us and told where that need can be satisfied by you.

Put the enclosed hanger in your window just about the time the August magazines are on sale in your city. Run the small ad, with your name and address, in your newspaper at the same time.

We furnish an electrotype of the picture free on request; the reading matter the newspaper will set for you. Send for the cut to-day so that it will reach you in time.

Remember our part is creating the demand. Results go to the dealer who announces that he is in shape to meet it.

If It's an Edison Phonograph, Say So

The crowd around the big horn in front of your store knows that some sort of a sound-reproducing instrument is entertaining it.

It would be a better advertisement if the crowd knew what instrument it was.

It would be a still better advertisement if the name of the selection or song was announced.

Songs or music coming out of a horn advertise talking machines to those who pass by.

Of the hundreds that stop and listen but few come in and say, "I like the sound of that instrument; what is it?"

The rest pass on carrying away no definite thought with them.

If, however, a card is displayed saying, "The Edison Phonograph is now playing Ada Jones' new song hit, 'Smarty,'" and another card announces what the next selection will be, then a distinct impression is made on all who stop and listen.
